ACO Access Covers

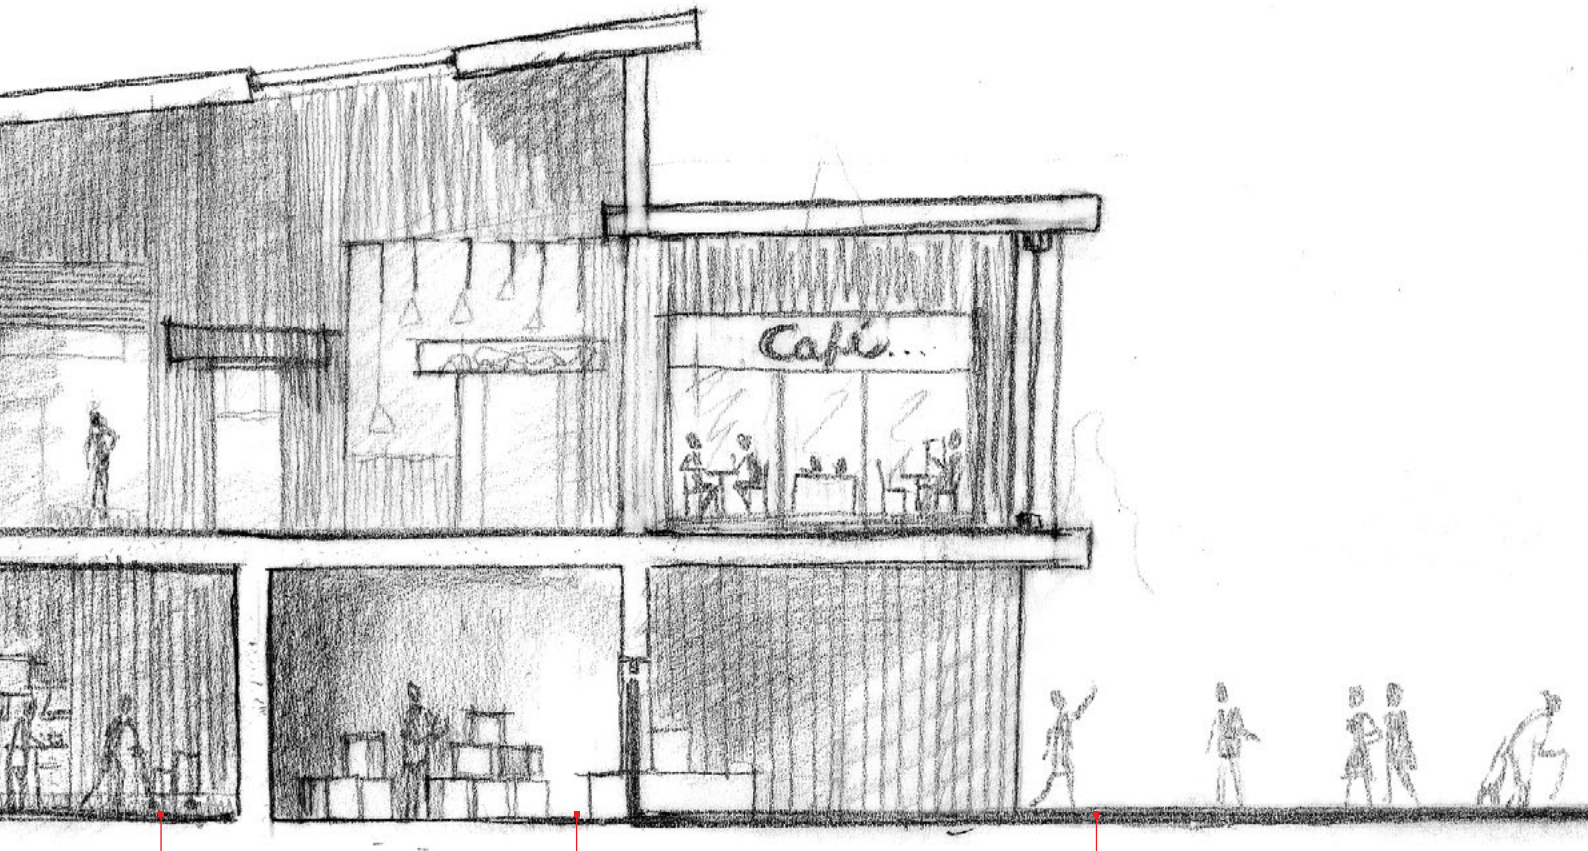

We at ACO Industries have many years of experience in designing access covers. We use our broad technical knowledge in product design, testing, manufacturing and applications to deliver maximum quality to our customers. ACO Access Covers are innovative and made of high quality materials. Our complete range of covers is fully certified according to European standards and meets all load, safety and functional requirements.

The precise manufacture of stainless steel, galvanized steel, aluminium alloys and composites guarantees high reliability and long life of our products.

- Stainless steel is suitable for application in meat, beverage, chemical or food industry.
- Covers made of galvanized steel are typical for residential buildings, as well as for production and storage buildings.
- Aluminum covers for demanding applications such as in hotels and hospitals will complete the program.

ACO Access Covers can be flexibly installed into any interior or exterior areas. Their installation and handling, as well as their maintenance and cleaning, are easy.

A wide range of standard types with many options, tailor made production and the possibility of using various floor surfaces make an ACO Access Cover look like an inconspicuous chameleon smartly merging into its background while retaining its full functionality and safety.

ACO Access Cover UNIFACE

Product information

Typical applications are inside buildings or in building surroundings, where high level of design is required.

Recessed access covers are suitable for a thin floor surfaces in thickness up to 15 mm or in special product range thickenss up to 65mm.

