"Real estate cannot be lost or stolen, nor can it be carried away. Purchased with common sense, paid for in full, and managed with reasonable care, it is about the safest investment in the world."

Franklin D. Roosevelt

India is a growing economy and real estate and infrastructure will be the torch bearers of our growth story in this decade. Construction sector of India is an integral part of the economy and is progressing on account of urbanization, industrialization, economic development and people's soaring expectations for improved quality of living.

The real estate sector is one of the most globally recognized sectors. It comprises of four sub-sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth in the corporate environment and the demand for office space as well as urban and semi-urban accommodation. The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

The residential sector is expected to grow significantly, with the central government aiming to build 20 million affordable houses in urban areas across the country by 2022, under the ambitious Pradhan Mantri Awas Yojana (PMAY) scheme of the Union Ministry of Housing and Urban Affairs. Expected growth in the number of housing units in urban areas will increase the demand for commercial and retail office space.

Have an insightful reading.

ELEMATIC

THE SMARTEST WAY TO BUILD INDIA

"The Maharashtra police housing project is about 5 million sqf residential development, comprising of about 60 towers and 5248 homes in all. We are building this entire development using Elematic precast equipment and methodology," says **Mr. Sandeep Bedi**, Executive Director and CEO of Janaadhar India Pvt Ltd.

Read the story "Changing the face of India":

www.concreteissues.com

Our precast technology has enabled hundreds of thousands of building projects in over 100 countries. That's millions of people living in safe homes that withstand decade after decade.

How to start precast production?

Supreme e-lite PEX piping systems

Pioneer in introducing unique and advanced piping solutions for various applications, the Supreme is pleased to offer yet other advanced plumbing systems i.e. **e-lite PEX piping systems** for hot and cold water applications. e-lite advanced plumbing systems are designed to meet premium project requirements like speedy execution, one point control, reliable joints and long term system performance etc. Manufactured using advanced material and technology these premium systems have excellent resistance to temperature and pressure.

These systems are endowed with many unique features which makes them one of the most trustworthy systems. The pipes and fittings joints are made using proven compression and crimping jointing methods which are considered to be most efficient and user-friendly jointing techniques. Moreover, our commitment towards efficient production process, world class quality of raw materials, rigorous quality control together with unparalleled product design, makes e-lite the most reliable systems in the market. Besides plumbing, these systems are also suitable for applications like compressed air, solar water heater, radiant floor heating, fire suppression, etc.

Supreme e-lite PEX-b Pipes

PEX stands for Cross-linked Polyethylene. Supreme e-lite piping system comprises PEX-b monolayer and multilayer pipes and brass compression and crimping type fittings conforming to EN ISO 15875, ENISO 21003, and IAPMO IGC 306:2016 standards. This variant stands apart in terms of higher burst pressure, higher impact resistance, excellent temperature and pressure resistance, excellent chlorine and oxidative resistance, long life besides economy.

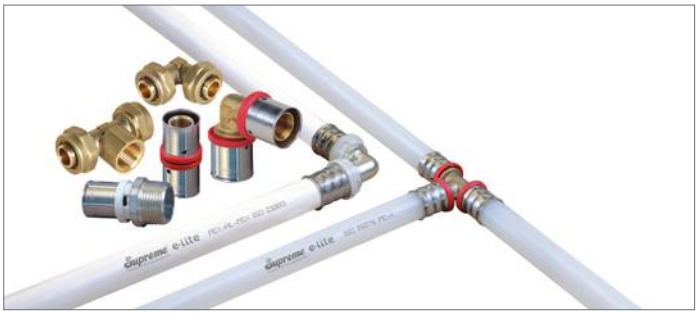
These pipes and fittings are made available in 16, 20, 25 and 32 mm sizes along with required tools and accessories to meet every installation requirement.

Features that makes e-lite a world class advanced system

Excellent temperature and pressure resistance: e-lite advanced plumbing systems are suitable for operating temperature up to 95°C, at high pressure up to 10 bars in wide spectrum of applications.

Long term reliable performance: The system offers long term reliable performance due to the excellent material properties and unique mechanical joints to offer 100% water tightness.

Safe and ideal for potable water application: Due to its mechanical joints there remains no need of solvent, chemical, or solder jointing which nullifies the possibility of water contamination.



> "The pipes and fittings joints are made using proven compression and crimping jointing methods which are considered to be most efficient and user-friendly jointing techniques."

Easy and fast Installation: The pipes are made available in the form of long coils that helps to reduce the no. of joints. Due to great flexibility, bendability at the point of change of direction and press fit crimping/compression joints, the installation of e-lite pipes becomes fast and easier than any rigid pipes.

Different installation methods: e-lite plumbing systems can be installed using various installation methods that serves different design advantages to meet the customized applications or requirements.

Easy to repair and maintain: Pipe in pipe method allows easy repair by pulling out the damaged pipe without disturbing the expensive tiling and interior work.

Low on noise: These piping systems are significantly quieter than rigid piping systems. It is inherently less noisy due to its flexibility and ability to absorb pressure surges.

Thus, Supreme e-lite piping systems are not only an alternative to the existing piping products, but a far superior solution that addresses every concern of its users and offers long term trouble free performance.

Hafele Presents Falmec Levante

Hafele presents to you Levante 120, a suspended island hood that defines geometric precision while making your kitchen aesthetically beautiful with its refined design and function. It comes equipped with a remote-controlled, motorised up & down lift system that enables adjustment in height by lowering itself down to a maximum of one metre from the ceiling, and then repositioning itself after use.

The hood is composed of a robust internal Stainless-Steel rectangular frame with an impressive black tempered glass exterior. It includes a stylish LED panel positioned in the lower portion that not only ensures optimal light output when the hood is in use but also provides a relaxing surrounding light source when it is 'at rest' on the ceiling. Levante is also supported by the Dynamic Light function that allows the tone of the light to be switched and adapted as per the surroundings, so as to incorporate the user's individual preferences.

The Complete Guide to Using Marble in Home Decor with The Quarry

Marble is timeless and one of the most popular options that come to mind when looking for interior decorating ideas. It is commonly used in homes and offices because of its sophisticated look and on some of the most famous monuments in the world. From marble walls and floors to marble wall coverings, kitchen splashbacks, and accent wall panels, they add a chic accent to any space.

There are different types of marble used for different rooms, and the curators at The Quarry Gallery will help you choose the right kind based on your needs. Get that stunning boutique hotel look with marble walls in your bedroom. If you would love a statement wall while letting the rest of your bedroom decor be minimal, try a gorgeous patterned marble wall with Azul Macaubas or Avocado Vert. A polished marble wall creates a soothing effect and transforms your bedroom into a cozy and elegant space.

An accent wall creates a focal highlight point for your living room without having to make any significant changes to your decor. This is where you can add personality and depth to the space by choosing marble that complements or matches your overall color scheme.

Promoters raise approximately Rs. 3,547 crores through QIP; enabling the company to achieve MPS threshold

Lodha, India's No. 1* real estate developer, announced that certain promoters and members of the promoter group of Lodha (Macrotech Developers Limited), have raised approximately Rs. 3,547 crores by selling approximately 7.2% of the equity share capital of the company through a Qualified Institutional Placement (QIP) by way of offer for sale. The issue opened on December 07, 2022 post market and closed on December 12, 2022. The issue was priced at Rs. 1,026 as against the floor price of Rs 1022.75.

Commenting on the development, **Mr. Abhishek Lodha, MD & CEO, Macrotech Developers Ltd.,** said *"We are pleased that marquee long-only investors such as Capital Group, UBS, ADIA, NinetyOne (formerly Investec), Nomura, USS, William Blair, MSIM, Amundi and Nippon MF have participated in the share sale, joining other globally renowned investors in our company such as GIC, Ivanhoe Cambridge, Wellington, Platinum, and HDFC MF.*

SHRIRAM PROPERTIES ACQUIRES "GOLDEN IRA", A PLOTTED DEVELOPMENT PROJECT IN NORTH BANGALORE

Shriram Properties Limited ("SPL"), one of South India's leading real estate developers, has successfully completed the acquisition "Golden Ira", a plotted development project of the Golden Gates Group that was a stressed asset with lending entities part of the IIFL Group. The transaction involves capital commitments of up to Rs.125 crores towards the acquisition and development of the Project.

Golden Ira is an approved plotted development project located at Dodballapur in North Bangalore, with an aggregate saleable area of approx. 10 lac square feet ("Project"). The Project has necessary approvals in place already and also partially completed infrastructure development.

SPL acquired the Project from IIFL Group entities through SPL Housing Projects Private Limited, a wholly owned subsidiary of the Company.

FURNITECH LUXE UNVEILS ITS FURNITURE EXPERIENTIAL CENTRE IN BHUBANESWAR

Furnitech Luxe, India's leading manufacturer of premium upholstered furniture has now launched its first franchised experiential centre in East India at Bhubaneswar. Centrally located at Shoubhagya Nagar, the 3600 sq. ft. store with its swanky décor and elegant interiors intends to pamper its affluent patrons with a wide assortment of furniture and accessories. It houses the finest range of luxury sofas, recliners, dining sets, centre tables and lounge chairs.

Announcing the launch Dhawal Shah, Managing Director, Furnitech Seating Systems Pvt. Ltd. said, "We are delighted to expand our presence in Eastern India with the launch of our experiential centre in Bhubaneshwar. The new centre will offer luxury furniture and seating for homes, offices, institutions, restaurants, lounges, hotels, architects and interior designers. Superior ergonomics, sustainable elements and aesthetic components are central to all our collection. We have so far received an overwhelming response for our franchise business nationally. Bhubaneshwar is a very promising and emerging market for premium furniture. We believe there will be great demand for our products from our esteemed customers in this region".

Furnitech is an amalgamation of Premium Upholstery Products along with being a forerunner of advanced usage of technology to innovate and integrate technological solutions to meet global consumer needs. It is the only Indian company with Cedex certification and is a proud member of MSME India, Round Table, AFMT & AFMI India. With 24 years of expertise, cutting-edge technology including CRM, IVR software, automated manufacturing, an evolved Supply chain system and High warranted products, Furnitech has created a world-class showcase to cater to Indian homes and establishments.

Nuvoco adds ultra-modern Aluminium Body Trucks in its Logistics Fleet

As part of its **'Protect Our Planet'** sustainability initiative, Nuvoco Vistas Corp Ltd, India's fifth-largest cement group and leading cement player in the East, in terms of capacity, has added advanced Aluminium Body Trucks to its Logistics Fleet. These trucks are built with aluminium that is sourced from Hindalco Industries Limited, one of the leading aluminium manufacturers in India. This unique model enhances Nuvoco's logistics efficiencies and strengthens its sustainable supply chain.

Aluminium-body Trucks are lighter with better load-bearing capacity which boosts the overall mileage by reducing fuel consumption. This leads to decreased CO2 emissions, leading to reduced vehicular emissions, positively impacting the environment. Aluminium offers excellent resistance to corrosion and rust, resulting in a longer lifespan for vehicles. Moreover, the metal can be recycled repeatedly, making automotive manufacturing highly sustainable.

In FY22, Nuvoco's direct carbon emissions were 478 kgCO2/t of cementitious products, which is considerably lower than the global average of 580 kgCO2/t and the Indian average of 560 kgCO_2/t.

The introduction of lighter aluminium body trucks for cement dispatches will help Nuvoco save approx. 28 tCO2/vehicle in its life-cycle by reducing fossil fuel consumption leading to natural resource conservation.

Jindal Stainless introduces Electric Vehicles in its plant, cements commitment to Sustainability

India's leading stainless steel manufacturer, Jindal Stainless has introduced electric vehicles for employee commuting in its manufacturing facility at Jajpur, Odisha today. Unit Head, Jajpur, Mr Deepak Agarwal flagged off 4 Tata Nexon EV Max on December 14, celebrated worldwide as Energy Conservation Day, in the presence of Head, Energy, Jajpur, Mr Kalyan Bhattacherjee and other senior officials of the company.

Commending this initiative, **Managing Director, Jindal Stainless, Mr Abhyuday Jindal** said, *"Our aim is to build a remarkable business on the foundation of sustainability. We reduced 1.4 lakh tonnes of CO2 in the last financial year and are determined to achieve net zero emissions by 2050. We are developing a comprehensive roadmap to reach this goal. Introducing electric vehicles in our plants is a part of our fleet decarbonisation initiative. Jindal Stainless intends to become not just the best in stainless steel manufacturing, but the best in sustainable stainless steel manufacturing."*

Dalmia Cement Announces 'DSP Every Home Happy Offer' in South India

Dalmia Cement (Bharat) Limited (DCBL), a leading Indian cement major, has made building homes a rewarding experience for customers with its exciting new **Dalmia Cement "DSP Every Home Happy Offer'** across the South region where Dalmia Cement has a presence. The concept behind this activity is that while DCBL is your partner in creating a new home; it believes happiness is not befitting in an empty house and hence it must be accompanied with gifts that add to the joy. The prizes include bikes and plethora of gifts including assured gifts on specific slab purchases. The consumer promotions will go live in these markets starting from 1st January 2023 to 28th February 2023.

The Dalmia Cement 'DSP Every Home Happy Offer' encourages consumers to start building homes as December – March is the ideal season for home construction. DCBL is also providing guidance on various important aspects of building homes from pre-construction to post construction phase in its website **www.dalmiacement.com** and through helpline no. 18002020.

JK Lakshmi Cement ties-up with GreenLine Logistics to roll out first LNG fleet in India

JK Lakshmi Cement, one of India's leading cement manufacturers, flagged today announced its tie up with GreenLine, a pioneer in green and smart logistics in India, for the introduction of LNG fueled heavy trucks in its logistics. With this association, GreenLine will enable JK Lakshmi Cement to decarbonize its road logistics operations in a phased manner over the next few years. Starting with a fleet of 10 LNG trucks plying on the Sirohi (Rajasthan) – Surat (Gujarat) route, the companies plan to scale this up substantially over the next two years. Each LNG truck reduces ~35 ton CO2 emissions per year.

Vedanta Aluminium Unveils 'Accelerating to Net Zero', its Sustainable Development Report for FY2022

Vedanta Aluminium, India's largest producer of aluminium, unveils its Sustainable Development (SD) Report for FY 2021-22, titled 'Accelerating to Net Zero', on National Energy Conservation Day. The report encapsulates the company's performance across key dimensions of sustainability, such as economic performance, supply chain management, climate change & energy management, air quality & emissions control, water management, biodiversity management, waste to wealth, safety, health & wellbeing, people excellence, community welfare, etc.

Vedanta Aluminium has also launched its maiden report on climate change, titled 'Road to Net Zero Carbon', aligned to the Taskforce for Climate-related Financial Disclosures or the TCFD framework. Through the report, the company aims to inform its stakeholders about business-related opportunities, climate management strategies, commitment and performance, in the context of climate change.

Ambuja Cements, part of Adani Cement, wins the National Award for Energy Excellence

Ambuja Cements, the cement and building material company of Adani Cement, part of Adani Group wins the National Award for Energy Excellence in Indian Cement Industry, under the Grinding Category for the measures adopted in improving energy efficiency at the Roorkee plant.

The award instituted by the National Council for Cement and Building Materials was given during the 17th NCB National Conference on 9th December 2022 in New Delhi from Shri Som Prakash, Hon'ble Minister of State, Ministry of Commerce and Industry, Government of India.

The Company also presented a paper titled 'Correlation of Chemistry and Process Parameters on Formation of Alite in Portland Clinker' at the Conference which was adjudged as the best paper in the category 'Productivity Enhancement and Process Optimization'.

Shyam Steel launches Z Huzoor; a B2B marketplace for procurement of all construction materials

Shyam Steel, one of the leading producers and manufacturers of primary TMT bars, today announced the launch of **Z Huzoor,** a new age B2B marketplace for all construction materials. The B2B marketplace provides a complete ecosystem in providing construction material and services under one roof and aims to bridge the gap between suppliers & buyers of construction materials in infrastructure sector. Z Huzoor understands the need of the customer and carries out all the tasks to deliver a frictionless procurement experience. Z Huzoor takes orders from all business customers which includes infrastructure contractors, builders etc for all construction materials of any brand and fulfils it by sourcing from suitable manufacturers/suppliers. The marketplace provides value for money proposition and there is no hassle in vendor management.

Adani Cement launches revolutionary cutting-edge green concrete solution 'ACC ECOMaxX' in Mumbai

ACC Limited, the cement and building material company of Adani Cement and part of the Adani Group, is all set to bring a new dimension to the building materials industry by launching **'ACC ECOMaxX'** in Mumbai and various other locations in the coming few days. **It is an expert range of green concrete solutions aimed towards building a sustainable future** through conscious green construction.

ACC ECOMaxX is the industry's broadest range of green concrete solutions, with 30-100% lower embodied carbon content compared to a reference concrete designed with OPC. The products are developed using a Unique Green Ready Mix Technology that allows for maximizing green impact by reducing CO2 emissions by up to 100%.

Casagrand Launches Casagrand Platinum Joy; An all-in-one housing community at Perungalathur

Casagrand, one of the leading real estate developers of South India, has launched an integrated all-in-one community Casagrand Platinum Joy in Perungalathur, 10 minutes from Tambaram railway station. This one-of-a-kind community offers wide range of housing choices for any homebuyer as it houses 932 high-rise apartments starting from INR 39 Lakhs and 21 luxurious 4BHK floor villas starting from INR 1.45Cr.

Casagrand Platinum Joy has been conceptualized in order to provide the most joyous living experience to the homebuyers at the most affordable price. The community is spread across 9.14 acre wherein the homebuyer can select their dream homes from 2, 3 BHK high-rise apartments and 4 BHK floor villas. It offers a huge 7 acre landscaped area and 49000 sqft vehicle-free podiums for maximum light, ventilation & outdoor recreational activities. It is a gorgeous high-rise community which offers stunning views, noise-free atmosphere to the residents. In order to showcase the utmost experience of luxury living, the premium/pinnacle apartments and villas have been designed with personalized entrances, spacious living and dining, well-planned bedrooms with walk-in wardrobes, etc.

The project is loaded with 95+ world-class amenities providing homebuyers a holistic living experience that becomes the foundation to generate irreplaceable memories with loved ones. The community offers a lavish 28550 sqft clubhouse for an active and engaging lifestyle.

Gauri Khan inaugurates Tisva's new store in Mumbai

Tisva, a premium decorative and architectural lighting brand from the house of Usha International, today threw open the doors to its brand-new store in Laxmi Industrial Estate, Andheri West, Mumbai, in the presence of Gauri Khan – who has been associated with the brand since 2016. The artistically designed lighting store will be a one-stop-shop for all things lighting. The Tisva Studio in Andheri, Mumbai, comes close on the heels of the new Tisva Studio in Madhya Marg, Sector 8, Chandigarh, that opened its doors to customers just last week.

Speaking at the launch, **Mr Vikas Gandhi, President and Business Head – Lighting (Tisva), Premium Fans, and Water Solutions Business, Usha International,** said, *"Mumbai has always been amongst our priority markets, and we have received a lot of love from people here who have appreciated our products over the years. We value the relationship we have with the people here and that is exactly why we have moved to this new address – to offer enhanced experiences to everyone who walks in the door. We are optimistic that this store will become a one-stop shop for everyone who appreciates the perfect blend of aesthetics and functionality. All our lighting solutions are of international quality and service standards. An amalgamation of innovation and design, Tisva has something for everyone."*

MINDSPACE BUSINESS PARKS REIT

Mindspace Business Parks REIT completes Commercial Papers Issuance of INR 100 Cr

Touchless Hygiene VitrA Root Faucets

The Root faucet collection from VitrA features a wide array of forms and sizes, which are perfect for complementing any bathroom design concept. The touch-free faucet collection from the Design Team VitrA has motion-activated technology that provides convenient, hands-free hygiene. Touchless faucets, which are particularly useful in public use areas, can help reduce the transmission of pathogens and other organisms that lead to contamination.

