1.0 PURPOSE

To outline management policy for

- Monitoring, measurement, analysis and evaluation
- Management Review

2.0 SCOPE

QMS established at NIHVA Technologies

3.0 DETAILS

3.1 NIHVA determines monitoring and measurement needs through annual goal setting process. The output of goal setting is a set of indicators (leading and lagging), important to measure and monitor performance of various functions and the business.

3.2 The objectives of monitoring, measurement, analysis and evaluation are: process criteria, product characteristics, performance and effectiveness of the QMS. Results from monitoring and measurement are evaluated. Informational reports are presented to management for general review and making decision on opportunities for improvement

3.3 A scorecard / QOS is used for monitoring, measurement, analysis and evaluation needed to ensure valid results. Appropriate documented information is retained as evidence of the results. This approach allow for:

- Demonstrating conformity of the product
- Ensuring conformity of the quality management system
- Continually improving the effectiveness of the quality management system

3.4 <u>Customer satisfaction</u>

- Information relating to customer perception of the degree to which NIHVA has fulfilled their needs and expectations, is monitored through customer feedback and customer complaints. Results of the customer satisfaction are reviewed in the Management Review
- Satisfaction of internal customer is determined through trends in internal quality / delivery aspects

3.5 <u>Analysis and evaluation</u>

3.3.1 NIHVA has established mechanism to analyze and evaluate appropriate data and information arising from monitoring and measurement. The result of analysis is used to evaluate-

- Conformity of products and services
- The degree of customer satisfaction
- The performance and effectiveness of the QMS
- In planning has been implemented effectively
- The effectiveness of actions taken to address risks and opportunities
- The performance of external providers
- The need for improvements to the QMS

3.3.2 NIHVA has determined the metrics most appropriate to monitoring its operations. These metrics are tracked through scorecard / QOS and corresponding reviews on identified key metrics. Continual improvement of the organizational performance is achieved by taking action on any “key” metrics that are not achieving established performance levels. Targets are set based on industry standard.

3.4 Internal audit: -

- Procedures are established to conduct internal audits at planned intervals to provide information on whether the QMS conforms to the requirements of ISO9001-2015
- Internal audits are conducted once a year minimum to determine whether the QMS conforms to planned arrangements to the requirements of ISO9001-2015 and is effectively implemented and maintained.
- The audit program is planned, established, implemented and maintained taking into consideration the status and importance of the processes and areas to be audited as well as the results of previous audits. The audit criteria, scope, frequency, responsibility, reporting, planning requirements and methods are defined.
- Selection of auditors and conduct of audits ensure objectivity and impartiality of the audit process. Auditors do not audit their own areas of responsibility.
- Internal auditors are qualified to audit the requirements of ISO9001 based on the training provided by internal Lead Auditor
- Documented procedures define the responsibilities and requirements for planning, conducting and reporting the results and maintaining audit reports.
- Management responsible for the area being audited ensures that any necessary corrections and corrective actions are taken without undue delay to eliminate detected nonconformities and their causes. Follow-up audit activity includes the verification of the actions taken, and the reporting of verification results.
- Results of internal quality audits acts as input to management review.

3.5 Management Review: Procedure is established to review QMS deployment at NIHVA at planned intervals, to ensure its continuing suitability, adequacy, effectiveness and alignment with the strategic direction. Documented information is retained as an evidence of the results of management review. Leadership team reviews the QMS at least annually to ensure its continuing suitability, adequacy and effectiveness. This review includes assessing opportunities for improvement and the need for changes to QMS including the quality policy and objectives. MRM records are maintained by MR

3.5.1 Management review inputs

- Status of actions from previous management reviews
- Changes in external and internal issues that are relevant to the QMS
- Information on the performance and effectiveness of the QMS, including trends in
    - Customer satisfaction and feedback from relevant interested parties
    - The extent to which quality objectives have been met
    - Process performance and conformity of products and services
    - Nonconformities and corrective actions
    - Monitoring and measurement results
    - Audit results
    - The performance of external providers
- The adequacy of resources
- The effectiveness of actions taken to address risks and opportunities
- Opportunities for improvement

3.5.2 Management review outputs

- Decisions and actions related to
    - Opportunities for improvement
    - Any need for changes to the QMS

- Resource needs
