Preface

Intended Audience:

Welcome to Whiz Sales – Version 1.0 of the e-Whiz CRM User's Guide.

Documentation Accessibility:

Our goal is to make Whiz-Sales products, services, and supporting documentation accessible, with good usability, to our customers. To that end, our documentation includes features that make information available to users of assistive technology.

This documentation is available in PDF format. Accessibility standards will continue to evolve over time, and e-Whiz is actively engaged with other market leading technology vendors to address technical obstacles so that our documentation can be accessible to all of our customers.

Introduction

Overview:

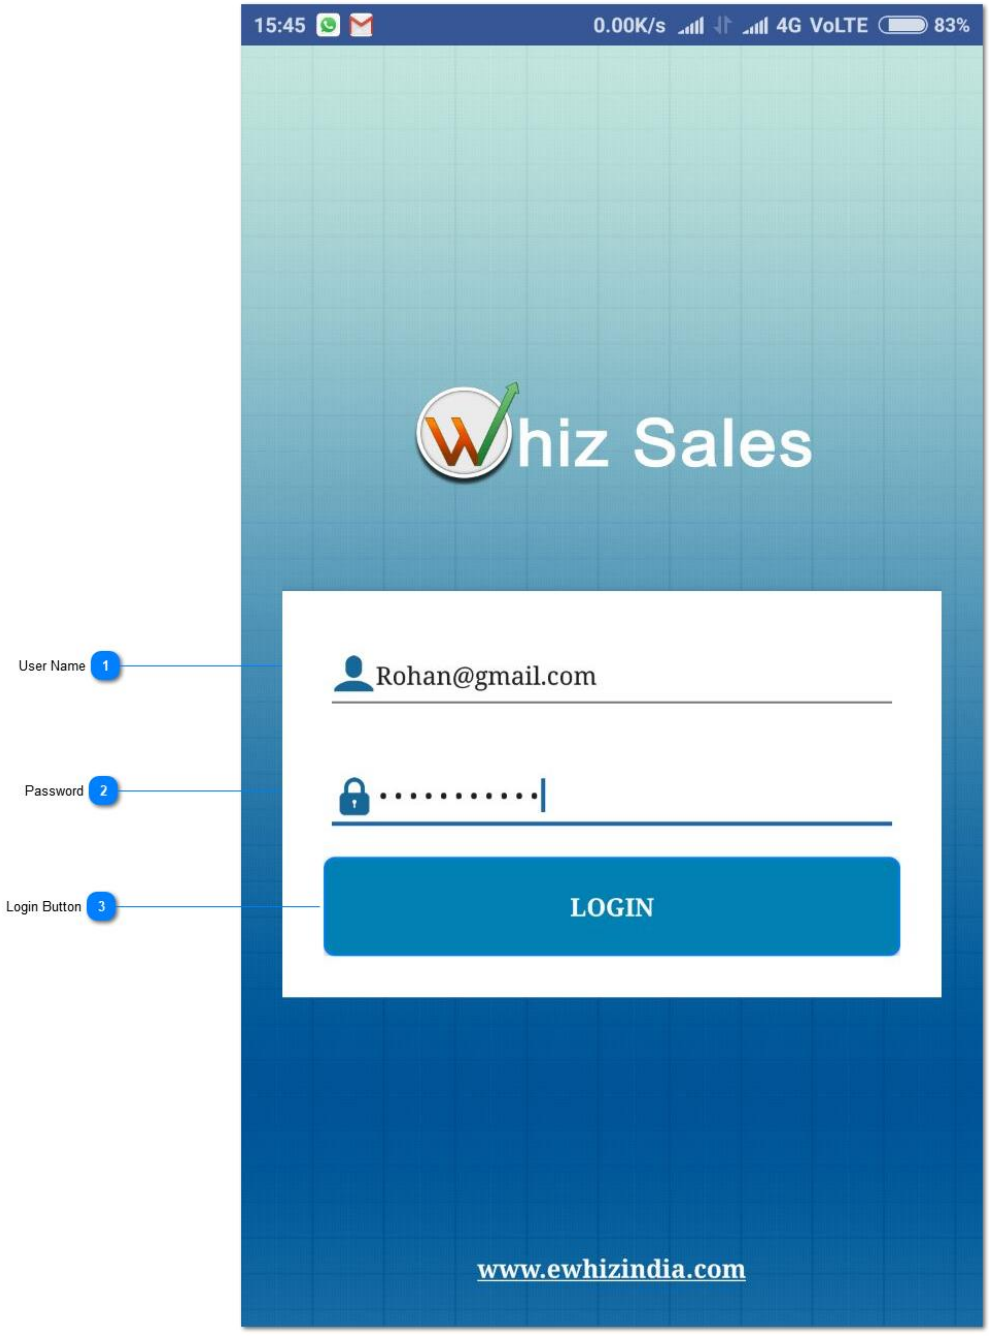

Why should you care about mobile? Because today over half of internet usage comes from mobile devices. Enabling CRM mobile solutions in your business is no longer something you should plan for—it's required. Whiz Sales can help you take advantage of modern sales tools that will help be more agile in this mobile-first era, allowing you to sell more effectively, market smarter, and delight your customers again and again.

