Complete entrance solutions for Automotive Manufacturing

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in door opening solutions

ASSA ABLOY Entrance Systems offers convenient, automated door solutions for the front, back and interior of your manufacturing facility.

ASSA ABLOY, Besam, Crawford, Megadoor and Albany, as words and logotypes, are examples of trademarks owned by ASSA ABLOY Entrance Systems or companies within the ASSA ABLOY Group.

Quality entrance solutions maximize output and minimize risk

The fast pace of automotive production requires safe and intuitive entrance solutions that can cycle quickly and reliably hundreds of times per day. ASSA ABLOY Entrance Systems offers a diverse portfolio of doors that meet the specific needs of automotive manufactures. Our interior doors streamline and enhance production processes while our exterior entrances safely expedite operations in loading areas and help ensure that foot and vehicular traffic flow smoothly.

The high expectations of the automotive manufacturing industry challenge manufacturers to meet increasing quality standards, streamline production and achieve short time-to-market goals. Our innovative entrance solutions help to increase productivity and reduce energy costs while ensuring safety and security of your workers. We provide peace-of-mind, allowing you to focus on increasing product output and optimizing process efficiency.

ASSA ABLOY Entrance Systems has the expert knowledge, combined product range and extensive engineering expertise to provide optimal support for specialized manufacturing processes. We understand the full range of challenges you face and offer the most efficient automated solutions for all entrances in your building.

Our portfolio includes:

- Rugged machine protection doors that improve automation, ensure safety and help meet high industry standards.
- Interior high-speed fabric doors that contain and protect separate environments, such as paint booths, from external dust and debris.
- Rigid exterior high-speed doors feature incredibly fast speeds to significantly reduce energy losses and reduce operator waiting time.
- Swing-, sliding-, and revolving doors that offer secure access control for office areas and pedestrian entrances.
- Tough commercial and industrial doors that are durable and provide superior insulation for exterior entrances.

The essential choice for safe and effective operations

Optimize your facility

Our machine protection doors are recognized throughout the globe as the ultimate safety barrier for separating machine operators from machine hazards. These high-speed doors feature smart design elements that help keep workers safe while improving automated processes. They stand up in harsh, industrial environments and guarantee reliability after a high number of cycles.

- Fabric machine protection doors feature a strong, tear-resistant, wind load-resistant fabric curtain that protects against direct pressure, allowing the door to be installed a short distance from machines.
- Reclaim valuable space on the production floor for more machines, wider aisles, better visibility and increased safety.
- Rigid, aluminum machine protection doors provide laser protection – the double-walled aluminum slats prevent penetration from laser beams.
- All of our machine protection doors can be integrated directly into the control systems for the automated machinery. This integration feature offers direct command, sensing and control of the door. When this integration is complete, the doors comprehensive safety features will meet the following standards: PL d/Cat. 3, PL e/Cat. 4 (EN ISO 130849-1) and SIL 3 (EN 62061).

Durable commercial and industrial doors

Our commercial and industrial doors maximize production efficiency and ensure safe, comfortable working conditions for employees. We offer you solutions that thrive in challenging manufacturing environments.

- Insulated sectional doors that deliver strength, security and energy savings for your large exterior openings
- Heavy-duty doors built to last with rugged steel exteriors and durable components

Offices and secure access zones

Our automatic pedestrian doors maintain comfortable office temperatures with tight seals to reduce air filtration and provide energy savings. Add access control features to create a secure and user-friendly division between public and restricted areas.

- Separate office and warehouse with doors that can provide significant noise reduction.
- For secure areas, choose from a variety of access-options including key cards and code locks.
- Options include doors that are fire-rated and meet all handicap codes and ADA requirements.

Proof in action

ASSA ABLOY Entrance Systems has succeeded in meeting many customer challenges in automotive manufacturing applications. Here is a sampling of our installations.

A full service partner for optimal performance

With more than half a century as the leading provider of automated door and dock solutions, ASSA ABLOY Entrance Systems delivers comprehensive services with expert technicians. Consistent assessment of your systems will help you improve energy performance, ensure safety and standards, and extend the life of your investment.

Entrance automation is the first step to managing excessive energy usage. Our intelligent products provide a range of options to help minimize energy loss, improve indoor air quality, increase daylight, control air circulation and optimize the overall energy performance of any building.

Maintenance and service aren't about what you get. They're about what you avoid: failures, losses and unplanned interruptions.

ASSA ABLOY Entrance Systems works according to your needs, with tailored solutions that ensure the function and availability of your entrances.

One point of entry for all your needs

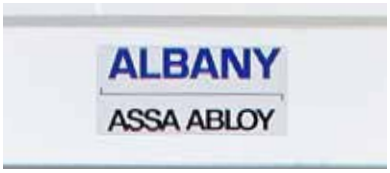

Smoothly functioning entrances are a prerequisite for businesses. To keep them functioning at optimal levels, look to ASSA ABLOY Entrance Systems to provide superior products, innovative solutions, and incomparable service for the front, back and interior of your building.

As the world's most comprehensive supplier of entrance automation products and services, we take an integrative approach to the flow of people, goods and vehicles, creating solutions with the best possible balance of cost, quality and lifetime performance.

Proven solutions and extraordinary service expertise

At our disposal is a strong portfolio of well-established brands, market leaders in their fields for decades and with a strong history of proven solutions and extraordinary service expertise. Today they are gathered under a single roof, at your disposal to meet all your requirements.

ASSA ABLOY Entrance Systems is a leading supplier of entrance automation solutions for efficient flow of goods and people. With our globally recognized product brands Besam, Crawford, TKO, Albany and Megadoor, we offer products and services dedicated to satisfying end-user needs for safe, secure, convenient and sustainable operations. ASSA ABLOY Entrance Systems is a division within ASSA ABLOY.
