Electric sliding canopy

Sunshade and rain protection
Easy installation
Electric intelligence

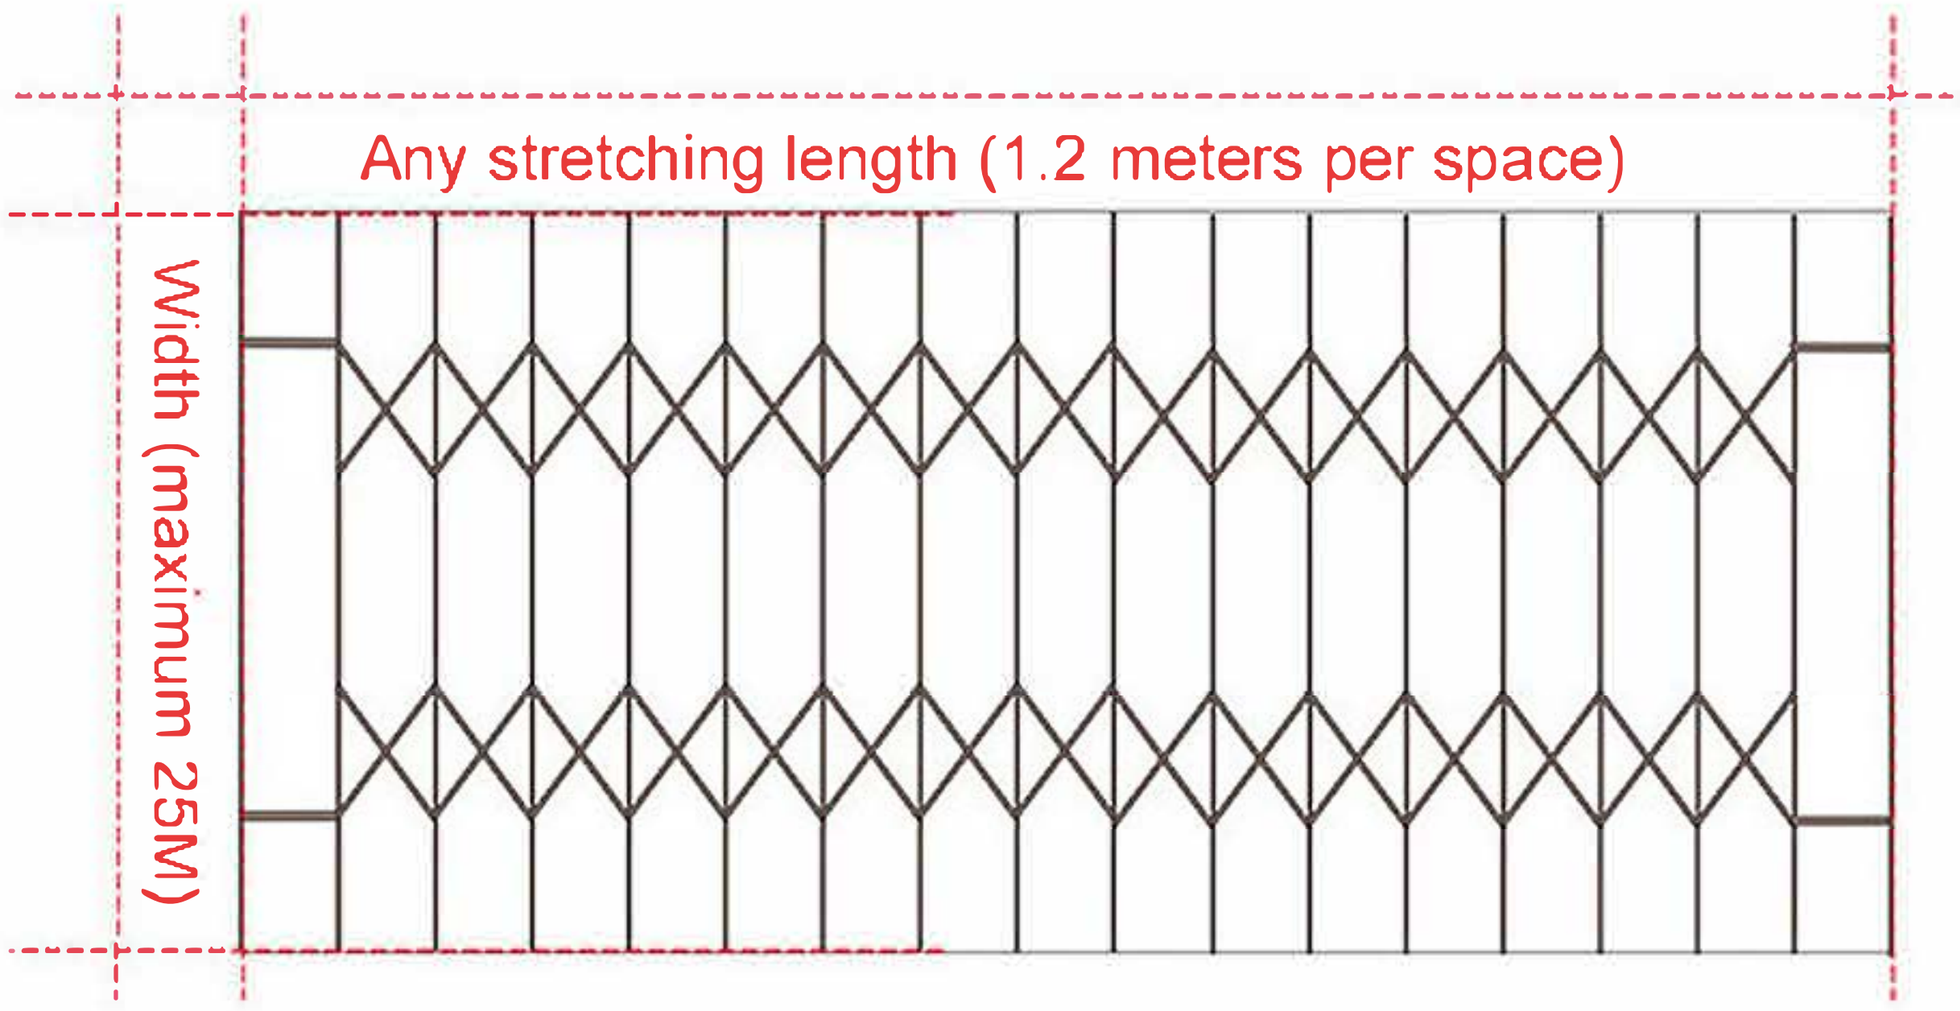

Sunshade
Rainproof
PVC fabric
Easy to install
Thickened skeleton
Electric intelligence
Support customization

Electric sliding rain shelter, sun and rain protection, convenient sliding, economical and practical. Suitable for temporary factory warehouses, large food stalls, car washing yards, repair shops, logistics shops, outdoor parking lots, large activity venues, etc.

