NIHVA

NIHVA Technologies Pvt. Ltd.

Automation Solutions

We Make Possible…!

Mission & Vision

- Nihva Technologies Automation solutions is one step solution provider for all automation needs of customer
- Our Mission is to provide optimized & integrated solution & services to industries using leading edge information , communication , automation & technologies .
- Our vision is to be a leader in the field of Automation Solutions through regular developments , quality services by meeting total customer satisfaction to help our customer to achieve their business targets by adding operational intelligences.
- We are determined to use leading edge technology , years of experience & knowledge in providing innovative solutions delivering High return on investments.

THATS THE WAY WE DO

CUSTOMER RFQ → CONCEPTUAL MODELING → APPROVAL FROM CLIENT (DAP APPROVAL)

APPROVAL FROM CLIENT (DAP APPROVAL) → SYSTEM MODELLING

SYSTEM MODELLING → DESIGN STRESS ANALYSIS → MANUFACTURING & ASSEMBLY

MANUFACTURING & ASSEMBLY → FAT AT NIHVA → INSTALLATION & COMMISIONING → CUSTOMER REVIEW

TRAINING TO CUSTOMER & SERVICE

SYSTEM : Yes We Do Follow

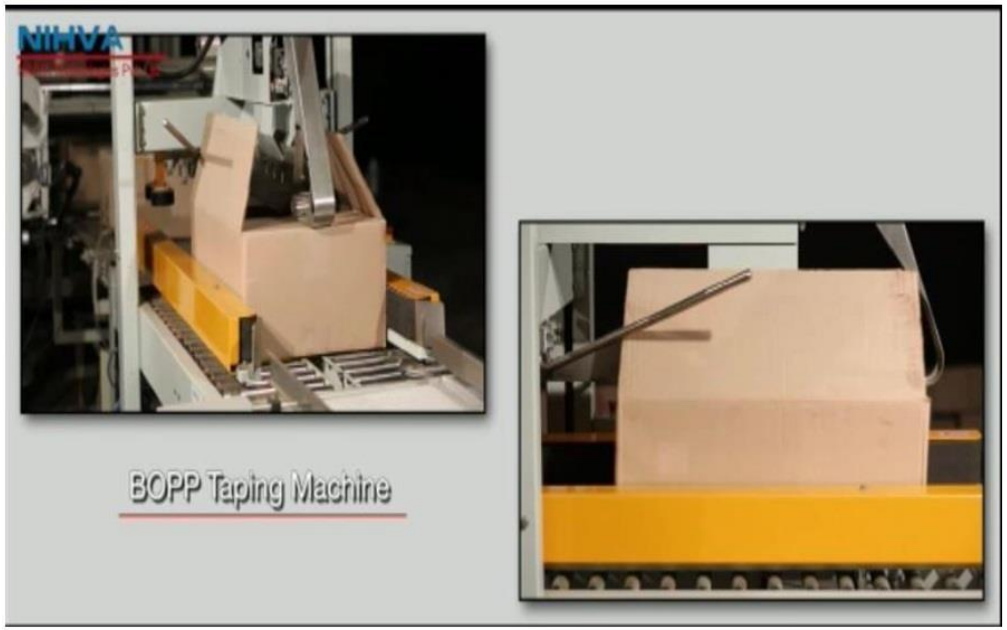

ISO CERTIFICATIONS : **TUV CERTIFIED ISO 9001:2015**
QUALITY PRACTICES : 3C & **5S**
SOFTWARE STRENGTH : **SOLID WORKS 2016** **AUTOCAD 2016LT**

Product portfolio

1. Seconadry packaging machine.
    - 1.1 Pouch into box.
    - 1.2 Pouch into bag.
    - 1.3 Pouch into pouch.
    - 1.4 Bottle into film .
2. Plant automation solution.
3. Robitic application.
4. Dairy automation.
5. Case erector.
6. Case tapping machine.
7. Palletizing Automation.
    - 7.1 Robotic palletizing.
    - 7.2 Gantry palletizing.
    - 7.3 Level palletizing.
    - 7.4 Pallet dispenser.
8. Conveyor traffic management.
9. Gantry system.
10. Conveyors.

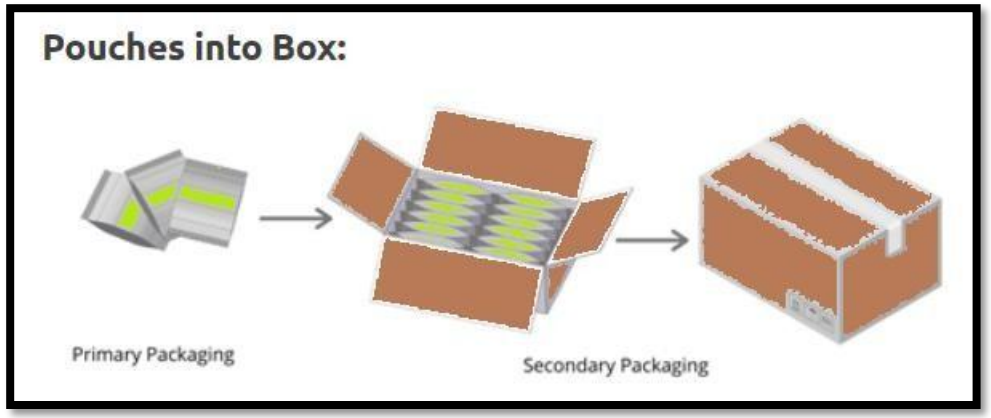

1.Seconadry packaging machine

1.1 Pouch into box

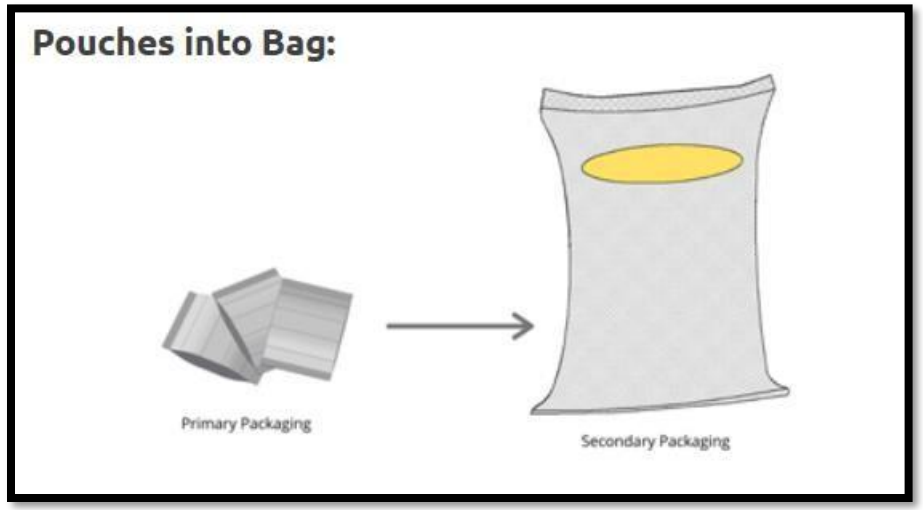

Nihva automation manufacturing pouch into box secondary packaging machine.
These machine are used in Food , Pharma, dairy & other related industries.
All such type of machines are custom based as per requirement. We provide online counting of pouches , making online pouch matrix, Online box making, box filling by pouches, online taping of box

Features:

1. Online pouch counting.
2. Online Weight measurement.
3. Online matrix formation.
4. Safety .
5. More efficient.
6. Eliminate labor cost.
7. Environmental friendly.

