SHIVAAH:

Established in 2012 in Pune (Maharashtra, India). We are the leading solution Provider for Residential and commercial buildings as well as Industries. SHIVAAH is a prominent brand of NIHVA Technology Pvt. Ltd. At "SHIVAAH"

About Us

WE specialize in offering comprehensive solutions for Residential and commercial buildings. Our involvement in any project begins with a throughout understanding of the requirements, functionality, and design. Leading to the development of a customized solution, followed by expert installation and commissioning. We are committed to providing ongoing service support that goes beyond our initial contractual obligations.

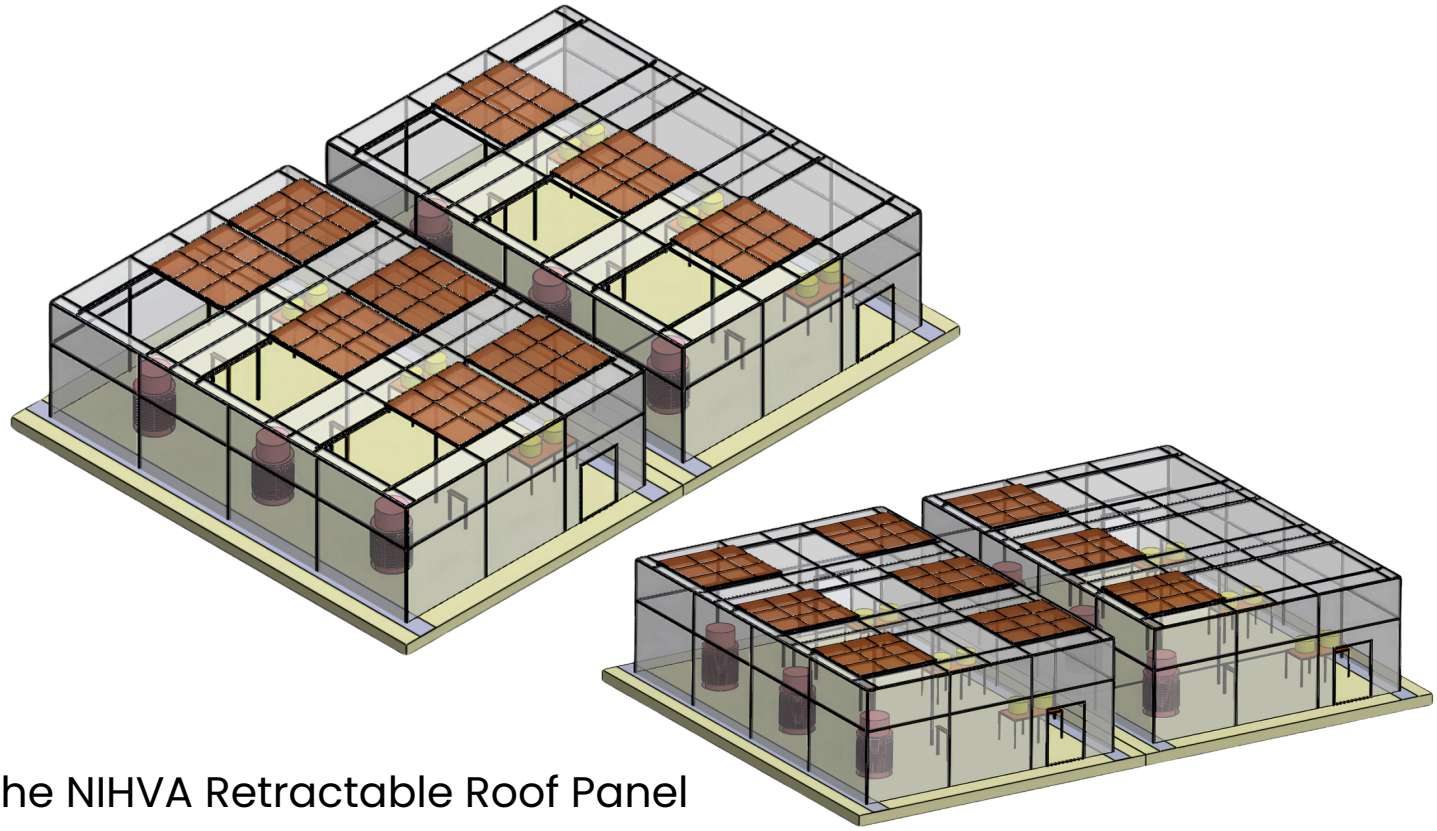

HORIZONTAL **WINDING MACHINE**

The NIHVA Retractable Roof Panel System overcomes this challenge by combining a dustfree enclosure, controlled roof opening, safe material handling, and efficient EOT crane accessibility.The Retractable Roof Panel System provides a clean, dust controlled workspace while enabling automatic roof opening for overhead crane operations. Only the required section opens and closes automatically, ensuring efficient material handling and uninterrupted production.