◆ Structural Diagram

Structural Frame Combination Axonometric Drawing

◆ Profile Parameters

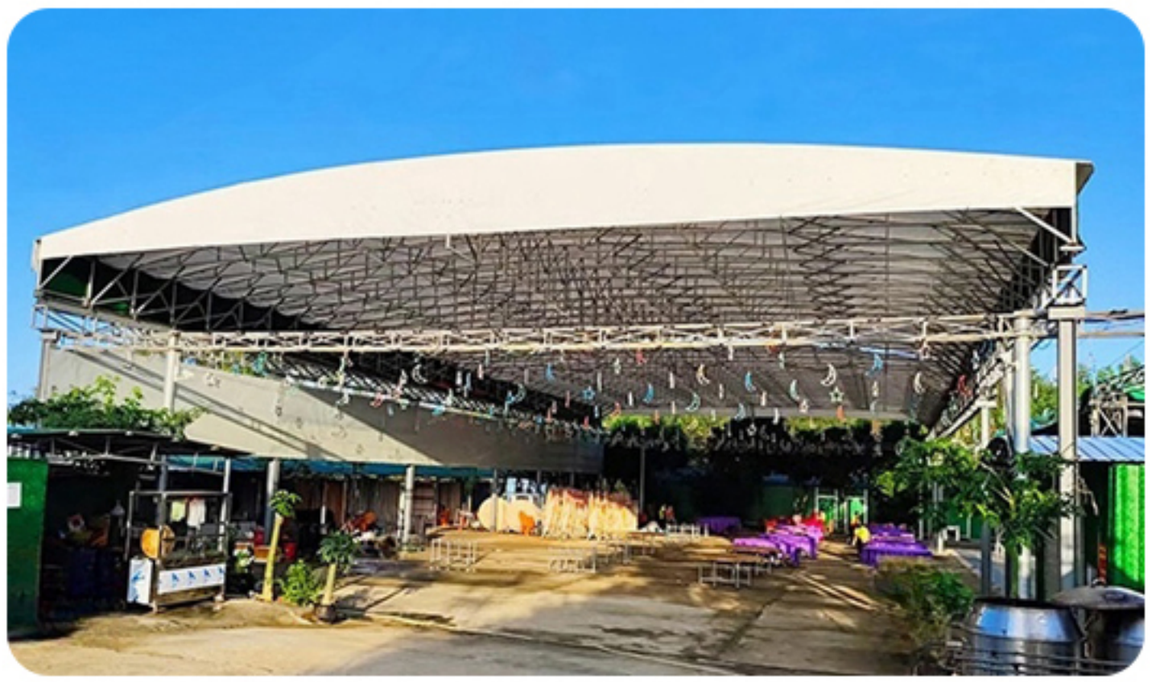

Component Name	Material	Specifications (mm)
Diagonal Brace of Column	Q235 Hot-dip Galvanized Angle Steel	L40*4
Arc Beam of Framework	Q235 Hot-dip Galvanized Steel Tube	40*60*2
Vertical Support of Framework	Q235 Hot-dip Galvanized Steel Tube	40*60*2
Diagonal Support of Framework	Q235 Hot-dip Galvanized Angle Steel	L40*4
Cross Beam of Framework	Q235 Hot-dip Galvanized Steel Tube	60*60*2
Telescopic Roof Frame	Q235 Hot-dip Galvanized Steel Tube	20*40*2
Telescopic Column Frame	Q235 Hot-dip Galvanized Steel Tube	20*40*2
Column of Framework	Q235 Hot-dip Galvanized Round Steel Tube	ϕ89*2.5
Rail	Q355B Special-shaped Steel	300*150*6.5*9
Bracket	Q355B Special-shaped Steel	300*150*6.5*9

Suitable for various scenarios

Meet different installation environments
and customize sizes

gymnasium

Mobile Restaurant

plant

warehouse

Product Details Display

Thickened and bold galvanized column

thickened and bold galvanized pipe pillar
Strong bearing capacity, good stability
Rust-proof, long service life

Thickened scissors holder

reinforced and thickened galvanized steel scissors holder, firm and stable

Beam framework

with diagonal braces added to the beam framework, provides enhanced support strength, ensuring sturdiness, durability,

Solid casters

Smoothly retractable and wear-resistant wheels. Our wheels exhibit strong wind resistance even in harsh weather conditions, offering significant advantages in both quality and durability.

Nylon swivel casters

Optional 4-inch to 8-inch solid swivel nylon wheels Excellent rolling performance and obstacle-crossing ability Effortless pushing experience

Aesthetically pleasing welding

Fully welded, ultra-strong joints. Reinforced with large screws for secondary fixing. The welding areas have also undergone aesthetic treatment for a more pleasing appearance.