1.2 Pouch into bag.

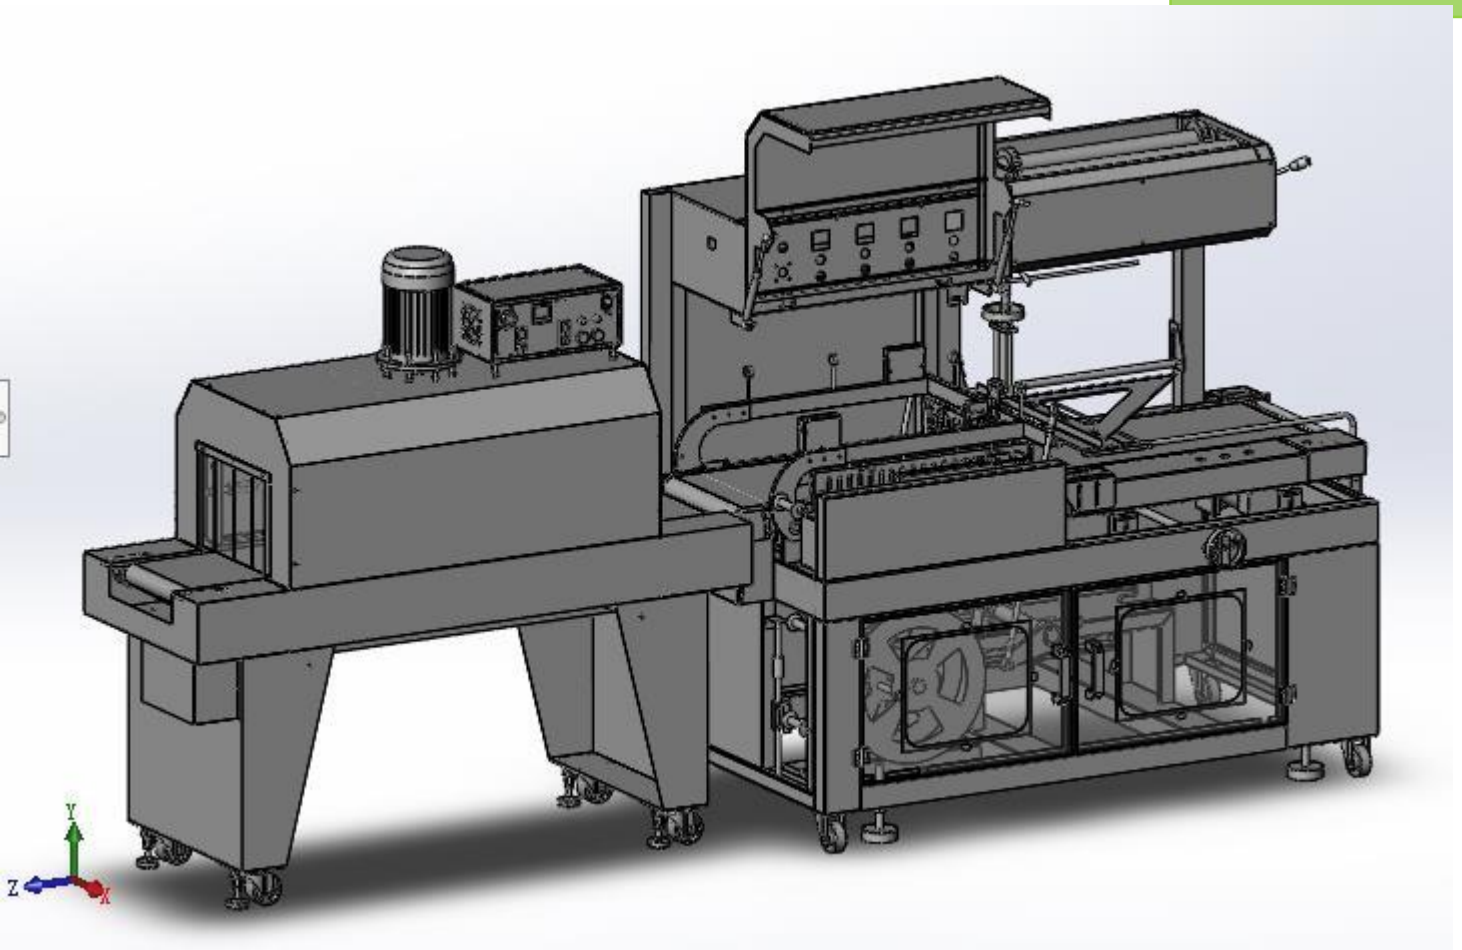

Nihva automation manufacturing pouch into bag secondary packaging machine.
These machine are used in Food , Pharma, dairy, seeds, tobacco, fertilizer, animal foods related industries. All such type of machines are custom based as per requirement. We provide online counting of pouches , making online pouch matrix, Online bag mouth opening, bag filling by pouches, online stitching of bag and weighing of bag.

Features:

1. Online pouch counting.
2. Online Weight measurement.
3. Online matrix formation.
4. Safety .
5. More efficient.
6. Eliminate labor cost.
7. Environmental friendly.

1.3 Pouch into pouch

Nihva automation manufacturing pouch into pouch secondary packaging machine.
These machine are used in Food , Pharma, dairy, seeds, tobacco, animal foods related industries. All such type of machines are custom based as per requirement. We provide online counting of pouches , making online pouch matrix, Online film feeding, Film cutting and sealing, Wrapping of film by shrink tunnel.

Features:

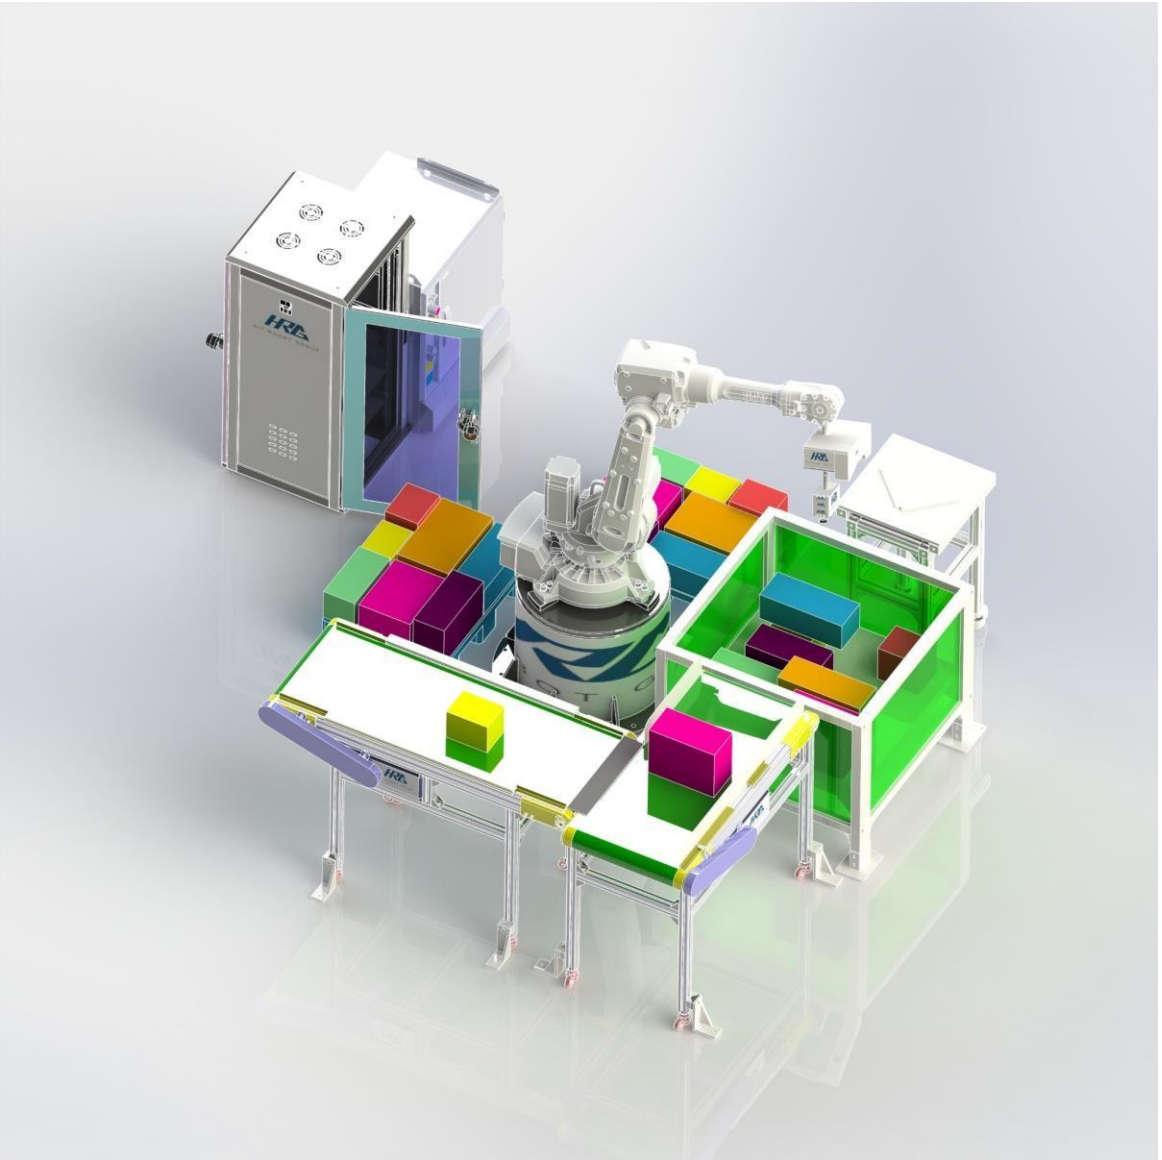

1. Online pouch counting.
2. Online Weight measurement.
3. Online matrix formation.
4. Safety .
5. More efficient.
6. Eliminate labor cost.
7. Environmental friendly.

2.Plant automation solutions:

- Plant automation solutions are the solutions where complete plant material is handled by automatically specially in food , pharma, animal food, cement industries, seed industries, Fertilizer industries, Etc.
- Which include secondary and tertiary packaging machine, conveying line and many more machines included in plant automation.

3.Robotic application

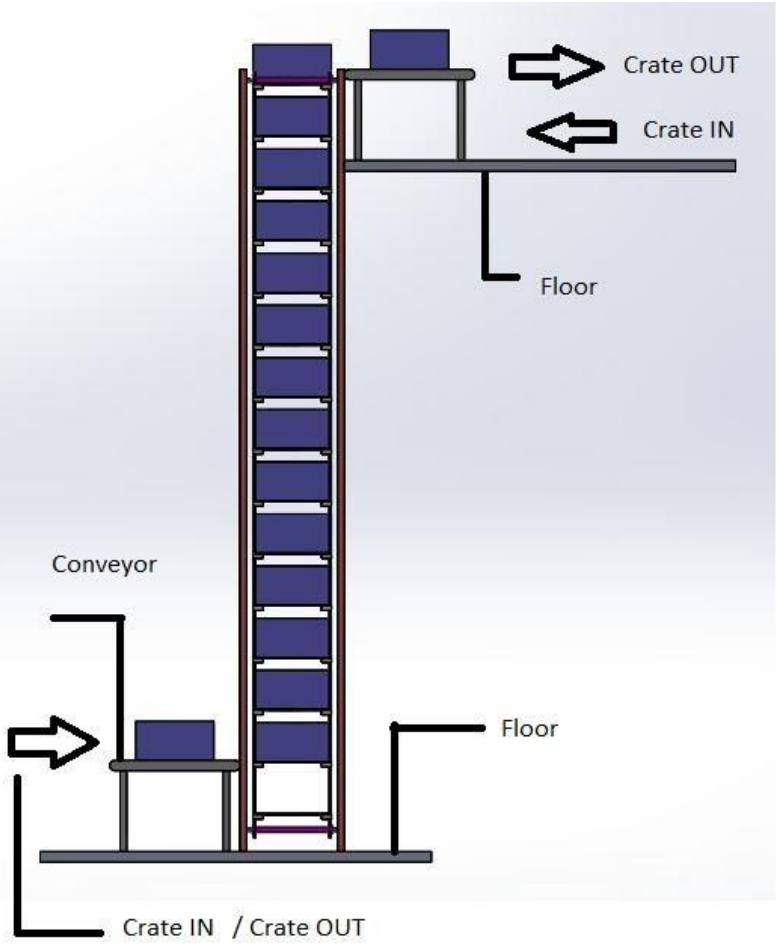

We are solution provider for various robotic application. By robot we can do following activities.

