

Distribution & Logistics: Friedrich Lange GmbH, Quickborn, Germany

Loading technology in a class of its own

"Robust and reliable Crawford loading docks and doors at the new logistics centre help the company to achieve its own high goals."

Friedrich Lange GmbH is a wholesaler in sanitary fittings and heating equipment operating in the Hamburg, Schleswig-Holstein and Mecklenburg-Vorpommern regions.
An innovative business which has continued to develop and recent years, it currently stocks 28,000 different articles, operates in 14 different locations and employs 185 people.

To service this development in a professional way, a complete new logistics centre has seen the light of day at Quickborn near Hamburg, with facilities matching and satisfying the high quality demands which Friedrich Lange GmbH expects in every way.

The main challenge for Friedrich Lange in terms of loading technology and door facilities was the robustness and associated reliability of the products.

ASSA ABLOY Entrance Systems met this customer requirement with:

- 16 Crawford teledocks
- 18 Crawford overhead sectional doors
- 16 Crawford curtain dock shelters

The result is that the logistics center has been in continuous function since 2013, with Crawford-brand industrial doors and docking equipment helping Fredrich Lange GmbH maintain a problem-free flow of goods to achieve its own business goals.
