e-Whiz Solutions

Preface

Intended Audience

Welcome to SCM version 2.0 of the *Quality* User's Guide.

Documentation Accessibility

Our goal is to make Whiz-SCM products, services, and supporting documentation accessible, with good usability, to our customers. To that end, our documentation includes features that make information available to users of assistive technology. This documentation is available in PDF format. Accessibility standards will continue to evolve over time, and e-Whiz is actively engaged with other market leading technology vendors to address technical obstacles so that our documentation can be accessible to all of our customers.

Introduction

This chapter covers the following topics:

- Overview
- Features in this Version

Overview

Whiz - SCM is a result of our extensive research and development efforts on manufacturing industries. It's a unique ERP solution specially designed for manufacturing companies. With WHIZ-SCM by your side, you would be able to efficiently manage all of your manufacturing operations. It will let you procure raw materials, maintain its inventory, plan and execute production, maintain customer sales orders, pick & ship orders out to customer and create and print invoices and much more. Being a web based solution; this application could be accessed anytime, anywhere with appropriate authentication and access protocols

Features in this Version

1. Improve Operational Efficiencies
1. Minimize manufacturing & Operations cost
2. Enhanced Product Quality measures & tracking
3. Increased On-time Shipments
4. Reduce inventory levels and shortages
5. Increased Inventory Turns
6. Increase customer satisfaction
7. Lower Labor costs
8. Improve Inventory Accuracy & Visibility
9. Optimized Resource Utilization
10. Scalable – Allows you to start small and expand as necessary

About Quality Module

This module has features like COA Certificate and Quality Inspection. You could maintain Manufacturing and Purchase order Quality Inspections. You can also create Inspection plans with the help of this module. .

Features:

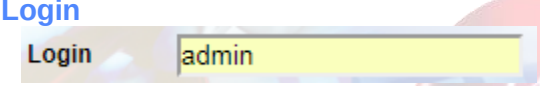

1. Create COA certificates
2. Add , edit Inspection Plans
3. View Inspection Results of all the orders
4. Search for Inspection Plan
5. Print , Copy COA Certificates