1.Bag matrix formation.
2.Pouch matrix formation.
3.Crate matrix formation.
4.Palletizing of bag, pouch, box.
5.Sorting of product.
6.Pick and place application can be done.

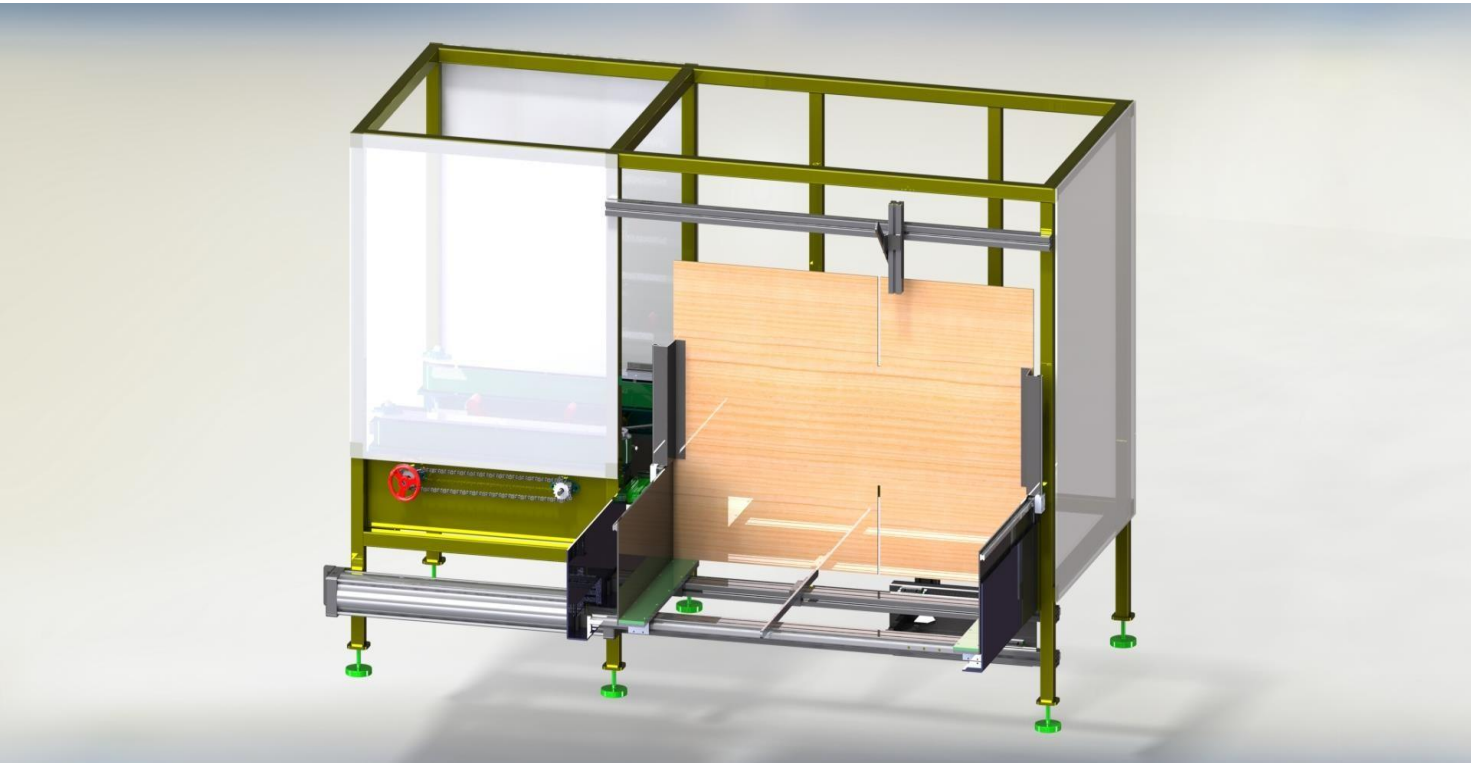

4.Dairy automation

4.Vertical lift conveyor:-

- It is used for conveying in small space
- It is used for conveying Crates & bags.
- It can be moved C shape, Z shape.
- It can carry various products up to 600 kg(total).
- Size of conveyor is designed as per requirement.
- For dairy , food & pharma industries we can use
- Easy to clean ,
- Easy to maintain.
- Easy to replace clits as it is modular.
- It comes in PVC modular belt and chain.
- Sizes of conveyor is as per requirement.

5.Case erector

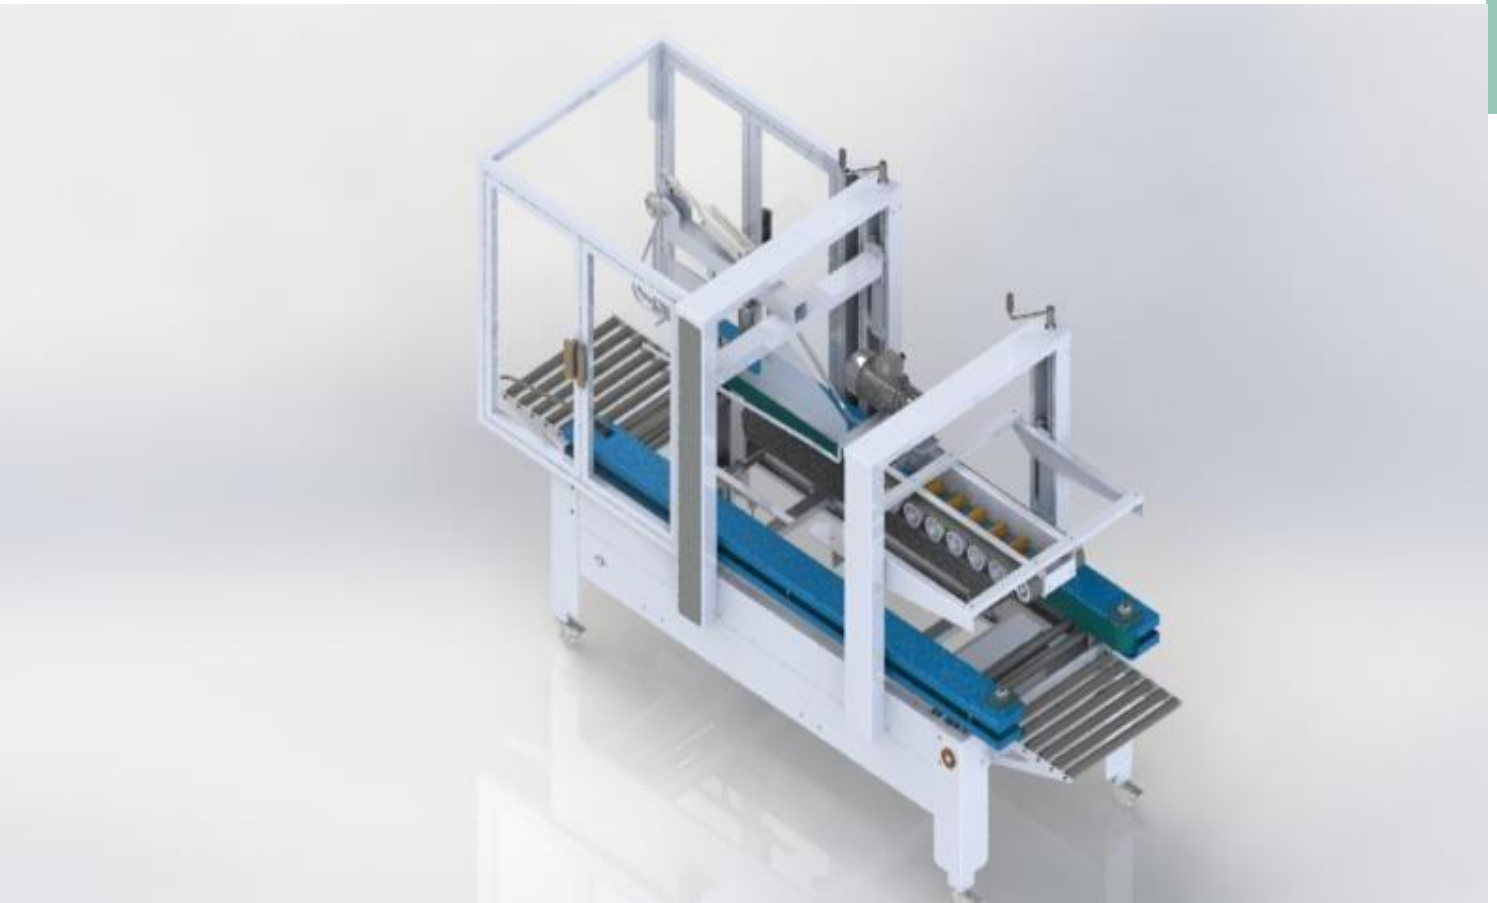

c

Case erector.

