Adding customer convenience while saving energy

Despite the amazingly large compartments, the Besam RD3L is market leading in safety, meeting tough international standards.

Background

COOP Hypermarkets are among the most well-known and widely spread supermarkets in Sweden. With a large number of daily visitors and shopping carts filled with everything from food to gardening equipment and furniture, spacious and convenient entrances are a must.

ASSA ABLOY Entrance Systems was asked to provide a high-capacity, automated entrance for COOP Hypermarket in Kungsbacka, Sweden.

Challenge

- Create a large, welcoming automatic entrance with plenty of capacity for shoppers with trolleys
- Ensure a comfortable indoor climate for both shoppers and store staff
- Reduce heating and cooling costs

Solution

- A large, high-capacity three-wing Besam RD3L revolving door
- An aircurtain on the inside, beautifully integrated into the Besam RD3L, for additional comfort

COOP Hypermarket chose a Besam RD3L revolving door for its spacious, high-capacity compartments and state-of-the-art safety features.

The client was also pleased with RD3L's ability improve the separation between the indoor and outdoor climates. This was especially important for the COOP store in Kungsbacka, Sweden, where the building's location and orientation exposes its entrance to high winds.
