Packaging System

• **Primary packaging:-** is the material that first envelops the product and holds it. This usually is the smallest unit of distribution or use and is the package which is in direct contact with the contents.

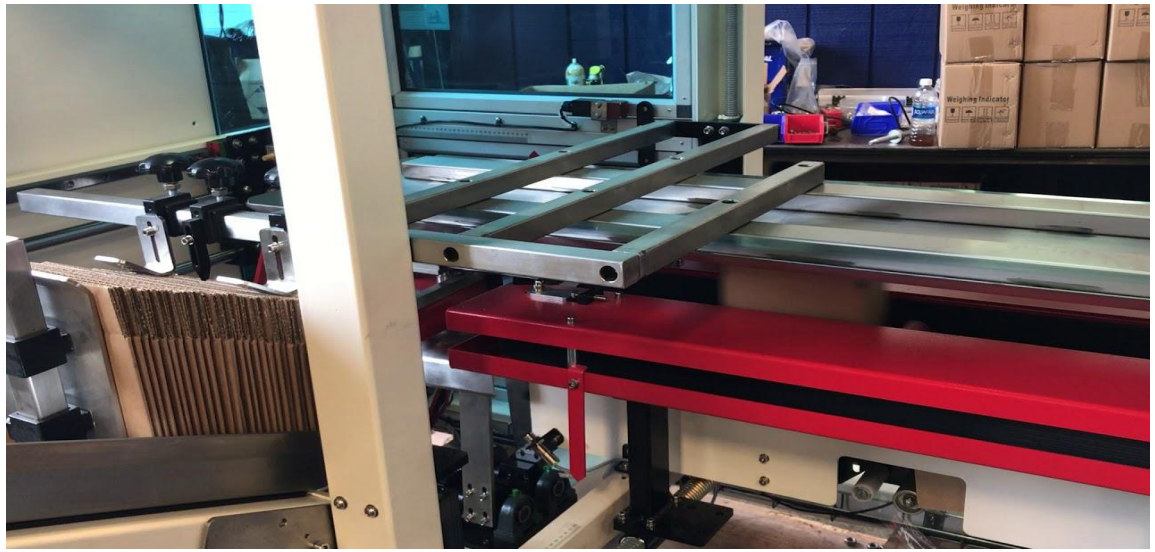

• **Secondary packaging:-** is outside the primary packaging, and may be used to prevent pilferage or to group primary packages together.

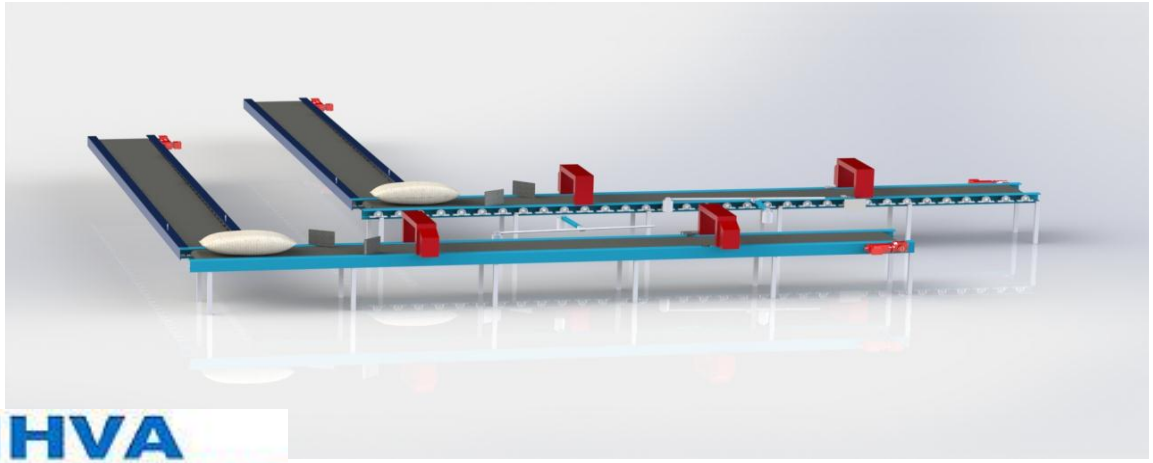

• **Tertiary or transit packaging:-** is used for bulk handling, warehouse storage and transport shipping. The most common form is a palletized unit load that packs tightly into containers.

Tail Tightening Unit

- Special Purpose Machine which tights tail in MOTAR 81 shell
- Machine operation divided in 3 sections
- Loading of tail
- Loading & Clamping of MOTAR shell
- Loading of 90mm spring
- Single push button to start
- Motor start sensor indication
- Rotational motion to MOTAR Shell
- Smooth Tightening of TAIL ASSEMBLY
