Swimming Pool Deck

Size	W 2630mmX L 6150mm
Client	Concur Design Pvt Ltd.

About This Manual

- The Motorized Retractable Swimming Pool Deck is designed to function as both a movable floor system & a deck covering for swimming pools.
- It allows user to cover the pool area when not in use, providing a safe walking surface, & retract the deck to uncover the pool with smooth, motorized motion.
- This user manual is specially designed to detail the functions and features of the Swimming Pool Deck system.
- The user manual supplied with the system may vary depending on the model or configuration.
- Please read this manual before operating the Deck to ensure safe and proper use.
- Optional components, specific features, and automatic system mentioned in this manual may not be included or may be subject to updates.
- The installation or usage environment described in this manual may differ from your actual setup.
- Descriptions are based on the system's default settings and standard installation. Available features and additional services may vary depending on the deck model or control system.
- This user manual provides instructions for operating the Swimming Pool Deck system. Features and controls described may vary depending on the specific model.
- Images and illustrations used in this manual are based on a representative model and may differ in appearance from the actual product.
- The content of this manual may be subject to change without prior notice and may not fully reflect the final product. For the latest version of the manual, please visit the official website at https://www.nihva.com

Key Features

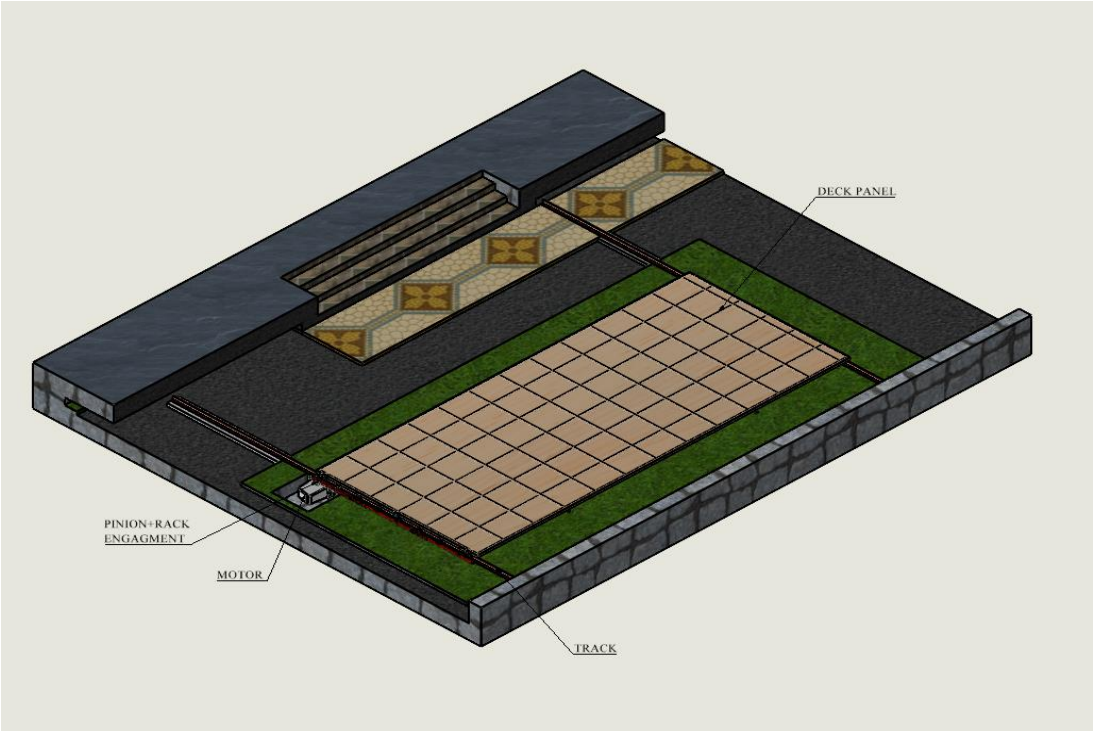

1.Fully motorized movement (open/close operation)
2.Sainless steel structure with anti-corrosive coating.
3.Integrated limit switch for position control.

Safety Instructions

1.Ensure all users are clear of the deck during movement.
2.Do not stand or walk on the deck while it in motion .
3.Keep hands, feet & objects away from moving parts.
4.Disconnect electrical supply before performing mainteance.
5.Operate the system only with the supplied control unit.
6.Do not overload the deck.
7.Ensure no obstruction under the deck before closing.

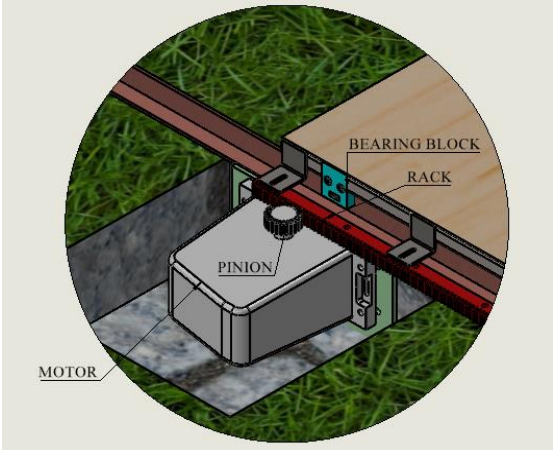

Product Overview

This system combines durability, style, and convenience, making it ideal for both residential and commercial spaces. Designed with a modular approach, the system ensures smooth operation and reliable performance.

COMPONENTS :

- Features or options may differ depending on the model.
- The items marked as optional may not be provided or may be provided in different locations.

- Swimming Pool Deck

Component

Item No.	Name	Description
1.	Guide Rails	Stainless Steel Track for smooth linear motion.