VitrA's Root faucets provide a combination of safety and water savings by preventing water wastage as they automatically stop water flowing when the user moves away from the sensor. VitrA's Root also features thermostatic bathroom mixers which keep the water temperature constant without requiring adjustment, providing a comfortable user experience. When the cold water is cut off, the mixers also disconnect the hot water thereby preventing users from being harmed. The mixers, which are either connected to the mains or battery-operated, have waterproof cables for safe use.

Kalyani Group pioneers Green Steel manufacturing in India

Saarloha Advanced Materials Private Limited (Saarloha), a Kalyani group company, today launched first of its kind in India, green steel under the brand **"KALYANI FeRRESTA"** in the presence of Shri. Jyotiraditya Scindia. This makes Saarloha the first supplier of Made in India green steel. This major milestone will enable Saarloha to contribute towards the government of India's commitments to reduce the carbon emissions by 45% by 2030, over 2005 levels and to become Net Zero emissions country by 2070.

KALYANI FeRRESTA steel products are manufactured in an Electric Arc Furnace using electricity from 100% of renewable energy sources and more than 70% recycled scrap material with zero GHG footprint. **KALYANI FeRRESTA PLUS** has Net Zero GHG emissions per ton of Crude steel whereas **KALYANI FeRRESTA** has very low GHG emission of <0.19 tCO2e per MT of Crude Steel. Customers purchasing **KALYANI FeRRESTA & KALYANI FeRRESTA PLUS** steel products will get Green Steel certificates jointly issued by DNV Business Assurance India Private Limited & Saarloha which they can use to claim their Scope 3 emissions reduction.

Nahar Group unveils its new brand campaign to promote 'Verified Smart Homes'

◆ Amaryllis Towers offer smart residences, with intelligent designs and smart automation

Nahar Group, Mumbai's leading Real Estate developer known for its 125-acre township 'Nahar Amrit Shakti, in the heart of Powai, Chandivali, has unveiled a new brand campaign for its project Amaryllis, 'Verified Smart'. With a positioning of 'Smart Homes for Smart People', the company aims to disrupt the real estate sector by focusing on new-age smart homes which are ideal for today's customer demographic. The new campaign works on the insight of people wanting to be 'verified' on social media, which gives them an aura of being special. The campaign pushes the same button on the plank of 'smartness'.

IBO

Home building retailer IBO further expands their footprint in South India, forays into Hyderabad

IBO, India's leading omni-channel destination for home building and renovation retail, has expanded their footprint in South India, through their foray into Telangana with the launch of their first store in Hyderabad. The expansion is aligned with the brand's commitment to extend the omni-channel experience in home building retail and home innovation to customers, at value price points.

Through this 15000 sq. ft. store, IBO will offer 4000 products from over 200 brands under "one roof at wholesale prices" to a cohort of home-owners, home building professionals, interior decorators, architects, and builders for their home building and home improvement requirements. Unlike organized retail, where prices are often opaque, all prices at IBO are displayed on shelf and available via the app. These prices will also be the most competitive prices that customers can get in the market.

> We introduced Panorama Windows for large openings and Barrier free internal partition system.

Tulsi Ram Modi
Director

> "Window is not a hole in the wall. It is very important element of the building, which have responsibility to keep residents safe and secure."

Please shed some Light on innovative collections which have been introduced by ALFEN recently?

ALFEN is continuously working on design and development based on customer feedback, requirements of Architects, Interior Designers and environmental requirements. We were the first one to launch integrated frame to accommodate all types of insect screen giving seamless view. We added in our product range Panorama Windows for larger opening for uninterrupted view. Currently we introduced barrier free internal partition system, balcony railings, Operable louvered doors and windows. We are continuously working to provide one stop solution to all your needs.

What value added services do ALFEN offer to its customers?

ALFEN takes complete charge from designing to installation and commissioning. We are not working through fabricators which ensures quality assurance as per ALFEN standards. We have in house state of the art surface finish (Powder Coating and Wooden Finish) facility to ensure quality.

How do you assess Aluminium Doors and Windows Industry in India? Could you elucidate about a comprehensive line of your brand acceptance in India?

Aluminium doors and windows industry is having a huge scope in India. We are expanding our area of operations and currently having showrooms Jaipur, Jodhpur, Bhilwara, Indore and Hyderabad. We are adding new locations to reach more customers and soon we are going to open many more showrooms across the country.

What's at the heart of the business philosophy of your company? Windows are most important part of every building structure.

Window is not a hole in the wall. It is very important element of the building, which have responsibility to keep residents safe and secure. Windows are very important component of every building structure and it is required to give that importance. Windows protect every building resident from heat, cold, noise, theft and any other external threat. We, at ALFEN, consider every openings in this way only which is also evident from our tagline" OPENINGS THAT MATTER'.

How do you see the company and the industry in the future ahead?

ALFEN have a long way to go. We are expanding and hopefully will be able to cater Entire County soon.

Ashish R Puravankara
Managing Director, Puravankara Limited

> "India, and the real estate sector in particular, has the people, the demand, and the demographics for stability. It is the right time for the sector to set its goals high and work towards sustainable housing and creating living spaces for all of India's residents."

The New Year has started; what is your broad outlook on the realty sector? How will 2023 pan out for the industry?

The Indian economy is projected to grow by 6.6% in 2022. This growth, coupled with the changing preferences of today's youth, who now prefer to own instead of rent apartments, will likely fuel strong demand for housing in the next year. At Puravankara, the share of customers up to the age of 35 has gone up significantly. We are also seeing an increase in customers opting for larger homes post-pandemic.

Demand remains strong despite price hikes between January and September this year in 8 major cities. In 2023, we believe the housing market in the top 7 cities will reach new heights. Research shows that Mumbai Metropolitan Region (MMR) and Bengaluru will lead in sales and new launches.

For commercial real estate, too, 2023 looks to be a year of intense demand, with major IT and other corporate players returning to the office. Post-pandemic, the retail sector is gradually making a return to physical locations. IT behemoths like Intel and Apple are shifting a sizable portion of their manufacturing to India. More businesses are expected to move to India, making it their manufacturing base.

We believe 2023 will be an exciting year for the real-estate sector in India. At Puravankara, our outlook remains highly positive, and we see significant opportunities to scale up.

What has been your experience in 2022 and how do you think you can contribute to the future of the sector?

The year 2022 has been one of the most significant turnaround years for the industry post-Covid-19. After a decade-long environment which was challenging and dynamic, a significant amount of transparency and positivity is now visible in real estate.

India, and the real estate sector in particular, has the people, the demand, and the demographics for stability. It is the right time for the sector to set its goals high and work towards sustainable housing and creating living spaces for all of India's residents.

But we must also look to the future, and build more valuable homes, efficient buildings and sustainable architecture. Across its businesses, Puravankara

Purva Clermont, Chembur, Mumbai

has strived to achieve operational excellence while mitigating its environmental footprint. Some of the key highlights include the benchmark Energy Performance Index (EPI) of its headquarters and pioneering the use of pre-cast technology in its projects.

Water conservation is central to the Group's efforts, where we are taking active steps towards optimizing use of water at our residential projects, including the 'direct from the tap' concept in our projects.

We firmly believe that TRUST is an attribute that the brand Puravankara holds close to its heart. We are working towards consistently enhancing the quality of our product and delivering it on time with transparency. These steps alone will ensure that we gain immense trust among our stakeholders for brand Puravankara. By promoting sustainable, environmentally friendly construction and on-time delivery, we hope to contribute to the sector's overall growth.

What are your expectations from this year's budget?

Real estate is the second-largest employer in the nation. We contribute a sizable portion of the GDP, and over 250 ancillary industries depend on the sector. The sector anticipates that the long-pending asks of single-window approval and industry status for real estate will eventually be addressed in the upcoming budget.

The demand for new homes remained strong last year and continues to do so. We expect this will continue, and the government is poised to maintain momentum through higher tax breaks and policy rationalization.

More tax breaks for investors and homebuyers are urgently needed. It is necessary to increase the tax credit of Rs. 2 lakh (Section 24). The demand for housing will pick up steam, especially in the affordable housing market. Some personal tax relief should be included in the budget, either in the form of reduced tax rates or revised tax slabs. Additionally, doing so would increase housing absorption. The

> "Housing can be a leading indicator of economic growth as it has a multiplier effect on the economy. The government should promote overall housing across India, keeping in mind global uncertainties."

Section 80C deduction cap was last raised (to INR 1.5 lakh per year) in 2014. In our view, we are overdue for another judicious revision.

Perhaps most significantly, the government must consider modifying the price bands for properties to qualify as affordable housing, considering the market dynamics of various locations.

Housing can be a leading indicator of economic growth as it has a multiplier effect on the economy. The government should promote overall housing across India, keeping in mind global uncertainties.

> "We contribute a sizeable portion of the GDP, and over 250 ancillary industries depend on the sector. The sector anticipates that the long-pending asks of single-window approval and industry status for real estate will eventually be addressed in the upcoming budget."

Tell us something more about your venture in other cities in India?

Puravankara, Provident Housing and Purva Land currently have projects besides Bengaluru in Chennai, Hyderabad, Pune, Mumbai, Kochi, Goa, Kolkata, Coimbatore and Mangaluru.

We have entered the Mumbai market with two projects, one in Chembur and the other in Kalyan. We have a strong, dedicated team in Mumbai and expect to participate more in the western markets in the future.

In Chennai, we will be launching almost 2 msft, in Kochi, we are looking at a development potential of 5,000 homes. In Coimbatore, we have completed over 2 msft and have around 1 msft in the pipeline.

We are constantly evaluating opportunities in Chennai, Kochi, Coimbatore and Goa while also looking closely at the Mumbai, Pune and Hyderabad markets. Every market has an opportunity for a brand like ours which can cater to different segments.

Provident Adora De Goa, Dabolim, Goa

According to you, what is the country's current real estate market scenario?

We are in a buying cycle where people are buying property. There is currently no slowdown, and the positive sentiments will likely continue this year and beyond.

The trend of opting for larger homes is expected to continue this year, even if it means that people will choose to wait and plan their investments better. For example, someone who can afford a 1BHK currently will wait and organize their finances better to opt for a 2BHK or a 3BHK a little further in the future. This has also been one of our biggest learnings from 2022.

Buyers always look for opportunities where price appreciation is likely. As long as property prices increase or are expected to grow, it will attract buyers' attention, and they will continue to invest in buying such properties. Moreover, Younger NRI customers are also looking to buy property.

In addition, purchases by NRIs are also on the rise. Data shows that Hyderabad, NCR, Bengaluru and Kochi are the top cities in which NRI customers are interested. Even among this category of customers, there is a push for larger homes and younger NRI customers are looking to buy property.

Purva Atmosphere, Thanisandra, Bengaluru.

Brief us about your latest completed projects, ongoing and pipeline projects?

Currently, we have a total of ~25 msft in ongoing projects and a land bank of ~57 msft. We plan to launch around 15 msft this financial year, of which around 5 msft will be in Puravankara, 5 msft in Provident Housing and around 4 msft in Purva Land.

We are determined on two aspects: new launches each quarter and continued construction and delivery for ongoing projects, which will keep increasing with each launch.

"Currently, we have a total of ~25 msft in ongoing projects and a land bank of ~57 msft. We plan to launch around 15 msft this financial year, of which around 5 msft will be in Puravankara, 5 msft in Provident Housing and around 4 msft in Purva Land."

DR. NIRANJAN HIRANANDANI
Founder & MD, Hiranandani Group

> The confidence index of key stakeholders comprising homebuyers, investors, institutional lenders, and developers remains upbeat despite economic vagaries. NRI homebuyers to catapult currency depreciation benefit and propel in luxury housing.

Dr Niranjan Hiranandani, National Vice Chairman, NAREDCO projected his views by saying, "The sustained homebuying demand buoyancy may dip if interest rates cross the upper tolerance limit of 9.5%, leading to demand contractions. The confidence index of key stakeholders comprising homebuyers, investors, institutional lenders, and developers remains upbeat despite economic vagaries. NRI homebuyers to catapult currency depreciation benefit and propel in luxury housing.

Banking and Financial institutions will continue to expand their retail home loan disbursement portfolio, as NPA in housing remains lowest at 2% in India. It is observed that home buyers prepay the home loans in nearly 7 to 8 years despite long term tenure.

The funnel of new property launches will reflect an improved capex cycle to cater to growing demand from the end-users and investors' interest. Home prices will continue to grow by another 5 to 7% in FY23 in lieu of sticky inflation, high cost of borrowings and skilled labour. Going forward, industry recommends a blend of fiscal and monetary intervention to herald the growth of the labor-intensive real estate sector.

The unfurling of inevitable recession in the global economies will have a marginal impact on housing, with postponement in logging housing sales. The volatile capital markets may lead to subdued discretionary spending, which may slow down the consumption rally, especially in an interest rate sensitive housing sector. The market share of branded players will be upscale as financial discipline precipitates in the trend of market consolidation.

The demand forecast for Grade A assets in the commercial real estate sector remains optimistic with short-term deferment due to recessionary cautiousness. The expansion and diversification plan of the commercial players remains bullish as the Indian economy is poised for 6.8% GDP growth, the fastest among the global counterparts. The attractive rental yield generating asset will continue to stay favored amongst the investor class.

Growth in emerging real estate asset classes like warehousing, industrial housing, logistics, data centers, student housing, senior citizen homes, flex spaces to gain ground in the ensuing year 2023."

Hiranandani Fortune City, Panvel township is a Family Home Destination

Hiranandani Communities, a globally acclaimed realestate developer envisioned a blueprint to build 'a city within a city' colossal township spanning across 400 plus acreage of land in Panvel, Navi Mumbai. The master plan of the known integrated township 'Hiranandani Fortune City' encompasses a cluster of statuesque high rise residential towers, commercial spaces, high street retail, curated green foliage, vivid horticultural landscapes, and array of social and entertainment amenities to exemplify a vibrant community living. The phase wise development is deftly performed to meet the consumer demand.

Dr Niranjan Hiranandani – CMD-Hiranandani Communities mooted that, "Hiranandani Fortune City township is ideally located on the Mumbai-Pune highway, aptly situated on the IT corridor. The township is in

"The master plan of the known integrated township 'Hiranandani Fortune City' encompasses a cluster of statuesque high rise residential towers, commercial spaces, high street retail, curated green foliage, vivid horticultural landscapes, and array of social..."

proximity to the Navi Mumbai International Airport also auguring well for commercial spaces and tourism. The Mumbai Trans harbour link via Panvel- Chirle connector will facilitate quick access to South Mumbai in a shortened travel time. The doubling of rail corridor between Panvel-Karjat for passenger travel is put on fast track by the state government. This will help the township habitants with an immediate access to railway stations like Chowk and Mohape for a smooth travel. This compounded connectivity will foster real estate demand at Fortune City project already offering a great value proposition to the homebuyers.

Hiranandani Fortune City, township in Panvel has successfully built 2.5 million sq. ft of residential space with over 2500 units delivered on receipt of Occupation Certificate. The township offers an assorted range of homes from minimalist studios, 1,2,2.5,3, and 4BHK designed to cater the demand of affordable as well as an aspirational homebuyer. The ambitious homeowners are taking possession to enjoy living in Hiranandani homes.

Hiranandani Fortune City township is a bedrock for experiencing holistic living with an enriched quality of life. Township has already delivered 2 million sq ft of commercial space with a world class data centre to enjoy work near home comfort. The retail establishment in the township assists the residents with the daily conveniences.

Hiranandani Foundation School has commenced its operation to impart quality education for shaping the future minds. Residents can avail the best healthcare facilities to address their medical emergencies in nearby vicinity. Additionally, the township also houses child day care crèche, yoga centre, spa and saloon, business centre and other desirable offerings which makes Fortune City township a conducive family home destination.

Hiranandani Fortune City, Panvel is a vibrant township encircled by quaint western ghat hills that enriches air quality index for its natives. The 25 acres of lush green reserve forest adjoining the project site is under development. Township brims with ample open spaces, nursery, organic farm, quaint treehouse, treeline boulevards as a pivotal sustainable amenity. A 'wellness' infused lifestyle is well-knitted in the lap of nature to offer a sublime customer experience. It is a thoughtfully curated township, way ahead of its time to experience climate conscious living.

Hence, the year 2023 makes it a right time to take the plunge and buy an ownership home at Hiranandani Fortune City, Panvel. It offers an early mover advantage due to its apt location on the rising economic corridor. Investment in the project developed by the organized branded developers like Hiranandani Communities will ensure exponential growth curve scripted arguably by multiple favourable factors. Do visit the Hiranandani Fortune City, Panvel township and join the Hiranandani family bandwagon.

"The 25 acres of lush green reserve forest adjoining the project site is under development. Township brims with ample open spaces, nursery, organic farm, quaint treehouse, treeline boulevards as a pivotal sustainable amenity."

AHMEDABAD BANGALURU CHENNAI COIMBATORE DELHI HYDERABAD INDORE JAIPUR KOCHI KOLKATA LUDHIANA MUMBAI RAJKOT VISAKHAPATNAM RAIPUR (Opening Shortly)

Siddharth Vasudevan
Managing Director, Vascon Engineers Ltd.

> "We explored multiple functionalities of our places and the concerns that we need to consider. People are now clearer about what they desire out of their houses. Features and spaces that were previously taken for granted are now becoming paramount while buying a home. For example, rooms for home offices, children's play areas, magnanimous balconies, and indoor/outdoor concepts play a significant role in the selection process and are also considered premium."

How has 2022 been for your company given the fact that there were few ups and downs over the last few months?

The short-term impact of the pandemic on the industry was sudden and was leading to a downward graph. However, I expect the long-term implications for the industry to be optimistic. We are already seeing pre-pandemic level of sales in pune. More specifically, it is because the pandemic has taught us to enjoy our houses. The lockdown made us realize the value of our homes and the significance of the spaces we live in. We explored multiple functionalities of our places and the concerns that we need to consider. People are now clearer about what they desire out of their houses. Features and spaces that were previously

Mastering the standard of living with smart homes

taken for granted are now becoming paramount while buying a home. For example, rooms for home offices, children's play areas, magnanimous balconies, and indoor/outdoor concepts play a significant role in the selection process and are also considered premium. It was terrible for the short term, mainly due to the job instability, migration, work from home culture, and overall uncertainty caused a panic. Buying a house is a tangible thing, and since people couldn't experience it, they were hesitant to buy.

> "As Vascon likes to say, 'If there is anything to be built, we will build it.' We are firm believers in innovating and accommodating with changing times. Hence, with every project we take over, we explore our creativity and gain experience."

Contemporary style for new homeowners

The New Year is started so what are your plans for this year? What are the initiatives we can see in 2023?

As an organization, I would tag us as 'opportunistic.' We are involved in metro projects, airport constructions, mall design and construction, government buildings and offices, hospitality, residential, and a wide range of commercial projects across the chain. We have a strong pipeline of residential & commercial projects for launch 2023.

What is the USP of your projects? And Mantra to sell your projects?

Our love and experience for this industry makes us different from others also we want to push our boundaries, innovate, and take up unique projects.