Application Link & Login

1

Login

Enter the valid login name in this text field

2

Password

Enter the valid password in this text field
NOTE: Password is case sensitive

3

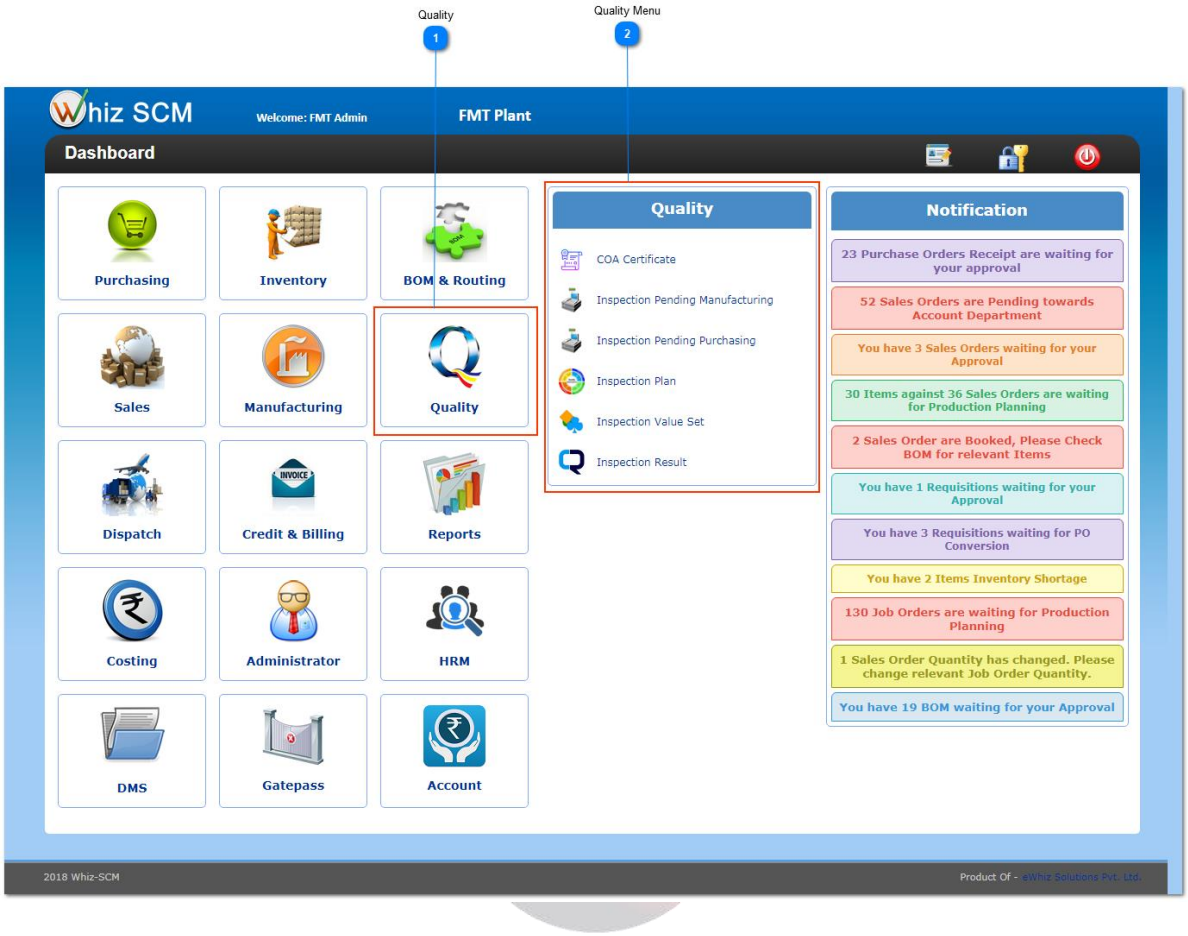

Login Button

Click the ***Login*** button to open application.

NOTE: If login name and password combination is correct, only then application will open otherwise system raises an error message.

Dashboard

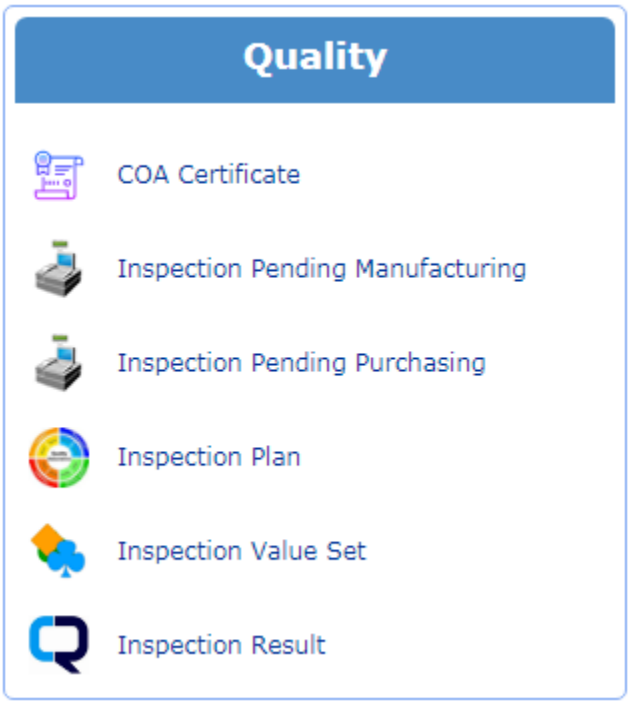

1 Quality

Click ***Quality*** button to perform any action Quality Module. It shows inventory related menus on right side of window.

2 Quality Menu

This section shows the menus related to Quality module.

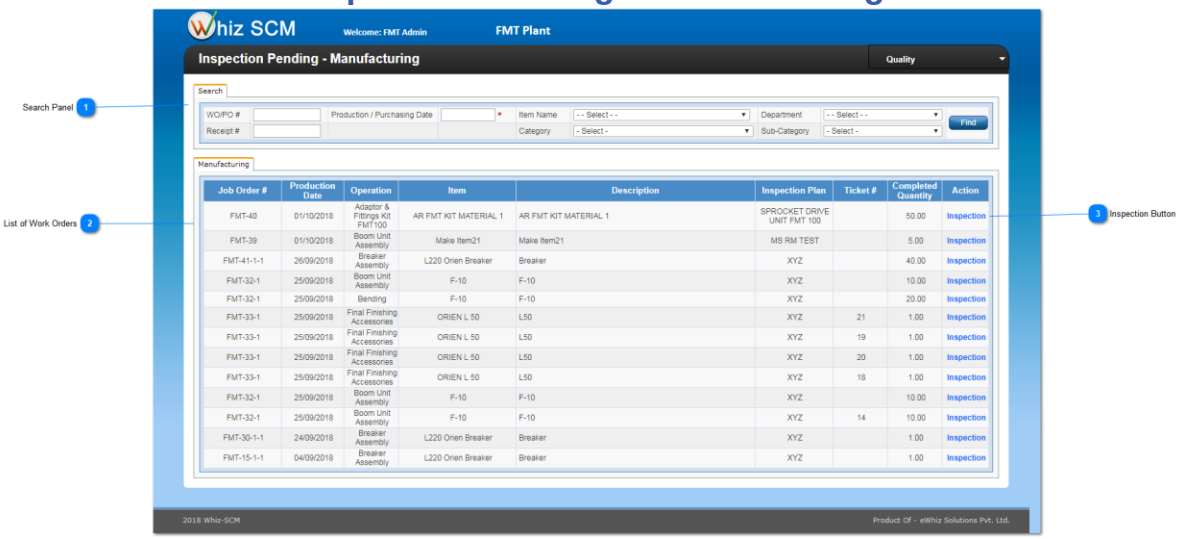

Inspection Pending - Manufacturing

After Production Entry of Job Order is made, its entry is reflected here in the Inspection Pending sub-module for its Quality Inspection.

