Contact No.: 9960338889

Project Name and Location: Vertical Lifting Fabric Door & Structure (Supply & Installation) at Serum Institute

Dear Sir,

Thank you for giving us an opportunity to participate with our offer on the above project. We enclose herewith our proposal which includes:

A. Requirement
B. Proposal
C. Terms and Conditions
D. Pricing

By choosing ASSA ABLOY Entrance Systems as the supplier of your door automation products, you will receive the following advantages:

- You are working with a Global Provider with financial strength and over 50 years' experience of the global market place in Entrance Solutions.
- World leading products ensure excellent reliability and life-cycle costs to give you peace of mind.
- Project support for both specification development and design suitability
- A comprehensive product helping to provide value engineered solutions

Major Benefits using Megadoor

- No floor track (and therefore no concrete grade beam) needed; a substantial saving in civil cost.

- Faster opening and closing time due to vertical lifting, resulting in a substantial reduction in loss of energy.

- Minimal side-room required (no "door pockets"); a substantial saving in space and cost of land, this is especially relevant, when a series of hangars are built adjacent to each other.

- The doors have very tight sealing, to protect against water, sand and dust ingress, which is essential for a maintenance hangar.

We wish you success with your project and hope that we may be part of your current & future projects as a solution provider. We will follow up this quotation with a call to you within the next few days.

If you have any questions after reading this proposal, or if you need more information, please do not hesitate to contact us.

Kind Regards,
Ms. Varsha

Description: -

The door leaf consists of two sheets of PVC-coated polyester fabric that withstand a temperature of –35 to +70 degrees C. Intermediate horizontal aluminum sections are fitted between the inner and outer fabric.

The door leaf is opened by belt/wire ropes attached to the bottom section, these are wound up onto a hoist unit. The TUV Approved safety arrester will prevent the door from falling in the unlikely event of wire failure. A windlock system is also included to prevent the door from lifting under high wind load conditions.

The door leaf is guided with aluminium side-guides mounted in the doorframe.

The door is available in the following standard colors: Red (RAL 3001), Blue (RAL 5005), Grey (RAL 7004), White (RAL 9016), Tan (RAL 1001), Green (RAL 6009) or Translucent White. Other colors are available at an extra cost.

The door is operated via PLC based control panel. The enclosure of the control cabinet meets the specifications of protection class IP65, Push buttons IP65 and Gear motor IP55

Electrical cables as per EN regulations.

For more technical details: **Enclosed attachments**

Commercial Offer: -

A) Supply of – Vertical Lifting Fabric Door

Sr. No	Description	High sea sales Price/Each in Rs (By sea freight) includes custom clearance, transport, unloading	Total Price in INR	Delivery (By sea)

General conditions of Aircraft Hangar Door

1. Continuous uninterrupted access to any single door section or as agreed separately.

2. A clear floor area of 4 meters each side of the door leaf must be available during the curtain fitting process. The floor should be finished or if this is not possible, adequate temporary protection be made available to prevent damage to the curtain material.

3. 400 volt / 50Hz 3 phase isolator to be fitted to within 1 meter of the door main control panel. If not available at the start of installation, a temporary supply is acceptable. Any return visits to commission the doors due to permanent power not being available will be charged as appropriate.

4. Provision of 230 Volt power supply (by others) for hand tools.

5. A dry and secure area, not in direct sunlight, is to be provided for storage of the door components.

6. Access to site between 7 am to 6 pm six days per week. If this is not possible the installation programme may require amending.

7. Any storage costs for materials due to delays outside of Mega door's control will be charged to the main contractor.

8. The project time indicated does not take into account adverse weather conditions that may prevent safe and efficient working practices. We reserve the right to extend the period accordingly.

9. Any passes required for the project, are the responsibility of the Customer and Contractor and must be available, before commencement of the installation. Any delays caused by the non-availability of passes, will be charged accordingly.

Inclusions

1. Our proposal includes sea freight from Sweden to Site and installation of the door leaf, guide rails, weather seals, motors, control panel and electrical wiring. (Please refer Exclusion)

2. A pre-installation inspection will be carried out, by our Project Manager, before our installers travel to site, so as to verify that the structural steelwork and electrical installation are as per our requirements. Our Project Manager will also check that the installation equipment and facilities are ready for installers.

3. Please note that the control panels, motors and electrical wiring are in full compliance with Swedish regulations and specifications, any variations due to specific requirements for India must be notified to us at the time of ordering and may be subject to an increase in the price. Any variations notified to us, after material procurement, will be charged accordingly and may lead to production delays.

4. Conduits and Cable trays from the control panel locations to the door distribution boxes.

5. Lifting Equipment's required for installation.

6. Additional support Structure required for door mounting

Exclusions

1. Any passes required for the project, are the responsibility of the Contractor and must be available, before commencement of the installation. Any delays caused by the non-availability of passes, will be charged accordingly.

2. Power supply and isolators adjacent to the control panels (to be done by electrical contractor).

3. Any Civil work is in client scope.

4. A 400/230 power supply (permanent or temporary) must be provided (FOC) by the main Contractor during the installation of the door for power tools and testing of the door sections during erection.

5. A safe storage / pre-assembly area for the door materials (by main contractor).

6. Any additional tests or certification, which are not within our scope of works but may be required by the Consultant or Client, these will be carried out or provided, subject to the actual requirements but will be at additional cost (by main contractor).

Please feel free to Contact Mr. Arjun Patil on 08551096333 For any further Clarification / Information in this concern.

ASSA ABLOY Entrance Systems

One partner for all your automatic entrances

ASSA ABLOY Entrance Systems comprise world-leading products, maintenance programs and modernization services, ensuring total solutions for efficient flow of people, goods and vehicles. With comprehensive entrance solutions for the front, back and interior of your building, we put every automatic door equipment or service you need under one roof.

The perfect match for your building
ASSA ABLOY Entrance Systems' extensive product range, expert application knowledge and maintenance programs provide optimal entrance solutions for all needs and any demands in manufacturing, distribution & logistics, retail, healthcare, transportation, hospitality, private services, public services, mining and air & sea, and more.

Sustainable Solutions
We design, manufacture and service automatic entrance solutions that help you reach your sustainability goals for energy savings and minimal environmental impact.

Leading product brands backed by dedicated specialists
With our three specialized business areas; Pedestrian Door Solutions, Industrial Door & Docking Solutions and High-Performance Door Solutions, we offer market-leading product brands and a global service organization. With more than a century of aggregated engineering experience and application expertise ASSA ABLOY Entrance Systems is your ideal business partner to provide, maintain and modernize all of your automatic entrances.

Pedestrian Door Solutions

- swing doors
- sliding doors
- revolving doors

Industrial Door and Docking Solutions

- industrial doors
- complete docking systems
- hangar doors

High-Performance Door Solutions

- high speed roll doors
- doors for special applications such as clean rooms, machine protection and food processing