"The real estate industry adapts itself to changing times though it takes a little time to bring new ideas into play. Compared to any other industry, the real estate sector can only advance slowly. For any new concept or change that we might want to make, it takes at least 2-3 years to execute after the idea's inception."

As Vascon likes to say, 'If there is anything to be built, we will build it.' We are firm believers in innovating and accommodating with changing times. Hence, with every project we take over, we explore our creativity and gain experience.

How do you see the prospects for your company, and the real estate sector in Pune as well as in the rest of Maharashtra?

The real estate industry adapts itself to changing times though it takes a little time to bring new ideas into play. Compared to any other industry, the real estate sector can only advance slowly. For any new concept or change that we might want to make, it takes at least 2-3 years to execute after the idea's inception. The emergence of new ideas is doubtless, but any new idea takes up to 5 years to become a trend that anyone else can notice or follow. Nevertheless, there is a considerable lag period from idea initiation to execution. Hence we cannot term new ideas into 'trends' since every realtor adopts new practices if they notice a demand in their target audience.

With high functioning industries running such as Automobiles, education, FMCG, IT, and glamorous fashion industry, real estate in Pune is always a secured investment. The market always balances itself out with the rising/falling demand-supply graph. We do not predominantly see dramatic highs and lows like bigger cities like Mumbai, Delhi, Bangalore, etc. This has a significant impact on decision making and makes the market predictable which helps businesses manage growth and expansion plans.

Tell us about the major projects that Vascon is undertaking as of now, kindly elaborate?

Yes, we are coming with interesting projects like
Commercial in Kalyani Nagar & Kharadi
Residential in Mumbai (Powai & Santacruz) & Pune (Kalyani Nagar & Baner Pashan)

What is your vision for the future?

A straightforward principle guides Vascon's approach to every project: "Understand the customer's needs and expectations; Fulfill the needs and exceed the expectations." Having said this, customers needs & expectations are changing rapidly. The key is to recognize this and be agile to respond to these needs. Technology for e.g. Will play a crucial role in overcoming these challenges.

What makes a home, a smart home?

The smart home is where you have control of energy use and water use. There is an automation of adjusting temperature, lights, opening and closing of windows and many other feathers in different rooms of the house.

The advancement of technology has brought smart devices home for the betterment of life. These devices are making living so easy that with the human voice the house can be controlled. As the devices have evolved there is the evolution of smart homes too. The new technology and engineering provide a smart solution for modern homebuyers.

Smart homes also control Television, Gas, and curtains for the homeowner. The technology has advanced and so do homes. When a homebuyer looks for a home they have such specific requirements in mind and it's the task of the builders to provide them with the value and well-being that they are looking for.

Vascon Engineers is making a constant effort to bring smart solutions to their customers. Residential units developed by Vascon Engineers have amenities like Gymnasium, 24/7 security, swimming pool, jogging track, barbeque station, a grocery store which is scan and pay, a game and gas station, a library, theatre, Jacuzzi, and many more lifestyle facilities.

For any new homebuyer Tulips Gold by Vascon Engineer located at Avinashi road is a perfect option to check out. It not only offers lifestyle facilities but also offers a great Return on Investment.

Working in real estate for more than 30 years brings the best looks of design and lifestyle. Vascon Engineers with their architecture team are designing homes that not just look good aesthetically but also cater to all the amenities.

One of the best projects by Vascon Engineers is Windermere in Koregaon Park, Pune. It is located in one of the posh areas in Maharashtra. Some of the well-known cafes, restaurants, clubs, corporates and educational institutions are located in this area. The project is built on the belief that some houses are to be passed in inheritance and not sold. They are designed to keep the legacy alive and consider the heritage of the family.

All the modern facilities are offered here. The facilities include a gas station, garden, barbeque for a friend's night out, other get-together spots like a gazebo, exercising facilities, car service, 3 tier security system, eco-friendly facilities and for pet parents, there's a pet spa too.

Vascon Engineers have been in the industry for a long time. They cater to every need and want of their clients and minutely understands the value of a property. There are many under-construction projects currently going on by Vascon Engineers. Check out their website to know more about the on-going and complete projects: **https://www.vascon.com/**

At Rohan Builders, we believe and focus on quality and timely delivery of projects. These are of prime significance in the real estate business. Over the last 30 years, the Company has consistently followed these two crucial aspects to establish itself as a market leader and a pioneer.

What is the brand philosophy and how has it helped the company grow over the years?

Rohan Builders' brand philosophy revolves around 'passion at work', signifying our passion and attention to every detail.

We are guided by 5 core values - international quality, passion, reliability, transparency and integrity. These values have guided and enabled us to withstand adversity. More importantly, it has helped strengthen our processes further to transform the Company into one of the most trusted and admired real estate brand in the country.

At Rohan Builders, we believe and focus on quality and timely delivery of projects. These are of prime significance in the real estate business. Over the last 30 years, the Company has consistently followed these two crucial aspects to establish itself as a market leader and a pioneer. As a result, today, we are able to win not only new customers but also a large number of buyers who are repeat customers.

We have leveraged innovation, technology, thoughtful design and a deep commitment to sustainability to add value to our real estate offerings.

"Moreover, the pandemic also brought real estate forth as a more stable option for investment, and this sentiment was further strengthened owing to the performance of the industry over the year."

What is your mantra to sell Real Estate?

Real Estate is a very sentiment driven market and there cannot be any fixed mantra to sell real estate. First of all, you need to have a good history to support your work because if the history is missing, the trust factor will not be there. Moreover, the current market in real estate is flooded with end users which drastically changes the demand pattern prevalent. Over the three decades, Rohan Builders have been involved in real estate, we have evolved as a Company backed by a thorough understanding of our clientele, pre-empting their needs, and mapping realty consumption patterns. Based on this, and given our experience in the field we have been able to curate the corporate entity and the brands branching out of it.

Over the three decades, Rohan Builders have been involved in real estate, we have evolved as a Company backed by a thorough understanding of our clientele, pre-empting their needs, and mapping realty consumption patterns.

What has been your experience in 2022 and what is your broad outlook on the realty sector in 2023?

Despite its recent ups and downs in 2022, the Indian real estate market has grown, instilling confidence in the minds of homebuyers and investors alike. The desire for homeownership has become stronger ever since the pandemic started and has continued to remain strong.

With this evolution of buying preference, customers are also gravitating towards peripheral areas with close proximity to city centres. Moreover, the pandemic also brought real estate forth as a more stable option for investment, and this sentiment was further strengthened owing to the performance of the industry over the year.

The demand and supply dynamics are expected to remain resilient in 2023. We expect this momentum to continue over the coming year and remain confident of the growth of the industry as a whole.

" The government has been implementing big infrastructure projects which will further drive growth both quantitatively and qualitatively. Further, the govt's recent rollout of numerous tax-related and other incentives aimed towards potential house buyers and NRI's will further boost the growth of the realty sector. Demand is likely to be more than supply in the mid-market housing segment and this will also lead to rise in prices. In addition, with property rentals being at an all-time high, the desire for home ownership, especially in the younger and first-time home buyers is increasing. Commercial real estate is also likely to witness growth with major IT companies switching back to offline work. We will also witness further market consolidation towards larger developers, which will be beneficial to established players. Overall, we expect 2023 to be a good year for the real estate sector and one that will set the platform for further growth in the future.

The government has been implementing big infrastructure projects which will further drive growth both quantitatively and qualitatively. Further, the government's recent rollout of numerous tax-related and other incentives aimed towards potential house buyers and NRI's will further boost the growth of the realty sector.

TRANSFORMING SPECIALIZED LIGHTING IN A PROFESSIONAL MANNER

> "As per Mahatma Gandhi's Vision – every village should have one Industry. Leksa ensured to have a factory to empower the youth from the village by giving good direction to their life."

Ronald Silvan Dsouza
Executive Director, Leksa Lighting Technologies Pvt. Ltd.

Lighting can influence a person's mood and their connection to a space. Whether history, identity or values, the features of a building can tell a story. While general lighting lights up spaces for convenience of people, it is Architectural lighting that works to bring the story of architectures and landscapes to life.

ARCHITECTURAL LIGHTING is the intersection of art (architecture) and technology (lighting). It is a field of lighting that is concerned with the design of lighting systems within the built environment. This is a field that Leksa has become a frontrunner in, by executing multiple projects across India.

Established in 2017, in Mangalore, India, Leksa started with little staff. But in just 5 years, adapting Japanese technology and work culture, Leksa has become one of the leading manufacturers and suppliers of professional lighting in Southeast Asia with dominating the lighting scene in Architectural lighting, Auditorium Lighting, Video conferencing, interior designer lighting, and broadcasting fields such as TV studio, Film and Fiction shoot industries and many other specialised lighting verticals. A highly professional team has geared up with one moto "Respect for people and Team work" under the able leadership of Mr. Ronald Silvan D'Souza – Executive Director, an excellent Leader and Team Player. In such a short time Leksa has executed projects all over India and also has spread its presence across 17+ countries and has one of the largest manufacturing facilities with over 300 specialized lighting produced under one roof with over 200 Employees.

Our mission is in the very name of it. 'LE' in LEKSA stands for "Lighting Excellence". It is also the company's tagline and indicates Leksa's goal to be a global leader in Professional Lighting Technology.

The second part of the name 'KSA' stands for "knowledge shared adequately", bolstering our mission to educate and share the knowledge to the younger generation. As per Mahatma Gandhi's Vision – every village should have one Industry. Leksa ensured to have a factory to empower the youth from the village by giving good direction to their life. It is the company's way of giving back to the society.

We manufacture architectural lights to decoratively illuminate structures ranging from historical monuments to garden landscapes. Leksa has wide range of lights with any colour of the spectrum and varying beam angles, all capable of installing outdoors, withstanding harsh weather conditions. Leksa is very strong and leading in RGBW lights production, signalling, controlling and programming.

Leksa Lighting has achieved many milestones such as "Fastest growing Indian brand" by International Achievers Council, "Excellence in Manufacturing and Customer satisfaction" during Global Business Meet, awarded "High Flyers 50 Global Indians award", for the outstanding individual achievements of Mr Ronald Dsouza and "Most Trusted Company in Lighting Equipment Manufacturing" on the occasion of National seminar on "Outstanding Contributions on National Development-Atmanirbhar Bharath".

With our unprecedented growth in this competitive market, we have shown our hunger for excellence and success and no obstacle will hinder Leksa Lighting in getting to that mission.

Platinum Avenue

> "**Platinum Avenue** is a magnificent 18-storied tower featuring premium Retail and commercial spaces and 2 & 3 bedroom elite luxury residences with Jodi options that offer a perfect blend of splendour and serenity along with an extravagant lifestyle for health, recreation, and relaxation."

In keeping with its reputation of offering a "Priceless Lifestyle" to its Valued Customers, **Platinum Corp.** brings one of its exclusive and extravagant projects to Khar West - a supreme landmark of luxuries that truly matches your stature and offers you a lifestyle as glamorous and glorious as you. With the serene Ramakrishna Mission view on one side and the active vibe of Linking Road on the other, ***Platinum Avenue*** promises to be one of the most talked about projects in the locality.

A location that puts your world in the center, the project stands at the junction of South Avenue Road and Linking Road, thereby offering a huge opportunity for High-street Retail and commercial premises. The bold and striking building elevation uses the prominent corner as well as the huge road frontage of the plot to its advantage, with a massive 24x7 opportunity to reach a mass audience through the provision of a central media screen. The project has been designed by the renowned Architect Reza Kabul while MahaVastu Certified Vastu Consultant Acharya Jaspreet Singh has ensured that the planning and purpose of the built structure on the given land leads to happiness and growth for all its occupants.

Platinum Avenue is a magnificent 18-storied tower featuring premium Retail and commercial spaces and 2 & 3 bedroom elite luxury residences with Jodi options that offer a perfect blend of splendour and serenity along with an extravagant lifestyle for health, recreation, and relaxation. The retail and residential entities have been thoughtfully segregated to offer privacy for both. Project hallmarks include extraordinary leisure, wellness, and recreation features at the podium level such as a world-class fitness center, outdoor lounge, conference room, creche, and toddlers' activity room, and a mini theatre. The project also boasts of a one-of-a-kind rooftop lounge that features a sky gazebo with serving counter, sky lounge with luxury sit-outs, and a sky pool with deck and loungers.

Other features include an air-conditioned and wi-fi-enabled grand entrance lobby and advanced security with ample parking. The residential apartments have been immaculately designed with sundecks that have been perceived to offer breathtaking sea views for the west-facing apartments and picturesque views of the suburbs for the north-facing apartments. All residences are fitted with modern amenities such as imported marble flooring, air-conditioners, premium sliding windows, ultra-modern modular kitchen with hob and chimney, and state-of-the-art bathroom fixtures and fittings.

Besides Platinum Avenue, Platinum Corp. has a few more upcoming premium projects in Khar West and other prime locations in the vicinity. Currently, there are 5 ongoing projects in Andheri out of which the delivery of 3 projects is lined up for this year alone. Having successfully constructed and delivered projects with an area of over 1 million sq.ft, Platinum Corp. will have proudly delivered over 1000 homes to its valued customers by the end of 2023.

Driven with innovation at its heart and a customer-centric approach, coupled with the highest standards of business ethics, transparency, and best global practices from its international exposure and experience, and backed by a strong track record of delivery, Platinum Corp. is gearing up to become one of the most sought-after Developers in Mumbai.

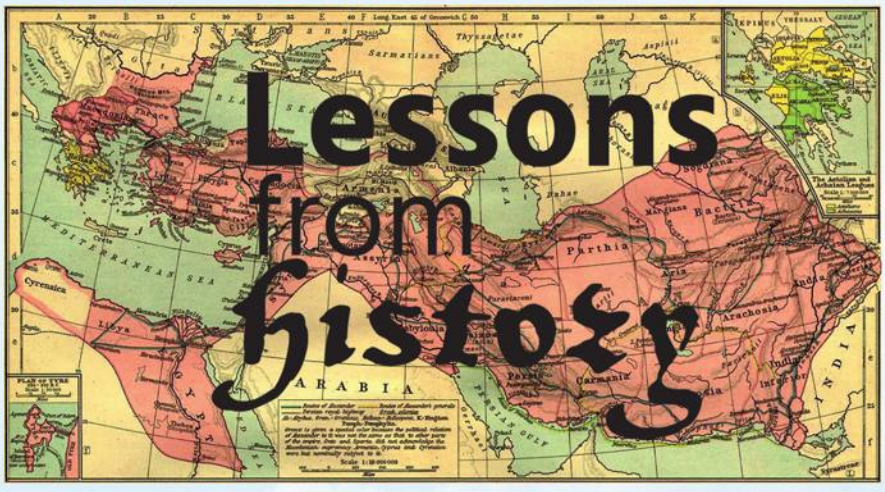
BUILDING A REAL RICH INDIA

GETTING REAL ABOUT REAL ESTATE

Lessons from history



An old Hindi film song **'Sikander ne Porus se ki thi ladai'** sung by Mahendra Kapoor in the film Anpadh (1962) is an interesting one. In the song a character questions the need to study history and asks, "**So Alexander attacked Puru, the Kauravas and the Pandavas fought**... but what have I got to do with any of that?"

There are many who would agree with that. Some people in some day and age went to war with one another, but what has that to do with us, right? Wrong!

For those who want to learn the fundamentals of getting to be Real Rich, history is a great place to start.

Many years ago, it is said, the anthropologist Margaret Mead was asked by one of her students what she considered to be the first sign of civilisation. And we are sure the student anticipated the answer to be about fragments of ancient pottery, or tools, or cave paintings or something like that. Her answer, however, was surprising. She is reported to have said that she considered a broken and healed femur, or thigh bone, from 15,000 years ago as the first sign of civilisation. And here's why – in the animal kingdom, if you break a bone, you die. You cannot run, you cannot hunt, you cannot find food... you die. But this human bone, from 15,000 years ago, was broken and then healed. This, according to Mead, showed that there was civilisation – some person or persons took care of the injured man, fed him while he healed, and allowed him to live on!

This means:

1. There was some knowledge of how to mend a broken bone.
2. There was a community of people who looked after the man with the broken bone.
3. They had food, or access to food.
4. They had some place safe to LIVE!

That is the hallmark of civilisation.

The earliest humans created real estate. And those who found the safest spots to live, spots that protected them from the elements and beasts, spots that gave them convenient access to water and food - these people created wealth in their lives and for the future.

It seems so obvious when we look at it that way, doesn't it?

Let's also look at wars. The history of mankind is one of wars. Tribes fighting one another, states fighting one another, generals marching on foreign territories, kings defending kingdoms.

For much of recorded human history, humans have fought one another for land. Again, it seems such an obvious truth. The ultimate symbol of power, wealth and grandeur has been the amount of land owned by a ruler and the kind of development that took place on that land.

Look at what any emperor in the history of humankind has done. They have, by definition, built empires. And what did those empires have?

They had palaces and roads and public eateries and places to gain education and markets and communities and homes and rest houses and hospitals and shops.

Empires were textbook definitions of developed land.

Empires, when you strip them of all the silk and velvet and pearls and diamonds and gold, were all about REAL ESTATE!

That is why kings became kings – on the basis of the real estate they owned!

(Excerpted from the book Real Rich with permission from the authors.)

Getting Real about Real Estate
Understanding Urbanisation

REAL RICH
GETTING REAL ABOUT REAL ESTATE

You don't have to believe in gravity. But when you throw a stone from a height, it will fall down, not float up, irrespective of your belief in gravity. That's just how this planet functions.

Similarly, the human need for spaces in which to live, work, study, grow, play... that need is a fact of life. Irrespective of whether anyone believes it or not, real estate lies at the very core of the condition of being human.

When we started writing this book, we spent a lot of time researching how other mammals, birds, insects and reptiles live. And for a while we even considered doing another book on homes in the animal kingdom – because that is how fascinating that whole universe was. Did you know, for instance, that the Cathedral Termites that live in Australia's Northwest Territory build centrally air-conditioned, self-sustaining mounds that are up to thirty feet tall? And that these mounds have north-south construction, with tunnels for temperature and air regulation? That they even have small motel rooms for mating?

See how fascinating that little paragraph was?

You can imagine how tempted we were to stay down that rabbit hole. But, thankfully for the purposes of this book, we emerged from the fascinating world of amazing animal architects with valuable lessons for our lives as humans.

We saw, even more clearly than before, that real estate is critical to the sustainment of life. That, in fact, all of our functions as individuals, families, communities and societies evolve with the evolution of real estate.

We were also struck by the incongruence of all the complaints we have heard about urban living. We hear these kinds of things all the time: "These cities are so crowded", "There is so much filth", "There is so much traffic", "We are so suffocated". The complaints are loud. But let us examine them closely.

1. Urbanisation is a fact of modern life. Currently, more than half of the world's population lives in urban areas.
2. By 2050, about 70 percent of the world's population is expected to live in urban areas.
3. Over 60 percent of the land projected to become urban by 2030 is yet to be built on.
4. Half the population of Asia is expected to live in urban areas by 2020, while Africa is likely to reach 50 percent urbanisation only in 2035.
5. In 1970, Tokyo and New York were the only megacities. A mere fifty years later, there are thirteen megacities in Asia, four in Latin America and two each in Africa, Europe and North America.
6. Having said that, megacities account for a small though increasing proportion of the world urban population: 9.9 percent in 2011 and 13.6 percent in 2025.
7. The real growth in urbanisation is in the small urban centre. Over half the urban population lives and will continue to live in small urban centres with fewer than half a million inhabitants.
8. The rate of urbanisation is expected to be the highest in Africa and Asia over the coming decades.
9. Over the next four decades, the urban population is likely to treble in Africa and to increase by 1.7 times in Asia.
10. While the number of slum dwellers has increased, the proportion of the urban population living in slums in the developing world has declined from 46 percent in the year 1990 to an estimated 32 percent in 2010.