FUNCTIONING

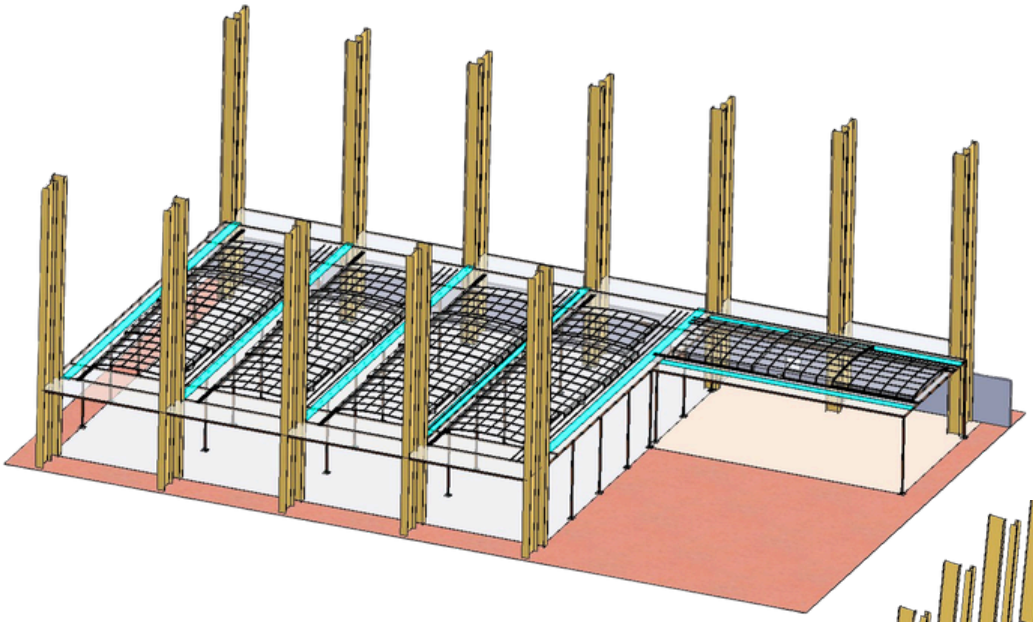

VERTICAL **WINDING MACHINE**

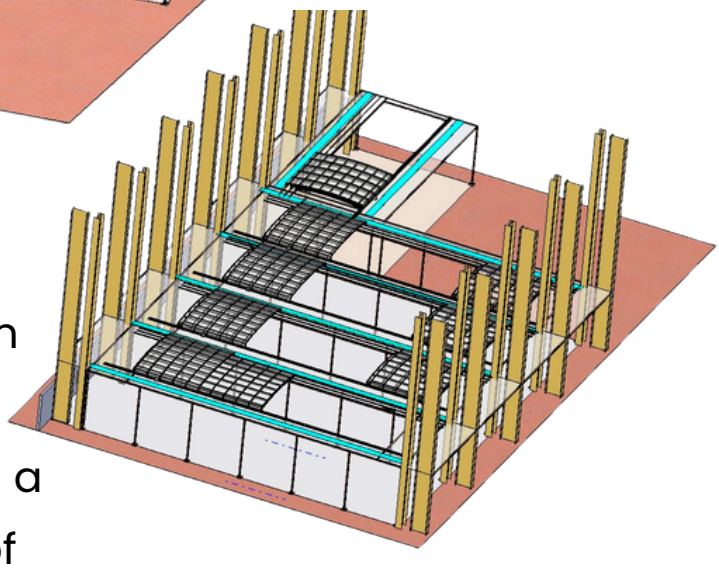

The NIHVA Retractable Roof Panel System is designed to enhance **Vertical Winding Machine** operations by combining a dust-free enclosure, controlled roof opening, safe material handling, and seamless EOT crane accessibility. The Retractable Roof Panel System provides a clean, dust-controlled workspace while enabling automatic roof opening for overhead crane operations. Only the required roof section opens and closes automatically, ensuring efficient lifting and positioning of vertical winding assemblies while maintaining uninterrupted production.