Triangle crossing design

Easy and convenient sliding and retraction

The skeleton is made of thickened galvanized steel pipes

which have a long service life and strong load-bearing capacity

High structural reliability

Suitable for withstanding impacts and dynamic loads
with good seismic performance
The internal organizational structure of the steel is uniform
and the reliability of the steel structure is high

High quality pipes

Thickened galvanized steel pipe column
with strong load-bearing capacity

Anti aging
PVC knife scraping cloth

Strong waterproof and leak proof
Long lasting and durable with high toughness
Authoritative quality inspection, environmental protection, non-toxic
Encryption weaving, wear-resistant and durable

◆ Fabric parameters

Waterproof | Sunscreen | Tear resistant | Cold resistant and insulated | Heat-resisting | Anti aging

Fabric name
PVC knife scraping cloth

Coating type
PVDF

Tensile strength
4200/4500 N/5cm (longitude/latitude)

Tear strength
600/500 N (longitude/latitude)

Fabric color
White, red, yellow, blue, green, gray

Fabric weight
950g/ ㎡

Applicable temperature
-30°C/+70°C

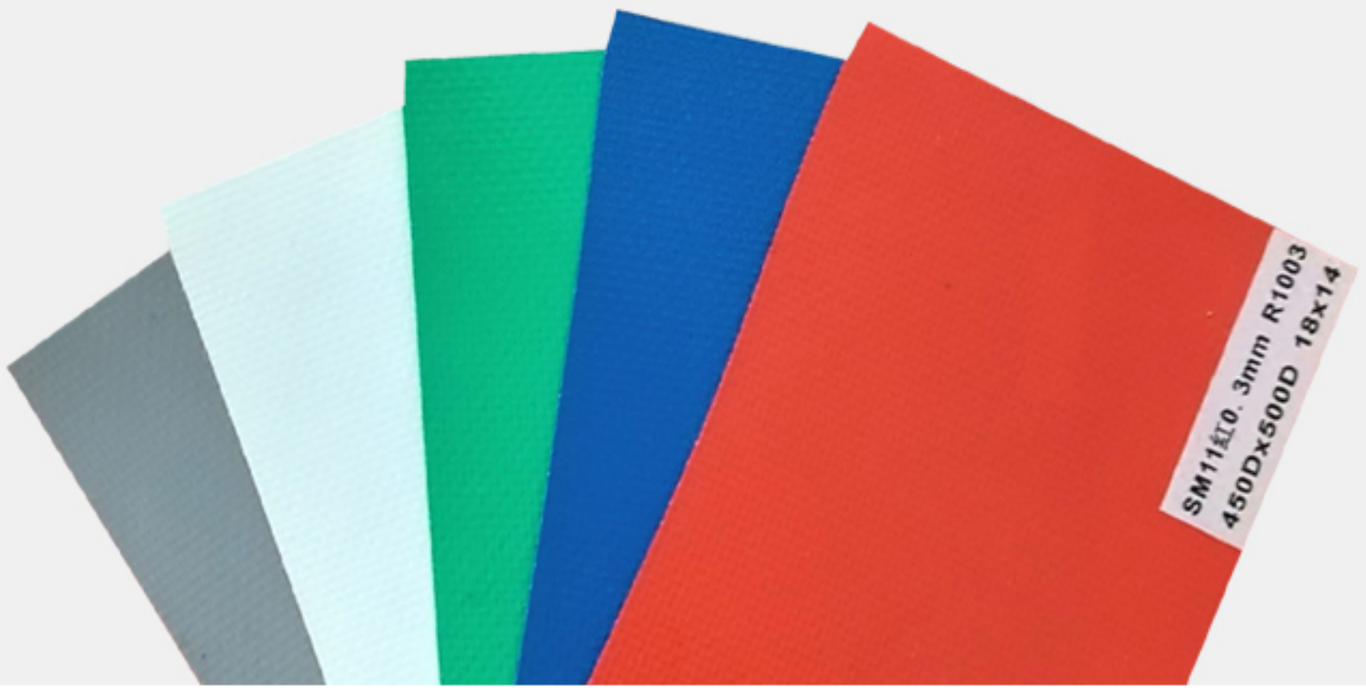

Light transmittance
6-8%

Other functions