The cover must be filled-up with concrete of required quality (C35/45) in order to achieve declared load capacity.

- Type tested and certified according to EN 1253-4, product range AAC Uniface DEEP according to EN124
- Tested with space for tiles height 15 mm and for pavement bricks and natural stone up to height 65 mm (competitors covers tested completely filled with concrete)
- Bolt locked – child safety
- Corrosion resistant
- Small corner parts
- Secure installation – good connection with concrete (profiled frame or anchors)
- Discreet product after installation
- Easy tool for opening and manipulation
- Water-tight and odour-tight tested according to EN 1253-4

ACO Access Cover UNIFACE 2.0 GS/SS

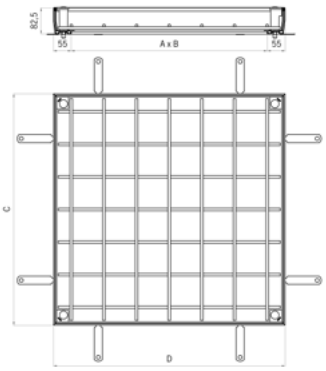

Product information

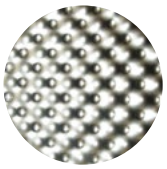

- Meets declared load class up to C250 for all clear openings up to 1 m
- Hot dip galvanized mild steel (≥ 60 µm of zinc) or pickle passivated stainless steel
- Preciseness, design
- Thanks to unique bending on the top no additional stripes for installation necessary
- Easy opening after installation
- Less friction between frame and cover
- No sharp edges – improved safety

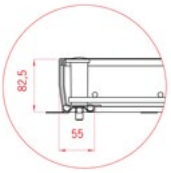

GS - hot dip galvanized mild steel (1.0037)
SS - pickle passivated stainless steel (1.4301)

- Rolled profiles for galvanized version of the cover are made from innovative material UltraSTEEL®. It helps significantly reduce weight of the cover while maintaining the strength, stability and stiffness of the product.
- Rolled profiles for stainless steel version are made from conventional steel sheet in thickness 2 mm.
- Covers are double sealed for excellent water- and odour-tightness.