Features of this Module:

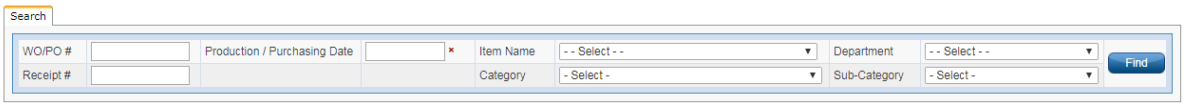

1. Add Job Order Production entries to inspect its Quality.
2. Delete Job Order Production entries.
3. Search Job Order Production entries.

Inspection Pending - Manufacturing

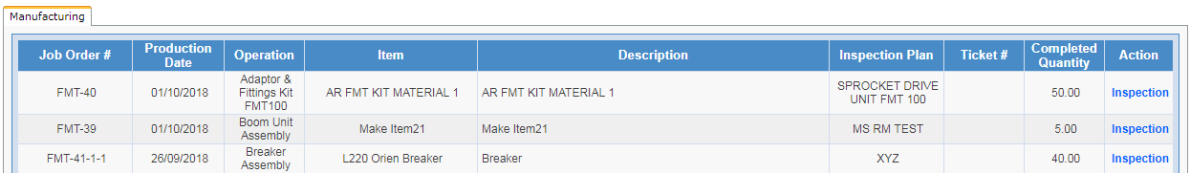

After Production entry is made of the Job Order, its entry is reflected in Inspection pending - Manufacturing

1 Search Panel

Use search panel to search for a particular Work Order.You can search using Job using Work Order/PO, Item Name, Category, Department, Sub-Category, Receipt Number.

2 List of Work Orders

List of Work Orders to perform inspection.

3

Inspection Button

Inspection

Click on the Inspection Button to inspect Work Order.
After Clicking on Inspection Button, Inspection Results Page Appear on the screen.

e-Whiz Solutions

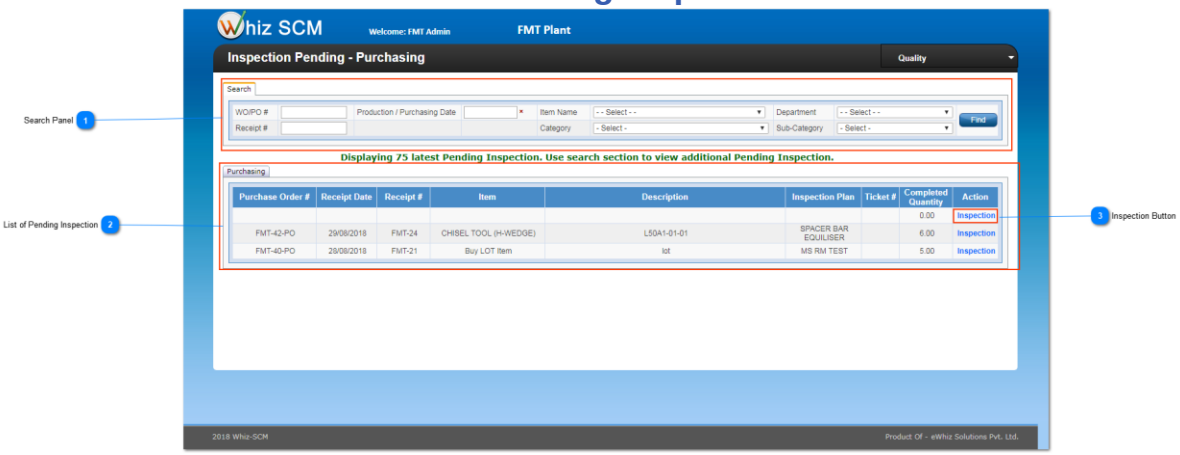

Purchase Order Inspection

This module allows you to perform and view inspection of purchase order. You could perform inspection of material depend upon the inspection plan selected for that item. Also user can view the result of PO inspection.
Here is the brief summary of some of its features:

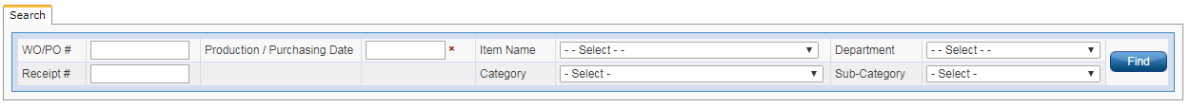

Features:

1. Perform inspection depend upon the selected inspection plan
2. Accept or reject quantity depend upon the inspection result
3. View inspection result and attached print out to the order

List of Pending Inspections

1 Search Panel

Select from verity of filter option ***OR*** combine different filters to narrow your search result. For example entering***WO/PO#*** or selecting prod/purchasing date from ***Calendar*** and clicking ***Find*** button will show resulting list of Purchase order for inspection.

2 List of Pending Inspection

List of all the pending PO inspection in system or resulting list based on search option is Shown here with some details.

