About Retractable Roof

Retractable Roof is kind of new innovation done by NIHVA for Bungalows, Hotels, Hospital, Villas, Apartments, commercial complex, Offices, where we can add more glory by allowing partial sunlight to enter in premises at day and start sky view at nights. Roofs are operated in many ways you like Folding Roof, sliding roof, telescopic roof, single sided, double sided, vertical lift, inclined lift and etc.

USP

- Non-Corrosive materials like Aluminium Alloy Profiles, Stainless Steel Fasteners, Rubber sealing and Polycarbonate Sheet Fillings.
- Complete Enclosure with doors, Locking systems, Rubber seals, etc. Lightweight solution for Terraces, Roofing systems, Pools, Balconies, Patios, Smoking Zones and a lot more applications.
- Completely Water proof and can be Air Conditioned if the area is enclosed.
- It can be easily Re-Located within a short time by our trained technical personal.
- No need of any license from municipal authorities for terrace Roofing's since it's completely retractable.

Telescopic Roof

Telescopic roof structure work on the principle of telescopic enclosure which can be folded level by level, the folding feature of retractable roof structure enhance the effectiveness and efficiency of the whole structure as it occupies lesser space during stacking. Retractable roof structure gives quality atmosphere as well as rememberable experience to the visitors. It permits sunlight and ventilation and gives required atmosphere to the ground.

Uplift Roof

These kind of roof follow the mechanism of hydraulics and used where the area require such kind of solution. It retract in upward direction and in enclose the area in closed position. Mainly used where there is staircase connectivity and headroom is less. It’s a modernized solution and can be achieved with different kind of material.

Hinged Roof

These kind of mechanism makes frequent access to the roof space easy and safe frequent inspection or occasional maintenance with the stylish Rooftop Entrance. Modernized materials and advanced technology allow for buildings to have useable flat roofs. It incorporates simplicity of installation, long trouble-free use with the beauty of a sleek, modern design. Roof skylight can be provided with handles & locks that could also open or close from the outside as well as the inside too.

Characteristics:

- Unique design
- The main purpose of the skylight is to take advantage of natural light. Natural light in homes increases the comfort of living and positively influences health
- Suitable for flat and sloped roofs.
- Installs in any orientation (360 degree rotation)
- Flat modern construction allows for easy water drainage
- Material finish as per the RAL color European standard
- Aesthetic modern exterior.

Advantages

Fast and easy installation takes a couple of days to a week to install depending on the size.

Water Proof covering & can be Air Conditioned too.

Light Weight, Easy and soundless movement.

Safety is the biggest plus point while using light weight but strong Retractable Roof.

Once Fixed, forget for a couple of decades. Minimum wear and tear parts.

Easy maintenance and Easy cleaning of the Roofs, Fun to use, while serving the purpose.

It matches to the indoor decorating scheme allowing the décor to flow seamlessly from one space to the next.

We are dedicated to attain customer satisfaction to strengthen the bond between the organization and customers.

Aesthetically stylish covering & once a particular area is decided to be covered, A retractable enclosure has many advantages compared to fixed structures made of glass or any other material.