UltraSTEEL® - More information at www.hadleygroup.com

ACO Access Cover UNIFACE DEEP 35

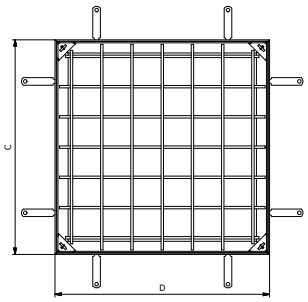

Product information

- Meets declared load class up to B125 for all clear opening up to 1 m dimensions
- Deeper cover allows infill of tiles, paving blocks, or natural stones up to thickness of 35 mm (adheasive included)
- No risk – load class capacity guaranteed and certified
- Secured in the frame by its own weight
- Trouble-free removal and assembly

- Corrosion resistant - Hot dip galvanized mild steel (≥ 60 µm of zinc) or pickle passivated stainless stee
- Preciseness design
- Less friction between frame and cover
- No sharp edges – improved safety
- Rolled profiles for galvanized version of the cover are made from innovative material UltraSTEEL®. It helps signifi-cantly reduce weight of the cover while maintaining the strength, stability and stiffness of the product
- Rolled profiles for stainless steel version are made from conventional steel sheet in thickness 2 mm
- Covers are double sealed for excellent water and odour-tightness

ACO Access Cover UNIFACE MULTI GS/SS

Product information

- Option for oversize multipart solutions
- Removable support beams make it possible to use the whole clear opening of the cover
- Trouble-free removal and assembly
- Individually designed

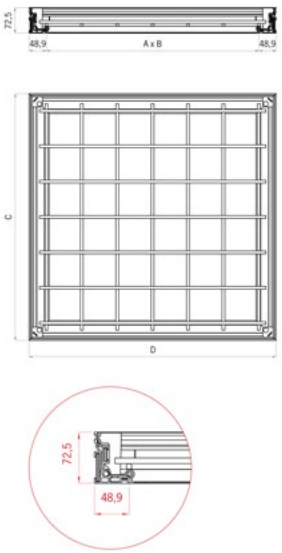

ACO Access Cover UNIFACE AL

Product information

- Excellent optic aesthetics
- Meets declared load class up to M125
- Corrosion resistant aluminium alloy
- Precision thanks to crimping (mechanical fixing)
- 2+1 sealing – water/odour tight+sand/ dust tight
- Easy opening – prevents blockage
- Easy installation – positioning of the cover in frame
- Tiny tolerances, perfect fit
- Very small corner parts (30×30 mm)
- Brass nut to prevent blockage
- Reinforcement in optimal position

ACO Access Cover UNIFACE MULTI AL

Product information

- Option for oversize multipart solutions
- Removable support beams make it possible to use the whole clear opening of the cover
- Trouble-free removal and assembly
- Maximum clear width 1000mm
- Maximum load class L15
- Individually designed

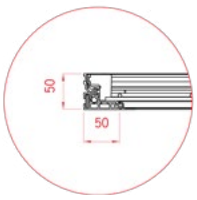

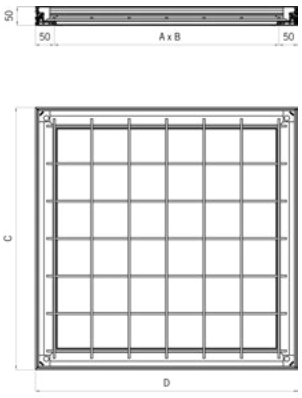

ACO Access Cover UNIFACE AL shallow

Product information

- For an application in floor screed (50 mm)
- No impact on structure slab
- Weight of installed cover reduced to 2/3 compare to standard AL cover
- Load capacity L15 for cover fully filled with concrete
- Load capacity K3 for cover with tiles in thickness up to 15 mm

ACO Access Cover PAVING

Product information

Typically specified for use outside buildings, for pedestrian areas, driveways and car parks. Recessed access covers for a pavement, natural stone or bitumen infill in height up to 120 mm.