Follow him on: RealRich thee_realrich The_RealRich The Real Rich Show

40 YEARS | GOEL GANGA GROUP

These are the facts. The question we need to ask is: Where are all these people who are moving to cities, moving out of slums, going to live?

Can anyone who has looked at the simple, easily available numbers on urbanisation continue to believe for even a moment that real estate is not the single most important factor in the great global urbanisation process of the human race?

And given the fact of urbanisation, are we seriously going to complain about the crowds and the traffic instead of focusing on creating long-term, sustainable futures for all of us?

There is an unprecedented need for urban spaces to live, work, study and entertain in. This is the time when real estate should be front and centre for anyone who is conscious about becoming Real Rich. Any time that we choose to waste in complaining about urbanisation is time that someone else is using to avail of the never-before opportunities opened up by urbanisation.

As the diagram above demonstrates, real estate is not simply a key driver of growth - it is the manifestation of growth too. People move to an area in search of education, employment, security or growth. When enough such people get together, they create primary, secondary and tertiary layers of community to take care of all their needs. Once their needs are taken care of, they move towards creating luxury. And that is how an entire civilisation springs from a single seed.

And just like a seed needs fertile land to grow, so does real estate.

What are the factors that create fertile grounds for the growth of real estate?

- Employment opportunities
- Educational facilities
- Medical and health infrastructure
- Transport and communication infrastructure

What are the factors that create premium demand for real estate?

In addition to all of the factors mentioned above,

- Access to entertainment
- Access to luxury
- Access to premium lifestyle destinations
- Centrality of location

Is there traffic? Yes. Is there crowding? Yes. Is there pollution? Yes.

But real estate is not the problem. Real estate is the SOLUTION to the challenges posed by the universal fact of urbanisation.

There is no going back. There is only going forward. And building a future that is clean, beautiful, and sustainable.

The operative word being BUILD.

It is always about real estate. It always has been. It always will be.

(Excerpted from the book Real Rich with permission from the authors.)

Follow him on: RealRich thee_realrich The_RealRich The Real Rich Show

40 YEARS GOEL GANGA GROUP

Who is a Builder?

If you are serious about getting Real Rich with Real Estate, you are going to be greatly benefitted by understanding this unique animal called a Builder.

A Builder is a facilitator.

There is a vision for nation building that comes from the government. But governments need people who will take that vision and make it into a reality.

On the other end of the spectrum there is a whole set of life and lifestyle aspirations that come from the common man. But the common man needs people who will build his dreams.

Between the vision of governments and the dreams of the common man, the Builder is the facilitator.

A Builder is a partner.

Look at the job of literally building a nation. It is a brick-and-mortar job. Roads, highways, bridges, dams, factories, offices, schools, hospitals, malls, parks, homes – they have all to be literally built. Nation building is a tough job, and a Builder is a partner in that job. Not merely a stakeholder, but a partner. Every single building that is constructed adds to the value of the skylines of a nation. We look at that Manhattan skyline as a symbol of all great things that humans can achieve. Who BUILT it? Builders.

A Builder is a dreamer.

And the best possible kind of dreamer. S/he looks at a barren piece of land and sees a city. S/he sees people rushing to work, kids happily going to school, grandparents living a gentle life in gentle spaces created for them; he sees young people growing by leaps and bounds in careers of their choice; he sees abundance, where others see nothing. A Builder is a dreamer...

A Builder is a doer.

There are endless levels of permissions, sanctions and compliances. There are endless agencies to coordinate with. There is a whole lifecycle of the project in which a Builder has to get things done from various agencies who never even interact with one another. The cement supplier never meets the architect, the architect never sees the legal team, the legal team knows nothing about sun path movement. But the Builder knows everything. He does everything. A Builder is a DOER!

There is heartbreak, stress, adrenaline, waiting, planning, drawing, re-drawing, blood, sweat and copious amounts of tears in the journey of a Builder.

But above and beyond all of that, there is something else. And it is this something else that keeps people on this perilous path – the joy of the skyline. When a building takes shape, when people move into it, when lives are lived in spaces that he has built, the Builder smiles a heartfelt smile and sleeps a deep sleep. He knows that this is his purpose – striking deep into the earth, laying strong foundations, and then soaring upwards, into the infinite sky... in order to give wings to the dreams of the people that he builds for.

At the end of the day, he is not an owner. He builds, he sells, he moves on. The people who buy from him are owners. The value of their asset appreciates. The Builder looks on at the appreciation with a glow of pride in his heart. Happy in the knowledge that he has helped innumerable people create enormous wealth.

Proud that history will know him. By the buildings he leaves behind. And the lives he made Real Rich.

(Excerpted from the book Real Rich with permission from the authors.)

> Hyderabad, witnessing a spurt in investments is proving to be the fastest-growing city in India and has emerged as the most preferred investment destination for global and domestic businesses.

B Subba Reddy
Founder, Vamsiram Builders

Share with us your overall thoughts on the real estate sector, particularly in Hyderabad and your expectation in the coming months?

Real estate merely does not encompass edifices or structures made of bricks, mortar, steel and glass, but is an architect of our presence and well-being. Real estate investments give a better sense of security amid a crisis when monetary resources come beneath the weight.

Hyderabad, witnessing a spurt in investments is proving to be the fastest-growing city in India and has emerged as the most preferred investment destination for global and domestic businesses. There is an unreflective urge for cutting-edge real estate developments that are both technically and operationally compatible. While being a massive IT investment hub, it can spare the stakeholders

Jyothi Optima

Overview

Jyothi Optima is an upcoming Integrated development of uber class retail , work space . Located at Opp to Rockwell International School Kokapet.

Upmarket Retail Spaces

Taking your Experiences beyond living and designed to strengthen and support an opulent lifestyle, Jyothi Optima features upmarket retail spaces that will be embraced by impeccable service providers

Office Spaces

The top floors feature office spaces designed to reflect mindfulness, management, and transformation. Surrounded by diverse facilities, these spaces unlock your inner vitality and maintain a perfect work life balance.

- **Status:** Under Construction
- **Area:** 3,50,0000 Sq.Ft
- **Location:** Gandipet Kokapet
- **Type:** Commercial ,Retail, Office
- **Floors:** G+14

from significant loss of money, time, and legal problems as the advantages will outweigh the costs spent.

Quality of life and affordability plays a big role in where people choose to buy a property. With advanced commuting capabilities, Hyderabad continues to be in a leadership position as the global conglomerate set up of IT companies, retail hubs, and life sciences industries are blatantly visible, besides the city enjoys the distinction of having won the prestigious "World Green City Award, 2022" for the maximum green cover developed over the last decade.

Performance in the real estate sector, including the residential and office segments, transcended pre-pandemic levels and hit a new record high in the July-September quarter as demand recovered sustainably despite rising interest rates. Real estate is a smart investment option, provided you have a medium to long-term vision. In addition, it also has a strong aspiration value.

Strong and positive dynamics are expected to continue to prevail in the Hyderabad property sector in the fiscal year 2023, supported by a solid structural base, rising demand and profitability. Construction is the third-largest sector in terms of FDI inflow. FDI in the sector (including construction development & activities) stood at US$ 54.17 billion from April 2000 to March 2022.

Affixing a property in Hyderabad to your portfolio will provide you with a more secure tangible asset that increases in value over time and recoups a portion of your investments through monthly rental payments, as the unit prices are expected to grow by around 6-9% in the year 2023, and these numbers must exhilarate you as an investor.

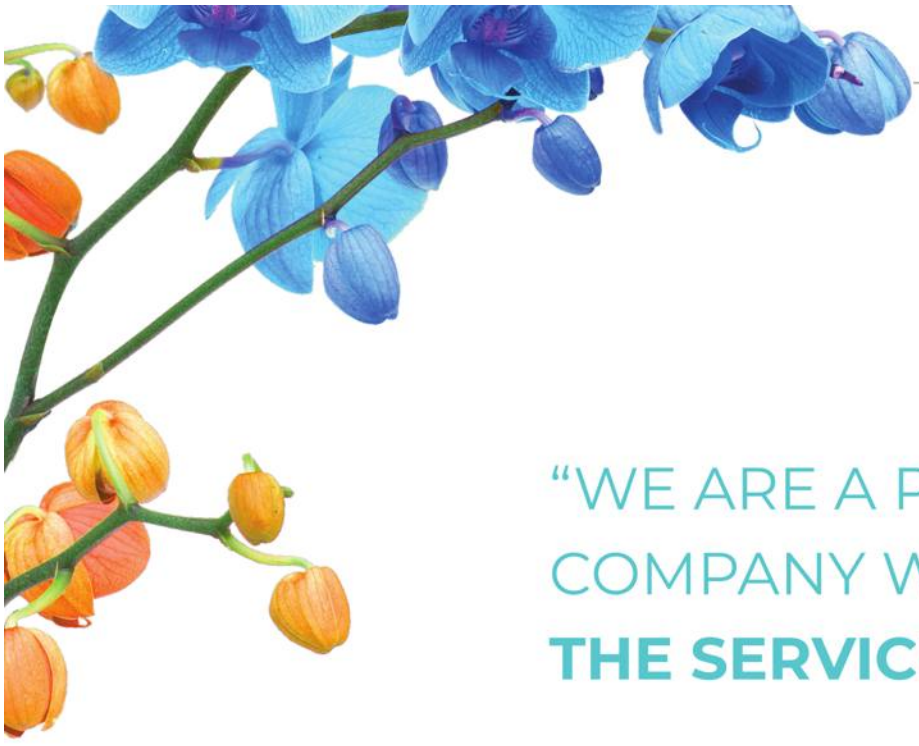
What changes or improvements do you think our existing working system should go about?

Real estate is an ever-developing industry which continuously needs to adjust to the unused innovations entering the showcase. Be it the case of constructing, offering or leasing, individuals will continuously look for the latest technologies when looking for their dream property, the one in which they will feel the foremost comfortable, secure and great. To coordinate the developing desires of clients, the real estate industry should adjust and utilize the unused advances accessible.

Taking after a pandemic-fueled course redress, the real estate industry faces transformational shifts in how buildings will be utilized, esteemed, and executed in 2023 and later. Progressing instability within the country's economy may affect the industry indeed more.

Key portfolio execution, prioritizing environmental, social, and governance to meet administrative and partner requests, understanding later and pending changes to

charge structures, reconsidering ability approaches, and utilizing innovation to enhance and progress proficiency, stood out as the need of the hour. In looking at real estate markets, we must consider existing delicacy, versatility to modern requests, and potential pertinence to new markets. The request will be characterized by the degree to which this crisis shall lead us to desert ancient propensities and embrace modern ones. Real estate organisations must learn about potential regulatory changes and adopt practices to comply with reporting requirements.



VTP REALTY
A WORLD OF THOUGHTFULNESS

"WE ARE A PRODUCT COMPANY WITH A **MINDSET OF THE SERVICE INDUSTRY.**"

VTP Realty is Pune's #1 Real Estate Development Brand*. The undisputed leaders that have not only set new benchmarks in business numbers but with stellar delivery line-up as well. Ranked 5th in India** VTP Realty is a well-known skyrocketing success story despite being a single city developer. A brand that stands firmly on strong ethics and projects a trailblazing thought-leadership for the industry. The numerous awards winning brand prides itself in pioneering the MLA (Maximum Livable Area) Homes. **The brand operates on the ethos of "Thoughtfulness" and it's 3-tiered philosophy of Better Design, Better Build and Better Care makes it a buyer's brand.**

VTP REALTY - A WORLD OF THOUGHTFULNESS

Pune is known to be a market that is driven by substance over style. It doesn't get swayed by lofty promises and hyperbole. Our deep understanding of the city has been the cornerstone of our stature as the undisputed market leader for the past five years. We are completely aligned to consumer needs and firmly believe in creating value through substance in every aspect of our offerings along with style and aesthetics.

Disruption is in our DNA. And possibly the secret of our sustained leadership going forward. We continue to challenge the status quo, question the conventions, and raise the bar consistently. It just so happens that now, we challenge our own benchmarks with every new project.

This has helped us deliver world-class developments that are not just holistic but have futuristic and smart design language as well. Anchoring us is our world of thoughtfulness also, that is customer-centric and delivers delight at every step of the home ownership journey.

Our dynamic leadership obsesses over every aspect of each development that carries the VTP name, as well as every step of each customer's journey with us. No wonder the VTP family continues to grow with every passing day and the brand is consistently ranks at #1 in the industry in Pune.

Sachin Bhandari, Executive Director and CEO, says "We are setting the highest benchmarks not only in sales but this year we will break records with our delivery. We are committed not only to business revenue but

WE ARE COMMITTED TO ESTABLISHING OUR LEADERSHIP ON ALL BUSINESS FRONTS.

COMPLETED PROJECTS

3.5 MILLION SQ.FT.

16,000+ HAPPY FAMILIES

ONGOING DEVELOPMENT - **30 MILLION SQ.FT.**

#TrueLeadersOfRealEstate

*According to sales revenue. **According to number of unit sold in FY - 2021-22

highest build quality for each of the thousands of homes we are slated to deliver this year. My entire team is working tirelessly as 2.28 crore square feet is being simultaneously developed across the city. Perhaps no other developer has such vision and strength. We are also highly emulated by others in the industry. In a way putting more responsibility on us to set up the best practices for the entire sector."

THE DRIVING FORCE BEHIND THE BRAND

Sachin Bhandari, Executive Director and CEO of VTP Realty became well versed with real estate during his stints in sales, marketing and finance. He believes, his background as a financier helped him develop a deep understanding of the pulse of the real estate sector.

He believes that his journey is all about learning. Understanding that one can't make 'perfect' decisions all the time, for Sachin Bhandari, the important thing is to keep calm and stay focussed on finding solutions.

When Sachin Bhandari took on the mantle of the CEO of VTP Realty in 2015, the brand was small and had a long way to go. Under his leadership, the company aligned itself to fast growth and underwent a revolution inside out. Each department was setup with processes that facilitated rapid growth. Sales and marketing also ramped up and the brand entered a new era of recognition. With a strong focus on designing better living spaces and strengthening the delivery pipeline, Sachin Bhandari today is the true driving force behind brand VTP which is looking at closing FY 2023 at over 4000+ crores of sales revenue and delivery of 3.5 million sq.ft.

Going from being a new entrant in the sector to becoming one of the top players in the city, in a very short span of time, is something that gives him immense pride.

THE CONCEPT OF MLA HOMES

MLA Homes (Maximum Liveable Area) is a design philosophy pioneered by VTP Realty. Wherein, everything is intelligently planned so that the residents get more space to enjoy the finest moments of life. Our apartment design and layouts offer larger room dimensions than most other projects, even in the same carpet area. The size of the decks and dry balconies is also just right for their purpose.

SACHIN BHANDARI
Executive Director & CEO of VTP Realty

The project layout planning ensures optimum spacing between the towers VTP Realty's scientific design approach MLA or Maximum Liveable Area.

The brand is also the pioneer of simplexes (aka butterfly units) and duplex apartments in towers. This allows customers access to much larger apartment formats than originally designed. Our custom designed simplex / duplex units are hugely popular and are best-sellers.

EXCELLENCE BOUGHT TO LIFE WITH -

BETTER DESIGN - Layouts that maximize the potential of each home offering more usable space, upgraded premium specifications, amenities for every family members and better value for money.

BETTER BUILD - VTP Group has over 38 years of experience in construction material sourcing. Built close to a 100 projects across the country with many reputed developers and the government, as customers. One of the pioneers of the latest construction technologies in India.

BETTER CARE – No transfer fee. Community Building programs after possession. Professionally-managed team facilitating leasing and resale of property. V-Care Customer Portal for single window.

LEADERSHIP THROUGH COMPASSION & INSPIRATION

Sachin Bhandari believes, a leader cannot always be a boss. He must sometimes be a guide, a father figure and sometimes be a friend. He further shares **"We hire people across age groups and industries and every leader must be adept at handling a multi-talented team of various ages. Infact we will have to unlearn somethings and relearn some new things when leading the millennial task force. Importantly compassion cannot be practiced once, or twice. Or even sometimes. It is a continuous effort. It must be a consistent attribute to your leadership style.**

My personal style is more grounded and pragmatic. I believe in inspiring by example and not just by speeches. A leader must be daring and have a high risk-taking ability. Only then path-breaking work can be done, and iconic organizations can be built."

LANDMARK PROJECTS

Enjoying over an enviable 10% market share of the Pune's real estate, VTP Realty the absolute leader of Pune's real estate industry with townships, residential and commercial projects, across every micro-market of Pune.

Our projects in the premium segment are VTP Sierra, VTP Verve, VTP Alpine, VTP Solitaire, VTP Celesta, Hilife and our international award winning Grade – A commercial project in Wakad, Altitude. Our other commercial projects are KP Square in PCMC, Trade Park and Market Place in south Pune.

Our projects in the two marquee townships – Blue

3.5 ACRE CENTRAL PODIUM LANDSCAPED GREENS WITH A 2-LEVEL GLASS CLUBHOUSE & LARGE SWIMMING POOL AT EARTH 1 BY VTP REALTY

*Artistic impression

Waters in Mahalunge, Pune West and Pegasus in New Kharadi, Pune East are the top sellers of the city. Earth1 by VTP, VTP Bellissimo, VTP Aethereus, VTP Leonara, VTP Belair and VTP Alpine rule the roost in the western Pune market with their wide variety of configurations. The Eastern corridor is dominated by our projects in Township Pegasus in New Kharadi with VTP Euphoria, Velvet Villas by VTP, VTP Beaumonde and VTP Cygnus.

Our latest residential project is crafted for those who are well travelled, well read and well lived. In the verdant green and peaceful environs of Mahalunge, the project is nestled amidst hills and the flowing Mula river. The project is not only an architectural marvel with stunning elevation but affords the residents a lifestyle closely integrated with nature. Isn't that today's real luxury? Over 4 acres of open amenity space in the project gives its residents a taste of the same luxury they have experienced before in their world travels.

Why should any customer compromise on their lifestyle, when they are achievers in their professional life. Why should they be pushed into leaving some boxes unchecked. Fast paced professional life can coexist with a more aware and deliberate personal lifestyle. A one that is close to nature. To the hills, the flowing river, the purest wind and the sun's shine. Why give up creature comforts while embracing nature? We want to give them both.

And keep that premise in mind, we crafted Earth 1. The best this world has to offer amalgamated in a home.

FUTURESCOPE

VTP Realty is known to upturn every micro-market it enters with an enthused capability to push prices up, premium product line-up and fastest sales. Today we are present is all micro-markets of Pune and we will keep strengthening our position with newer products offerings and more locations. We are looking toward extending our presence outside Pune.

Our extensive market network to develop real estate products and services is an invaluable asset for us and a boon to our investors. We are synonymous with Integrity in every facet of real estate!

Hakim Lakdawala
CEO, Goodwill Developers

> "Over the years, we have succeeded in building an unparalleled reputation that rests firmly on a value-driven, customer-centric approach; transparent systems and processes that ensure accountability of the highest order."

How do you view about Real Estate outlook for 2023? Which sector (residential/ commercial etc) will fuel the demand and why?