Over All Mobile Feature: Enables users to work within the application as they go out of office on calls, even to locations where there is no internet connection. They can continue to work normally once they have updated or synched the data base on their laptop, mobile phone etc.

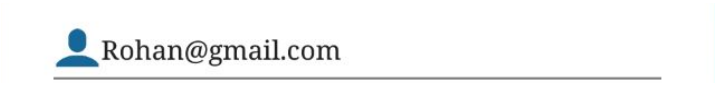

Features:

- Easy Add Follow Up through listing page.
- Classify Sync data using update mark.
- Easy Access to screen.
- Manually Sync Company Settings.
- Comfortable and Handy.
- All of your customer data is at your finger tips, anytime, anywhere. This makes it easy to service your customer anywhere.
- Instant messaging through Whiz Chat.

Application Login

1 **User Name**

- Enter the Valid ***Username*** in this Text field

2 **Password**

- Enter the Valid ***Password*** in this Text field
  NOTE: Password is Case sensitive

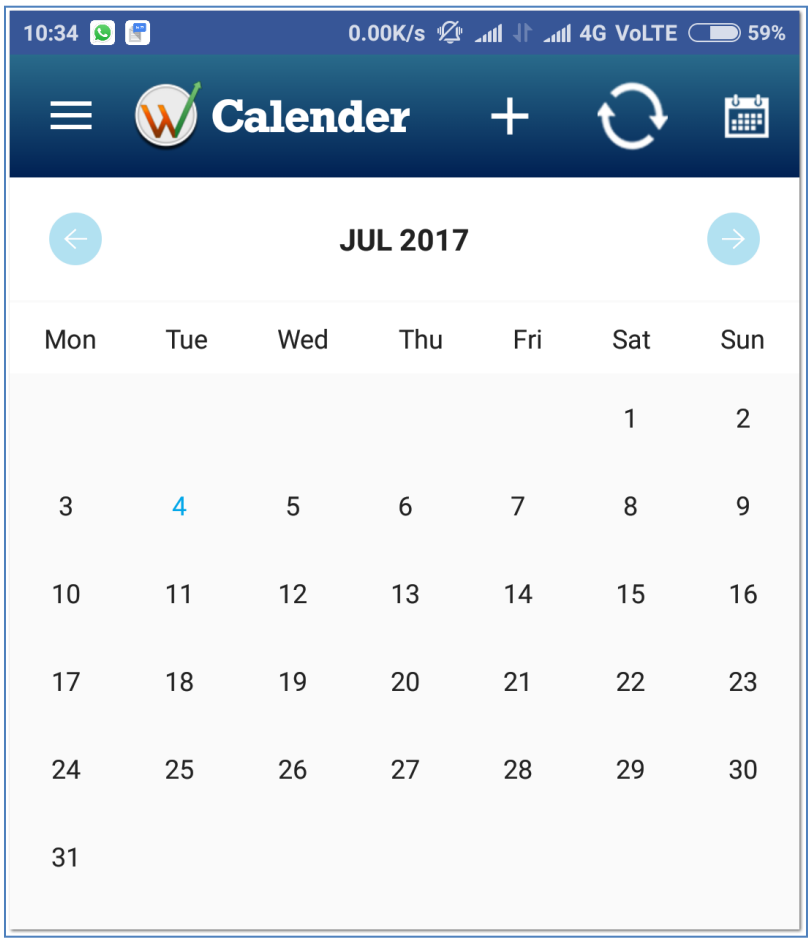

3 **Login Button**

Dashboard Menu Tray

TO DO List

- To Do List is the first Module in Whiz Sales App.
- When User Login and click on To Do List, he is able to see Present day Follow Up, Task and Appointment for that particular day.