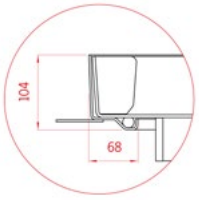

- Strong supports are welded underneath of the cover
- Load capacity up to load class C250 for all clear openings up to 1 m
- No concrete or any other additional structural infill necessary
- Equipped with a seal

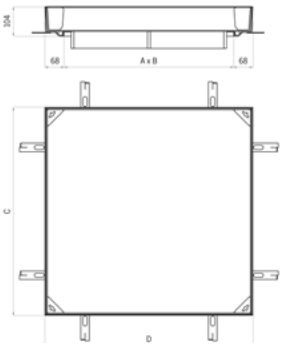

ACO Access Cover PAVING GS 80

Product information

- Type tested and certified according to EN 124
- Equipped with a seal
- Corrosion resistant – hot dip galvanized mild steel
- Secure and time saving installation
- No risk – load capacity always guaranteed
- 80 tray depth available

- Secured in the frame by its own weight - child safety
- Stainless steel version available on request (1.4301 or 1.4571)

ACO Access Cover PAVING MULTI

Product information

- Option for oversize multipart solutions
- Removable support beams make it possible to use the whole clear opening of the cover
- Trouble-free removal and assembly
- Covers are not watertight
- Individually designed

ACO Access Cover SOLID

Product information

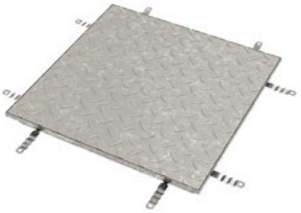

Suitable for light industrial applications, where simple and lightweight covers are required. Surface of the cover is formed by anti slip tread “checker” plate. Optimized supports are welded underneath of the cover which guarantee declared load capacity.

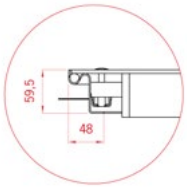

- No concrete or any other additional structural infill necessary
- Type tested and certified according to EN 124
- Equipped with a seal
- Bolt locked – child safety
- Corrosion resistant
- Secure and time saving installation
- No risk – load capacity always guaranteed
- Durable

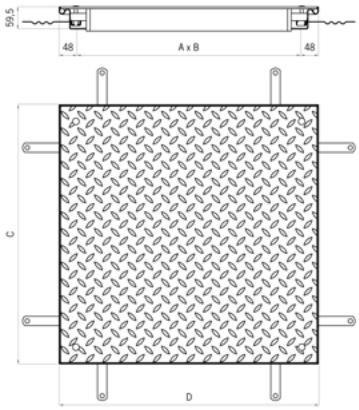

ACO Access Cover SOLID GS/SS

Product information

- Load capacity up to load class B125 for all clear openings up to 1 m
- Hot dip galvanized mild steel (≥ 60 µm of zinc) or pickle passivated stainless steel
- Cover weight ca 30 kg (600×600, B125)
- Frame height 59,5 mm
- Highest grade of stainless steel (1.4571) available on request

ACO Access Cover SOLID AL

Product information

- Load capacity up to load class A15 for all clear openings up to 1 m
- Highest grade of aluminium alloy for “checker” plate
- Excellent corrosion resistance
- Crimped frame
- Lightest solution - cover weight ca 10 kg (600×600, A15)
- Frame height 37,5 mm only

Order information

ACO Access Cover SOLID MULTI GS/SS

Product information

- Option for oversize multipart solutions
- Removable support beams make it possible to use the whole clear opening of the cover
- Trouble-free removal and assembly
- Individually designed

Special slip resistant surface

It is possible to apply special long-life, durable antislip surface on all SOLID GS/SS covers. Plastic based coating has excellent antislip features. Material is available in several colours (e.g. black, gray, yellow, red, green, beige or blue).

