1.0 PURPOSE

To outline a management policy to plan for the effective quality management system through systematic -

- Risk & Opportunity analysis
- Quality objectives and relevant measure – monitor – improve mechanism
- Planning for changes

2.0 SCOPE

QMS established at NIHVA.

3.0 DETAILS

3.1 Actions to address Risks and Opportunities

3.1.1 While planning for the QMS, NIHVA considers the issues and requirements to determine the Risks and Opportunities that need to be addressed to

- Give assurance that the QMS can achieve its intended results
- Enhance desirable effects
- Prevent, or reduce, undesired effects
- Achieve Continual Improvement

3.1.2 NIHVA plans actions to address the identified risks and opportunities. Actions taken to address Risks and Opportunities are proportionate to the potential impact on the conformity of products and services. The action planning includes integration and implementations of actions into the QMS processes, whenever necessary.

3.1.3 Effectiveness of the action is monitored through performance metric (goals)

3.2 Quality objectives: -

- NIHVA Leadership team ensures that quality objectives including those needed to meet requirements for QMS are established within the organization.
- The Quality objectives are measurable and consistent with quality policy.
- High-level business objectives are finalized every year. These are then cascaded down to all levels of organization through individual goals.
- Quality objectives are relevant to conformity of products and services and to enhancement of customer satisfaction
- Quality objectives are communicated through war-room displays, communication meeting etc.

3.3 Planning to achieve Quality Objectives

When planning how to achieve Quality Objectives, NIHVA determines

- What will be done
- What resources will be required
- Who will be responsible
- When it will be implemented
- How the results will be evaluated

3.4 Planning for changes

When NIHVA determines the need for changes to QMS, the changes are carried out in a planned manner, considering the following

- The purpose of the changes and their potential consequences

- The integrity of the QMS
- The availability of resources
- The allocation or reallocation of responsibilities and authorities