FUNCTIONING

VWM & HWM **COMMON**

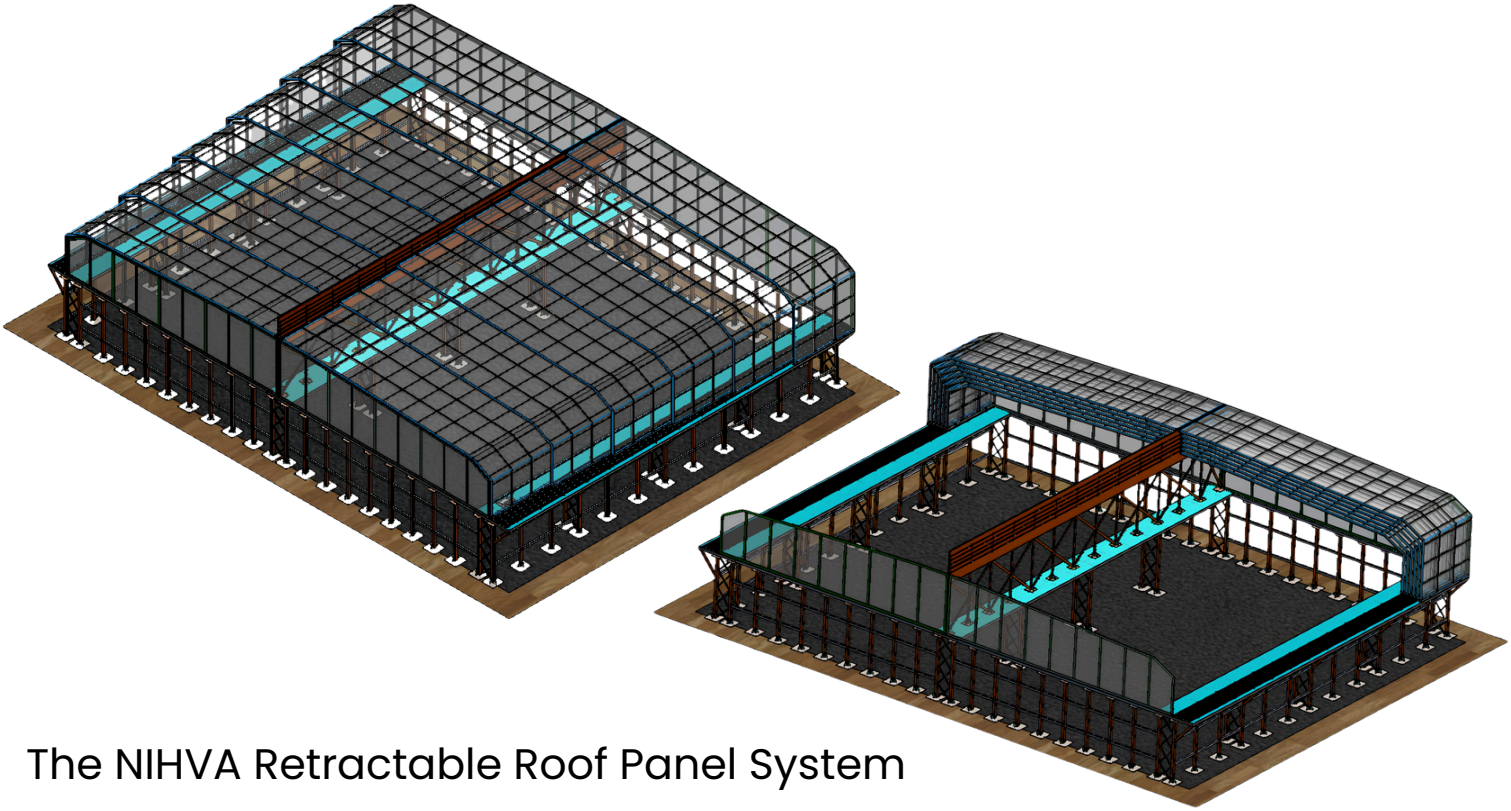

The NIHVA Retractable Roof Panel System is designed to support both **Vertical and Horizontal Winding Machine** operations by combining a dust-free enclosure, controlled roof opening, safe material handling, and seamless EOT crane accessibility.

The Retractable Roof Panel System provides a clean, dust-controlled workspace while enabling automatic roof opening for overhead crane operations. Only the required roof section opens and closes automatically, ensuring efficient handling of winding assemblies, improved workflow, and uninterrupted production.

