Vulcan Components India Pvt. Ltd.

Industrial Components of Rubber, Metal, Plastics & Composites.

Vulcan Components India Pvt. Ltd., is a manufacturer and exporter of Rubber, Metal, Plastic and Composite components for Industrial consumers. Along with our associate Companies, our manufacturing and exporting activities started in 1995. Established, owned and managed by Manufacturing professionals, our core competencies are in the design, development, prototyping and manufacturing of small and medium runs at optimum cost and speed, for appropriate specification and quality levels.

Our range of products include components for Earth moving equipment, Truck and Coach building, Warehousing and logistics, Conveyors and material handling, 4x4 and RV accessories, etc.. Over 95% of our Sales by volume and value are exported to the US, UK, European and Australian markets.

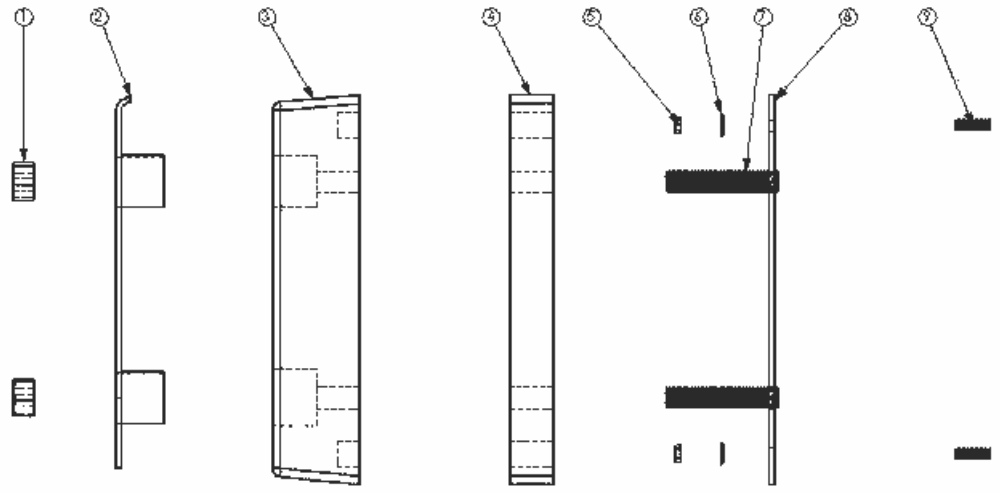

DOCK BUMPERS, PLATES AND ACCESSORIES

Dock Bumpers, Plates and Accessories

We manufactures a wide range of Dock Bumpers, suitable for Dock leveler designs of popular US, European, UK, Canadian and Australian manufacturers. Our range includes as many as 40 designs. Many of the popular and widely used designs are available ex stock from our factory at Badlapur, near Mumbai, India. A limited range is available ex stock UK as well as in the UAE. These products are made from heavy duty, fabric/nylon reinforced rubber compound and have been used for over two decades in the US,UK and European markets.

For usage directly on loading bays, without dock leveller equipment, we also supply matching base plates that can be fitted to the loading bay walls with foundation bolts. Additional spacers to increase depth of the bumper as well as covering plates to give reinforcement and protection to the bumpers are also available. A schematic diagram of the entire assembly is shown below.

Typical Schematic Assembly Details

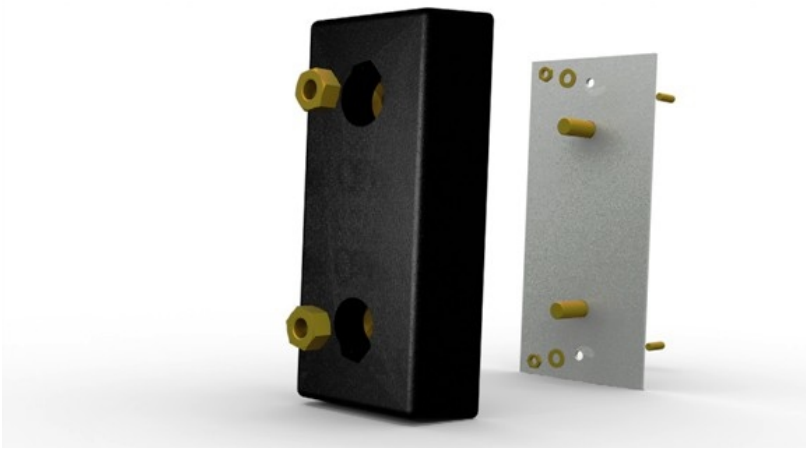

1 Nuts [X2]
2 Protective Plate (Optional)
3 Dock Bumper
4 Rubber Spacer (Optional)
5 Nuts [X2] for Base Plate
6 Washer [X2] for all foundation bolt
7 Studs [X2] welded to Base plate
8 Baseplates
9 Foundation bolts [X2]

Plates for Dock Bumpers :

Normally, for usage directly on the loading bays, without docking equipment, only the base plate and Dock bumper is used and fitment is easily done with foundation bolts and a simple nut. This enables replacement of worn out bumpers easily with a simple easily available equipment, in house.

Fitment plate for 30 x 10 x 4

Fitment plate for 24 x 12 x 4

Fitment plate of 13x10x4

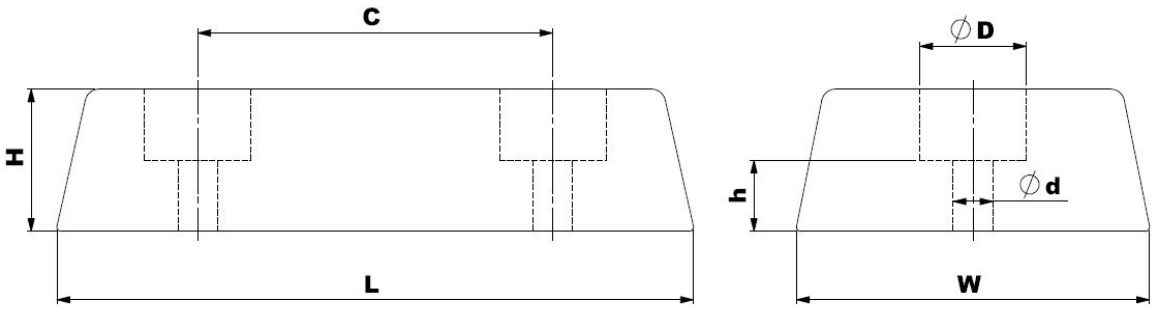

Fitment plate for 18x10x4