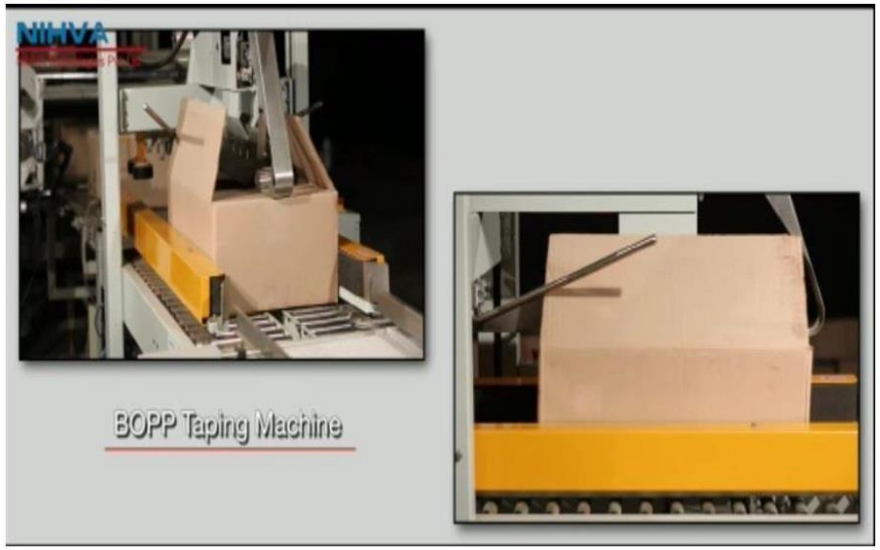

1. Case erector is used for forming of case blank to formed case.
2. Labeling of bottom tape.
3. Size of the carton up to 600mm L x 500mm W x 400 mm H.
4. No of carton /min-10 pc/min.
5. Length , width and height is adjustable.
6. Fully automated machine.

6.Case tapping machine

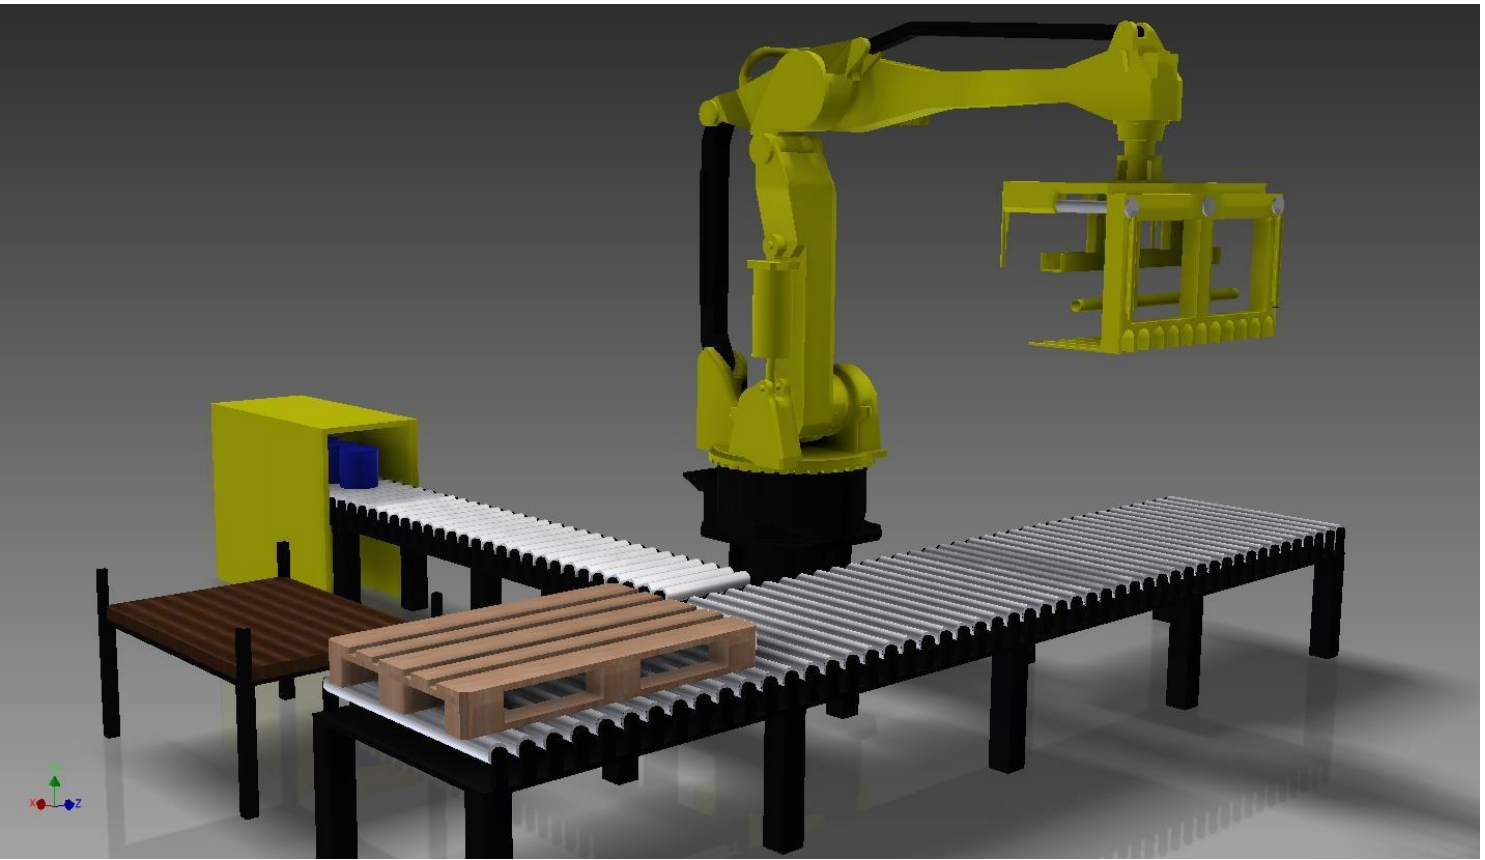

Case tapping machine.

1. Case tapping is used for pasting of tape on top side of formed case.
2. Labeling of top tape.
3. Size of the carton up to 600mm L x 500mm W x 400 mm H.
4. No of carton /min-10 pc/min.
5. Length , width and height is adjustable.
6. Fully automated machine.
7. Width of tape 50mm, 75mm, 100mm.