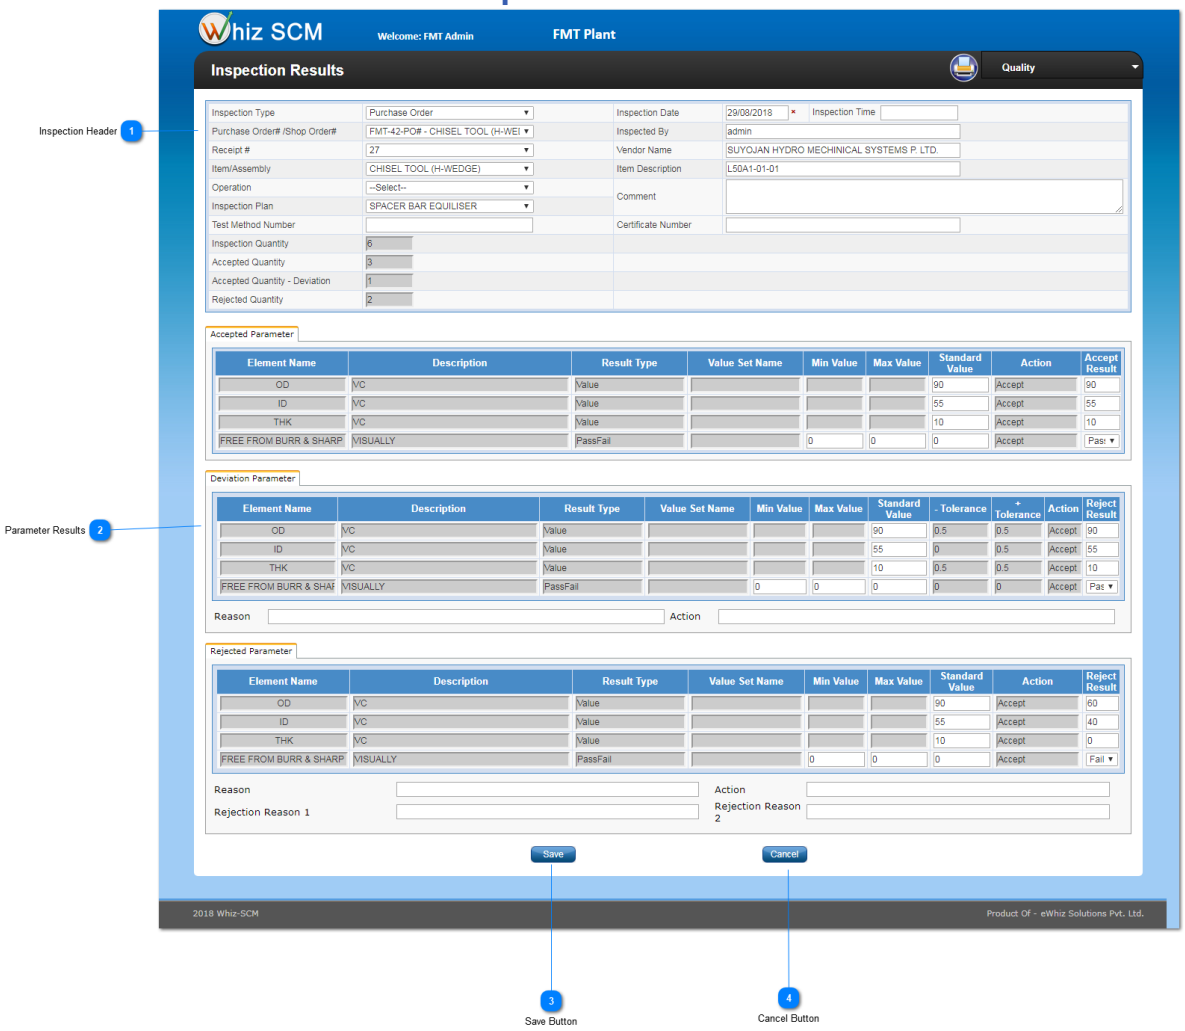

3

Inspection Button

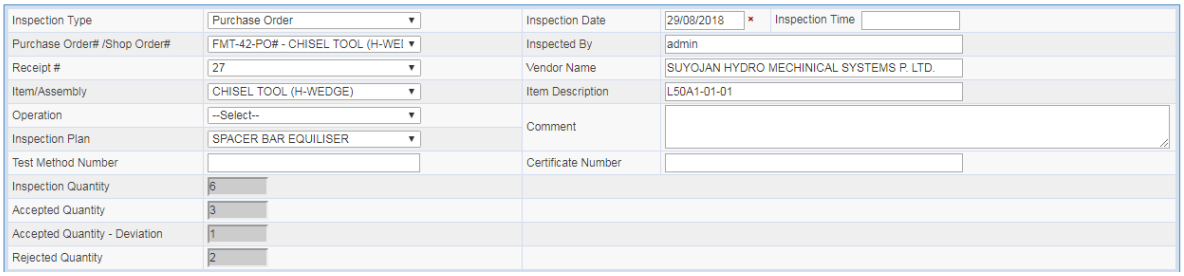

Inspection

Click on ***Inspection*** button to inspect the items in purchase order.

