

Czewo Full Filling Service, Zülpich — New doors installation

Albany RR355 – Clean Work by Czewo, Full Filling Service Specialists

Czewo Full Filling Service GmbH is a leading, international company with more than 40 years experience in the contract filling of liquids for body care, and technical and household products. In three different plants with an annual production capacity of more than 200 million aerosol and 160 million liquids, products are developed, manufactured, and filled.

Czewo also provides services from stock management and logistics to raw material purchase and the creation of its own formulas.

In 2005, 550 employees working in Germany achieved a sales turnover of 105 million euros. Czewo's Zülpicher Plant, which produces cosmetics in a secure, hygienic work environment requiring climatic separation, needed a door which could not only uphold these conditions but also fulfill the high logistic requirements for the smooth transference of vehicle and person traffic as well as of materials.

Only the Albany RR355 from ASSA ABLOY Entrance Systems high speed door could fulfill all at once such high demands for speed, visibility, and safety. Contactless safety edges as well as a SRD2 self-repairing techno-logy prevent accidents while increasing the safety of workers as well as of production. Moreover, one of the primary problems of cosmetic production, the intrusion of dirt and foreign particles, was immediately and permanently solved.

You would like to know more about our high speed doors? Contact us personally by telephone or simply send us your request by email or fax. We are here for you!