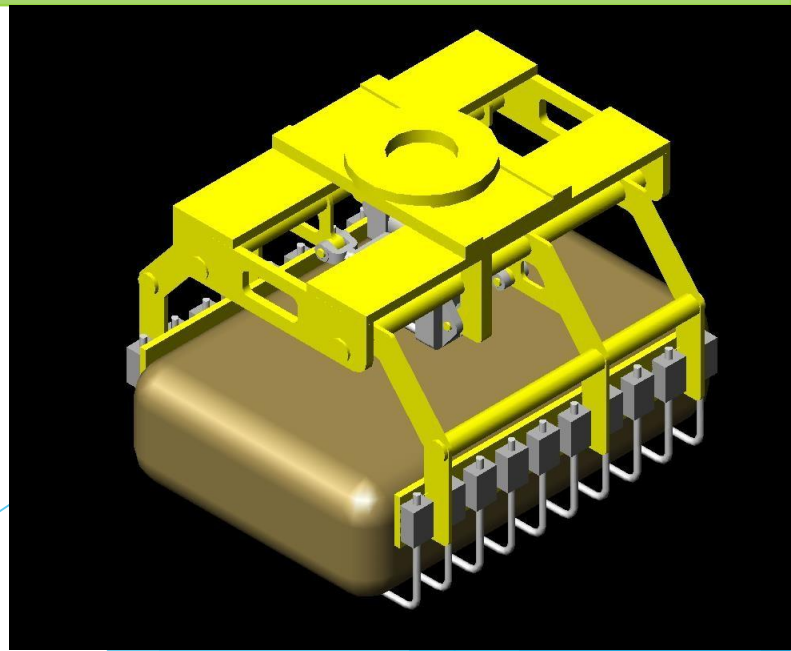

7.Palletizing automation

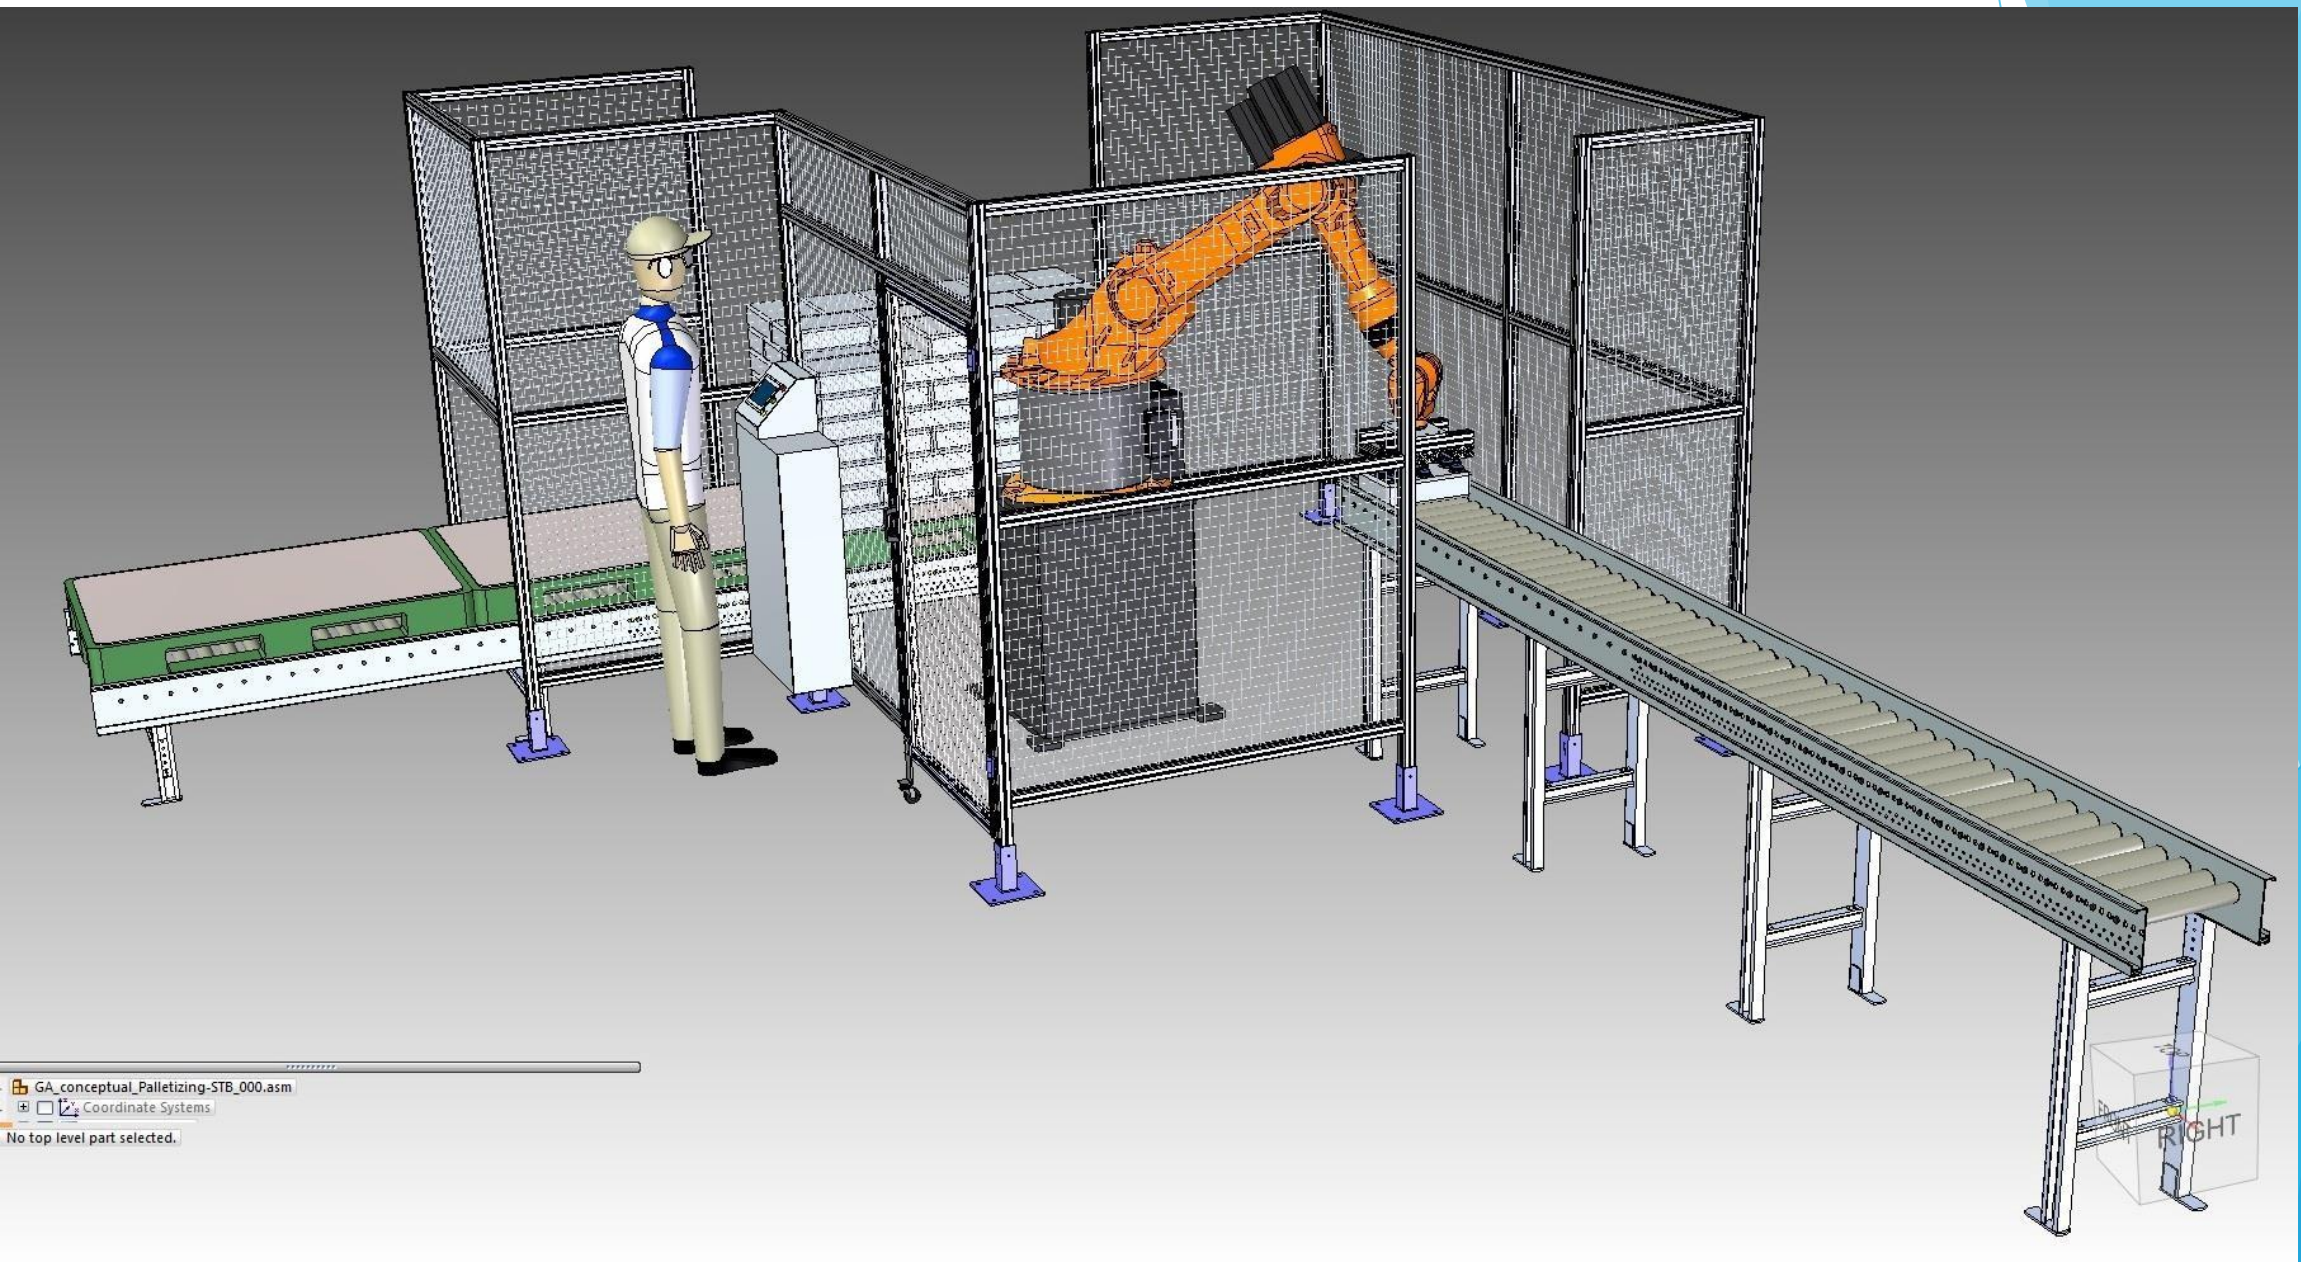

7.1 Robotic palletizing

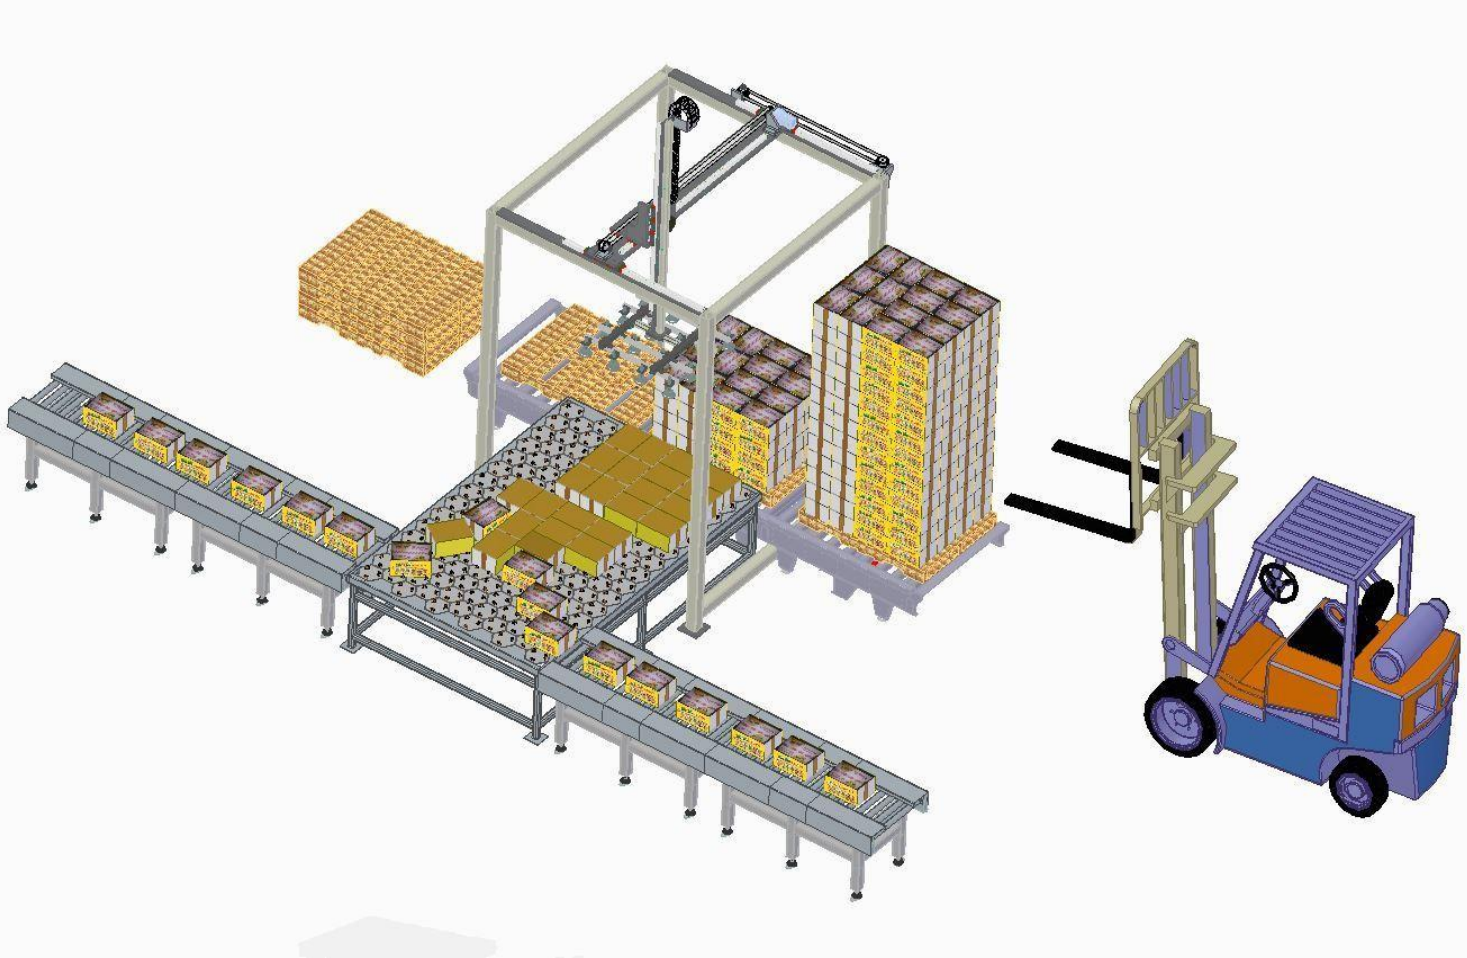

Robotic palletizing.

1. We supply and integrate robotic palletizing and de-palletizing system.
2. It is used for Box, bag, bottle, tin &buckets
3. This type of application can save lot of time with accuracy.
