Quotation

Dear Mr. Vijay,

With reference to our recent email we have the pleasure to offer you the following quotation. For the design, supply and installation of 1 no. Electrically operated Megadoor Door System.

Description

The door leaf consists of two sheets of PVC-coated polyester fabric that withstand a temperature of –35 to +70 degrees C. Intermediate horizontal aluminum sections are fitted between the inner and outer fabric.

The door leaf is opened by belt/wire ropes attached to the bottom section, these are wound up onto a hoist unit. The TUV Approved safety arrester will prevent the door from falling in the unlikely event of wire failure. A windlock system is also included to prevent the door from lifting under high wind load conditions.

The mullions consist of a steel tube. To achieve full daylight width, the mullions are lifted into the horizontal position by a chain hoist unit. A safety device protects the mullion from falling in the unlikely event of chain failure.

The door leaf is guided with aluminium side-guides mounted in the doorframe. The door is available in the following standard colors: Red (RAL 3001), Blue (RAL 5005), Grey (RAL 7004), White (RAL 9016), Tan (RAL 1001), Green (RAL 6009) or Translucent White. Other colours are available at an extra cost.

The door is operated via a touch screen control panel which includes visual indication of the door status and fault diagnosis indication plus Service history data. The enclosure of the control cabinet meets the specifications of protection class IP65, Push buttons IP65 and Gear motor IP55.

Electrical cables as per EN regulations. Cable tray and/or conduit is excluded.

Installation equipment's like Telehandler, Boom lift to be provided by Client.
