ASSA ABLOY Entrance Systems

The global leader in door opening solutions

A warm welcome

"A door simply has to function - at all times ASSA ABLOY Entrance Systems provides the best door solution for optimum hospitality",

Nick Timmers,
General Manager
Van der Valk Hotel
Veenendaal

Background

Van der Valk Hotel Veenendaal is a luxury-class hotel that enjoys surprising its guests. The hotel has luxurious rooms, an atmospheric restaurant with bar, an extensive wellness and fitness center and 15 multi-functional conference rooms all equipped in line with the latest standards. They emphasize the significance of sustainability down to the last detail by complying with the very highest quality standards in terms of energy-efficient and sustainable building. The company opted for the automatic doors of ASSA ABLOY Entrance Systems on the merit of enthusiastic references.

Challenge

Letting guests feel that they are welcome is probably the most important aspect of hospitality. Other factors that play a significant role are good accessibility and nice atmosphere. One such example is the frontal view of the building which is entirely made of glass. The challenge in this respect was to retain the beautiful appearance with an automatic entrance door that enhances the building's stunning look. Further items that were high on the wish list were: needs of personnel, durability, decreasing energy costs and high-quality fireproof doors.

Requirements

- Robust, durable automatic doors
- Wheelchair-friendly entrances
- Low maintenance
- Fireproof sliding doors
- Enhancing hospitality and appearance
- Creating an optimum working environment

The solution

After assessing the current situation, the company opted for a combination of automatic doors to comply with the specific requirements of each room. Aspects such as wheelchair accessibility played an important role in this respect. Ultimately, a large number of sliding doors, revolving doors (automatic door closers) and a turnstile ensured the realization of an optimum working environment and optimum hospitality.

Nick Timmers (General Manager Van der Valk Veenendaal) is enthusiastic:
"While we were in the process of choosing automatic door systems, we took several aspects into account. The doors had to meet the above requirements, we wanted one single supplier for all automatic doors and they had to fit in with the design of our hotel. And let's not forget fire safety, wheelchair friendliness and minimum error proneness. A door simply has to function, at all times. ASSA ABLOY Entrance Systems provides the best door solution for optimum hospitality."

The result

For the entrance, a Besam RD3 revolving door with a diameter of 360mm was chosen, also in connection with optimum access for disabled guests. The desired look is underscored by a matching revolving door and the vertically installed air curtain. This gives the building an impressive appearance, which still emits a sense of warm welcome to the guests.

The needs of personnel were also taken into consideration in opting for automatic doors. For instance, the kitchen door is the most frequently used door in the building. Here the supplied sliding doors ensure that staff can access the restaurant while carrying plates or pushing trolleys.

The door to the supply room is equipped with automatic door closers so that everything runs smoothly in terms of logistics. Nick Timmers has the following to say about this: "*This facilitates the manner in which we render our services, which helps us in our aim to achieve an optimum customer experience. ASSA ABLOY Entrance Systems has translated our needs into high-quality automatic door solutions for every room in the hotel. The diversity of the door offer, expert knowledge and enthusiastic references have underpinned our decision. We recommend ASSA ABLOY Entrance Systems to anyone who stands for hospitality, design and quality.*