The Indian economy reflects strong positive signs for 2023 with a forecast of 8-9 per cent overall growth, fuelled by a solid structural foundation and rising demand. The improving standard of living & population expansion, the demand for housing infrastructure has grown now more than ever, further bolstering India's real estate market. Moreover, the government's recent rollout of numerous tax-related and other incentives aimed towards potential house buyers and NRI's will further boost the growth of the realty sector. The demand is likely to be more than supply in the mid-market housing segment and this will also lead to rise in prices. The desire for home ownership, especially in the younger and first-time home buyers is increasing with addition of property rentals being at an all-time high. The demand for housing is expected to percolate to Tier 2 and Tier 3 cities, that are closer to large metros or located in industrial belts where there is investment potential. Commercial real estate sector is also likely to witness growth with major companies switching back to offline work. We will also witness further market consolidation towards larger Developers, which will be beneficial to established players. Overall, we expect 2023 to be a good year for the real estate sector and one that will set the platform for further growth in the future.

Can you tell to our readers about Goodwill Developers' success story so far?

Right since its foundation in 1997, Goodwill Developers has been recognized as the proud trendsetters of unique propositions in Navi Mumbai's real estate market. Over the years, we have succeeded in building an unparalleled reputation that rests firmly on a value-driven, customer-centric approach; transparent systems and processes that ensure accountability of the highest order with customer delight at the core of its ideology. Goodwill Developers is one of the real estate companies in Navi Mumbai with a professional core team managing the entire operations in the Company. We have successfully delivered 20 + projects having more than 2,200 happy families in a span of 25 years amounting to approx. 2.5 million sq.ft across all asset classes like Integrated Townships, Residential Condominiums, and Commercial Offices.

Our extensive market network to develop real estate products and services is an invaluable asset for us and a boon to our investors. We are synonymous with Integrity in every facet of real estate.

FAISAL
ROOFING SOLUTION

SINCE 1991

AN ISO 9001:2015 CERTIFIED COMPANY

FAISAL ROOFING SOLUTION (I) PVT. LTD.

आप सोचिए हम बनाएंगे

SALIM I. REHMANI

FOUNDER & CMD

Salim I. Rehmani, the Founder of Faisal Roofing Solution, is an inspiration for the working class and for the entrepreneurs alike. A self-made man, Salim started his career from the lowest rung with a blue collar. But he nurtured the right attitudes which made him go that extra mile in everything he did. He had that rare spark in his eyes to envision something which is unimaginable for the mundane people who may seldom have the kind of grit and determination which Salim displayed.

Salim who physically lifted and carried roofing sheets to eke a living, succeeded in building an empire of his own with roofing sheets! That's the saga of Faisal Roofing Solution (I) Pvt. Ltd., the Rs.100 crore enterprise which Salim I. Rehmani heads and steers today. A company which offers the entire gamut of roofing solutions to the industrial world and sets benchmarks in industrial roofing in India. A modern manufacturing facility in Taloja, near Mumbai with state-of-the-art production equipment, a hundred plus highly motivated and dedicated employees, cutting edge technology products designed for energy efficiency, durability, green-house effect and integration with solar power systems and a portfolio of 750 plus blue-chip organizations to vouch for the company's quality products and eminent service back-up, Faisal is indeed poised to join the big league in the not too distant future.

But the modesty of the man who aims for the stars says that he has only one ambition: Live for the people who work for him sincerely and make their homes and fructify their dreams!

WE ARE COMMITTED
MILESTONE

1991: The founder, Salim Rehmani got a chance to work for RCF starting from 13th Nov. The work involved installation of conveyor on rooftop. It was sheer hard labor for a meager daily wage. But it decided his destiny and opened up his eyes and gave him a perspective. He knew what exactly he should do for a living. This triggered the humble beginning of his enterprise.

1997: Salim Rehmani started a small firm in the name of S N Roofing Services.

2009: Faisal Enterprises was started. The firm was engaged in trading.

2011: Faisal Roofing Solution (I) Private Ltd. was incorporated. After the initial hiccups, the company could get its roots fixed firmly on the ground.

2019: Faisal set up its maiden manufacturing unit at Taloja, Wavanje, Maharashtra . Having an area of 1,42,642 sq ft, the facility housed different divisions and departments including Pipe, H-Beam and Plazma Cutting Line for structural fabrication.

5 Common Mistakes First Time Home Buyers Should Avoid

> "Finding an affordable home can be difficult with low inventory in many local markets and rising home prices nationwide. Between the euphoria of purchasing a home and the stress of its financial implications, a first-time buyer is prone to making mistakes.

Anurag Goel
Director, Goel Ganga Developments

Most people's largest investment in their lives is the purchase of a home. You must not only find the right location, but also the right mortgage. Finding an affordable home can be difficult with low inventory in many local markets and rising home prices nationwide. Between the euphoria of purchasing a home and the stress of its financial implications, a first-time buyer is prone to making mistakes.

Here are five common mistakes that first-time buyers make and how to avoid them.

Failing to fix a budget

The biggest mistake potential homebuyers make is not having a specific home purchase plan in place. The first consideration is your financial capacity. If you don't know how much you can afford to spend on a house, you'll be in big trouble later, especially if your home consumes all of your earnings. It all starts with a budget, which is created after taking into account other major expenses, especially if you have other loans to repay.

Inadequate research

Research will help you understand the kind of projects in the market. The best way to begin the quest is to do adequate research. Identifying the right locality for your needs, estimating the prices in said area, having a general idea of reliable builders, having a basic understanding of interiors and construction etc will go a long way in protecting newbies from making rookie mistakes.

Not comparing home loans

The interest rate is the most important factor to consider when choosing a lender. However, there are several other factors to consider. Given that you will be spending a significant portion of your working life repaying this debt, a home loan product should be chosen after extensive research and due diligence.

Not checking loan eligibility

One should not proceed with the purchase unless the financial status is well understood. A typical purchase requires a down payment ranging from 10 to 25 percent of the actual value, the remaining amount availed as a loan from banks. It's a good idea to get pre-approved for a loan to determine your loan eligibility. This will give you an idea of your financial capacity and will aid you in your home search.

Ignorance about tax benefits

Few people are aware of the taxes they must pay when purchasing a home, as well as the rebates available under various sections of the Income Tax Act. Not paying the taxes on your home purchase would be considered tax evasion, and failing to properly claim the rebate would result in financial losses.

LEAKAGE, SEEPAGE, CRACKS, PEELS, CORROSION . . .

WE PROOF IT

Structural Restoration and Plastering at site

Jacketing of Load-bearing Pillar at site

Water is a shrewd traveller. In 15 years of painstaking analysis, MASTER COATS has uncovered some ruthless secrets of how water seeps through the smallest of cracks to damage the strongest of structures. Rainwater combined with faulty drainage systems, harsh weather conditions, wear and tear – all give way to leakage and corrosion – leading to a weak structure that needs immediate attention.

MASTER COATS has been closely working with leading builders and architects to help restore the structural stability and beautification by providing integrated services such as Structural Repairs, Crack Filling, Plastering, Exterior and Terrace Water Proofing, Painting, and Interiors.

> Over the years, we have succeeded in building an unparalleled reputation that rests firmly on a value-driven, customer-centric approach; transparent systems and processes that ensure accountability of the highest order.

Sagar Sukhwani
Director, Sukhwani Associates

Right since its foundation, Sukhwani Associates has been recognized as the proud trendsetters of unique propositions in PUNE's real estate. With customer delight at the core of its ideology, Over the years, we have succeeded in building an unparalleled reputation that rests firmly on a value-driven, customer-centric approach; transparent systems and processes that ensure accountability of the highest order. We are synonymous with Integrity in every facet of Real Estate! Under the visionary leadership of Mr. SAGAR SUKHWANI, having over 10 years of rich experience in Real Estate. He holds a Bachelor's degree in Business from Symbiosis Institute of Management Studies. His vision is to be known as the creator of unprecedented superior lifestyles. His aptitude for excellence has created the highest business standards, which are appreciated by the industry professionals as well.

We at Sukhwani Associates are constantly striving to scale new heights in professional competencies and efficiencies by pushing performance and human potential to new limits. Using our intellectual and managerial expertise and harnessing the benefits of state-of-the-art technology, we all set out to venture into the next level of real estate development and construction in the Western India. We are looking forward to growing in more in PCMC & Pune.

A trusted name in the real-estate sector in PCMC & Pune with 45 years of stellar Reputation, 60+ Projects executed, 1 crore sq.ft of upcoming construction, 20,000+ Happy families by delivering on time, 2 crore sq.ft of Quality construction, 5000+ apartments delivered to loyal customers by Mr. Gurmukh Sukhwani. In this ever-changing real estate environment, our Customers are at the center of our business and we are driven by a constant urge to adapt to their changing needs.

The New Year has started so what are your plans for this year? What are the initiatives we can see in 2023?

Real Estate has been one of the driving forces of economic growth in our country. NITI Aayog predicts that the Indian real estate market will see tremendous growth in the coming years and show a 13% rise in GDP by the year 2025.

This comes at a time when the real estate business in India is undergoing a technological transformation. Several innovative strategies and solutions for reforms are being implemented throughout the industry. No doubt, this sector is all set to witness transformation and unprecedented growth in the coming years.

> Pune is one of the fastest growing cities with an influx of people from all over India, who are looking for a better life and job opportunities. The Pune housing market is expected to remain robust in 2023 because of rising buyer demand and increased investment in infrastructure projects.

According to you, what is the current scenario of real estate in the market in the country; especially in PUNE?

While the pandemic dampened growth, the real estate industry has begun to recover after being devastated by the pandemic. Rapid urbanization, changing consumer behavior, regulatory reforms, and the impact of COVID-19 on everyday living are all driving the evolution of this sector right now.

Pune is one of the fastest growing cities with an influx of people from all over India, who are looking for a better life and job opportunities. The Pune housing market is expected to remain robust in 2023 because of rising buyer demand and increased investment in infrastructure projects. Pune's housing market is expected to remain active and develop further with more new projects in the pipeline and investments from both local and out-of-town buyers.

For buyers, this could mean more housing options and lower property prices; for investors, it could mean new opportunities for capital gains and returns on investment (ROIs).

How would you define your investing experience in your projects? What would be your piece of advice to investors looking at this market?

Real Estate has always been profitable if your decision is backed by thorough market research. It's important to do your homework before investing as it takes considerable capital for investment. Our investing experience was fairly good and we have a bright future ahead with new projects in line.

With major trends that point out the growth of Indian real estate, the sector is expected to witness a 5% value growth. Sales momentum will increase owing to affordable rates and easy interest rates. The future looks promising, and the industry is expected to register double-digit sales growth in 2023. This makes it an ideal time for the homebuyer to invest and go for it strategically!

> Our advice to an investor looking at this market is to early identify lands in neighbourhoods carrying the potential of infrastructure development and invest in them. It is an excellent money-saving investment strategy which will guarantee higher returns in the future. There is a great saying **"The best investment on Earth is Earth"**

Harsh Agrawal (MD) with Omprakash Agrawal (CMD)
Peak Realty

Tell us little about Peak Realty?

Established in 2011, Peak Realty India Pvt Ltd is a reputed and renowned name in the field of "Real Estate".

The company is primarily into real estate business and has acquired large land parcels in prominent locations all across Central India with various price points to cater to the needs of different target groups. We are a major player that offers multiple usage of land for residential, commercial, industrial and many more uses.

How would you define your investing experience in the Land development projects? What would be your piece of advice to investors looking at this market?

"Smart Investments also needs to be safe Investments".In India, land and plots usually yield high returns as land appreciates more quickly than any other type of investment. If you have land in an area with good infrastructure and development, the price of that land will appreciate more. Our advice to an investor looking at this market is to early identify lands in neighbourhoods carrying the potential of infrastructure development and invest in them. It is an excellent money-saving investment strategy which will guarantee higher returns in the future. There is a great saying **"The best investment on Earth is Earth".** Although, there is no guarantee in a business and it is subject to changes in the economy, in the long term, real estate usually is one the most stable progressive investment alternatives as it value tends to appreciate over time in a growing country like India.

What is your biggest USP that differentiates the company from competitors?

Building a distinct product or service and finding its place in the market takes a lot of work. But over time, one's efforts can pay off significantly. By differentiating your products and services, you can find your customers, create the products they want, show them what makes you unique, and ultimately grow your business by making them feel valued.

We distinguish ourselves by ensuring the highest quality finishes that meet our customer's expectations. Projects are created with the customer's needs in mind, as well as the valuation factor, by imagining the projects standing in 5 to 10 years. We recently sold a huge parcel of land to Godrej Properties Limited to build one of the largest residential townships in the land of oranges (Nagpur).

What would be the most determining factor in your company's growth in the near future?

Since we are into Land Development the main determinants to the longitivity of our company revolve around Land. Factors like foreseeing the demand by analysing the demographics, understanding the topography and having visionary thoughts on a place on the basis of the local authorities' development process all play a major role in the growth of this sector. Formulating effective strategies keeping in mind these factors and investing at a favourable time determines our company's growth in the near future.

MANOJ GAUR – THE MAN WITH A VISION

Manoj Gaur, Chairman and Managing Director of Gaurs Group, is one of the most respected name in Indian real estate, all because of the unfaltering commitment and timely delivery of close to 65 real estate projects. A reputation gained by hard work, perseverance and absolute commitment.

MANOJ GAUR
CMD, Gaurs Group
VP - North, CREDAI (National)
& President, CREDAI (NCR)

A first generation entrepreneur, Manoj Gaur, is at the forefront of real estate in the country today. Donning multiple hats, in his own organisation as well as leading the real estate fraternity through his dual roles at CREDAI, the leading real estate body with almost 13,000 members all over the country; he is one of the leading and most respected name in real estate world today. Mr. Manoj Gaur holds dual roles at CREDAI: Vice President - North, CREDAI National, and President - CREDAI NCR. Besides these, he also holds the position of Chair, Housing & Urban Development Committee, PHDCCI - UP Chapter. He has always been a visionary, driven by the ambition of diversifying the Gaur Group.

Under his visionary leadership, over the past 28 years, Gaurs Group has delivered multiple group-housing residential projects, commercial complexes, developed three integrated townships, and made forays into the luxury residential category too. It has consistently delivered superior construction quality and on-time possession of projects since inception. Gaurs Group has etched its reputation and evolved into one of the most successful developers in Delhi NCR. In the sphere of real estate, the name of Gaurs inspires awe and stands for the highest quality. The projects boasts of a broad spectrum, ranging from affordable housing to group housing residences, sprawling townships to mega malls.

The key to success lies in diversification and Mr. Gaur realized this mantra early on. As a result of this vision, the Group today has successfully diversified into sunshine verticals of Retail Malls, Education and Hospitality. Today, the Group has in its repertoire - 2 extremely sought after malls - Gaur City Mall at Greater Noida West and Gaur Central Mall at Ghaziabad. It runs 4 schools under its banner - Gaurs International School wherein today more than 4500 students are studying. The Group also runs - The Gaurs Sarovar Portico - a 74 room luxury hotel. Gaurs Group is soon venturing into Solar Power Generation and is setting up a plant at Mahoba near Jhansi, which is rapidly under construction.

> "For all his efforts and dedication to the sector, Mr. Manoj Gaur has been recognized at various forums and has won prestigious Real Estate awards. In 2019, he was felicitated with the CEO of the Year award at BAM Awards in association with CII."

Not only this, the group is also fulfilling stuck dreams of distraught buyers by completing 10,964 units in three Amrapali projects after being awarded tenders worth Rs.2124 crores from NBCC. The group has also diversified into NBFC category, and launched SugarMoney; a finance startup in 2022. It provides loans with an aim to empower small businesses with financial growth.

For all his efforts and dedication to the sector, Mr. Manoj Gaur has been recognized at various forums and has won prestigious Real Estate awards. In 2019, he was felicitated with the CEO of the Year award at BAM Awards in association with CII.

A philanthrope at heart and a strong votary of "Beti Bachao, Beti Padhao" mission, Manoj Gaur has opened the access of Gaurs International School at Gaur City, Greater Noida (West) to girls belonging to economically weaker sections of

society. Today, 440 girls are getting free education under this scheme at the school till 12th standard. He is also a strong believer in Hon'ble Prime Minister, Sri Narendra Modi's mission of "Housing for All" which has enabled him to create massive footprints in the affordable housing segment.

Mr Manoj Gaur's vision has been to transform the real estate sector totally. From affordable to mid-segment to premium to ultra-luxury, it has its footprints in every sphere of realty. Among his visioning ideas, such as townships, the company under him understood the value of a township early on, delivering two hugely successful, integrated townships - Gaur City and Gaur Yamuna City along with one more new township, Gaur Airocity Ghaziabad, which is currently under construction.

The company recently launched a super luxury residential project in Greater Noida - 'The Islands by Gaurs'. This is one of the most ambitious projects in the group's journey and the buyer response has been phenomenal.

During times of hardship, such as the recent Corona crisis, which nearly halted construction activities; the group successfully weathered the storm stoically under his leadership and moved ahead. The group not only completed the under-construction projects in record time but offered them for possession to the customers. Gaurs Group, under his leadership, established RMC and Shuttering plant in 2013-14, that moved the pace of construction and enabled the group to give timely possession in such huge numbers. Under Mr. Manoj Gaur's leadership, Gaurs Group today has successfully delivered more than 65+ projects, which translates into more than 70,000 residential plus commercial units.

The Gaurs Family, standing from left to right – Manju Gaur, Veshesh Gaur (Son), Sarthak Gaur (Son). Sitting from left to right – Manoj Gaur and B. L. Gaur (Father)

Gaurs Group is renowned for unwavering values, robust engineering, and uncompromising business ethos, along with a pursuit of excellence that has led to the highest degree of customer satisfaction in each project. With Mr. Manoj Gaur at helm, this 28 year young organization is bound to grow by leaps and bounds.

Manoj Gaur along with his staff members is all smiles at the 28th Foundation Day of the group on 20th January 2023.

Smart elevator solutions can be a great help in dealing with the Green Building Challenges

The concept of green building has always been associated with environment and sustainability-related features such as green walls and solar panels, but it is way more than that. Green Building is one of the latest trends in the building and construction industry, which aims to reduce energy consumption through sustainable and energy-saving building design and using energy-efficient equipment.

Manish Mehan
CEO & MD, TK Elevator India

With growing urbanization and vertical development of cities, sustainable living has become extremely important. Energy consumption is high in cities, with the significant source of consumption being the buildings, manufacturing units, and transport. In the wake of global warming and pressing concerns of energy consumption, green building is becoming increasingly relevant to urban lives.

Challenges to promote green building in the country

A popular view against green buildings involve higher operation and maintenance costs in comparison to conventional buildings. Rather, the truth is by optimizing key systems such as lighting, air-conditioning, electrical and vertical transportation, green buildings can over a longer term help reduce energy consumption and operation cost thanks to their higher operational efficiency.

Locally, popularity of green building is still hindered somewhat by funds and budget constraints of owners and developers, limited awareness on operation and maintenance requirements, and most importantly the environmental and financial benefits green buildings can offer in the longer term.

MAX Controller

How next generation elevator solutions can contribute to the development of green building concept in the country:

Elevators allow cities to expand upwards instead of outwards, allowing us to effectively reduce urban sprawl and associated negative impacts of traffic congestion, pollution and other key issues that are concerns for many countries in Asia Pacific.

In today's times, buildings are responsible for 40% of overall energy consumption, and around 10% of the building's electricity is consumed by the traditional elevators. But this can be overcome with smarter and newer elevator technologies. Using TK Elevator's revolutionary TWIN elevator system as an example, with two elevators operating independently in one shaft, the TWIN offers the benefits of significantly increasing system capacity, without the need for extra elevator shafts.