4. Can be customized to any height to any weight.

RIGHT

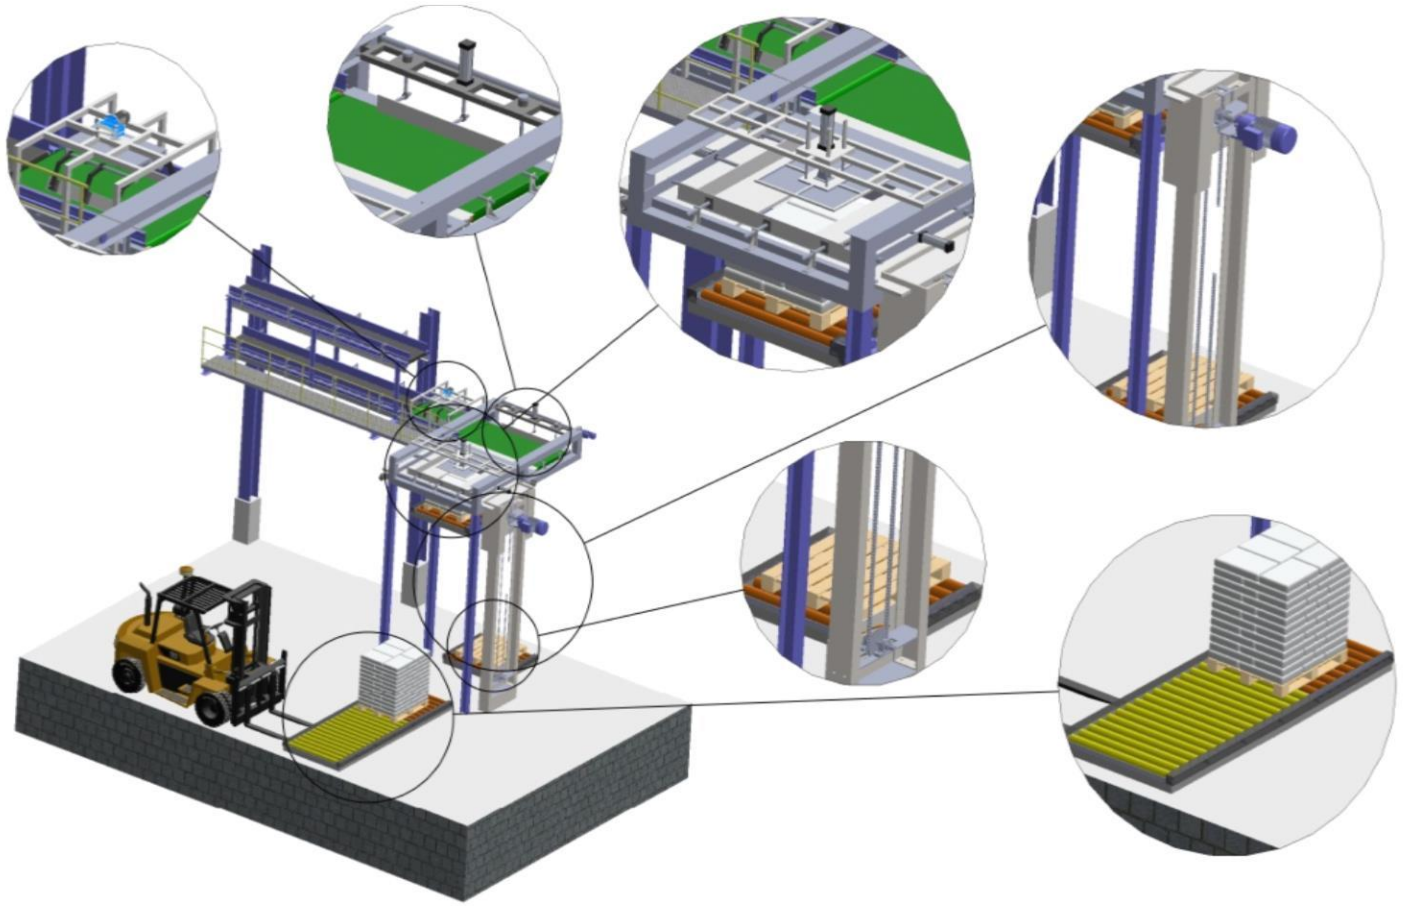

7.2 Gantry palletizing

Gantry palletizing.

1. We supply and integrate gantry palletizing and de-palletizing system.
2. It is used for Box, bag, bottle, tin &buckets
3. This type of application can save lot of time , space, and money.
4. Can be customized to any height to any weight.
5. This is low cost and robust technology.