Inspect PO Items

1 Inspection Header

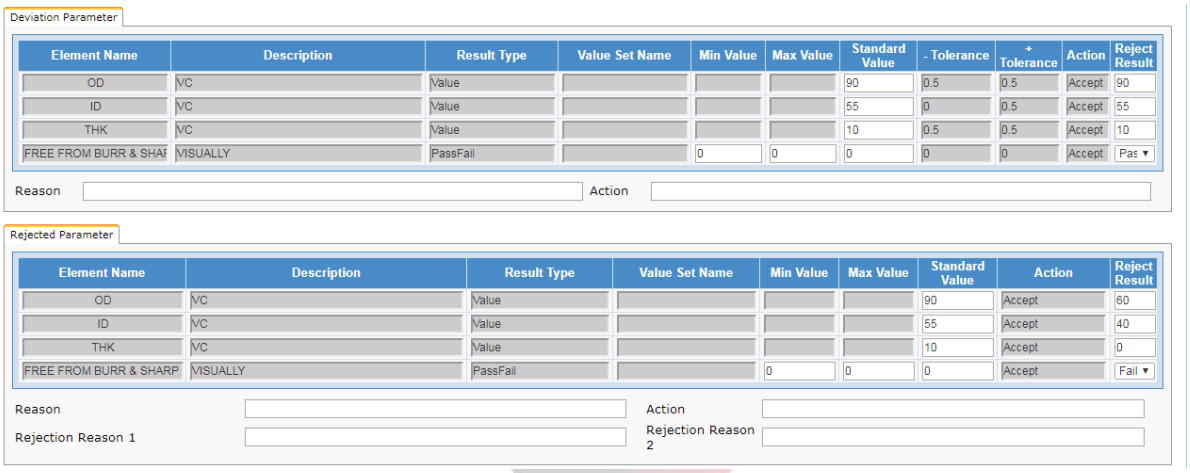

Inspection Type	Purchase Order	Inspection Date	29/08/2018 × Inspection Time
Purchase Order# /Shop Order#	FMT-42-PO# - CHISEL TOOL (H-WEI	Inspected By	admin
Receipt #	27	Vendor Name	SUYOJAN HYDRO MECHINICAL SYSTEMS P. LTD.
Item/Assembly	CHISEL TOOL (H-WEDGE)	Item Description	L50A1-01-01
Operation	--Select--	Comment	
Inspection Plan	SPACER BAR EQUILISER		
Test Method Number		Certificate Number	
Inspection Quantity	6		
Accepted Quantity	3		
Accepted Quantity - Deviation	1		
Rejected Quantity	2		

Below lists all data items available for the seeded (default) inspection header tab:

- Inspection Type - System display inspection type as per defined on order.
- Inspection Date/Time - Inspection date shown by system itself; by default system current date is set,
  User can change it as per the requirement.
- PO#/Shop Order # - System display PO # or Shop Order # depend upon inspection type.
- Inspected By - Inspected name shown by system itself; by default system current login person name is set.
- Receipt # - System display receipt # which is link to the current PO.
- Vendor Name - System display vendor name as per defined on purchase order.
- Item/Assembly - System display item name as per defined on purchase order.
- Item Description - System display item description as per defined on purchase order.
- Operation - Select operation for inspection from drop down list.
- Inspection Plan - Select inspection plan as per item selected for inspection from drop down list.
- Comment - Enter comment, if any.
- Test Method Number - Enter test method number.
- Certificate Number - Enter certification number for inspection.

- Inspection Quantity - System display total order quantity of an item as inspection quantity.
- Accepted Quantity - Enter accepted quantity of an item.
- Accepted Quantity - Deviation - Enter accepted quantity - deviation after an item.
- Rejected Quantity - System will calculate rejected quantity depend upon the value of Inspection and accepted quantity.

2 Parameter Results

Below lists all data items available for the seeded (default) inspection elements tab:

- Element Name - System display element name as per inspection plan selected.
- Description - System display description as per selected element name.
- Result Type - System display result type as per selected element name.
- Value Set Name - System display value set name as per selected element name.
- Min Value - Enter min value of inspection.
- Max Value - Enter max value of inspection.
- Standard Value - Enter std value of inspection.

- Action - System display action as per accepted quantity.
- Accept Result - Select accepted result as per displayed action
- Reject Result - Select rejected result as per displayed action

3

Save Button

Click ***Save*** button to save inspection result into the system or any changes made in edit mode.

