Maintenance as it always should be

We know that your doors and docking systems are important to your business. They provide efficient access to your facilities and improve the flow of goods and people, and they help to prevent energy losses. They also have mechanical parts that require regular maintenance for optimal performance.
A preventive maintenance program is the key to extending the life of your equipment and avoiding problems before they occur.

NIHVA Entrance Systems provides you with optimal performance and the security of knowing that your installation is regularly inspected and safe. Our technician inspects and certifies your equipment for safety and reliability during a number of planned preventive on site visits, scheduled according to your needs.

One supplier – one number

We'll repair your industrial door, docking station, entrance gate or automatic pedestrian door, whatever their brand. Our skilled service engineers are stationed within easy reach of you, across the country. We always have the most common spare parts with us and if there's anything we don't have, it can quickly be delivered from our own parts warehouse. We solve most problems in a single visit.

Trouble-free operation

Our way of working guarantees good quality along the whole chain. Registering the products individually provides detailed statistics on the breakdown of servicing and maintenance costs. This provides useful support in the task of preventing serious problems. We are also able to use the statistical data to identify measures that could make your facility more efficient and cut your energy costs. Every day, new customers are discovering the benefits of drawing on the market's broadest expertise in the field, whatever the type or brand of door.