FUNCTIONING

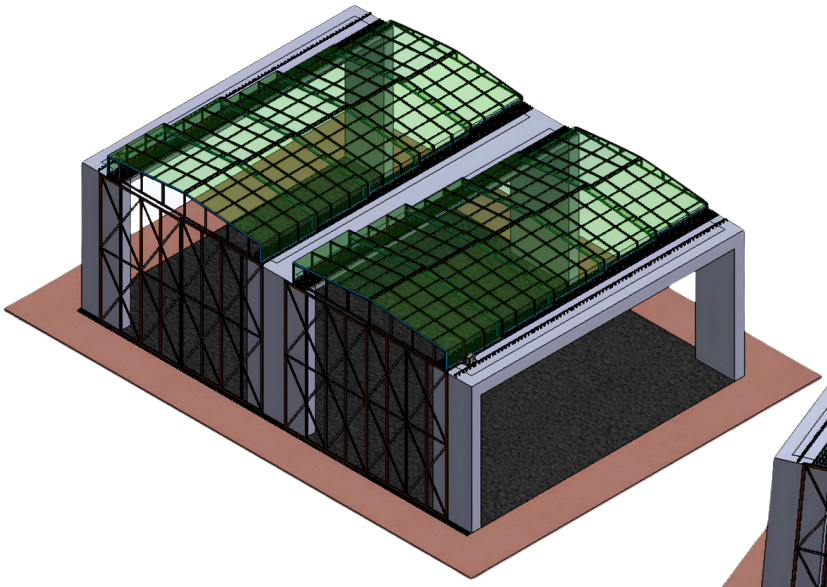

ASSEMBLY **LINE**

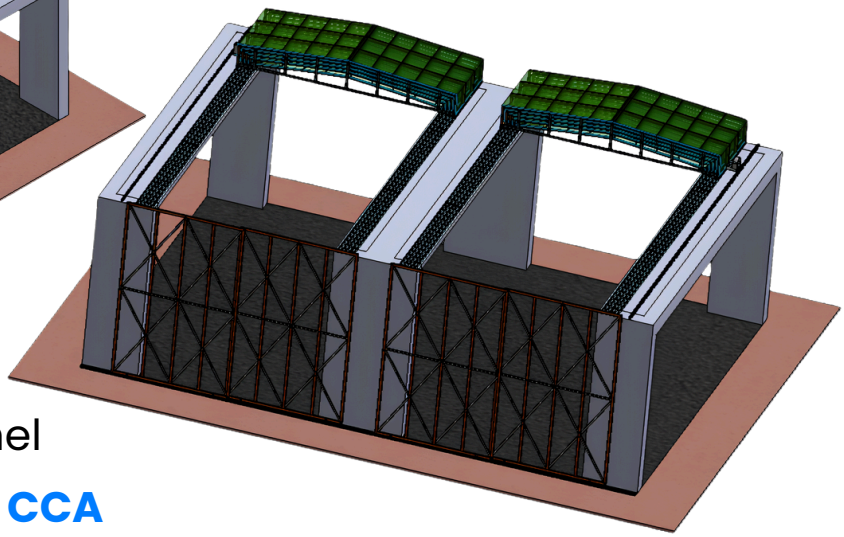

The NIHVA Retractable Roof Panel System is designed to streamline transformer **Assembly line** operations by combining a dust-free enclosure, controlled roof opening, safe material handling, and seamless EOT crane accessibility.
The Retractable Roof Panel System provides a clean, dust-controlled workspace while enabling automatic roof opening for overhead crane operations. Only the required roof section opens and closes automatically, ensuring smooth movement and assembly of heavy transformer components while maintaining continuous, efficient production.

