Complete entrance solutions from ASSA ABLOY Entrance Systems

ASSA ABLOY

The global leader in door opening solutions

One point of entry for all your needs

Smoothly functioning entrances are a prerequisite for business. So are smoothly functioning relationships. The combined product brands, solutions, knowledge and service of ASSA ABLOY Entrance Systems create a single partner for every aspect of entrance automation.

Total entrance solutions
ASSA ABLOY Entrance Systems is the world's most comprehensive supplier of entrance automation solutions. We take a holistic approach to the flow of people and goods, creating solutions with the best possible balance of cost, quality and lifetime performance.

At our disposal is a strong portfolio of well-established brands. These have been the market leaders in their fields for decades, which means all have a strong history of proven solutions and extraordinary service expertise. Today they are gathered under a single roof, where they now form a complete offering for the front, back and interior of your building.

Pedestrian Door Solutions
Safe, secure and convenient entrance solutions for the flow of people are sold under the Besam brand. The Pedestrian Door Solutions product portfolio includes:

- Sliding doors
- Swing doors
- Revolving doors
- Air curtains

These can be tailored to suit your needs and aesthetic preferences, with options that include activation devices, access control, air curtains, tight-seal brushes, insulated glass, colors and finishes.

Industrial Door and Docking Solutions
Automated entrance solutions for the safe and efficient movement of vehicles and goods are sold under the Crawford and Megadoor brands. Crawford products in the Industrial Door and Docking Solutions portfolio include:

- Overhead sectional doors
- Folding doors
- Complete docking systems

These are complemented by the Megadoor range of oversize industrial doors, specially designed for the unusual demands of very large facilities. The Megadoor range includes:

- Hangar doors
- Large industrial doors
- Vertical lifting fabric doors

High-Performance Door Solutions
Entrance solutions for areas with exceptional performance demands are sold under the Albany brand. The High-Performance Door Solutions product portfolio includes:

- High-speed roll doors (metal, fabric and rubber)
- Doors for special applications such as clean rooms, machine protection and food processing

Developed according to the latest standards and tailored to your requirements, these innovative products ensure a long service life while delivering the necessary degree of speed, safety, cleanliness, sterility and energy efficiency.

Partnership with ASSA ABLOY Entrance Systems
ASSA ABLOY Entrance Systems is a world-leading provider of a wide range of safe, convenient, reliable and energy-efficient automatic entrance solutions. Our customers can be confident that they have chosen a professional partner, knowing that each of our specialist brands represents many decades of service and accumulated experience.

ASSA ABLOY Entrance Systems

Business areas and product brands

Pedestrian Door Solutions	besam ASSA ABLOY	Besam was founded in 1962 with the development of automatic doors for the Swedish healthcare sector. Expansion soon began into other sectors, such as transportation and retail, as well as into other markets worldwide.
Industrial Door & Docking Solutions	Crawford ASSA ABLOY	Crawford has early roots in garage doors, but industrial doors and docking equipment have been the focus for over half a century. An extensive portfolio of Crawford industrial doors has been sold in Europe since the 1950s.
	MEGADOOR ASSA ABLOY	The first Megadoor solution was developed in 1973 for the Swedish forestry industry, which needed a very large kiln door with a tight seal. Business quickly expanded into mining, shipyard and aviation applications.
High-Performance Door Solutions	ALBANY ASSA ABLOY	Albany pioneered the high-speed door industry by inventing the world's first high-speed fabric roll-up door in Sweden in 1968. The company has since expanded internationally into a large number of end-user segments.

Three specializations – one focus

Details make a difference, which is why ASSA ABLOY Entrance Systems comprises three distinct business areas: Pedestrian Door Solutions, Industrial Door and Docking Solutions, and High-Performance Door Solutions. Each has its own specialized and dedicated products, sales organization, installation and service personnel.

Nonetheless, we work with you as a single partner. Our combined approach means we understand the full range of challenges you face, and it allows us to provide the best solution for your total entrance needs.

Quality from start to finish

With one partner for all your entrance systems, you can expect full accountability. Our deliveries, installation, commissioning and support bring you constant reliability and safe, secure, sustainable door function.

That promise extends throughout the product lifetime.

As business requirements change, we make sure that your entrances continue to meet them. We keep you compliant with safety, security and environmental regulations – including those that are only pending. Likewise, we keep you up-to-date through an innovative offering and a wide variety of upgrade kits and replacement programs.

Strength in service

For complete peace of mind, we also maintain an exceptional service organization. Its task is to eliminate disturbances before they occur, providing qualified advice and advanced preventive maintenance programs.

If a door issue does arise, our many service experts are ready and able to solve it. Not only can they service our own doors and docking systems, they can also service those of other manufacturers.

In short, you can count on cost-effective operation and uninterrupted entrance availability.

Building the perfect match

Each business has its own specific challenges and needs. ASSA ABLOY Entrance Systems has the expert knowledge, combined product range, preventive maintenance solutions and service expertise to provide an optimal solution.

