NIHVA
We Make Possible

## Our services:

### Consultation Service for Complete Door Opening Solution

NIHVA is the emerging brand in door opening solutions in INDIA, dedicated to satisfying end-user needs for security, safety and convenience. NIHVA is represented in all major regions, on both mature and emerging markets.

### Specification

All of our schedules are computer generated to ensure clarity in the materials specified and the materials to be ordered. The information presented will directly correlate with the individual door locations as found on supplied drawings. We follow CSI format for specifications and can also adapt to client's format as well. We have GAI qualified Specification writers with immense Ironmongery and Entrance Door experience in this region.

### Technical Support

We have a team of experts based in Pune who are available **24×7** to provide technical assistance about our products at any level of the project.

### Project Co-ordination

We will undertake to ensure that the materials specified will be fit for purpose across the various trades and where necessary meet the standards as stipulated by the local governing authority.

As an international company we are also capable of integrating products, which comply with different national standards.

### After Sales Service

All projects are provided with full maintenance manuals where required. These will include full adjustment and service details as provided by the manufacturer of each specific product.

Warranty certificate will be provided for all the products supplied and/or installed. Packing and marking will be made in accordance with the project requirements. Please visit our website http://www.nihva.com for further information.