FUNCTIONING

CCA **SHOPLINE**

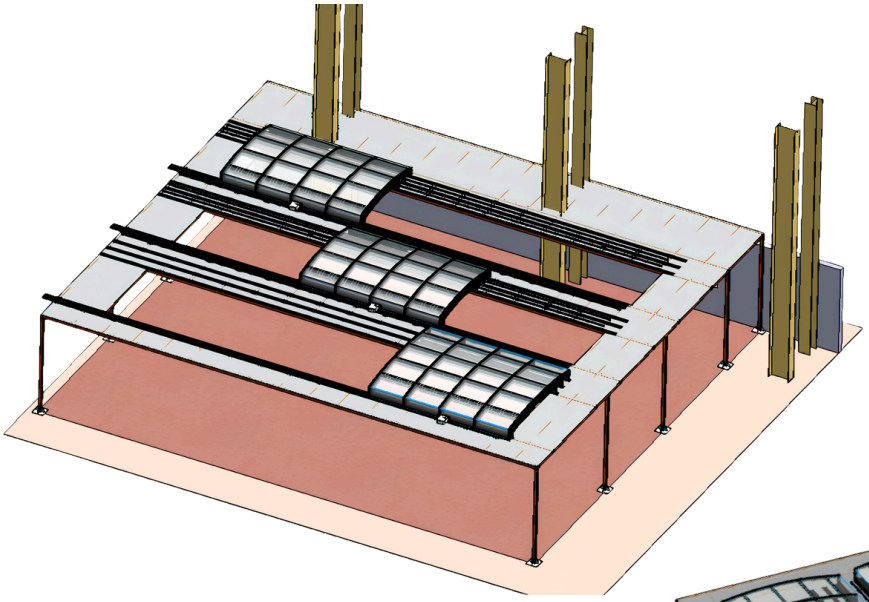

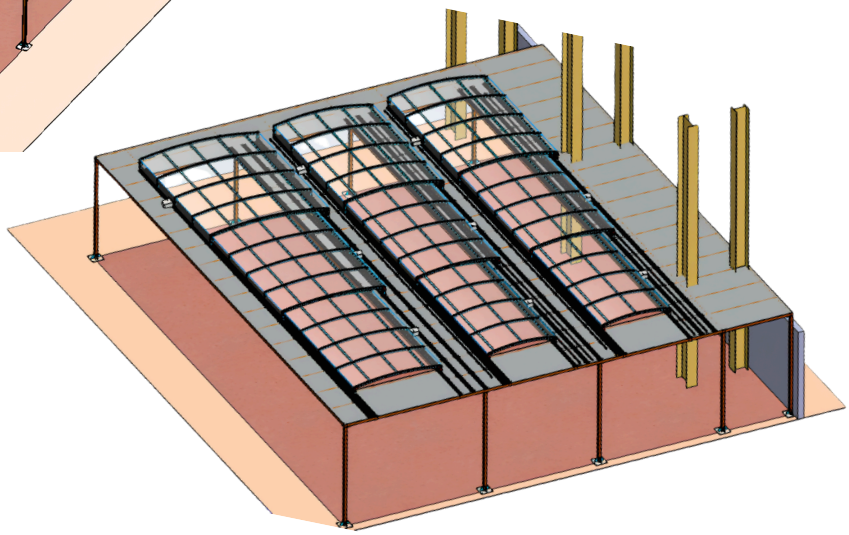

The NIHVA Retractable Roof Panel System is designed to enhance **CCA Shopline** operations by combining a dust-free enclosure, controlled roof opening, safe material handling, and seamless EOT crane accessibility.
The Retractable Roof Panel System provides a clean, dust-controlled workspace while enabling automatic roof opening for overhead crane operations. Only the required roof section opens and closes automatically, ensuring efficient handling of CCA coils and components while maintaining uninterrupted production and a contamination-free environment.