Manufacturing
With increasing pressure on manufacturing companies to become more effective, their entrance solutions must contribute to the goal. Doors and docking systems with precise operation play a key role in maximizing production efficiency and reducing energy costs. In addition, they protect high-value goods and the safety of employees.

Transport and logistics
With schedules to keep and goods to protect, transport and logistics facilities place high demands on their entrance solutions. Doors and docking systems must be matched to the highly specific business requirements, and their function must be ensured through preventive maintenance and dedicated service.

Airports
Airports are high-traffic environments where convenience and security are often competing demands. Automated doors with access control can create a secure and user-friendly division between public and restricted areas. Special needs are posed by the aircraft hangars, whose massive doors must protect and facilitate efficient flow.

Mining
Wash bays, truck shops and doors in processing facilities face incredibly tough requirements: dozens of opening cycles per day, gritty, dirty, often corrosive environments; and weather and temperature conditions that are often anything but peaceful.

Healthcare
Providing security, safety and convenience for patients, visitors and staff is a challenging task for today's healthcare facilities. With highly sensitive environments and round-the-clock operation, hospitals and clinics demand customized entrance solutions and dedicated service.

Public facilities
Public facilities range from government buildings to sports arenas, where entrances should enhance the visitor experience while providing convenience and security for everyone who works there. The high traffic flow and the need to ensure visitor safety place high demands on entrance availability and reliability.

Hotels
With large numbers of visitors, most of whom are a great distance from home and travelling with luggage, hotels must maintain very high standards for safety and convenience. Automated entrances create a comfortable, pleasing environment and can ensure safe evacuation during an emergency.

Retail
Retail facilities handle high-volume turnover and a wide variety of goods, some with their own special requirements. Entrance solutions for retail manage many different tasks, but their common goal is convenience and comfort for customers. In addition, they must provide appropriate security and meet stringent safety regulations.

Moving your business forward

The experience brought together in ASSA ABLOY Entrance Systems is as comprehensive as the product range. With our insights, we can recommend the ideal solution to meet your needs. This includes the doors, docking systems and related equipment, but also the optimization of lifetime cost and the long-term protection of your investment.

New investments

Cost assessment
We provide you with a clear picture, balancing pricing against a projection of lifetime costs that weighs in maintenance and other peace-of-mind factors.

Performance assurance
We assess your application based on factors such as space, security and traffic intensity. This lets us evaluate your potential energy savings and other key performance indicators.

Your needs are always in focus

Upgrade of existing installations

Ongoing optimization
As new business needs and regulations arise, we ensure your ability to meet them. We also help you take advantage of new improvements in service life and sustainability.

Installation

Project implementation
We manage the entire chain from purchase to finished installation. Our positive relationships with contractors build on our willingness to align with their working processes.

