ASSA ABLOY

Modernization Solutions for Automated Entrances

ASSA ABLOY Entrance Systems

The global leader in door opening solutions

Reuse. Repair. Replace.

Modernization is among the most effective methods of addressing today's budgetary demands. Whether it be enhancements in energy-efficiency, updated equipment for improved performance, or sensors which meet current standards - ASSA ABLOY Entrance Systems modernization programs provide immediate improvements to your bottom line. Our programs help prolong the life cycle of an entrance, giving you far more value for from your original investment.

We supply, maintain and modernize:

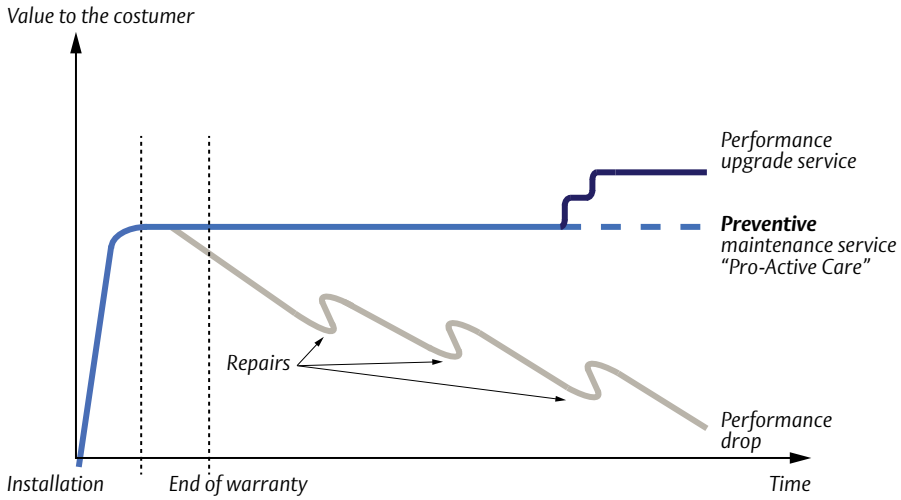

- Sliding doors
- Swing doors
- Revolving doors
- Industrial doors
- Docking solutions
- Vertical lifting fabric doors
- High speed roll doors
- Clean room doors
- Cold room doors

and more..

Value for money

By working with ASSA ABLOY Entrance Systems, you can find the perfect balance of short-term gains and long-term benefits from your power operated entrance.

Effective life cycle management enhances your automatic entrances' performance. ASSA ABLOY Entrance Systems offer upgrade services such as modernization as well as Pro-Active Care service contracts for all needs and budgets.

Keeping your entrances up-to-date

Service support 24/7

Trained and specialized technicians

Calculation tools available

This brochure focuses on entrance improvements in the form of modernization. Modernization is a simple and effective way to bring automated entrances up to today's standards – from creating a modern look and improved traffic flow, to adaptations in order to meet local building norms.

Yesterday's norms, today's answer

New directives appear frequently, especially when it comes to safety and security. But it's possible to meet them with an existing entrance system – even if it's a little bit older. With our wide range of equipment and our in-depth expertise, ASSA ABLOY Entrance Systems can bring you into compliance. What's more, we can provide technology that might have been unavailable when your entrance system was first installed. This includes advanced systems to indicate service needs or to allow the alignment of entrance functions via the Internet. But it also includes simpler solutions, such as LED lighting for better energy efficiency.

Green in more ways than one

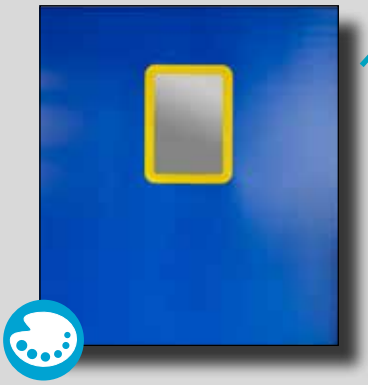

As energy prices and energy spending increase, saving energy is a common and important reason for modernizing. But modernization is always a green choice. Instead of replacing your existing solution entirely, modernization lets you get more life from the equipment you have – and often with small means. Whatever green advantages you're looking for, ASSA ABLOY Entrance Systems has comprehensive options for improving sustainability.