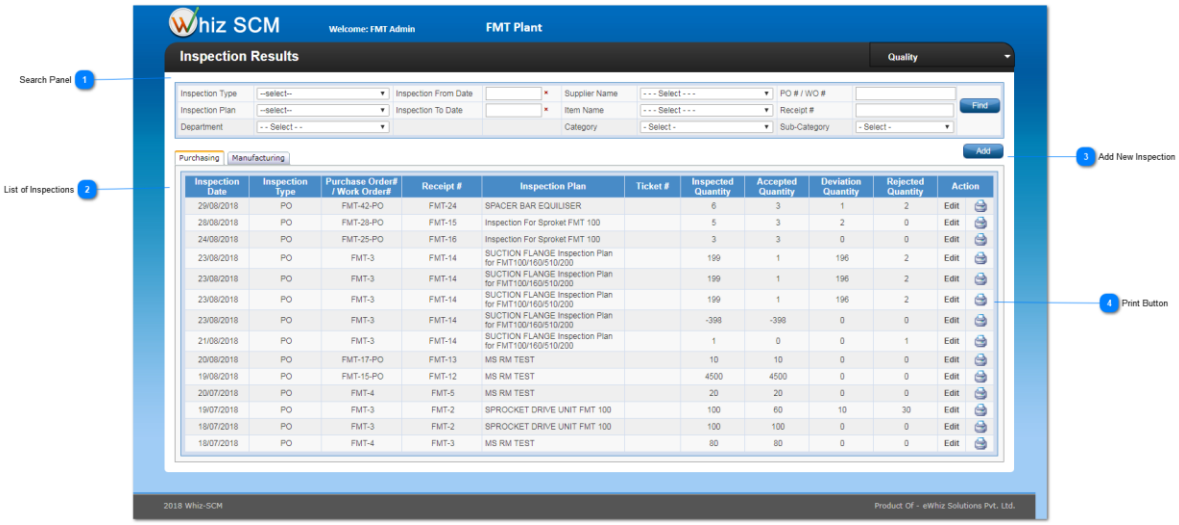

4

Cancel Button

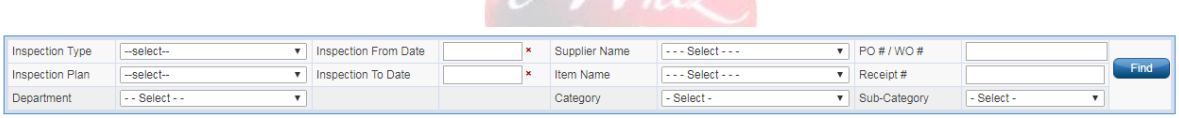

Click ***Cancel*** button to discard changes without saving result.

PO Inspection Result

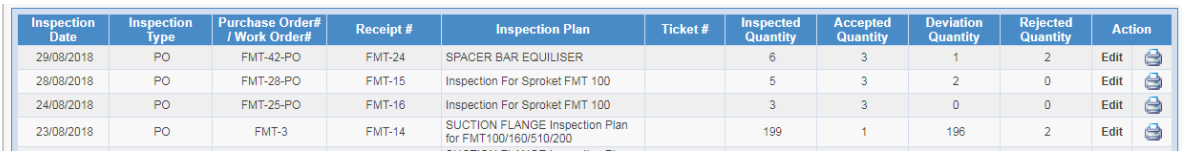

1 Search Panel

Select from multiple search parameters OR combine different parameters to narrow your search result For example entering
PO/WO# or selecting date from ***Calendar*** and clicking ***Find*** button will show resulting list of Purchase order inspection result.

2 List of Inspections

Inspection Date	Inspection Type	Purchase Order# / Work Order#	Receipt #	Inspection Plan	Ticket #	Inspected Quantity	Accepted Quantity	Deviation Quantity	Rejected Quantity	Action
29/08/2018	PO	FMT-42-PO	FMT-24	SPACER BAR EQUILISER		6	3	1	2	Edit
28/08/2018	PO	FMT-28-PO	FMT-15	Inspection For Sproket FMT 100		5	3	2	0	Edit
24/08/2018	PO	FMT-25-PO	FMT-16	Inspection For Sproket FMT 100		3	3	0	0	Edit
23/08/2018	PO	FMT-3	FMT-14	SUCTION FLANGE Inspection Plan for FMT100/160/510/200		199	1	196	2	Edit

List of all the PO inspection result in system or resulting list based on search option is shown here with some details.

3

Add New Inspection

Click ***Add*** button to add new purchase order inspection.

4

Print Button

Click ***Print*** icon for printing Inspection Result.

- List of existing Inspection Value Sets present in the system.
- Click on the edit button to edit an Inspection Value Set.