FUNCTIONING

COLLAPSIBLE **ROOF**

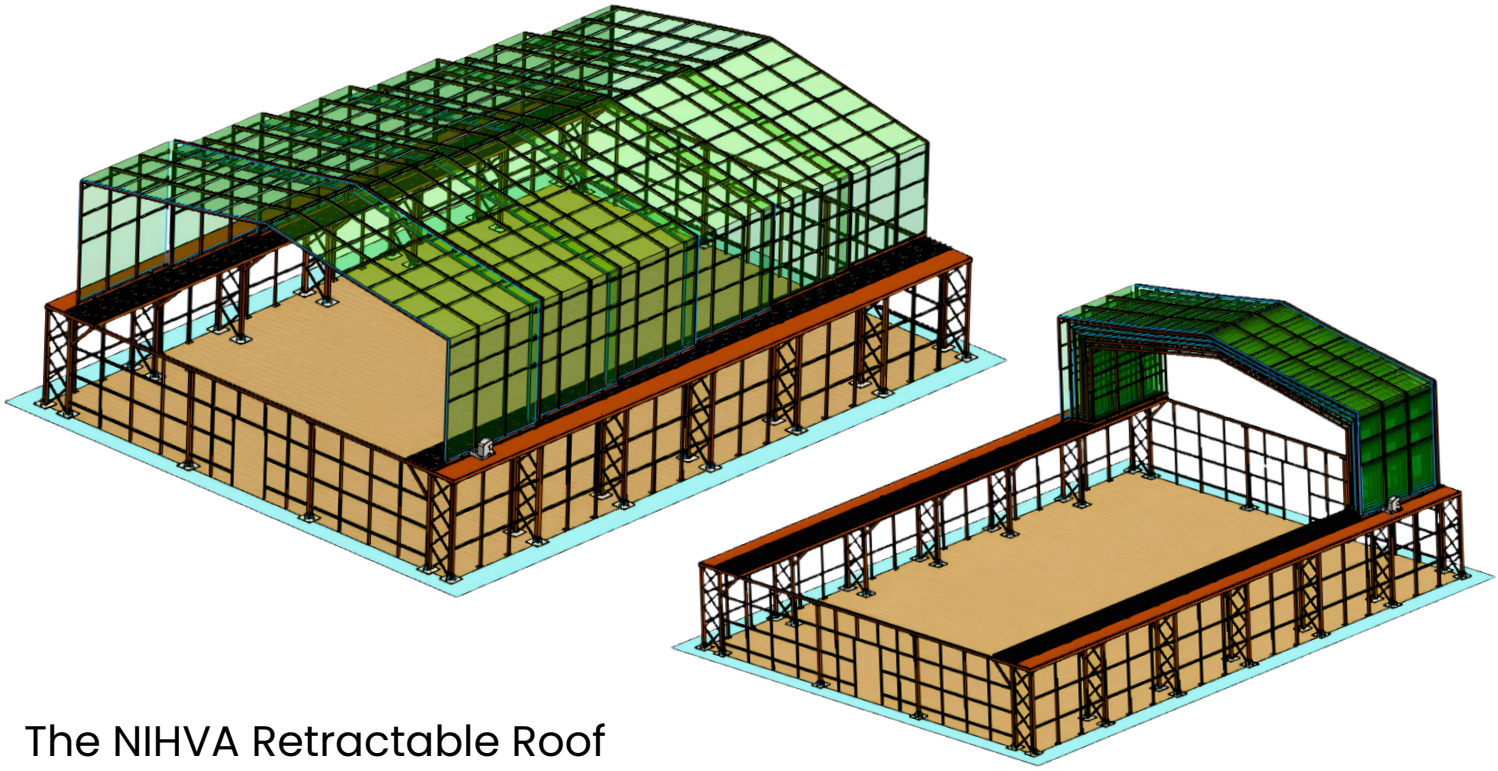

COLLAPSIBLE ROOF

The NIHVA **Collapsible Roof System** provides flexible roof access while maintaining a clean, protected workspace for industrial operations.

The system opens only the required roof section for EOT crane access and closes automatically after material handling, ensuring a weather-protected, dust-controlled environment and uninterrupted production.