All our products are fully certified

Safety and functionality is our priority in the development of access covers. During the development we can rely on many strength calculations, tests and real applications that we have implemented in recent years.

We aim to be on the top of technological development and innovation. We are also active in an amendment process of European standards related to access covers.

ACO Access Covers are type tested and certified according to following standards

EN 1253-4
Gullies for buildings – Access covers

- ACO Access Covers UNIFACE
  Product certificate
  No. 204/C5a/2016/060-044177.

EN 124
Gully tops and manhole tops
for vehicular and pedestrian areas

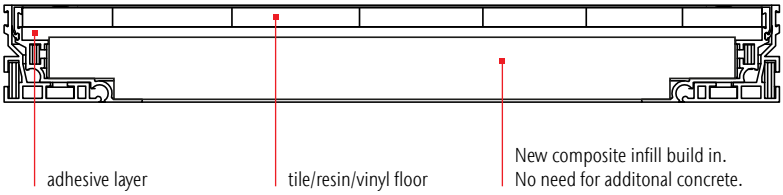

- ACO Access Covers PAVING,
  ACO Access Covers SOLID
  Product certificate
  No. 204/C5a/2017/060-045479.

- ACO Access Covers Uniface DEEP 35
  ACO Access Covers Uniface DEEP 65
  Product certificate
  No.204/C5a/2020/060-050525

Certificates

ACO Access Cover UNIFACE SMART AL

- Lightweight cover with structural composite infill (no concrete necessary)
- Load capacity L15 with tiles in thickness up to 15 mm
- Extremely easy opening and manipulation
- No risk – load capacity always guaranteed

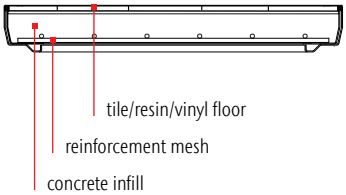

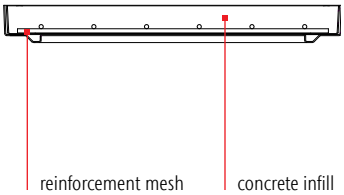

ACO Access Cover UNIFACE GS/SS

- Recessed access covers suitable for a thin floor surfaces in thickness up to 15 mm
- The cover must be filled-up with concrete of required quality in order to achieve declared load capacity
- Declared load capacity tested and guaranteed with space for tiles 15 mm
- Type tested and certified according to EN 1253-4 – Product certificate No. 204/C5a/2016/060-044177

Common solution of access cover

- No information or guarantee for cover with tiles
- Example for a recessed cover with a clear opening 600×600 mm, declared test load 125 kN - if the concrete layer is reduced about 15 mm then the real test load is reduced to 75 kN only!

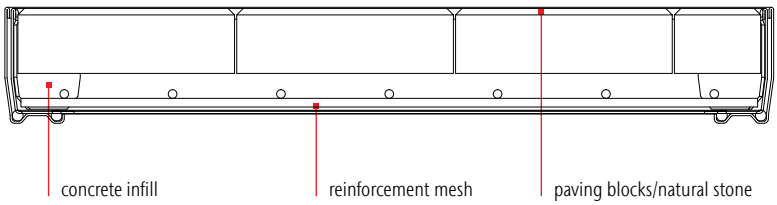

ACO Access Cover Uniface DEEP 35/65

- Recessed access covers are suitable for a thin floor in thickness up to 65mm
- The cover must be filled-up with concrete C35/45 in order to achieve declared load capacity
- Declared lead capacity up to B125 for clear opening up to 1m
- Tested and guaranteed with space for infill up to 65mm
- Certified and tested according to EN 124 - Product certificate No. 204/C5a/2020/060-050525

Common solution of access cover

- Example for a recessed cover with a clear opening 600×600 mm, declared test load 125 kN - if the concrete layer is reduced about 15 mm then the real test load is reduced to 75 kN only!

