General conditions of Aircraft Hangar Door

1. Continuous uninterrupted access to any single door section or as agreed separately.
2. A clear floor area of 4 meters each side of the door leaf must be available during the curtain fitting process. The floor should be finished or if this is not possible, adequate temporary protection be made available to prevent damage to the curtain material.
3. 400 volt / 50Hz 3 phase isolator to be fitted to within 1 meter of the door main control panel. If not available at the start of installation, a temporary supply is acceptable. Any return visits to commission the doors due to permanent power not being available will be charged as appropriate.
4. Provision of 230 Volt power supply (by others) for hand tools.
5. A dry and secure area, not in direct sunlight, is to be provided for storage of the door components.
6. Access to site between 7 am to 6 pm six days per week. If this is not possible the installation programme may require amending.
7. Any storage costs for materials due to delays outside of Mega door's control will be charged to the main contractor.
8. The project time indicated does not take into account adverse weather conditions that may prevent safe and efficient working practices. We reserve the right to extend the period accordingly.
9. Any passes required for the project, are the responsibility of the Customer and Contractor and must be available, before commencement of the installation. Any delays caused by the non-availability of passes, will be charged accordingly.

Exclusions :

The following items are not within our scope of works and are to be provided by others at no cost to NIHVA
1. Any passes required for the project, are the responsibility of the Contractor and must be available, before commencement of the installation. Any delays caused by the non-availability of passes, will be charged accordingly.
2. Power supply and isolators adjacent to the control panels (to be done by electrical contractor).
3. Any Civil work is in client scope.
4. Conduits and Cable trays from the control panel locations to the door distribution boxes, mullion hoist units and door hoist units be provided. (to be done by electrical contractor). These are to be installed prior to the commencement of door installation.
5. A 400/230 power supply (permanent or temporary) must be provided (FOC) by the main Contractor during the installation of the door for power tools and testing of the door sections during erection.
6. A safe storage / pre-assembly area for the door materials (by main contractor).
7. Any additional tests or certification, which are not within our scope of works but may be required by the Consultant or Client, these will be carried out or provided, subject to the actual requirements but will be at additional cost (by main contractor).
8. Lifting Equipment's required for installation.
9. Demolition of concrete floor to lay bottom rails.
10. Material & labour for micro concrete.

Please feel free to Contact Mr. Vijay Tarak on 8551093333 For any further Clarification / Information in this concern.

With Best Regards