Utilization of door solutions

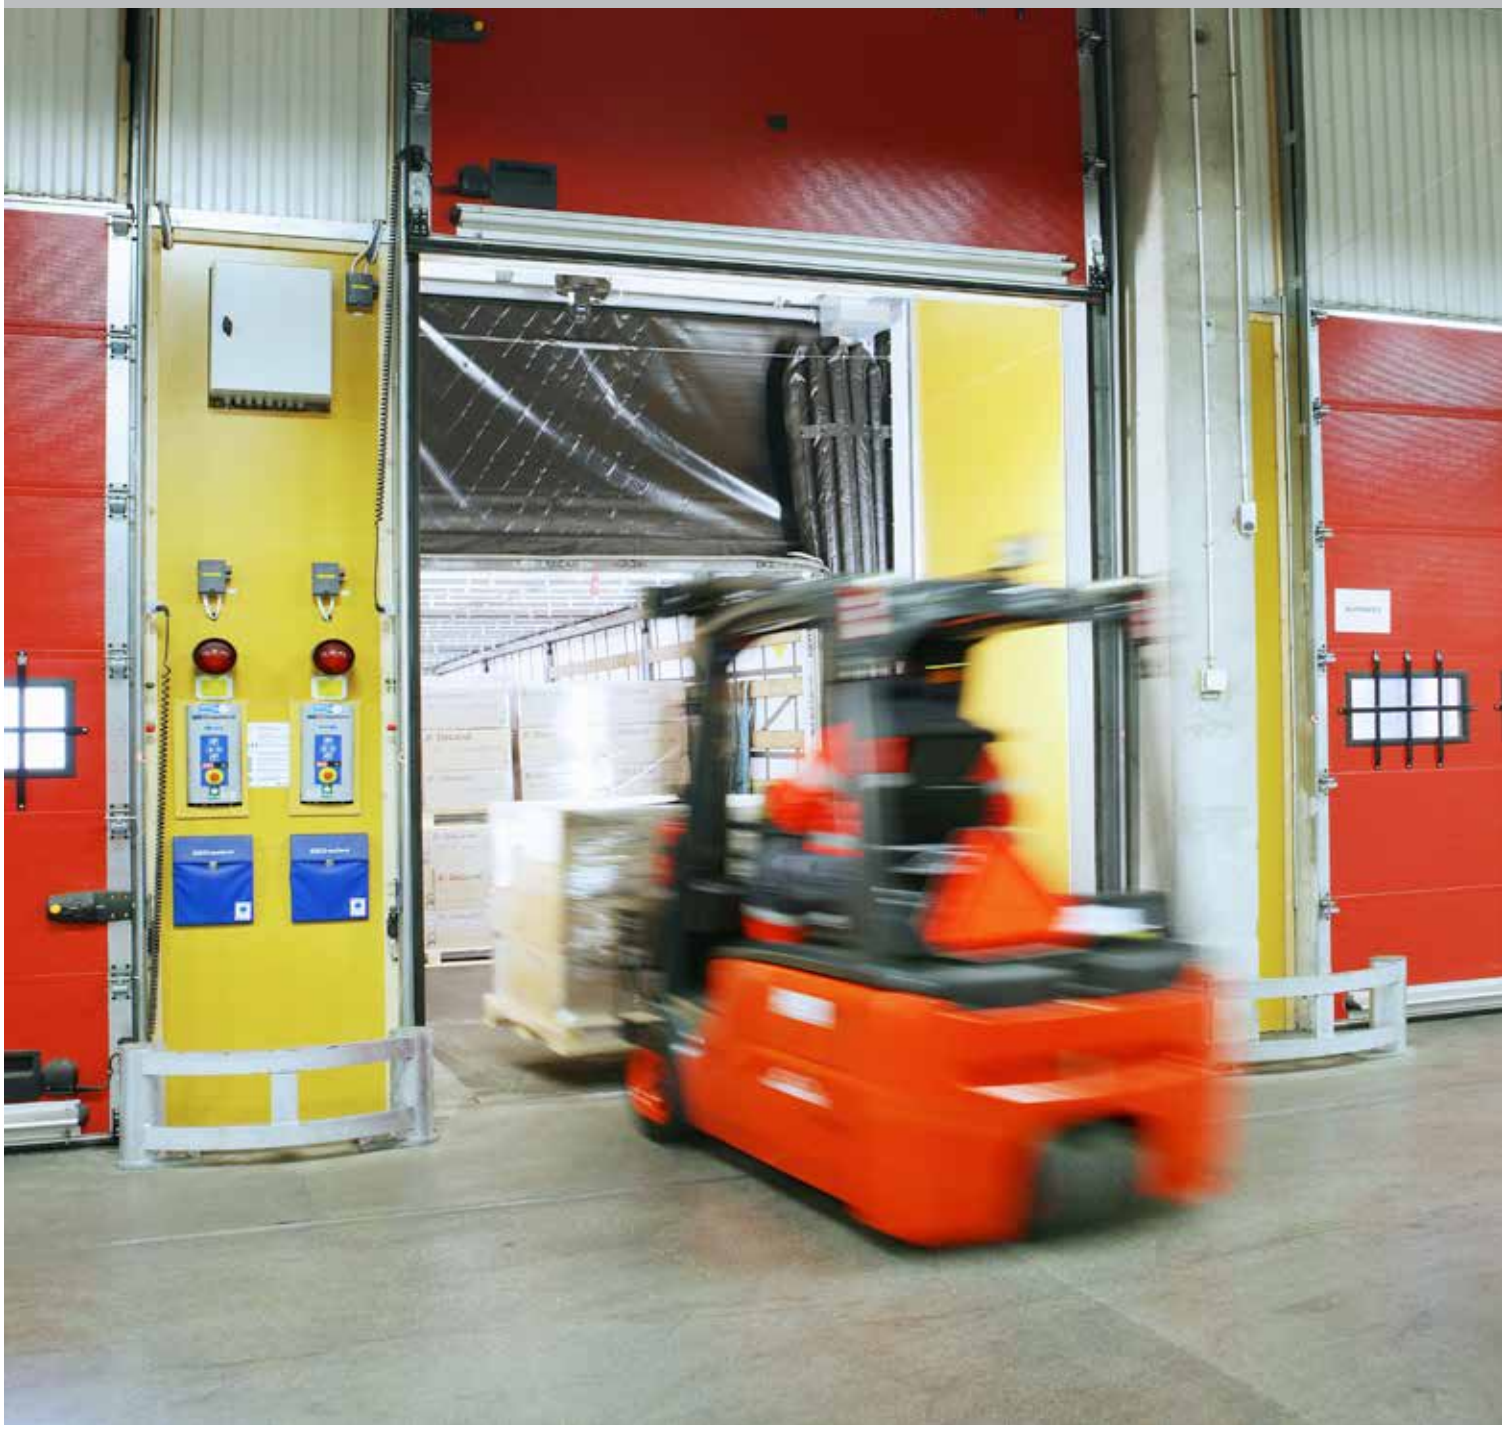

Reliable function
We maximize entrance availability from the start. Proper installation and optimization are key steps in avoiding downtime.

Proactive support
We prolong service life through preventive maintenance and advise you regarding safety, energy savings, security and optimization of lifetime cost.

ASSA ABLOY Entrance Systems is a leading supplier of entrance automation solutions for efficient flow of goods and people.