Certificates

ACO Industries k.s. in Přibyslav is using a quality management system certified according to EN ISO 9001. The company has been certified since 1996.

Factory production control, employees qualification and technical equipment are certified according to EN 1090: Execution of steel structures and aluminium structures - Part 1: Requirements for conformity assessment of structural components.

Customers can rely on key parameters of ACO Access Covers:

- Safety
- Declared load capacity
- Tightness
- Functionality

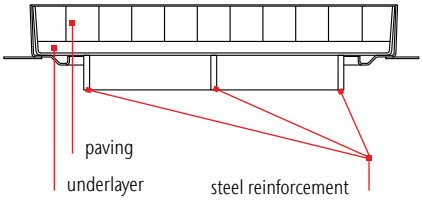

ACO Access Covers
– Innovation you can trust

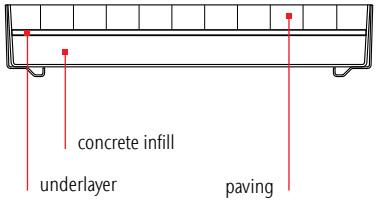

ACO Access Cover PAVING

- Strong optimized supports are welded underneath of the cover
- Space for paving blocks up to 110 mm
- Load capacity up to load class C250 for all clear openings up to 1 m
- No concrete or any other additional structural infill necessary
- Type tested and certified according to EN 124 – Product certificate No. 204/C5a/2017/060-045479

Common solution available on market

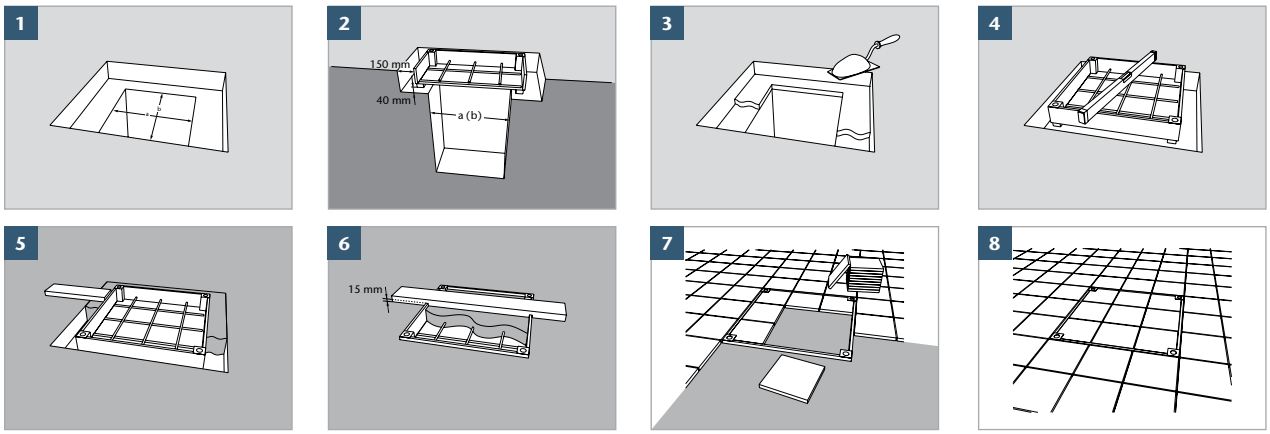

- Additional structural concrete infill necessary
- Less space for paving infill
- Longer installation time

Planning assistent for covers

General information: Please tick the appropriate boxes below.