Leads

Managing Leads is big challenge; as a result more opportunities are lost because of non-follow-up than any other reason. With Whiz-Sales you can manage Leads and Follow Ups effortlessly.

Leads are the particulars gathered about an individual or representatives of an organization. They play a very important role in an organization's Sales& Marketing department and are useful in identifying potential customers.

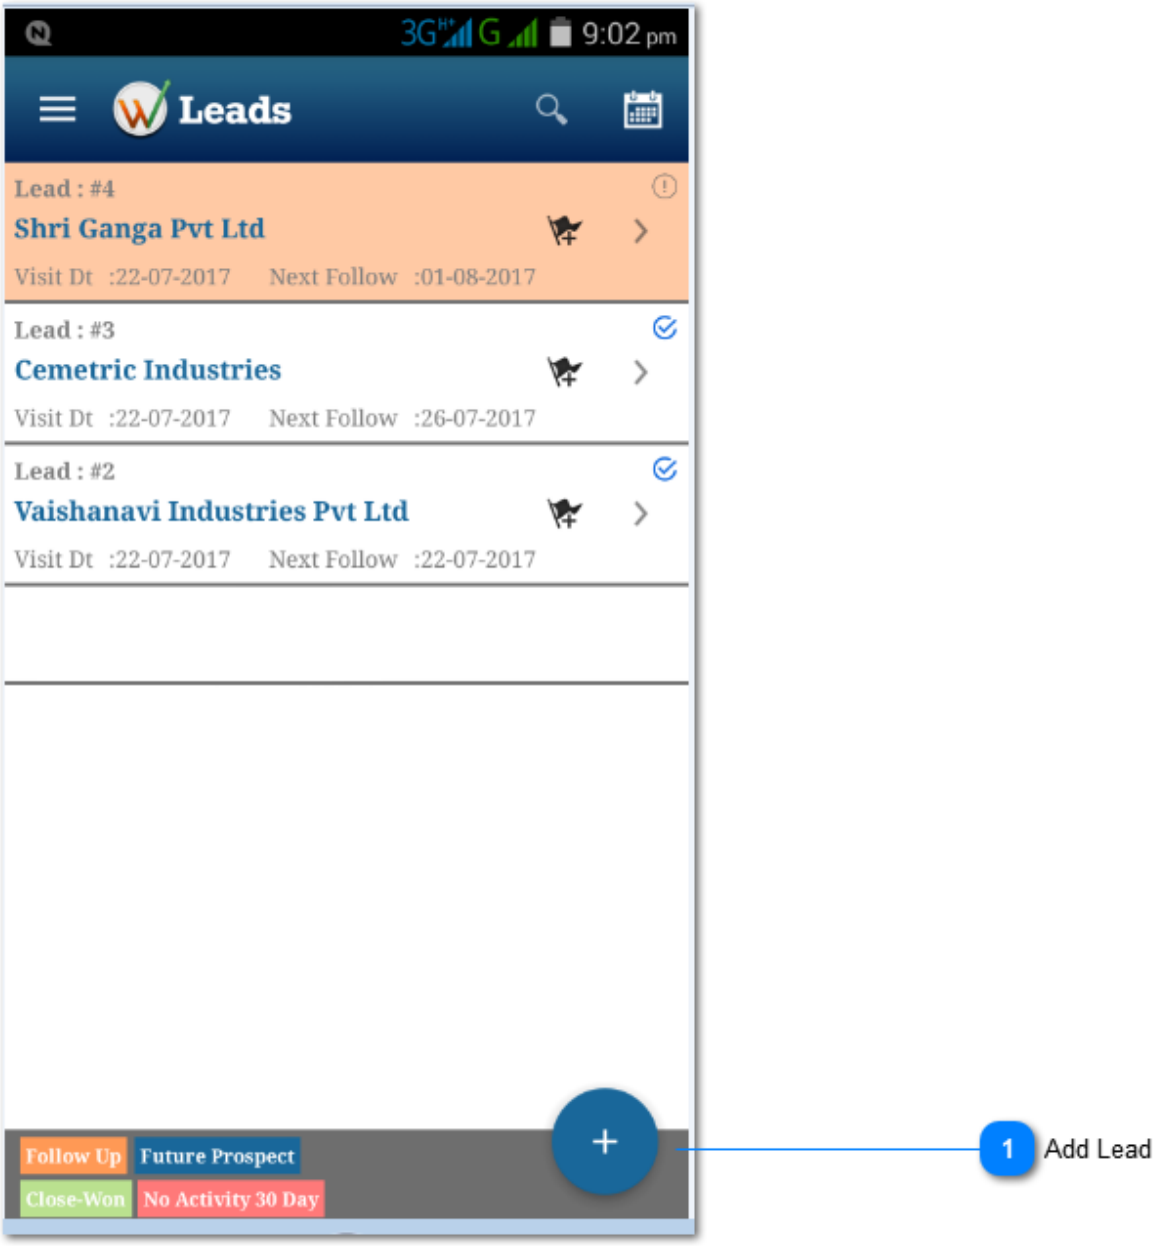

Gathering leads and managing them are the initial stages in the sales process. Leads can be obtained through trade shows, seminars, advertisements, marketing campaigns etc. Once the leads are collected, it is essential to manage them and follow