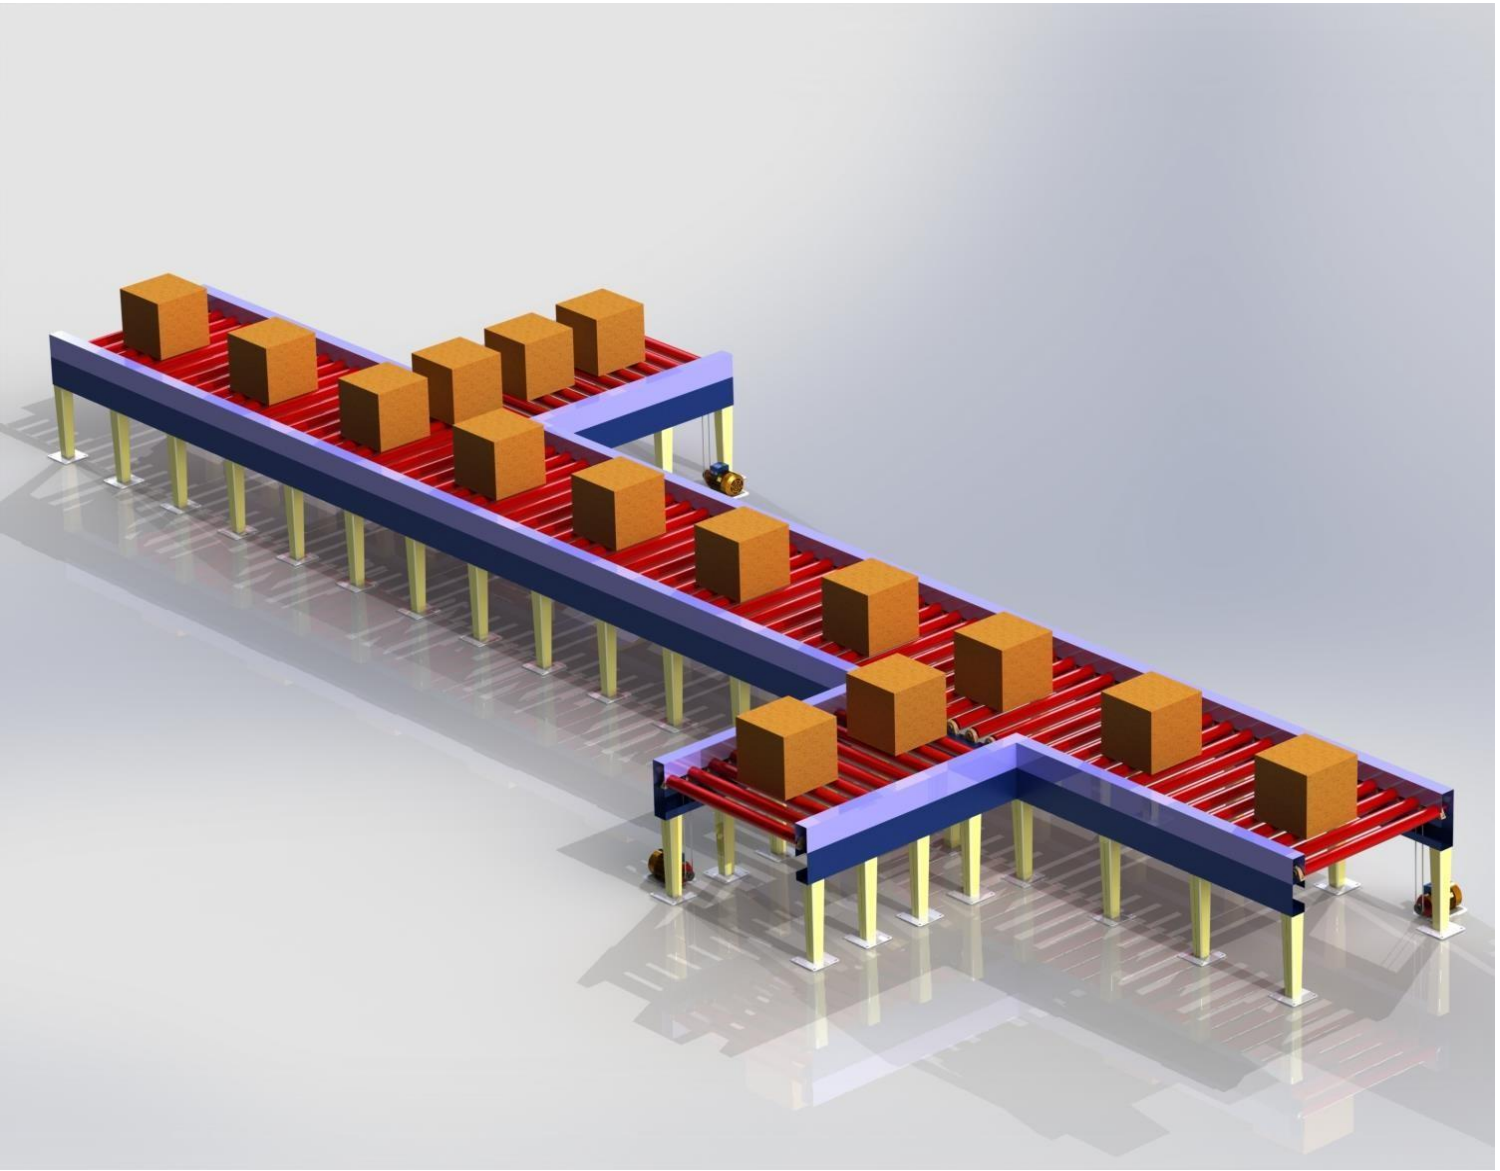

7.3 Layer palletizing

Layer palletizing.

1. It is low cost solution of palletizing
2. It is used for Box, bag, bottle, tin &buckets
3. This type of application can save lot of time with accuracy.
4. Can be customized to any height to any weight.
5. It is overhead type.

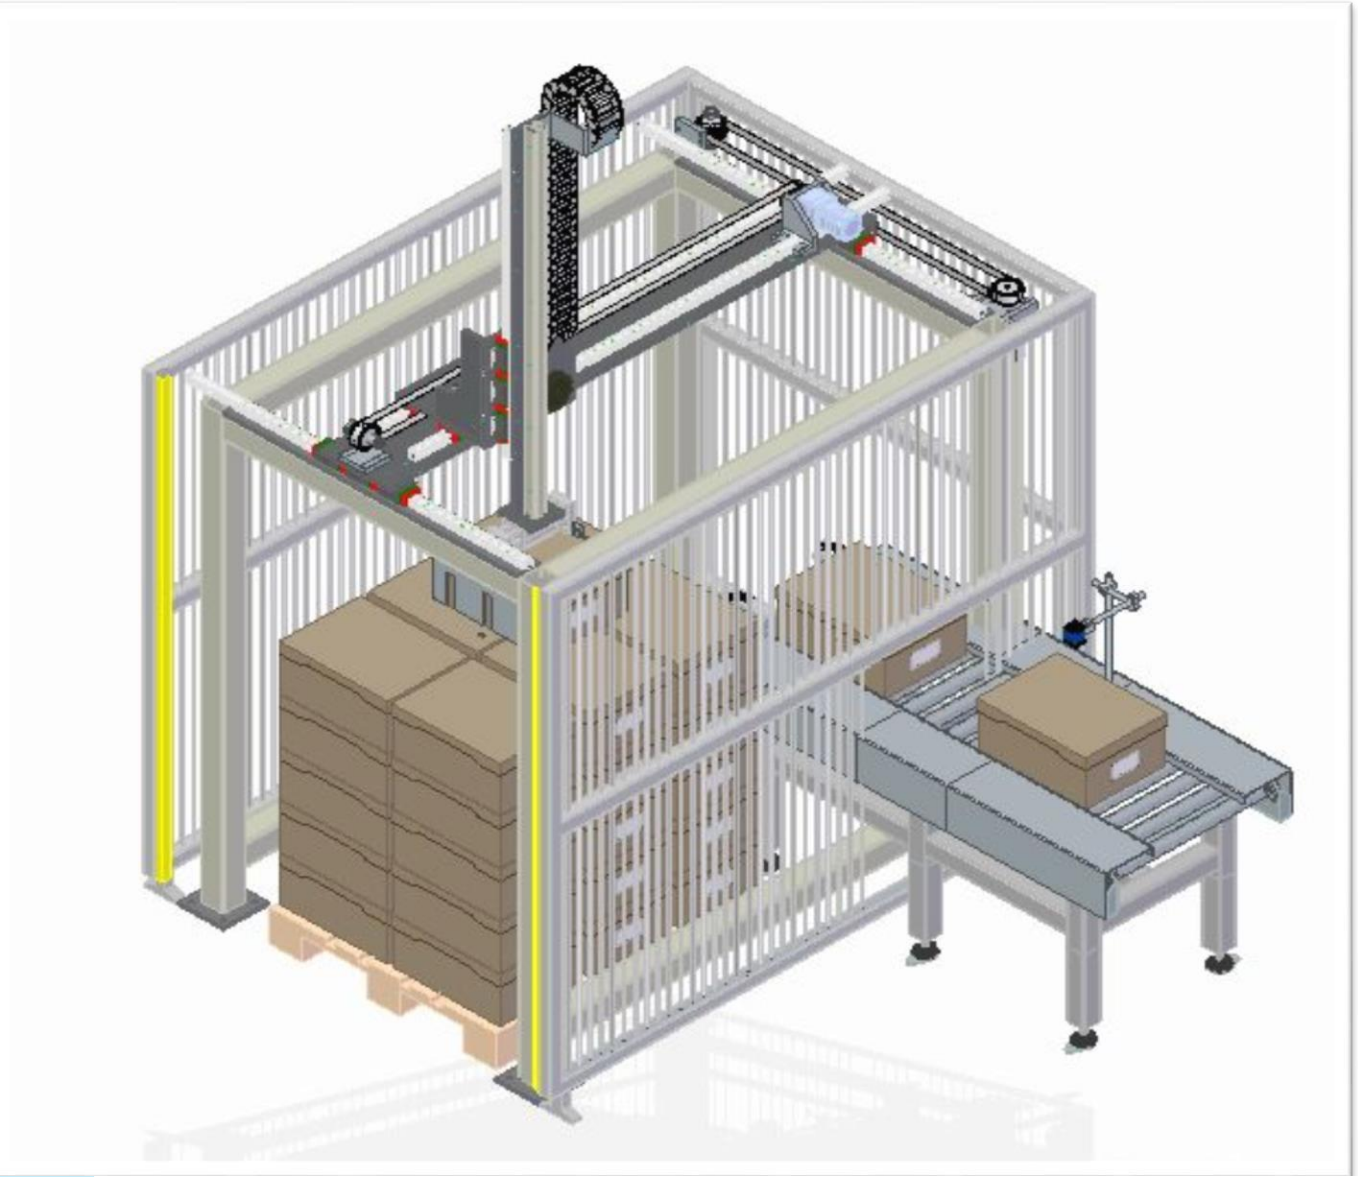

8.Conveyor traffic management

Conveyor traffic management.

1. In this no. of conveyors are connected to express conveyor.
2. Traffic management is works on sensors.
3. It is used for Box, bag, bottle, tin &buckets
4. It is tailor made conveyors.

9. Gantry system.

Gantry system

1. It is used for pick and place at X,Y&Z axis with rotation.
2. It is used for Box, bag, bottle, tin &buckets.
3. This is works on servo motors.
4. Can be customized to any height to any weight.
5. This is low cost and robust technology.

10.Material handling conveyors.

Flat belt conveyor.

