A guide to preventative maintenance for Albany High Performance Doors

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in door opening solutions

Actuators

(Radar, Infrared, Laserscanner, Light curtain, Induction Loop Detector)

What is the function?

- To open and close the door
- To secure the door
- To provide quick and easy access with automatic actuation

What is the manufacturer's specification?

To make sure the manufacturer's specifications are observed, replace every:

- 2.500.000 / 10 years
- 2.500.000 / 5 years for laserscanner

Can I also replace it earlier?

- Yes, if the actuators occasionally trigger the door unintentionally due to lowered performance.

How do they wear?

During the lifetime of the actuators there will be wear and tear due to:

- The aging of electrical and optical components
- The degradation of LEDs (Reduction of luminous flux)
- The wear of the rotating mirror system on the laserscanner

What is the risk of not replacing?

When not following the manufacturer's specifications the customer is taking the responsibility for unintended breakdown, e.g.:

- The doors cannot be operated by actuators and door functions will be limited.
- In case of safety related actuators, only hold-to-run mode will be possible

Top reasons for preventive maintenance

- Keeps the warranty valid
- Prevents unexpected and expensive break-downs
- Prolongs lifetime
- Cost saving
- Minimises risk of personal injury
- Minimises energy loss
- Fulfills legal requirements
- Improves working environment