them up until the leads qualify to prospective customers. The sales department's approach in managing leads can significantly impact the success of an organization.

The terminology related to lead management may differ across industries, but the basic process remains the same. The Leads module in Whiz Sales - CRM helps you manage your leads.

In Whiz-Sales CRM, lead details contain a combination of company (account), person (contact), and business opportunity (potential), depending on your requirement - for managing Business to Business (B2B) industry or Business to Consumer (B2C) industry.

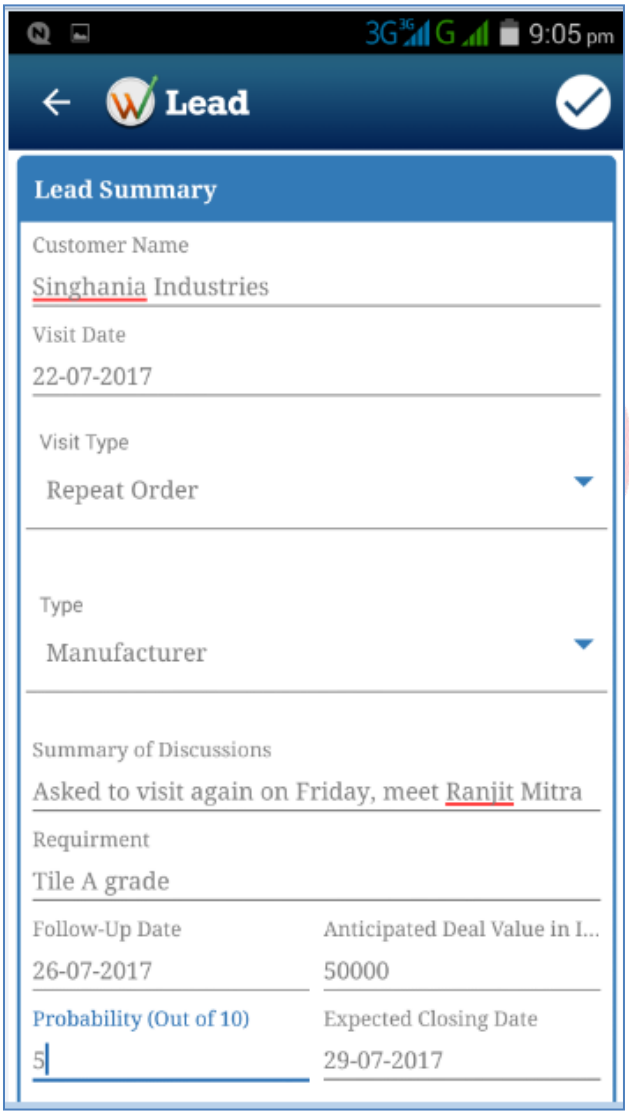

Lead Listing

- Open Lead Module, Lead Listing Page gets displayed.