The biggest advantage of our TWIN is its ability to park one of the two cars while the other stays in operation. This means when passenger volumes are low, very little energy is consumed by the non-moving cars. Additionally, the TWIN can be equipped with energy recovery devices that can feed about 30% of energy back into the building's power grid.

Digital and sustainable mobility solutions "The major game-changer":

Mobility solutions play a pivotal role in building a sustainable tomorrow. And TKE's solution for the future is MULTI, which allows the operation of multiple cabins in both horizontal and vertical directions, and frees tall building design from the constraints imposed by traditional elevators. As the world's first rope-free elevator system, MULTI gives architects the power to completely reshape our cities, and has the potential not just to connect floors but also buildings and cities as a more eco-friendly transportation means. The focus of our innovation is also on using the latest technologies to drive energy efficiency and minimize the overall energy consumption of the building.

In addition, all our elevators can be equipped with MAX, which provide the benefits of data analytics to facilitate predictive maintenance services. MAX is a game-changing

predictive and pre-emptive maintenance solution that extends remote monitoring capabilities to dramatically increase current availability levels of existing and new elevators. Utilizing the power of Microsoft Azure Internet of Things (IoT) technology, MAX predicts maintenance issues before they occur, and empowers elevator engineers by flagging the need to replace components and systems before the end of their life cycle.

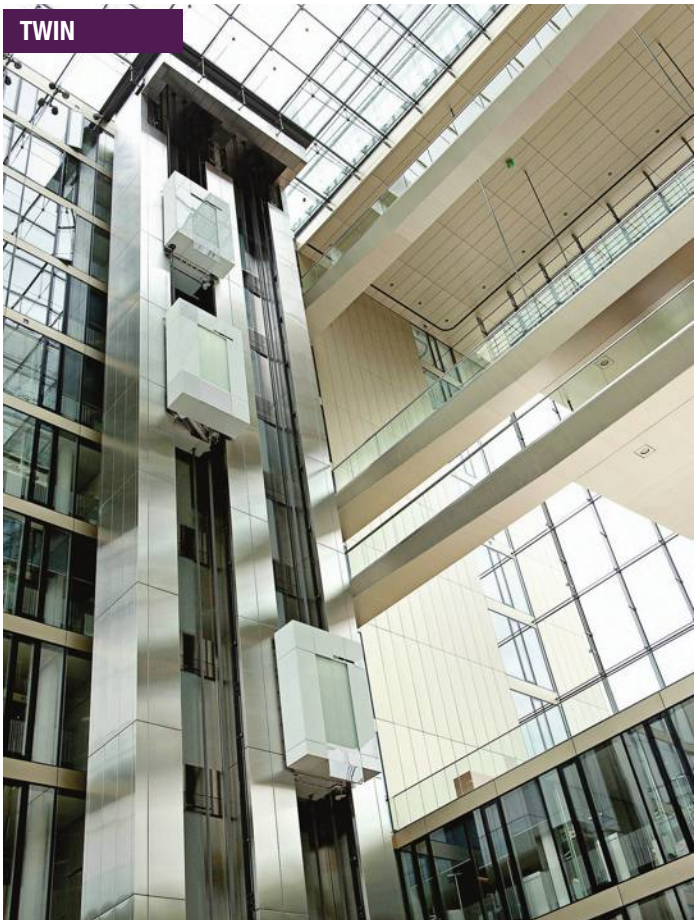
Our AGILE Destination Control (DSC), also improves system efficiency and passenger experience by effectively shortening wait and travel times. Compared to conventional elevator control systems, the AGILE DSC increases passenger handling capacity by up to 30%, minimizes passengers' travel times to their destination and reduces crowding in lift lobbies. DSC also allows for much more flexibility in elevator grouping, lift core layouts and overall building design.

Why one should opt for digital elevator technology in building:

- **Reduced energy consumption:** By optimizing key systems such as lighting, air-conditioning, electrical and vertical transportation, green buildings can over a longer term help reduce energy consumption and operation cost thanks to their higher operational efficiency.
- **Reduce negative impacts of urban sprawl:** Elevators allow cities to expand upwards instead of outwards, allowing us to effectively reduce urban sprawl and associated negative impacts of traffic congestion, pollution and other key issues that are concerns for many countries in Asia Pacific.
- **Versatile elevator deployment:** TK Elevator's next-generation elevator TWIN has the advantages of flexible zoning by operating the two cars independently, lighter in total weight, and the added flexibility to park one of the cars during non-peak hours to save energy, this is very important for modern green buildings
- **Improves system efficiency and passenger experience:** Compared to conventional elevator control systems, the AGILE DSC increases passenger handling capacity by up to 30%, minimizes passengers' travel times to their destination and reduces crowding in lift lobbies. DSC also allows for much more flexibility in elevator grouping, lift core layouts and overall building design – which makes it the ideal elevator control solution for modern green buildings.

Applications

Green building reduces the environmental impact of buildings by optimizing the use of energy, light and other resources to reduce consumption and minimize carbon footprint. Next generation elevator solutions such as



TKE's TWIN and MULTI used in newly-built skyscrapers and high-rises can effectively reduce urban sprawl and its associated impacts, but older buildings can also be turned into more sustainable or "greener" ones by modernizing its vertical mobility system. Digital solutions such as TKE's MAX and AGILE DSC can also bring the operation and energy efficiency benefits to older buildings by means of modernization.

In a nutshell, the concept of green building applies not only to new state-of-the-art high-rises and newly developed urban areas, but to all kinds of buildings and infrastructures; thereby extending the benefits of reduced environmental impact and enhanced health and well-being of occupants to people dwelling in less developed and older communities as well.

With the new, frameless **Infineo** sliding door.

Featuring a fully concealed outer frame, ultra slim 21mm interlock and market leading performance; the Infineo sliding door has been engineered to break free from the conventional constraints in architecture, design and living space.

Omaxe brings world-class shopping experience to Delhi/NCR

> "Overall the year 2022 was positive for the real estate sector, people have again started investing and we witnessed a significant boost in commercial, retail, and residential investments. People nowadays look for better lifestyle spaces to spend quality time with their friends and family."

Siddharth Katyal
Group Director, Omaxe Limited

Staying true to its motto of ***'Turning Dreams into Reality'***, Omaxe has delivered some landmark projects and engineering marvels in the past three decades. The real estate giant has exhibited unparallel skills and passion to turn the dream of millions of Indians into the reality of owning their space in both luxury and affordable segments. With a vision to elevate the living and shopping experience of their customers, Omaxe is creating two world-class shopping centers, equipped with new-age technology and modern amenities with detailed architecture at prime locations in Delhi/NCR.

Omaxe World Street at Faridabad and ***Omaxe Chowk*** at the heart of Delhi's Chandni Chowk, are the two upcoming projects of Omaxe that will provide customers with a world-class shopping experience.

If you wish to take a quick tour around the world then visit the ***World Street by Omaxe*** at New Faridabad. World Street, is the crowning jewel of Faridabad with its internationally local design on a high-street royal theme like Portugal, Athens, Amsterdam, London, San Francisco, and Paris Street. World Street is a one-stop destination for shopping, gaming zones, food court, hypermarkets, office spaces, and residential spaces while being well connected

In the last 35 years, Omaxe has delivered some landmark projects and engineering marvels, created a niche in both luxury and affordable segments and more importantly has brought smiles in the lives of millions of people. Today, the company is present in 28 cities across 8 states namely Uttar Pradesh, Madhya Pradesh, Punjab, Haryana, Uttarakhand, Rajasthan, Delhi, Himachal Pradesh and possesses a diversified product portfolio that includes Hi-Tech Townships, Integrated Townships, Group Housing, Shopping Malls, Office Spaces, SCOs and Hotel.

Siddharth Katyal, Group Director, Omaxe Ltd. *"The Indian real estate industry is one of the fastest-growing sectors in the country, driven by factors such as urbanization, rising disposable incomes, and a growing middle class. The industry has experienced a paradigm shift in the last two years, with people looking out for a sustainable future – the need of 'having a house' has increased massively.*

Following the enormous growth last year, home ownership has unquestionably become a secure investment in these extremely volatile times. Making 2023 a crucial year for robust growth in the real estate market in both residential and commercial segments.

We believe that the Government's 'Housing for All' objective will straightforwardly incentivize them to lease their homes to the targeted segment, augmenting the efforts to increase housing stock in this segment. We are optimistic that the government would shape its policy actions to promote real estate demand even further this year. With a home being a constant appreciating asset that creates generational wealth, we can assume that the future of Indian residential real estate is compellingly hopeful."

to the major highways and the Delhi-Mumbai Industrial Corridor (DMIC), Faridabad being the eighth fastest-growing city in the world, experiencing high demand in the retail sector.

World Street is also coming up with its A-Grade office spaces under ***Omaxsun,*** with an intent to shape Faridabad as a new corporate hub and also to boost the Walk-to-Work culture, World Street is also coming up with ***Omaxe Royal Residency,*** a residential property built within World Street situated very close to Omaxsun.

Omaxe Chowk is another real estate marvel being developed by Omaxe to revamp the world's oldest and Asia's largest wholesale market. Strategically located in the heart of Chandni Chowk. The building is situated adjacent to Chandni Chowk metro station and within walking distance from Old Delhi Railway Station, Red Fort, Sis Ganj Gurudwara, and several other heritage properties. It is a future-ready one-stop business destination with ample retail space for food & beverage shops, and fashion and lifestyle stores.

Siddharth Katyal, Group Director, Omaxe Limited, says: "Overall the year 2022 was positive for the real estate sector, people have again started investing and we witnessed a significant boost in commercial, retail, and residential investments. People nowadays look for better lifestyle spaces to spend quality time with their friends and family. To make sure that customers are happy and satisfied, we try to give them a holistic experience by providing them with shopping malls, play zones, food courts, and other experiential centers under a single roof. This year our focus is to increase the service level with anyone associated with Omaxe, to be more service-centric company towards our customers and channel partners. With good market presence in 8 states and 28 cities, our prime focus is on tier 2 cities both for commercial and residential projects. In Delhi, however, we are primarily focused on retail projects.

For Omaxe, it was an introspective year where we designed new projects and ideas to improve the company's functioning and services. More emphasis on completing the ongoing constructions in different parts of the country so that we could hand over a maximum number of projects to the buyers by 2025. In Tier II cities, our focus is on delivering projects on time, where we are promoting residential and commercial spaces together. In Delhi, our focus is on retail and commercial spaces only. Our philosophy for this year is to create real estate projects and infra projects according to the government's norms".

Affordable housing has an upside potential for massive growth in the future

Poor living conditions are one of the biggest drawbacks of growth in India. end result? Slow growth in every spectrum possible. The real-estate sector is looking at a massive growth potential in the next 5 years. The real estate business is worth more than 12,000 crores and is expected to be worth 93,000 Crores by the year 2040 but utilisation of funds in the right aspects is essential as well.

Rajas Jain
MD, Kumar World

Affordable housing is an imperative aspect of growth in India in every aspect possible. Building houses which are affordable for the lower income groups will be extremely beneficial in the long run not just for the builder but for the tenants as well. Living conditions of many big cosmopolitan cities in India are becoming worse day by day, people get sick because of unhygienic conditions, congested spaces degrading the quality of life, etc.

The above-mentioned situations keep the growth stagnant and reduce its long-term positive impact of it. Affordable housing has much greater importance in retrospect to what we know. Researchers have shown the conditions of people living in bad conditions and how it is affecting them in every possible manner.

Affordable housing will solve a lot of problems in the long run. How?

- Environmental impact: Poor conditions and discarding of goods lead to pollution of the environment which further necessitates the increase of countermeasures. A bad environment is a threat to people, especially in terms of health.
- Overpopulating of urban areas: A lot of Indian cities have seen large numbers of people migrating which results in the accumulation of people in one area. Overpopulation and unclean surroundings will pose a threat to everyone. Adding to that, increasing congestion will lead to socio-economic barriers and domestic conflicts.
- Better growth for families- A stable house increases the focus of people in a lot of different arenas because shelter is one basic and most important human need, once this is checked off people tend to focus on other aspects of growth. Studies have shown improvement in multiple aspects of people who come from stable housing situations.
- Increase in job opportunities- Better housing projects mean more people coming and staying. This creates a lot of opportunities for employers to look for people in the vicinity and vice-versa.

> "Affordable housing is an imperative aspect of growth in India in every aspect possible. Building houses which are affordable for the lower income groups will be extremely beneficial in the long run not just for the builder but for the tenants as well."

What can be done to improve the affordable housing sector:

- Reduce expenses for builders for them to promote affordable housing and not focus on profit maximization
- Reduce land taxes to improve localities and interweave people with different jobs available in the area
- Subsidisation of different benefits so people of lower income groups are interested in living in those apartments and improving their quality of life

Conditioning of the real-estate sector is important when it comes to growing in a linear manner. Improved conditions will help children study better, explore more and live a good quality life with a potential for growth.

Real Estate is responsible for the growth of different aspects in many great ways. Proper utilisation of land without harming the environment and providing better quality life to people will slowly improve the different sectors which will provide even greater benefits in the long run.

System development in the not-too distant future may have functions beyond our imagination.

> "The main aim of 4tis elevator & escalators is provide the quality service and first class solutions by giving unique designs, service.

Elevators and Escalators are indispensable parts of urban life that support smooth and effortless movement. Through daily research and development, we are committed to further improving your safety, quality and comfort. System development in the not-too distant future may have functions beyond our imagination. Just as space travel was once thought to be inconceivable or fantasy-like; our persistent efforts in research and development over the years are making the unthinkable a reality. If we dream of big solutions for advancing these systems, we will achieve new methods in innovative transportation.

We are having 6+ years of vast experience into the field of Passenger Lifts, Home Lifts, Commercial Lifts, Dumbwaiter, Goods Lift, Residential lift. We as 4tis Elevator & Escalators believe in high quality services & customer satisfaction. Dealing into high quality service and up to date technology for meeting out your business needs.

All accessibility lifts are installed by our own technicians and engineers. We design and install full range of Passenger Lifts, Home Lift, Commercial Lifts, Dumbwaiter, Lift Goods Lift scalator, Travelator & Elevators Interiors 4tis elevator & escalators is promoted by the team of professionals and engineers having vast experience in the field of lift from new projects, Modernization to Maintenance. The main aim of 4tis elevator & escalators is provide the quality service and first class solutions by giving unique designs, service. We want to be the one to whom individual customers, look when they have an accessibility project.

The 4tis elevator & escalators offer a wealth of engineering experience and an immense fund of information, technical date and product knowledge. We pride us in personalized service to meet the needs of our valued costumers our service provide quality solution meeting all new installation. Monetization and Maintenance requirements. Our first Responsibility is towards our customers and all the others who are using our product and services. We strive to reduce the cost and waste in order to maintain reasonable prices and to service promptly and accurately the customer's Orders. We believe that our first transaction with our clients will be the beginning og long and pleasant business associations.

Pavitra Shankar

Managing Director, Brigade Enterprises Ltd

> We anticipate a sustained demand for housing, driven by a growing requirement for homes with more space and practical amenities, to accommodate the post-pandemic lifestyle.

"The outlook for the Indian real estate sector is expected to stay positive in the coming calendar year with many rating agencies projecting growth in development to reach around 8% to 9%. We anticipate a sustained demand for housing, driven by a growing requirement for homes with more space and practical amenities, to accommodate the post-pandemic lifestyle. With several corporates reverting to the work from office business model, and with people increasingly visiting malls and shopping complexes, the outlook for the leasing and retail businesses is also promising. We expect the basics such as cost and availability of capital, leasing activity, property prices, etc. to stabilise in the coming year. Overall, the sentiment is positive with growth being driven primarily by increased demand for housing, well supported by office and retail spaces. The hospitality sector is also expected to see an increase in occupancy, increased average room rates, and better F&B performances, thanks to leisure and business travel attaining pre-pandemic levels."

An artist's impression of Brigade Cornerstone Utopia

About the project --

Joining the ranks of 334 WTCs present across the globe, World Trade Center Chennai is the tallest commercial establishment in the city. It is a complete business ecosystem with residences, and retail space. The fabulous architectural design at WTC Chennai is designed by HOK, the largest U.S based architecture engineering firm who has consistently been recognized as leaders in a sustainable and high-performance design. An iconic commercial Leed Platinum development with Special Economic Zone benefits and design represents everything that a typical modern business would wish for.

WTC Chennai is a Grade A++ commercial development with an excellent frontage. It is home to several multinational companies and corporate giants. The campus contains a separate utility block complete with cooling towers, transformers, BMS and a large cafeteria. It has a full time F&B retail service support along with serviced apartments in the central podium. This commercial office space in Chennai has beautiful, landscaped gardens and several areas for employees to unwind, network and connect with nature.

A key feature of the project includes the supremely designed modular façade that deflects the solar radiation before it reaches the building envelope while ensuring maximum daylight utilization. The building also comes encompassed with a state-of-the-art lobby and a lush podium that is the highlight of the development.

The development is strategically located in Perungudi, Chennai in the established IT Corridor. WTCC is just 35 minutes away from the International Airport and is close to several well-known landmarks in Chennai such as Apollo and Fortis hospitals, renowned colleges such as IIT Madras and NIFT, malls such as Phoenix market city and hotels such as The Holiday Inn and The Gateway by Taj, making it the ideal location for brands looking to magnify their stature globally. Seamlessly unifying aesthetics and performance, the stunning WTC edifices have been designed by HOK, the largest US-based architectural firm and a leader in sustainability and global design.

The landscape concept tries to establish a vibrant and distinctive public realm by creating urban spaces that are distinctive, experiential, and functional, keeping in mind the local culture and climate. The landscape complements the distinctive architecture of the development, in line with the brand equity of World Trade Centers worldwide. Furthermore, we have managed to create inviting and visually attractive outdoor spaces while providing

sensory experiences using elements such as imaginative planting palettes, water features, bespoke lighting, etc.

Cutting-edge firms looking to associate themselves with innovative, high-tech, green buildings can benefit from this commercial LEED Platinum certified development with SEZ benefits. World Trade Center, Chennai reinforces a sense of exclusivity for its tenants by bringing together architectural brilliance and a sustainable design.

> "A key feature of the project includes the supremely designed modular façade that deflects the solar radiation before it reaches the building envelope while ensuring maximum daylight utilization."

Real Estate Industry in 2023: Luxury housing uptick expected to continue

> "Data from ANAROCK Research shows that in the top seven cities, 1.84 lakh units were sold in the first half of the year, of which 14%, or 25,700 units, were in the luxury housing class. Given the favourable sentiment, it is clear that the market for luxury real estate has advanced up the growth ladder."

Kamal Khetan
Chairman & Managing Director, Sunteck Realty Ltd

The Indian real estate (RE) market is expected to experience significant and favourable growth in the financial year 2023 (FY 23), fueled by a solid structural foundation and rising demand. Due to improving standards of living and population expansion, the demand for housing infrastructure has grown than ever, further bolstering India's real estate market. The RE sector has experienced rapid growth in the recent years, and it is expected that this trend would continue in the years to come. The Indian real estate market is predicted to reach Rs. 13,00,000 crore by 2023 and touch $1 trillion in value by 2030, generating a large number of employment opportunities. The housing market, which propels and supports the real estate industry as a whole, is poised to experience boom. Prices are predicted to climb by 7.2% nationwide, according to Reuters (4-5% in Mumbai and Delhi, 5.5-6.5% in Chennai and Bengaluru).