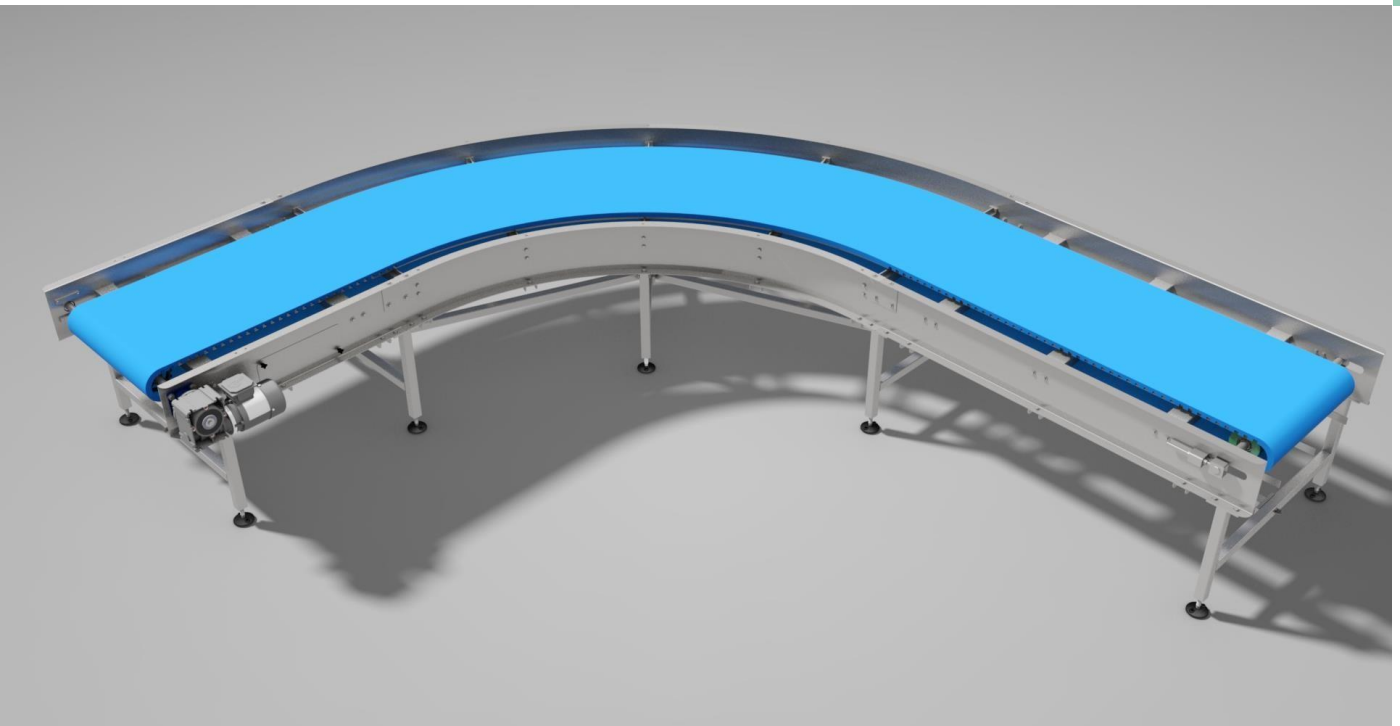

Flat belt conveyor:-

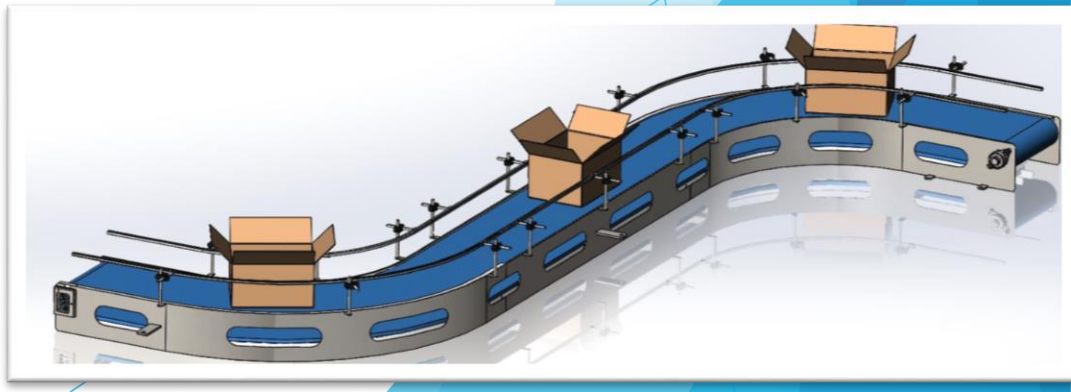

- It is used for manual packaging.
- It is used for printing and labeling.
- It is used for inspection purpose.
- It can carry various products up to 100 kg.
- Size of conveyor is designed as per requirement.
- For food and pharma industries we can use it.

90 deg. Conveyor.

90 deg. conveyor:-

- It is one of the simplest conveyor.
- It is used for conveying crates, box, pouches & bags.
- It can be moved 90 deg, 180 deg, 270 deg .
- It can carry various products up to 100 kg.
- Size of conveyor is designed as per requirement.
- For food and pharma industries we can use it.
- Easy to clean ,
- Easy to maintain.
- Easy is replace belt as it is modular.

Inclined & declined conveyor

Inclined and declined conveyor:-

- It is used for conveying inclined and declined material handling.
- It is used for conveying pouches & bags.
- It can be moved L shape, Z shape.
- It can carry various products up to 50 kg.
- Size of conveyor is designed as per requirement.
- For food and pharma industries we can use it.
- Easy to clean ,
- Easy to maintain.
- Easy is replace belt as it is modular.
- It comes in PU/PVC belt and modular belt.
- Sizes of conveyor is as per requirement.

Acclivitous conveyor

Acclivitous conveyor:-

- It is one of the simplest conveyor.
- It is used for conveying Namkeen, granules, grains & many more.
- It can be moved L shape and Z shape .
- It can carry various products up to 25 kg.
- Size of conveyor is designed as per requirement.
- For food and pharma industries we can use it.
- Easy to clean .
- Easy to maintain.
- Easy is replace belt as it is modular.

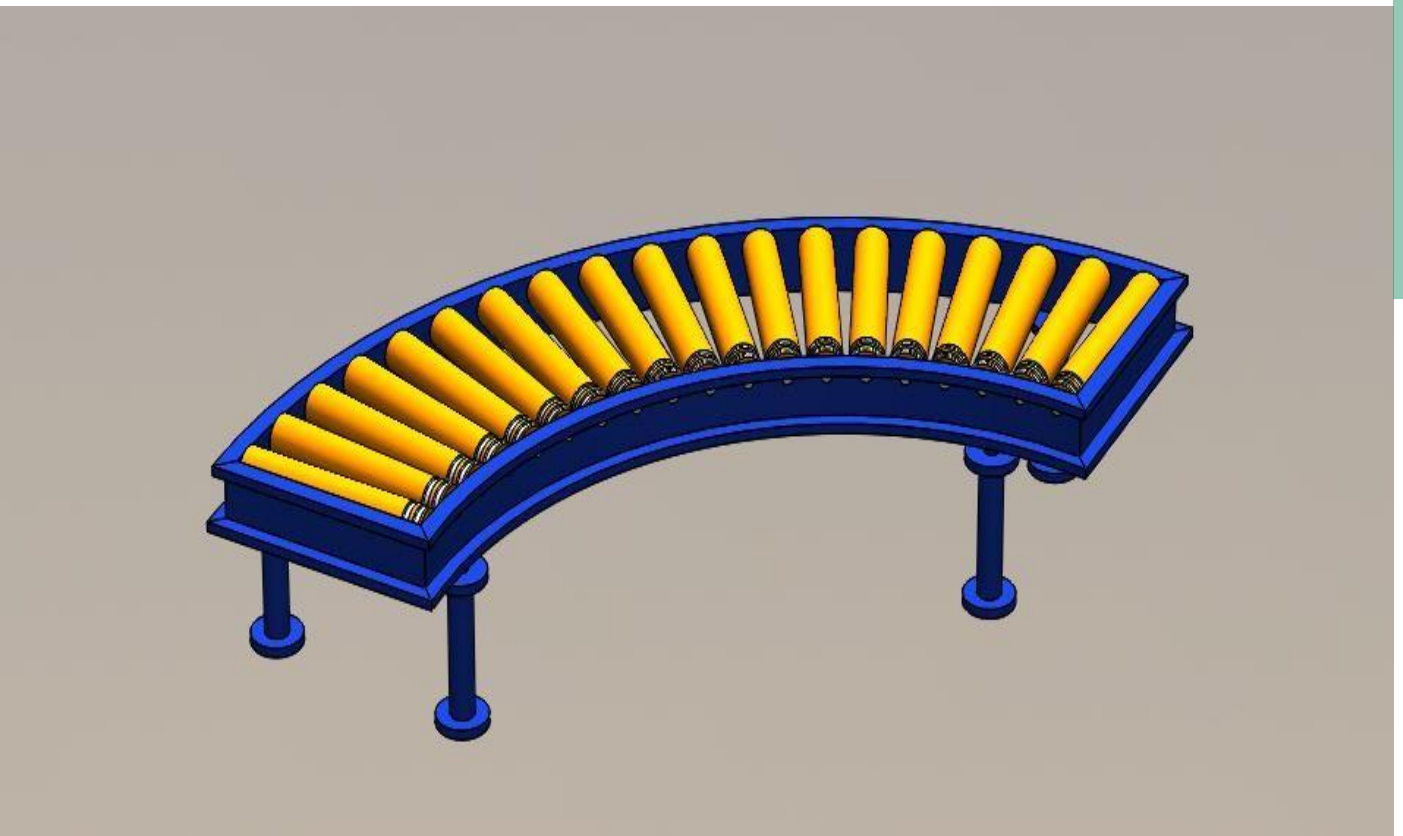

Take up conveyor

Take up conveyor:-

- It is used for conveying inclined material handling.
- It is used for conveying pouches & bags.
- It can be moved L shape, Z shape.
- It can carry various products up to 50 kg.
- Size of conveyor is designed as per requirement.
- For food and pharma industries we can use it.
- Easy to clean ,
- Easy to maintain.
- Easy is replace belt as it is modular.
- It comes in PU/PVC belt and modular belt.
- Sizes of conveyor is as per requirement.

Drive 90 deg roller conveyor

Drive 90 deg. conveyor:-

- It is one of the drive roller conveyor.
- It is used for conveying crates, box in 90 degree.
- It can be moved 90 deg, 180 deg, 270 deg .
- It can carry various products up to 100 kg.
- Size of conveyor is designed as per requirement.
- For any industries we can use it.
- Easy to clean ,
- Easy to maintain.
- Easy is replace roller as it is modular.

Telescopic conveyor

Telescopic conveyor

- It is used for loading and unloading vehicle.
- Products can be moved bag , box , etc
- It saves lot of time in loading and unloading.
- It can manufactured as per requirement.
- Robust design .
- For any industry it is useful.

7.Gravity roller conveyor.

1.Gravity roller conveyor:-

- It is one of the gravity roller conveyor.
- It is used for conveying crates, box
- It can be moved 90 deg, 180 deg, 270 deg .
- It can carry various products up to 100 kg.
- Size of conveyor is designed as per requirement.
- For any industries we can use it.
- Easy to clean ,
- Easy to maintain.
- Easy is replace roller as it is modular.