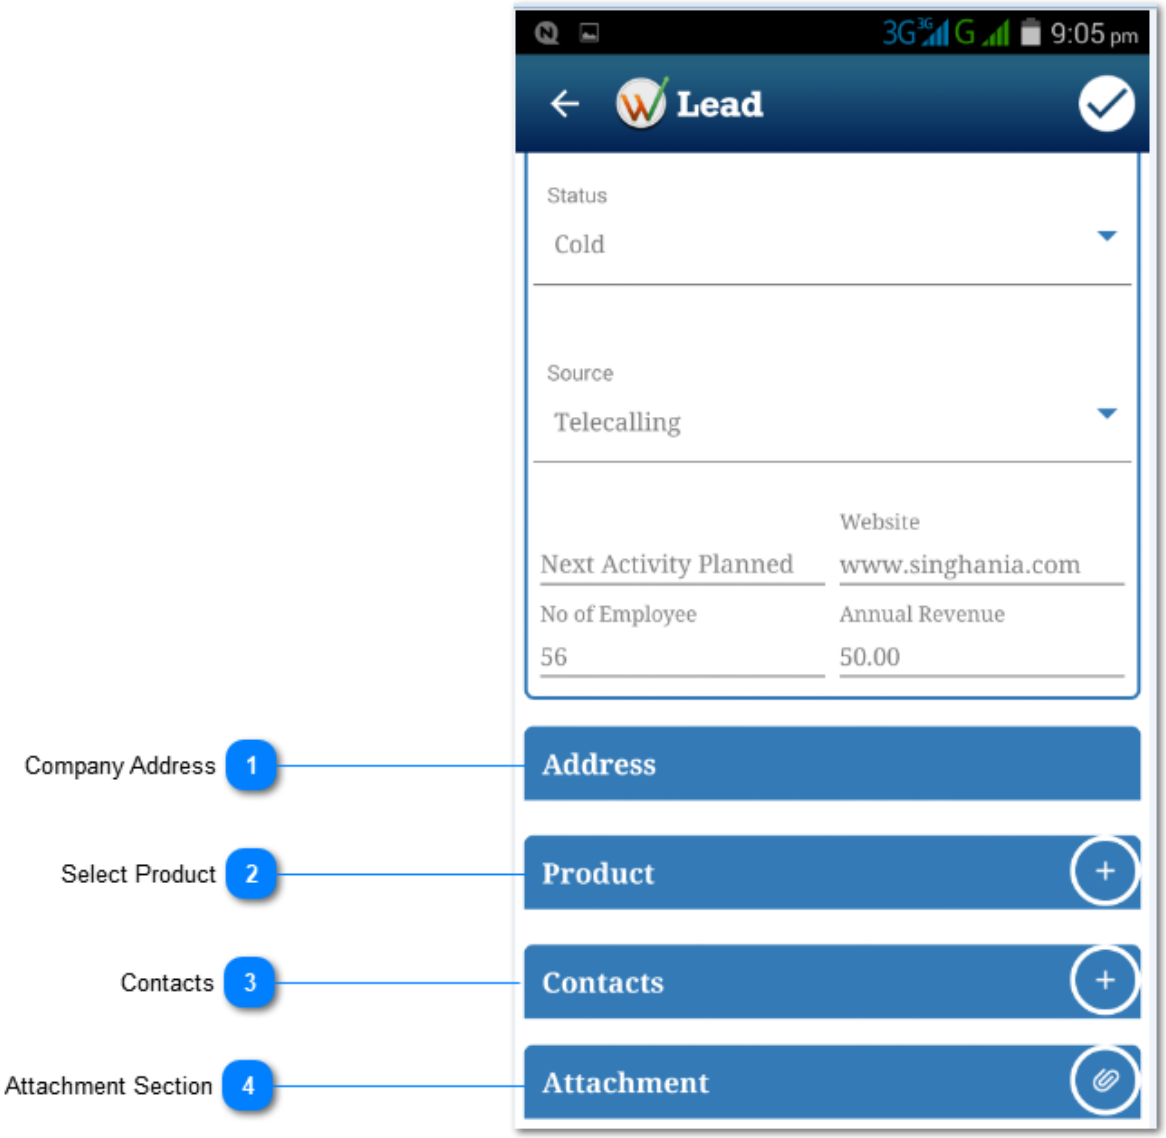

1 Add Lead

- Let's Enter Leads. Click on ***Add button,*** enter details and click on Save.