HIGH DEMAND FOR LUXURY HOUSING IN INDIA

In India, the demand for luxury housing continues to grow exponentially. The new normal promoting work-from-home and hybrid work has made people realised the importance of comfortable and hassle-free lifestyle. As a result, an increasing number of purchasers are gravitating toward luxury properties as a lucrative investment choice. Data from ANAROCK Research shows that in the top seven cities, 1.84 lakh units were sold in the first half of the year, of which 14%, or 25,700 units, were in the luxury housing class. Given the favourable sentiment, it is clear that the market for luxury real estate has advanced up the growth ladder. Real estate's luxury sector appears to have a promising future. As their consumer markets grow, Plotted Development, Luxury, and Uber luxury apartments will further solidify their market positions.

MODERN TECHNOLOGY HELPS THE INDIAN REAL ESTATE SECTOR GROW

Real estate's fundamental concept has changed, expanding beyond the four walls to provide the end user with a complete 360-degree experience. The recent changes in the demographics of homebuyers have undoubtedly had a significant impact on the real estate market. Technology has enabled the real estate industry to reach its full potential by encouraging the use of digitalization and technological tools like artificial intelligence (AI), augmented reality (AR), virtual reality (VR), big data, and analytics. On the horizon of the sector are automated homes employing the Internet of Things (IoT), AI, and other technological advances. The real estate market is being disrupted by the digital technology revolution, which also offers tremendous opportunity to the sector to reach new heights. Technology has transformed real estate in every way and will continue to play a significant part in its digital transition.

Despite a positive outlook, the expansion of the Indian real estate market will be influenced by the efforts and policies that are announced in the upcoming Union Budget, changes in mortgage rates, the state of the employment markets, and the overall economic situation.

Manufacture of all kind of Fire and Non-fire rated Doors.

(Wooden Doors, Hollow Metal Doors, Acoustic Sound Proof Doors / Frames.and Special Type of Doors for Malls, Cinema Theaters and Sky Rise Building Etc)

House of Hiranandani transforming the real estate landscape in India.

Surendra Hiranandani
Chairman and Managing Director, House of Hiranandani

"The real estate sector is looking forward to the 2023-24 Union Budget in order to maintain the growth momentum that began last year. The primary goal of this budget must be to achieve GDP growth of 6.5-7 percent in a year when many global economies may experience a recession. We anticipate a bold, growth-oriented budget, with announcements that will encourage capital investment and FDI inflows into India. To begin, in order to encourage homeowners, particularly first-time purchasers, the government could enhance the mortgage interest tax deduction ceiling, providing these buyers with tax relief. Furthermore, the highest tax rate of 30% is hoped to be reduced to 25%. With more than half of India's 2030 real estate stock still unfinished, the real estate sector has a great chance to become greener, reducing energy consumption and embodied carbon emissions and meeting the ever-growing energy needs of buildings. To promote the sector, the Union budget should further incentivize investments in green technologies. Investing in green infrastructure like renewable energy sources, city planning, architectural codes, and infrastructure regulations, will demonstrate the importance of focusing on developing technologically advanced and planned cities for a contemporary India."

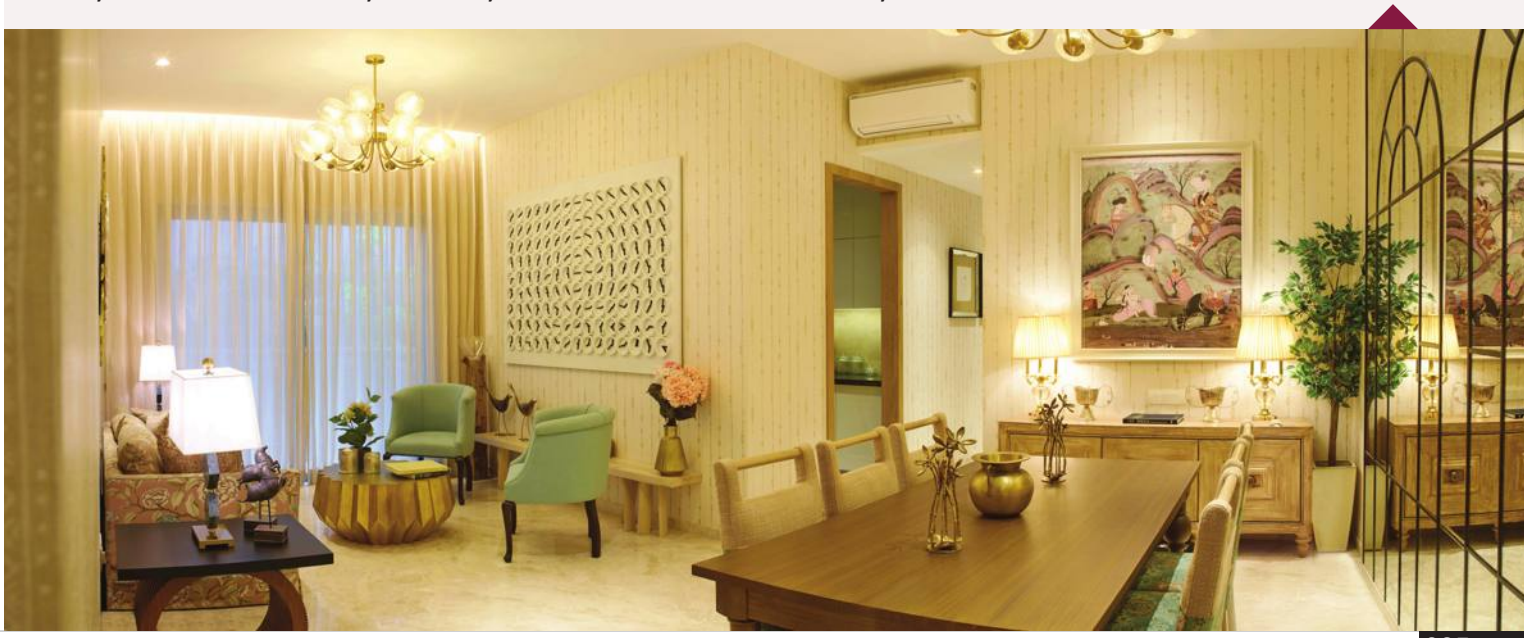
"We anticipate a bold, growth-oriented budget, with announcements that will encourage capital investment and FDI inflows into India. To begin, in order to encourage homeowners, particularly first-time purchasers, the government could enhance the mortgage interest tax deduction ceiling, providing these buyers with tax relief."

House of Hiranandani's 'Anchorage' - Iconic luxury project

House of Hiranandani, a leading real estate conglomerate, is set to change the skyline of Chennai with the launch of their iconic luxury project "Anchorage". It will be the tallest residential tower in the city and all apartments will have panoramic views of the sea. The Avant Garde concept designed by renowned architects and consultants, is poised to become a contemporary landmark in the capital of Tamil Nadu. Anchorage is a perfect combination of excellent location, exquisite neo-classical architecture, thoughtful planning and world class amenities. This magnificent stilt + 45 storey marvel will have various configurations from 2 to 5 BHK apartments and a limited number of uber luxurious duplexes. Strategically located at Egattur OMR, inside our self-sustained ecosystem spread across 120 acres, this masterpiece will provide a holistic living experience to discerning home buyers. The layout is designed to provide complete privacy to the residents.

House of Hiranandani Castalia

House of Hiranandani Castalia is a new residential development project located at Kandivali West. This project offers elegantly designed 2 & 3 BHK beautiful homes with custom specialties blending unique views that will delight you every day and an amazing set of modern lifestyle amenities for leisure. Additionally, the House of Hiranandani Castalia is developed at the most-sought residential address, comprising a plethora of supermarkets, restaurants, cafes, and so much more. Also, the locale of this project is close to leading hospitals, educational institutes, malls, multiplexes, and recreational facilities in & around Kandivali West. Come, experience the lifestyle that is tailored to your every comfort and convenience only at the House of Hiranandani Castalia.



> This tower will continue to be in line with our core objective of offering an exceptional integrated lifestyle, comparable to global standards. Part of the Runwal City Centre township, designed around the concept of Live, Learn, Work and Play this new addition too will continue to delight our consumers.

Subodh Runwal
Managing Director, Runwal Group

Runwal Group unveils 'Liberty', the newest tower at Runwal Avenue in Kanjurmarg

Exquisitely designed smart residences offering an integrated lifestyle

Runwal Group, one of India's leading real estate developers, announced the launch of a new residential tower - Liberty, in their project Runwal Avenue located at Kanjurmarg East in Mumbai. The project is situated just 300 mtrs from Kanjurmarg railway station and is a part of the 36 acre mixed use development - Runwal City Centre. The tower will consist of 50 floors with over 275 habitable units. It will comprise of efficiently planned 1, 1.5, and 2.5 bed residences with carpet areas ranging between approximately 390 sq. ft and 647sq. ft. The tower will also offer options of residences with private decks and numerous lifestyle & recreational amenities in addition to excellent connectivity. With a proposed school, an integrated upmarket high street, proposed Business Park and a unique 8 acre Central Park within Runwal City Centre, Liberty aims to offer the buyers a holistic lifestyle. It will provide freedom from multiple urban constraints such as daily commute hassles, worries about children's education, non availability of shopping & entertainment avenues nearby, lack of green open spaces and much more. Starting at approx. Rs.1.03cr, apartments at Liberty will provide panoramic views of the surroundings in addition to fresh air and an elevated lifestyle.

Located at the new city centre Kanjurmarg, Runwal Avenue brings every significant landmark closer for its residents. From the strategically important business districts like SEEPZ & BKC to the International Airport, every key hub of the city is easily accessible. Kanjurmarg enjoys fantastic road, rail and upcoming Metro connectivity.

Located just 2 km from Powai, Kanjurmarg is a much sought-after location for home buyers, offering a great living experience at far more attractive prices.

Speaking on the occasion, **Mr. Subodh Runwal, Managing Director, Runwal Group** said, *"After the overwhelming response and successful launches of Madison, Broadway, Park View and Manhattan we are pleased to announce the launch of our new tower, Liberty at Runwal Avenue. This tower will continue to be in line with our core objective of offering an exceptional integrated lifestyle, comparable to global standards. Part of the Runwal City Centre township, designed around the concept of Live, Learn, Work and Play this new addition too will continue to delight our consumers. We are certain this new tower will generate a great response, like the previous launches at Runwal Avenue."*

Runwal Avenue is a perfect blend of connectivity, convenience and lifestyle. Residents can pamper themselves with a wide range of amenities such as a huge central podium, green open spaces, swimming pools, indoor games, badminton courts, state-of-the-art gym, yoga, play areas etc.

The project will feature thoughtfully designed facilities such as a health clinic within the premises by a leading healthcare institution and a Wi-Fi-enabled business centre space to allow residents to manage their work from home lifestyle. 'Fifth Avenue' - an integrated high-street galleria with cafes, bistros, salons, brand stores, boutiques and much more will bring in a vibe similar to international high-street addresses.

Kanjurmarg has grown rapidly and has become a much sought-after destination amongst home buyers. It is a well-developed location with a cosmopolitan population. It has excellent social & civic infrastructure and is close to top-notch educational institutes, business hubs, healthcare facilities, hotels, shopping destinations and great natural surroundings. Runwal City Centre will transform the region and establish it as a premium lifestyle destination.

Runwal Group announces Kalyan-Dombivli's 1st ever 'By Invitation' only homes at Runwal Gardens, Dombivli

Runwal Group, one of Mumbai's leading real estate developers launches Park Avenue, Kalyan-Dombivli's first-ever 'By Invitation only' homes at Runwal Gardens, Dombivli. Park Avenue boasts of 3-BHK, 4-BHK and Duplex homes ranging from 1017sq. ft to 2595sq. ft carpet areas with a starting price of 1.40 Cr.

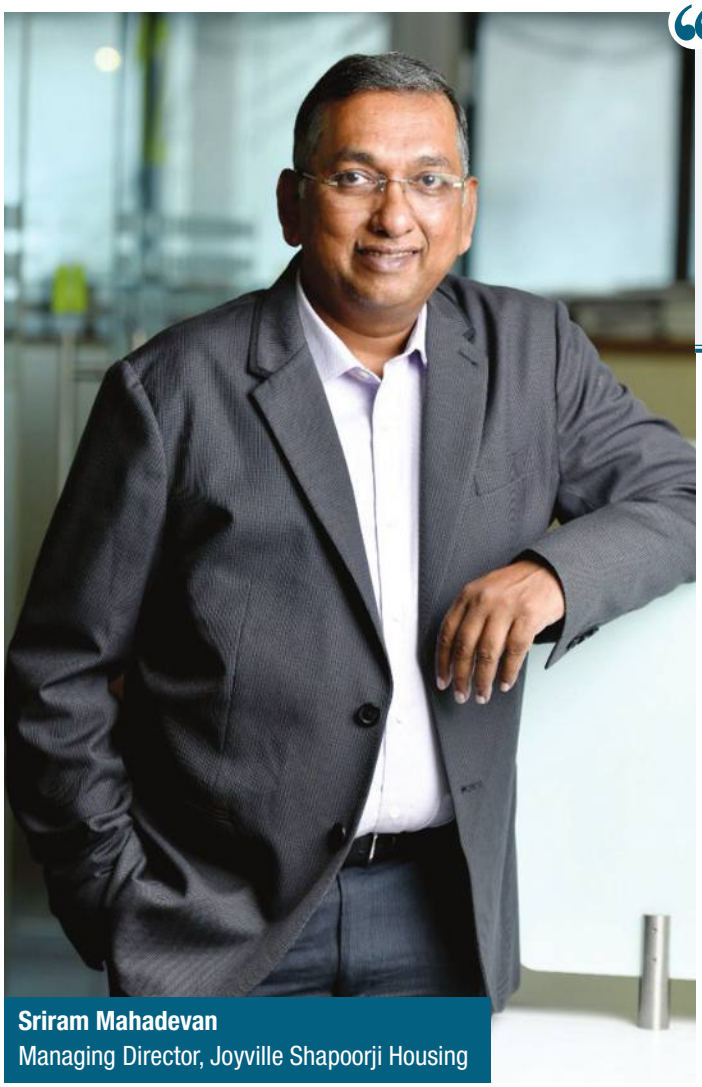
Designed by AR Hafeez Contractor, these homes offer lifetime views of an 11-acre central park with an exclusive clubhouse and private amenities like an open-to-the-sky swimming pool, state-of-the-art gym, library, creche, multipurpose hall, gymnasium, Kids play area and Basketball Court, all designed to cater to the needs of the select few who will call this home.

This cluster is a part of Runwal Gardens, a 115-acre integrated township that is the highest selling residential project in the country. At an advanced stage of delivery, Runwal Gardens has received OC for five towers in cluster 1 and select amenities like an 11-acre central park, cricket ground, amphitheatre, gazebo picnic areas, reflexology park, herb garden, skating rink, toddler park, 3.4 km jogging & cycling track, senior citizen area, and many more are now ready.

"Runwal Avenue is a perfect blend of connectivity, convenience and lifestyle. Residents can pamper themselves with a wide range of amenities such as a huge central podium, green open spaces, swimming pools, indoor games, badminton courts, state-of-the-art gym, yoga, play areas etc."

Joyville Shapoorji Housing eyes INR 1000+ crore revenue from its new project in Pune

the 'Sky-Luxe Edition' comprises duplexes and penthouses with exclusive terrace and podium amenities



Sriram Mahadevan
Managing Director, Joyville Shapoorji Housing

> We are excited to announce the launch of our new residential project comprising duplexes and penthouses near Hadapsar, Pune. While doing our research, we found a growing demand for duplexes in the region.

Joyville Shapoorji Housing, the aspirational housing platform by Shapoorji Pallonji, ADB, IFC, and Actis, today announced the launch of its new residential project near Hadapsar, Pune. The first phase comprises the 'Sky-Luxe Edition' of duplexes and penthouses. The towers will have 168 duplexes and penthouses with carpet areas ranging from 1,220 square feet (~113 sq.m.) to 1,326 square feet (~123 sq.m.). The company expects a sales revenue of INR 1000+ crore from its newly launched project.

Part of a ~9-acre (~36,594 sq.m.) development, the two towers consist of 3-BHK duplexes and penthouses with a saleable area of about 2.8 lakh square feet (~26,000 sq.m.), with exclusive terrace and podium amenities. Sky-Luxe Edition is a luxurious architectural marvel that is meticulously planned, offering stunning views of its vicinity with utmost privacy. Joyville homes are always built around greenery, and Sky-Luxe Edition residences are no exception. Apart from the duplex towers, the development comprises 75% open spaces with abundant fresh air, making the homebuyers feel on top of the world. The duplexes start from Rs. 1.45 crore onwards.

Located on the Pune-Solapur Highway, near Hadapsar, Sky Luxe Edition is well-linked to the neighbouring localities such as Kalyani Nagar and Koregaon Park and even to major transit hubs like the Pune Railway Station, Pune International Airport, SP Infocity, and Magarpatta IT Park. Two major state highways, the Pune-Solapur Highway and the Pune-Ahmednagar Highway, pass through this region, proving to be one of the major reasons for development in Hadapsar. Another upcoming infrastructure development closer to the project is the 30 m R.P. Road connecting Saswad Road and Ring Road, which further connects Nagar Road and the Solapur Highway.

Speaking on the launch, Mr Sriram Mahadevan, Managing Director of Joyville Shapoorji Housing, said, "We are excited to announce the launch of our new residential project comprising duplexes and penthouses near Hadapsar, Pune. While doing our research, we found a growing demand for duplexes in the region. Joyville strives to meet the needs

of upwardly mobile customers, whether they are upgrading to gated communities or, in this case, aspirational-fueled duplexes and penthouses. The Sky-Luxe Edition offers duplexes and penthouses in towers with best-in-class amenities, safety, and security within a gated community. We are confident that the new project will provide a holistic living environment that meets the aspirations of a perfect home."

He added, "We are happy to add this project to our growing portfolio and strengthen our presence in the Pune market. Rapid infrastructure development has increased residential demand in Hadapsar. Given the location's gradual transformation, we are optimistic that Hadapsar will promote a future that will change the way people live."

Sky-Luxe Edition residences are crafted for sustainable living. They are built with energy-saving features such as energy-efficient walls, low-flow water fixtures, and rainwater harvesting, leading to lower energy utility bills.

"We are happy to add this project to our growing portfolio and strengthen our presence in the Pune market. Rapid infrastructure development has increased residential demand in Hadapsar. Given the location's gradual transformation, we are optimistic that Hadapsar will promote a future that will change the way people live."

The two duplex towers include exclusive terrace amenities such as a walking/jogging path, a senior citizen's plaza, a yoga and meditation zone, a barbeque zone, an observatory zone, and pergola seating. Other exclusive amenities such as a plunge pool, spa, steam room, gym, café, kids' play area, indoor gaming zone, work-from-home area, screening room, and guest rooms will help the homebuyers live a luxurious life, offering a perfect blend along with the goodness of nature.

Asian Paints Unveils the 'Asian Paints Art House' at Mumbai Urban Art Festival

Amit Syngle
Managing Director & CEO, Asian Paints Ltd

> "We are proud to unveil the 'Asian Paints Art House' and the 2023 Colour of the Year at the Mumbai Urban Art Festival. We are thrilled for the public to see what has been created at Sassoon Dock, representing Mumbai City, its art and culture, in a way that Mumbai may have never witnessed or experienced before.

