

Wernecke New doors installation

Albany RR300 Plus – Precision, Flexibility, and Maximum Safety at Wilh. Wernecke

The Wilh. Wernecke Company values rapid transport, short turn-around times, and high flexibility when it comes to handling customers. In order to fill various orders, an economical interior door suitable for all purposes would be needed. This compact, high performance door would have to provide not only safety for the workers but also noise isolation and draft protection.

The company decided to install the High Performance Door Albany RR300 Plus from ASSA ABLOY Entrance Systems.
The compact construction requires little space and the curtain is made from highly transparent PVC or from highly rigid RollTex fabric suitable for extreme mechanical load. This door solution offers maxi-mum protection from draft and heat loss, therefore it is long term cost-efficient and optimizes the work environment.

The fast opening and closing times of the doors with flexible control systems as well as the combination of safety features and durable construction materials convinced the Wilh. Wernecke Company that the RapidRoll300Plus was the best solution and provided the guarantee of a safe and cost-efficient establishment for the long term.

The Albany RR300 Plus is a self-supporting structure with side frames available in galvanized or stainless steel.
The innovative MCC^{VectorControl}-System and Knock-Out Capability (in case of collision, a sensor stops door immediately on impact) are also available as options. Damage is prevented and the flow of production remains consistent.

Founded in 1939, Wilh. Wernecke GmbH & Co. KG, today with nearly 50 employees, successfully manufactures fasteners as well as pins and bolts for well-known automobile and agricultural machine companies, and for the mechanical, motor, and electrical industries both domestically and internationally. Wilh. Wernecke wants its clients to understand that it is not simply just a supplier but a reliable, flexible, and inventive partner with know-how.