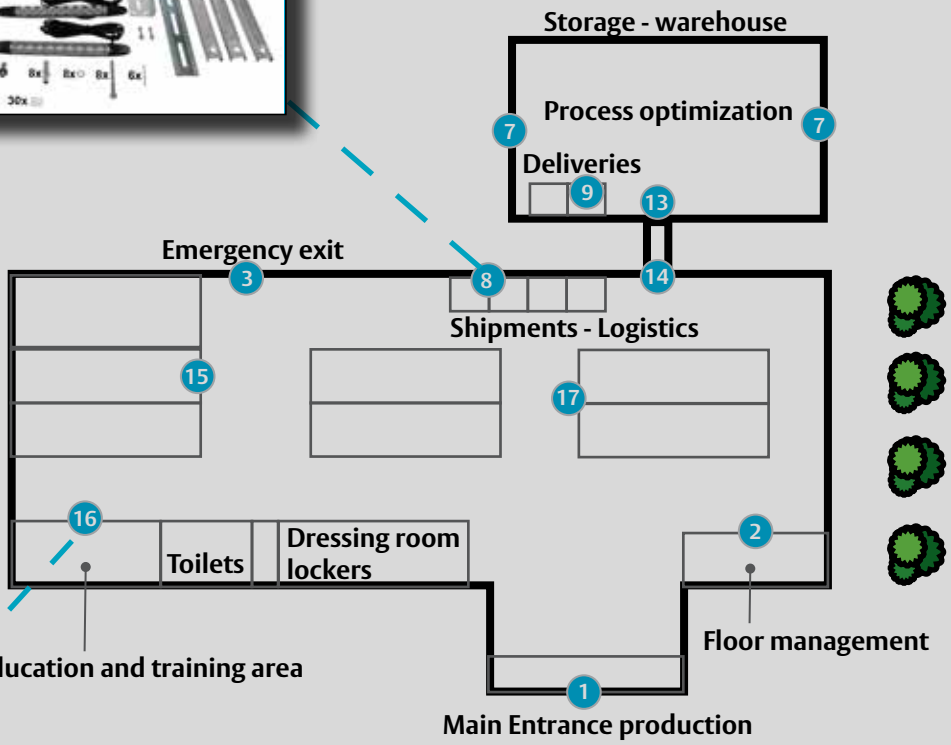

Support and advice

We have the passion, experience and expertise to support you in project managing your entrances; from budget management and service maintenance programs to modernization possibilities.

Part of a complete offering

ASSA ABLOY Entrance Systems is the world's most comprehensive supplier of entrance automation solutions and a complete partner for every aspect of their use. In other words, we have the portfolio and expertise required to keep your entrances up-to-date. One of the most convenient and economical ways of doing so is modernization. By modifying or exchanging even a portion of your existing equipment, we can provide a complete solution to meet your present needs.

"Modernization is always a green choice. Energy-savings and peace-of mind are additional benefits."

New entrance systems aren't the only way to achieve modern entrances.
ASSA ABLOY Entrance Systems offers many ways to modernize your doors and equipment.
With big steps or small, we can keep your entrances in tune with changing times.

Customer benefits in modernizing automated entrances.

As current as the expectations

Your needs in focus

Modernize to meet new demands

Modernize to increase building value

Your entrance needs are governed by more than regulations, standards and energy prices. As times change, so do your expectations and the expectations of others.

Through modernization, ASSA ABLOY Entrance Systems can adapt your entrances to the demands of a changing world. Whether you're looking for improved access for the disabled, reduced noise levels, increased physical security or simply a fresher appearance, we can provide a solution to match your needs and budget.

> " One of our most useful tools is dedicated personnel with genuine knowledge of your special needs."

Maintenance & Modernization
Regular maintenance and modernization ensures that your equipment operates reliably and efficiently for consistent, sustained energy savings.

Automatically Green
For external entries to climate-controlled buildings, automatic doors are a greener option than manual doors. Only open when actually in use, they reduce the amount of energy needed to heat and/or cool the building.

Time to modernize!
√ Improve workflow and convenience in storage rooms and warehouse
√ Old main entrance needs improvement in security
√ Entrances no longer meet local regulations
√ Re-decorating interior, lift look of automatic doo to look more modern and fresh.
√ Too high energy costs - invest in lowering
√ No need for new installation - reinvest in existing.