Asian Paints and St+art India Foundation unveil their one-of-a-kind project, called **'Asian Paints Art House'** at the Mumbai Urban Art Festival (MUAF) along with the exclusive preview of **'Illusions'** which is a part of the Sassoon Dock Art Project. The endeavour also witnessed the announcement of **'Silver Escapade'** as the **2023 Asian Paints Colour of the Year.**

As one of the premier creations at MUAF, **Asian Paints Art House** was designed to represent a node in the ocean. Since Sassoon Dock has a visceral connection to the ocean, and is witnessing a new sort of gathering of culture, art and people, our aim was to design a maelstrom that pulls together currents in the Art House, creating an energy vortex. It was created using waste, debris, upcycled fabrics, and other bits and pieces found around the dock. The Art House will also consider what a **'home'** can be, inspired by creative living and modular design. The Art House also incorporates the Colour of The Year – Silver Escapade in very interesting ways.

Sassoon Dock Art Project - **Illusions**, on the other hand, reflects on some of the complexities of our transactional reality, by proposing alternative, fluid, and expansive views. It is open for public viewing from January 13th to 22nd February.

The Asian Paints **Colour of the Year 2023, 'Silver Escapade',** was announced at the launch, revealing a shade evocative of time travel and technology, and it is also the colour of child craft, wellness, and auspicious new beginnings in India, a hue of hope, festivities, and glamour. UK artist Steve Messam took the colour and created an installation that perfectly encapsulates the ethos of the colour.

The opening of the Art House also saw Asian Paints and St+Art India Foundation drop 5 NFTs for the first time created by visual artist Amrit Pal Singh.

He has created **'Toy Faces'** a collection of portraits driven by nostalgia and childlike wonder. Toys are objects reminiscent of an extraordinary limitless time when the word cynical wasn't part of your vocabulary.

The collection celebrates individuals and characters throughout history and fictional stories to remind you of how they inspired you when you read about them for the first time. Some are still your heroes, and some don't seem that impressive anymore, but for a moment, they all push you to do better, and Toy Faces is about revisiting that feeling. Over the last two years, Amrit has created several Toy Faces, and its signature style is like a canvas to him. For MUAF he extended this canvas to five individual artists, resulting in a playful collaboration celebrating various styles and mediums. Some of the NFTs also feature the Asian Paints Colour of The Year 2023 – Silver Escapade.

Speaking on the launch, Mr. Amit Syngle, Managing Director & CEO, Asian Paints Ltd. said, "We are proud to unveil the 'Asian Paints Art House' and the 2023 Colour of the Year at the Mumbai Urban Art Festival. We are thrilled for the public to see what has been created at Sassoon Dock, representing Mumbai City, its art and culture, in a way that Mumbai may have never witnessed or experienced before. Illusions, is another landmark project we've launched at Sassoon Dock, adding to our collective vision of celebrating Mumbai city and its people. I am also very excited for the NFTs that have being curated for the festival with a tinge of Colour of the Year – Silver Escapade. A call out to the St+Art India Foundation for co-curating the Mumbai Urban Art Festival & building onto our long-time partnership. A special mention to the Mumbai Port Authority for their support in making MUAF a possibility"

Asian Paints and St+art India Foundation have been collaborating on a collective vision of 'beautifying public spaces' and 'democratizing art' for 8 years now. This year, in their most formidable project, Asian Paints and St+art India Foundation launched the 3-month long Mumbai Urban Art Festival (MUAF) in the city. Mumbai Urban Art Festival is taking on a city scale endeavour including landmark murals, experiential exhibitions and immersive installations across several locations.

It was created using waste, debris, upcycled fabrics, and other bits and pieces found around the dock. The Art House will also consider what a 'home' can be, inspired by creative living and modular design. The Art House also incorporates the Colour of The Year – Silver Escapade in very interesting ways.

Top reasons why commercial real estate will lead real estate investments in 2023

Investing in Real Estate and buying property is regarded as the best mode of investment because of assured, reliable, infallible profits and higher returns. Being a tangible asset, it also provides long-term security and the benefit of regular cash flow through rentals. The value of Real Estate always goes up over time, and rents also tend to increase over time, generating higher cash flow. The longer you hold onto your property, the more money you will make when it's time to sell, and with a good investment, one can turn an enormous profit.

Ankit Aggarwal
MD, Devika Group

Real Estate is broadly of two types - residential and commercial Real Estate. Residential Real Estate comprises residential buildings, housing complexes, apartments, flat systems etc., where people reside and live in. Commercial Real Estate, on the other hand, consists of properties for commercial and official purposes as well as buildings for public use such as offices, garages, hotels, industries, malls, multiplexes, shopping centers, community parks etc.

So, let's look at some of the reasons why Indians might be wanting to choose commercial real estate rather than residential real estate.

Higher returns

Commercial properties provide good rental returns over long periods of time. Prices will take some time to rise because the housing market has yet to recover from the pandemic. In commercial real estate, Grade-A office properties are already yielding high returns due to their high demand. The expected return on residential properties is around 3-4%, while the expected return on commercial properties is around 8-10%. The Indian property market had a great season in Q2 2022, with solid annual and quarterly growth in leasing activity for most segments. According to Financial Express, the country's commercial real estate market is expected to grow at a CAGR of around 13% between FY 2022 and FY 2027.

> The longer you hold onto your property, the more money you will make when it's time to sell, and with a good investment, one can turn an enormous profit.

Increasing demand

Most people prefer to return to work due to larger family sizes, smaller homes, inconsistent internet speeds, and vulnerable digital platforms. Furthermore, the emergence of new businesses registered year on year is increasing demand for commercial properties. Since the lockdown, approximately 16,000 new companies have been registered, according to the Central Registration Centre. In addition to start-ups, multinational corporations are looking to India as a hub for Data Center Offices and large commercial spaces, particularly in Tier 1 cities.

Constant and quick cash flow

The lease period for commercial properties can differ from 2 to 10 years. There are several benefits to having such long lease periods. For starters, regular rentals ensure a consistent cash flow. Secondly, you will no longer have to worry about finding tenants every few months. Due to short lease periods, residential properties suffer from erratic cash flows. The lease is generally for 11 months only.

Easier maintenance and upkeep

While residential properties invest heavily in attractive lifestyle amenities such as swimming pools and kid's play areas, commercial properties focus on amenities that can improve work capabilities and create a healthy, positive work environment. As a result, because commercial properties have fewer larger-than-life amenities than residential properties, the maintenance cost is lower. Additionally, unlike in residential real estate, where the landlord is always responsible for property upkeep, the tenant bears the burden of maintenance in commercial real estate.

The triple-net lease is another advantage. This is a kind of lease agreement in which the renter is responsible for all the ongoing construction and living expenses such as maintenance, taxes, and insurance. At the end of the day, real estate remains one of the strongest and most promising investment options, and with the pandemic gradually receding, this market is rebounding in most major cities.

Modern high-rise Luxury housing projects promote sustainable living in line with global environmental concerns

Samyak Doshi
Director, Bhoomi Group

There is a growing concern among people across the world on the ill-effects of global warming and climate change. We have seen this manifest itself in the form of tsunamis, earthquakes, volcanos, landslides, cloud bursts that have pounded countries across the globe. Here in India too, people are waking up to this alarming reality. There is more awareness on protecting our environment, if we are to survive as a human race. In line with this concern, we see this reflected in the way most modern high-rise luxury housing projects are being constructed. Such projects incorporate the concept of 'Sustainable Living' as its core philosophy.

Post pandemic, people have become more health conscience and look at ways to maintain a healthy lifestyle. There is a convergence between healthy and sustainable living which go hand in hand. Developers of modern high-rise luxury housing projects understand these concerns and incorporate both these features in all high-end luxury residential projects. Since these projects go vertical rather than horizontal there is more space available around such projects. Vertical development doesn't take up much of land which is anyway scarce, they use the surrounding area around these high-rise towers to create lush greenery with sylvan surroundings in the form of gardens, jogging tracks, swimming pool, Amphitheatre, Yoga & Meditation zone etc., for the residents.

> "Developers of modern high-rise luxury housing projects understand these concerns and incorporate both these features in all high-end luxury residential projects. Since these projects go vertical rather than horizontal there is more space available around such projects."

Apart from providing such amenities they also incorporate green products in the construction and building process, apart from the latest techniques like advanced MIVAN formwork technology that ensures durability & faster construction with accurate and smooth finish. Sustainable design in such projects have minimum impact on the environment. Most projects that are green certified use construction material, electrical fittings, bathroom fittings, water conservation process and even paints that are environmentally friendly. Also, these projects promote healthier living for residents, at the same time reduces negative effects of the construction process on the environment.

Most of these projects employ internationally acclaimed architects and designers who bring to table the latest in construction technology, planning and project layout. They provide residents with a green lifestyle enhancing their living experience. Increase in green space improves the urban environment by reducing carbon emission; water quality is protected, reduces heat build-up, improves air quality, rainfall retention (rainwater harvesting) and helps natural resource conservation.

Most luxury housing projects integrate more greenery, open landscape and play areas for children, sports and recreational facilities etc. This creates an ambience conducive for positive living – health of body and mind; and a healthy lifestyle. Such projects are designed in such a way so as to be more spacious, allow plentiful sunlight into your apartment, perfect cross ventilation and a panoramic view of the city.

Over the last decade or so, the concept of luxury living has become an integral part of the Indian landscape. We have seen new areas transform into aspiring addresses for the rich and aspiring middle class to flaunt. In Mumbai, areas such as Lalbaug – Parel have seen a mushrooming of high-rise luxury properties. Apart from location advantage; being in the heart of the city and in close vicinity to upcoming infrastructure projects, business hubs and entertainment centres, these neighbourhoods have a snob value attached to them, making them the most desired by luxe home buyers.

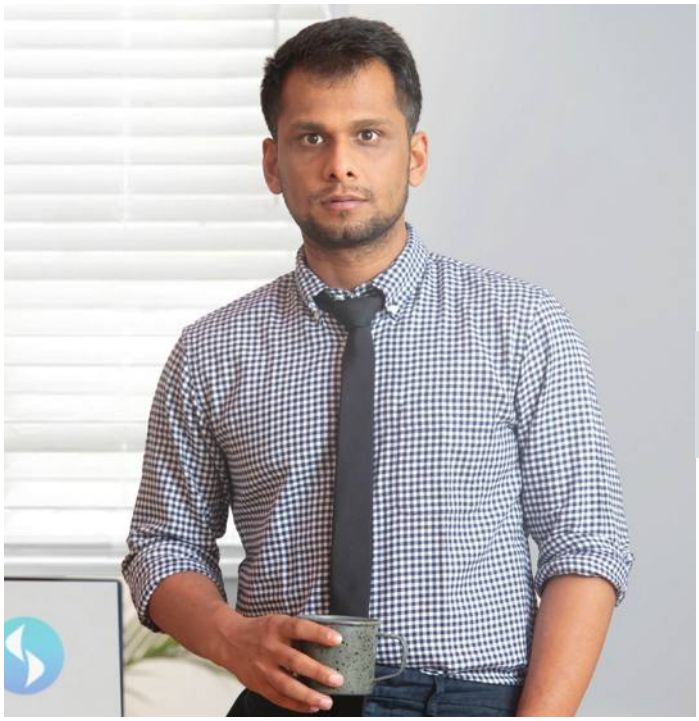
Why furniture E-Retailers Must Invest Towards Creating a Post-Purchase Experience



> One way to drive your furniture business in a sea of other competitive players is to improve its post-purchase customer experience delivery, an often neglected part of e-commerce business strategy.

Raghunandan Saraf
CEO & Founder, Saraf Furniture

The onset of the COVID-19 crisis has seen an upward growth trajectory for the furniture e-commerce industry. Even today, consumers prefer the safe, convenient, hassle-free, and comfortable experience offered by online shopping platforms. Covid restrictions and lockdowns compelled previously hesitant businesses to take the leap. With many new businesses coming up in 2022, companies must brace themselves for increased competition from new entrants into the online market.

One way to drive your furniture business in a sea of other competitive players is to improve its post-purchase customer experience delivery, an often neglected part of e-commerce business strategy. While there is a lot of emphasis on raising brand awareness and providing a great pre-purchase experience to drive sales, companies frequently overlook the fact that a trustworthy relationship between a brand and a consumer is formed once a customer clicks on the buy button.

In a crowded e-commerce world, it is no longer enough to focus only on making sales. The post-purchase customer journey has become a vital factor for long-term success in online retail and building a strong and sustainable business. As per a recent study conducted by Bain and Company's Fredrick Reichheld, increasing customer retention rates by 5% increases profits by 25-95 per cent. Customers today look for faster delivery, efficient parcel tracking, better communication, and easier free returns. To stay in the game-enhancing post-purchase services is more of a necessity than an option.

Some components of the post-purchase journey that can build or break your brand's reputation include seamless order tracking, technical assistance, and return and refund. A customer's post-purchase experience affects their view of your organisation and their decision to return or not.

A consumer impressed by your post-purchase service is more likely to skip the first two customer lifecycle stages – brand awareness and purchase interest – and proceed directly to purchase intent. There is so much competition out there that it would seem obvious that companies would use every opportunity to convert leads to customers and one-time customers to regulars.

A successful post-purchase experience helps in increasing your customer retention. Existing customers develop a sense of brand loyalty. When they need something, they are more inclined to look for your brand. 93 per cent of customers are more likely to buy from a firm that provides exceptional customer service again.

Offering product recommendations or a discount coupon during the post-purchase journey can help increase the sales and revenue of the company. An optimized Post-purchase customer experience also leads to customer advocacy. 92% of customers have said that they trust the product purchase recommendations made by their family and friends.

When you provide the care and support even after they purchase, you show them a reason to stay with your company. This positively impacts their experience. As a result, they are more likely to share their experience within their network and vouch for your brand.

Stanley Group Unveils Revolutionary Kitchen and Cabinetry Solutions with the Launch of Cabinetry Cult

Stanley Group, a maker of premium furniture and home decor products, today announced the launch of the world's finest kitchen and cabinets Cabinetry Cult, a revolutionary kitchen and cabinetry solution. Crafted using the perfect blend of German precision manufacturing, French carpentry techniques, Italian design sensibilities and craftsmanship with 26 years of manufacturing expertise.

Stanley offers an elite range of kitchen and cabinetry. The cabinets come in a variety of styles, colours, sizes, and floor plans offering customers a range of styles and layouts for their kitchen and cabinetry needs of the entire home. The materials used in Cabinetry Cult cabinetry are globally sourced and of the highest quality which includes marine plywood, FSI-certified timbers, wood veneers, laminates, natural stones, and finishes.

The Cabinetry Cult collection offers customers a complete solution to their cabinetry needs. From kitchen to wardrobes, walk-in wardrobes, bathroom cabinets, counters, bar, pantry, laundry room, and study, Cabinetry Cult has it all. Customers can now design their cabinetry using a narrow or eclectic palette, to seamlessly blend with the architecture of their choice and can choose from 4 finishes ranging from metallic to solid lacquer and 37 shades for ultimate flexibility. This allows customers to unlock their imagination and create a look that is timeless and unique.

Speaking on the announcement, **Sunil Suresh, Chairman and Managing Director, Stanley Group, said,** *"At Stanley Group, we are excited to launch Cabinetry Cult it's the best of both worlds. It is an excellent opportunity for us to showcase our passion for craftsmanship and quality, with our 25+ years of expertise in the manufacturing industry. We have incorporated the best of German technology, French carpentry techniques, Italian design, and Indian engineering to bring to life our unique collection of kitchens and cabinetry you will ever find. We look forward to bringing our customers the most exquisite kitchen and cabinetry experience," said.*

To ensure our customer's satisfaction, we offer a Company-owned manufacturer & retailer's warranty

> "At Stanley Group, we are excited to launch Cabinetry Cult it's the best of both worlds. It is an excellent opportunity for us to showcase our passion for craftsmanship and quality, with our 25+ years of expertise in the manufacturing industry."

Stanley prides itself in fine craftsmanship, our commitment to quality, innovation, and service has been a cornerstone of our success for over the years. We are proud to have served more than 150,000 customers, and we are dedicated to continuing our mission of providing the highest standard of craftsmanship, genuine authenticity of materials and quality assurance, he further added.

Architectural Lighting

Sharmila Kumbhat
Director, K-Lite Industries

K-LITE INDUSTRIES an ISO company, manufacturing indoor and outdoor luminaires have launched a new series of LED Architectural Lighting. Being the trend setters in outdoor lighting and inspired by the "Make in India" vision, K-LITE, through their innovative outlook, have showcased an all new product portfolio under Architectural Lighting. The application includes Facade Lighting, Pathway Lighting, In-ground Luminaire, Up-down Lighting, Billboard Lighting, Vertical Light Bars, Wall Washers, Area Lighting poles and above all popular sleek polar lighting solutions.

The solutions offered are backed by extensive understanding of illumination in urban spaces and the expertise gained over a period of three decades. The fixture are designed to provide value technology, ideally suited to Indian Conditions. The LEDs used comply to LM 80 testing requirements and from Internationally reputed makes such as Nichia / CREE. The luminaires are RoHS, LM 79 and CE certification compliant. The luminaire efficacy (lumens/ per watt) is much above 100 for all luminaires. Varied optical options for lighting distribution and correlated colour temperature (CCT) for cool white, neutral white or warm white are available to suit specific requirements.

The outstanding item of the series viz., the Sleek Polar Lighting Solutions is a contemporary design that is both timeless and unique in its impression. Compact without visible mounting equipment and optimised integration, Polar Lighting is in perfect continuity with the geometric lines of the square column. These assemblies are ideal for surroundings of contemporary architectural constructions.

Perk
Bathing Sensation

> Perk products are simply elegant not just because of their design and functionality, but also because of their high quality, durability and value.

PERK IS GLOBALLY RECOGNIZED MORE THAN 25 YEARS FOR ITS LUXURY BATH-CARE BRAND, ITS CONVEYS ELEGANCE & LUXURY AND IT COMBINES AESTHETICS, ERGONOMICS & FUNCTIONALITY. A BRAND WITH ITS OWN ESTEEM, GROWING RECOGNITION AND POPULARITY. IT PRODUCTS ARE REFLECTION OF ART & PERSONAL EXPRESSIONS.

Today, Perk bath-care products adorn the world's finest residences, luxury hotels, resorts, spas and yachts where discerning clients insist upon the finest workmanship. The designs and functions of the products are irresistible for every high-class individual who cares for modern & comfortable living.

Its healthcare products range are well-designed and developed to create a comfortable and safe bathing enjoyment, especially for the elderly people. It's not uncommon to become a little unsteady on your feet as you grow older and there are many elderly and disabled people living with a condition which requires more robust support. Perk's products within the bathroom aids section have been purposefully designed to make the bathing safer, yet still enjoyable, particularly for elderly and disabled people. One of the most common places to fall or slip at home is your bathroom.

which is why we offer such a wide range of bathing products, ideal for younger to elderly and disabled people.

Perk products are simply elegant not just because of their design and functionality, but also because of their high quality, durability and value. Its technological innovations and high standard of quality have made it an iconic and much-loved brand not just in India but across the globe. The brand promises a high level of performance and uncompromising perfection in everything it does, from product development to customer service.

Perk brand name belongs to RS Sanitation Pvt Ltd - a leading manufacturer of luxurious bathroom accessories and world class sanitary products. Having its ISO 9001 certified factories in Mumbai and New Delhi with the best equipped state-of-the-art machineries and technology. RS Sanitation offers unique added value in the field of sanitary technology as well as in the field of bathroom accessories.

The 'Perk' brand is awarded with European Technology, The Rising Star, Asia's Most Promising Brand, India Green Building Council Member & Mega Brand for exceptional quality in bath-care accessories.
