A guide to preventative maintenance for Albany High Performance Doors

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in door opening solutions

Drive unit

What is the function?

- Transform electrical energy to mechanical energy
- Turn the top roll
- Positions the door
- Fulfills regulations regarding closing forces
- Serves as a catching device which benefits unbalanced doors, by preventing the bottom beam from falling down in an uncontrolled manner

What is the manufacturer's specification?

To make sure the manufacturer's specifications are observed, replace every:

- FC-control 1.000.000 cycles
- Contactor control 500.000 cycles

Can I also replace it earlier?

- Yes, if there is oil leakage
- If there is an unusual operating noise
- If the feather key groove is worn out
- If the drive chain is elongated

How do they wear?

During the lifetime of the drive unit there will be wear and tear due to:

- Forces on the feather key groove
- There may be an abrasion to the teeth on the chain sprockets
- Aged sealing due to high temperature and pressure
- Corrosion to the shaft and drive unit
- The loss of oil through the sealings (shaft)

Chain drive

- Abrasion of worm gear and sprockets
- Friction, abrasion and drag forces will cause wear to the drive chain

What is the risk of not replacing?

When not following the manufacturer's specifications the customer is taking the responsibility for unintended breakdown, e.g.:

- The door may stop if the gear box or motor is broken
- Positioning of the door will not be exact
- A broken chain can cause the bottom beam to fall down in an uncontrolled manner
- There may be increased closing forces, which will not longer fulfill regulations
- Oil leakage will cause the area to become slippery and hazardous, and it is an issue in clean or food applications

Top reasons for preventive maintenance

- Keeps the warranty valid
- Prevents unexpected and expensive break-downs
- Prolongs lifetime
- Cost saving
- Minimises risk of personal injury
- Minimises energy loss
- Fulfills legal requirements
- Improves working environment