Anti freeze crack, anti mold and anti-aging

red | green | yellow | blue | grey | camouflage

Industrial high-strength
sandwich flame-retardant fabric
Vibrant colors

◆ Motor Parameters

Product Name: Tapered Rotor Motor

Model: ZDY123-4

Current: 5.6A

Power: 2.2KW

Frequency: 50Hz

Rotation Speed: 1380R/MIN

Voltage: 380V

Braking Torque: 15N.M

High-precision Rotor

Brand-new National Standard Rotor featuring lightweight and low-noise rotation, designed for high-speed operation with long-lasting durability.

Seiko bearings

Exhibit excellent soundproofing and dust-proofing effects, with longer service life and greater durability.

Pure copper coils

Fully copper-wound coils, delivering more powerful performance and operating with greater efficiency and stability.

Strong power
Smooth operation

The coils are made of brand-new national standard copper wire
which is heat-resistant and has a slow heating rate
ensuring the motor operates efficiently, smoothly, and safely

One click control of smart life

Intelligent remote control eliminates manual folding

making high-tech life worry free and more convenient

Case Presentation

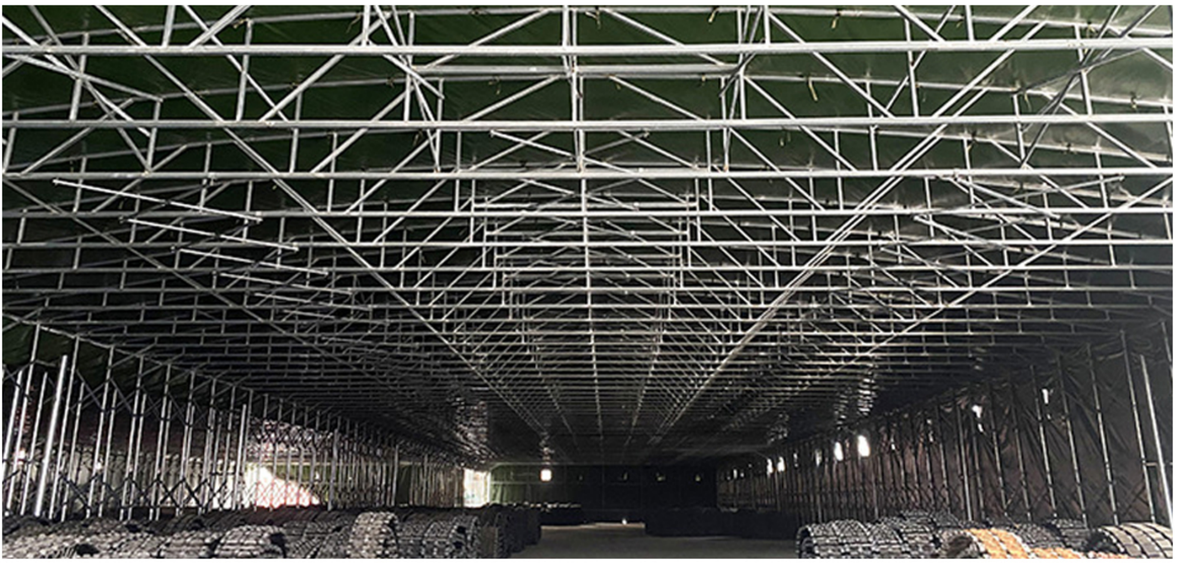

Capable of withstanding wind force 7