FUNCTIONING

CORE **ASSEMBLY LINE**

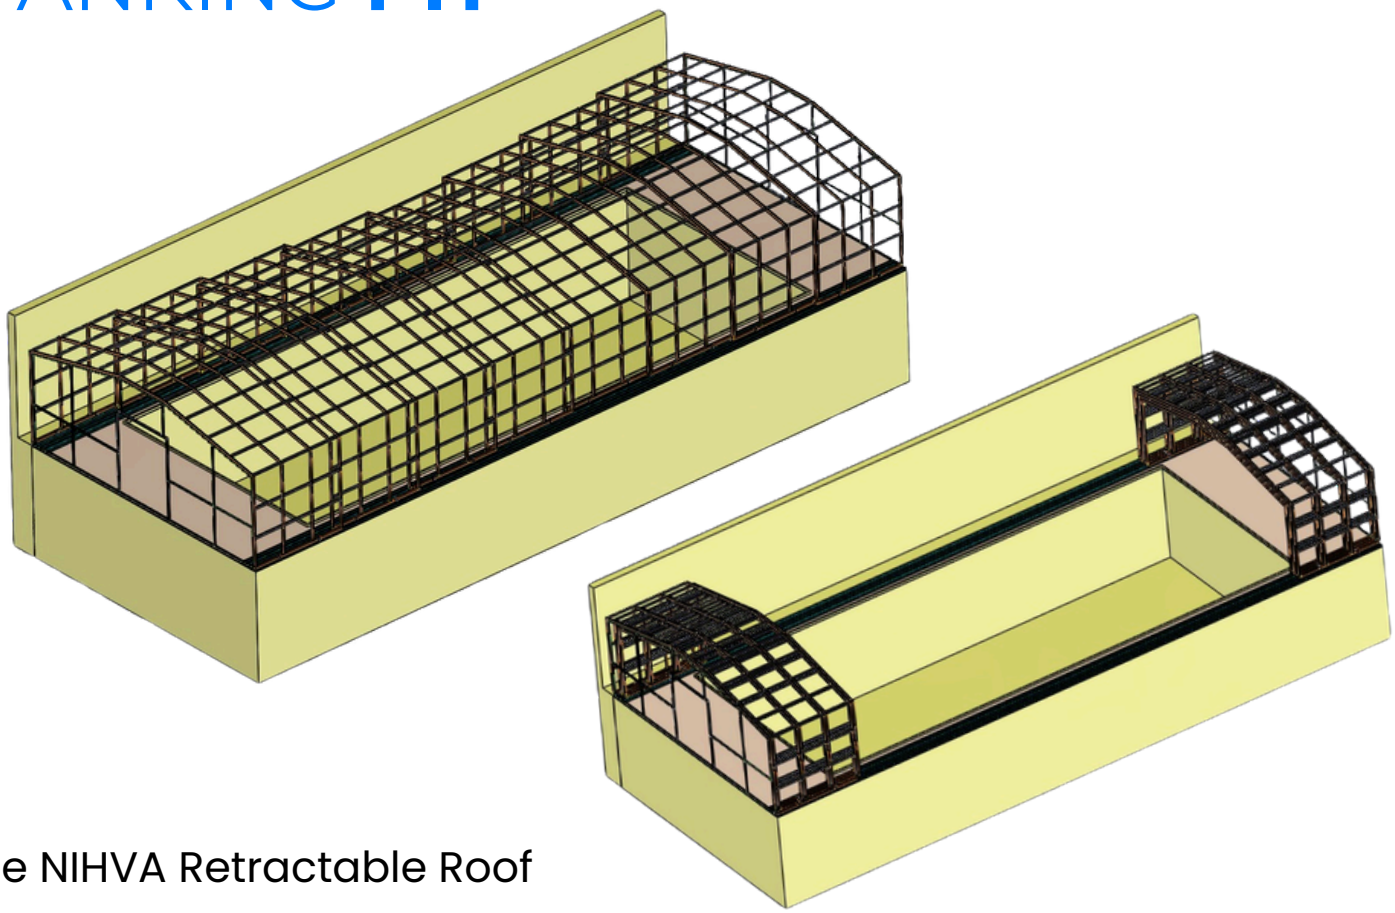

The NIHVA Retractable Roof Panel System is designed to support **Core Assembly Line** operations by providing a clean, dust-controlled workspace with seamless EOT crane accessibility.

The system opens only the required roof section for overhead crane operations and closes automatically after material handling, ensuring safe core assembly, efficient workflow, and uninterrupted production.

FUNCTIONING

TANKING **PIT**

The NIHVA Retractable Roof Panel System is designed to support **Tanking Pit** operations by providing a clean, protected workspace with seamless EOT crane accessibility.