3

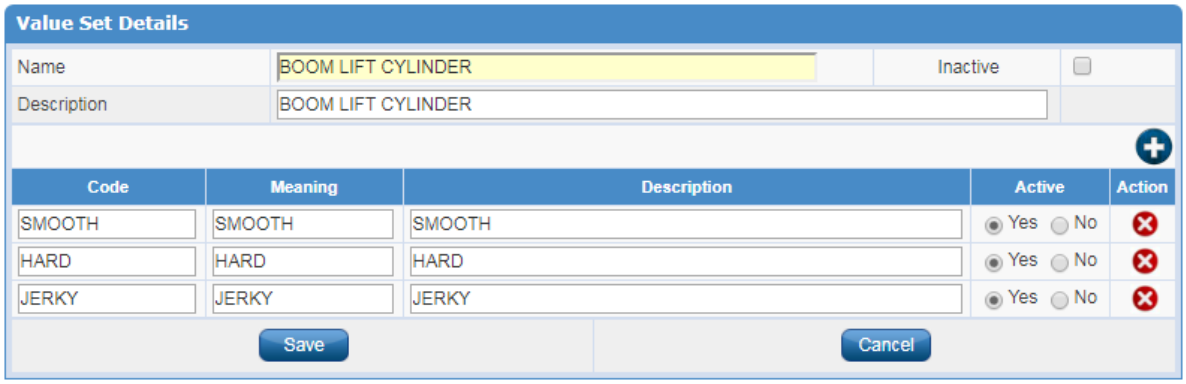

Add Button

Add

Click on ***Add*** button to add new Inspection Value Set.

4

Inspection Value Set Details

• Enter details about Inspection Value Set.

• Click on **add** button to add new Inspection Values.

• Click on the **red Cancel** button to delete a Value from the Inspection Value Set.

• If the Value is active then click on the **Yes** button in the Active column, else click on the **No** button.

5

Save Button

Save

Click on ***save*** button to save changes in Inspection Value Set or save a new Inspection Value Set.

6

Cancel Button

Click on ***Cancel*** button to discard changes.

Inspection Results

Inspection Results module shows the inspection quality results of all the items in Purchase Order / Work Order.

Features of this module:

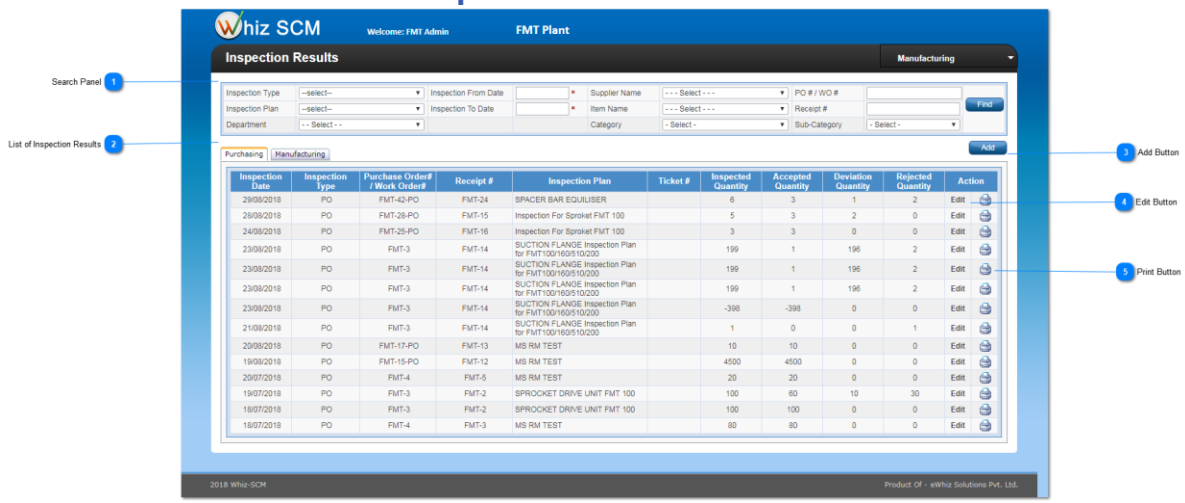

1) Add new Inspection Results

2) Edit Inspection Results

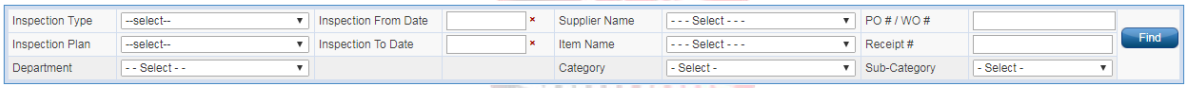

3) Search Inspection Results

4) Print Inspection Results

Inspection Results List

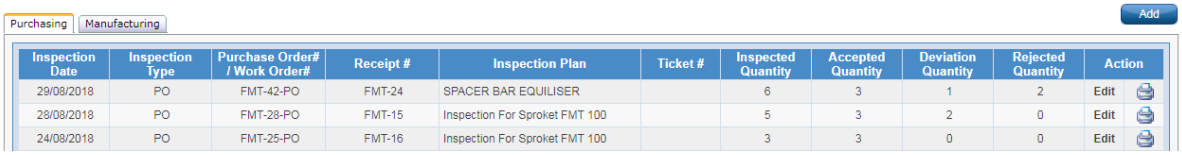

1 Search Panel

Search for a particular Inspection Result entry. For egg :You can search using PO/WO number or by Inspection type.There are multiple parameters to search from.

2 List of Inspection Results

List of Inspection Results

3

Add Button

Click on the ***Add*** button to add new Inspection Results.