Indoor / outdoor: Cover is indoor ◯ Cover is outdoor ◯

New cover instalation / cover replacement: New instalation ☐ Replacement ☐

Replacement (please describe the situation as much as possible):

Intended use of cover:

Entrance ☐ Firefighter access ☐ Inspection shafts ☐ Exit / escape opening (emergency) ☐

Place of cover instalation:

Concreated surface ☐ road / paved area ☐ Green space ☐ Ceiling / Roof ☐

Type of „instalation“ underneath the cover:

Stairs ☐ Wet room ☐ Cable duct -humidity non sensitive ☐ Cable duct -humidity sensitive ☐

Drinking water supply ☐ Escape tunnel-humidity non sensitive ☐ Corossive substance-humidity sensitive ☐

Access Cover Clear Opening (AxB):

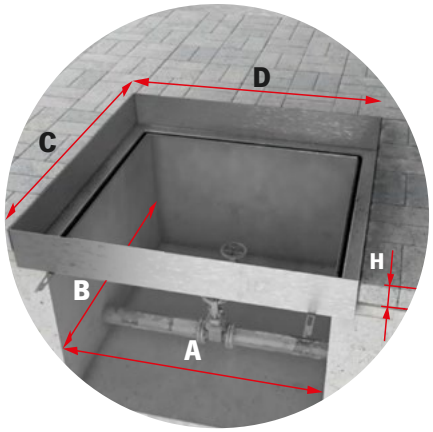

_____ X _____ mm

Max. allowed external dimensions (CxD):

_____ X _____ mm

Max. Allowed in-built height (H):

_____ mm

Limited weight of signle part required: Yes ◯ No ◯

Required weight of single part:

_____ kg

Frequency of cover being driven over:

Rarely ☐ Occasionally ☐ Frequently ☐ Very frequently ☐

Frequnecy of cover being opened:

Rarely ☐ Occasionally ☐ Frequently ☐ Very frequently ☐

Infill Required: Yes ◯ No ◯

Infill depth:

15mm ☐ 35mm ☐ 50mm ☐ 65mm ☐ 80mm ☐ 120mm ☐

Infill type:

Asphalt ☐ concrete ☐ Natural stoone ☐ Wood ☐ Tiles ☐ Pavement ☐

Classification of environments cover would be exposed from top/bottom side
According to EN ISO 12944-2, the environment is devided into six atmospheric corrosivity categories as follows:

C1 -very low ☐ C2 -low ☐ C3 -medium ☐ C4 -high ☐ C5 „I“ -very high /industrial ☐

C5 „M“ -very high/marine ☐

Temperature differ from top / bottom side: Yes ◯ No ◯

Parameters / features:

Load Class (LC):

Temperature differ from top / bottom side: Can be walked on only ◯ Can be driven over ◯

Can be driven over:

By passenger cars up to 3,5t ☐ By vans up to 7,5t ☐ By trucks up to 60t ☐

Heavy duty (industrial areas) ☐ Heavy duty (airports) ☐ Other loads: ☐

specified by customer (EN124):

A15 ☐ B125 ☐ C250 ☐ D400 ☐ E600 ☐ F900 ☐

specified by customer (EN 1253-4):

L15 ☐ M125 ☐ N250 ☐ P400 ☐

Material:

Galvanised steel ☐ Stainless steel ☐ Steinless steel V2A ☐ Steinless steel V4A ☐ Aluminium ☐

Fire proof resistance:

Not required ☐ EI30 ☐ EI60 ☐ EI90 ☐ EI90 ☐

Waterproofed: Yes ◯ No ◯

Cover opening method: Without opening assistance ☐ With an opening assistance ☐

Cover with opening assistance / lifted by: Gas spring (GS) ☐ Hydraulic (HD) ☐

Advanced slip resistance surface treatment: Yes ◯ No ◯

Cover lid fixing by screw: Yes ◯ No ◯

Lid secured by:

Screw with unique head shape:

Allen shape (DIN 912) ☐

Triangle shape (DIN 3223) ☐

Six shape (DIN 14925) ☐

Multi shape ☐

Lid secured by:

ACO locking lock with:

Half cylinder / key operating (LC EN 124 -A,B) ☐

Lock operated by customized head shape (LC EN 124 -A,B) ☐

Heavy duty lock (LC EN 124 -D,E,F) ☐