The system opens only the required roof section for overhead crane operations and closes automatically after material handling, ensuring efficient transformer tanking, safe operations, and uninterrupted production.

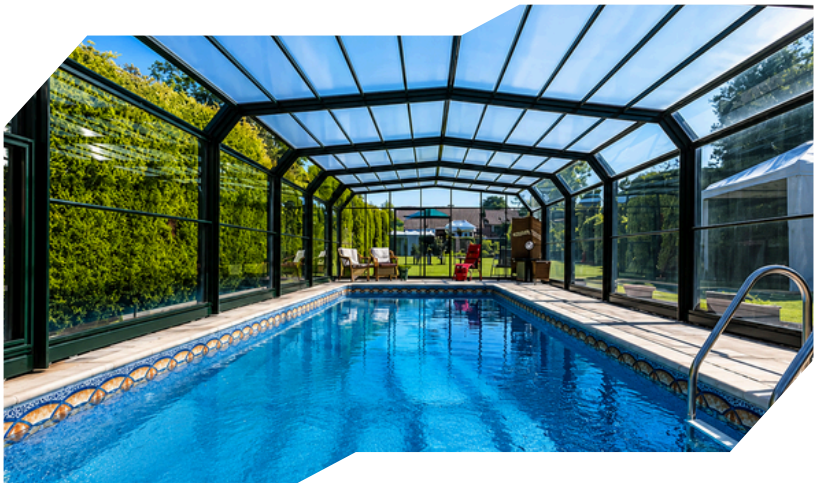

FUNCTIONING

SHIVAAH:

SHIVAAH provides customized retractable roofing solutions tailored to the unique needs of industrial facilities and manufacturing plants. Designed for durability, automation, safety, and reliable performance, each system enhances operational efficiency and supports uninterrupted production.