4

Edit Button

Click on the Edit button to edit Inspection Results

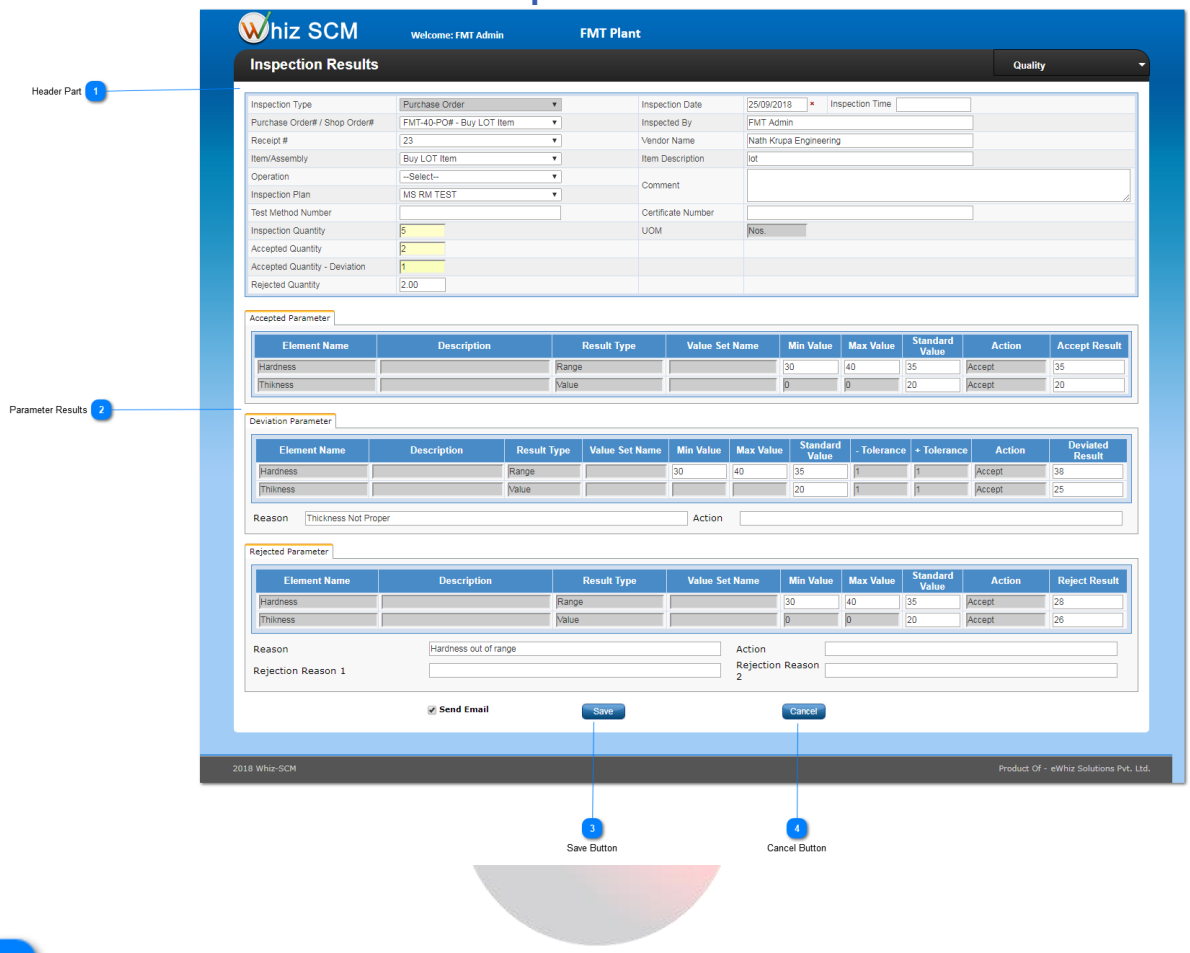

5

Print Button

Click on the ***Print*** button to print Inspection Results.

Add Inspection Results

1 Header Part

Inspection Type	Purchase Order		Inspection Date	25/09/2018 ×	Inspection Time
Purchase Order# / Shop Order#	FMT-40-PO# - Buy LOT Item		Inspected By	FMT Admin	
Receipt #	23		Vendor Name	Nath Krupa Engineering	
Item/Assembly	Buy LOT Item		Item Description	lot	
Operation	--Select--		Comment		
Inspection Plan	MS RM TEST				
Test Method Number			Certificate Number		
Inspection Quantity	5		UOM	Nos.	
Accepted Quantity	2				
Accepted Quantity - Deviation	1				
Rejected Quantity	2.00				

This part includes :

1) Inspection Type - Select the Inspection Type from the drop down list. Inspection type can be either
Purchase or Manufacturing type.

2)Purchase Order/ Shop Order - Select the Purchase Order from the drop down list.

3)Receipt - Select the Receipt Number from the drop down list.

4) Item/Assembly- Select Item/Assembly from the drop down list.

5)Operation- Select Item/Assembly from the drop down list.

6) Inspection Plan- Select the Inspection Plan from the drop down list.
