Your care is our care

In healthcare environments, everything matters. From the quality of your care, the capability of your staff, or the accessibility of your building, no detail is too small to be considered. ASSA ABLOY Entrance Systems entrance automation portfolio and service offer can help provide a welcoming and functional environment for your patients, staff and visitors.

Expertise when it matters most

While the need for quality healthcare is universal, the needs of its providers are not. From hospitals and clinics to rehabilitation centers and homes for the elderly, entrance requirements differ both inside and out. That's what makes a complete partner like ASSA ABLOY Entrance Systems so valuable. Our recommendations are tailored to your requirements.

Your major benefits

- Market-leading brands and a complete portfolio in entrance automation
- Convenience in people and goods flow
- Energy savings with 'Automatically Green Solutions'
- Repairs and maintenance programs
- Modernization of older entrances

Additionals

- Supporting peaceful recovery, which is why our automated entrances operate in silence
- Ensuring unauthorized visitors and personnel cannot access
- Safe-guarding patients' privacy in wards
- Staying one step ahead of unnecessary touching and heavy, inconvenient opening by ensuring entrance automation throughout the premises

Full range for your entrance needs

From automatic doors for your main entrance, overhead sectional doors for your ambulance and loading areas, or high-performance doors with fast opening and closing speeds, we have a door to suit your needs. We also provide comprehensive maintenance and regular inspections on your existing equipment to keep it operating in top condition. Trust your entrance automation needs to ASSA ABLOY Entrance Systems to make a crucial difference when seconds count.

NIHVA

1 Sliding door
Besam sliding doors accommodate changes in traffic flow without compromising safety and energy savings.

2 Hermetic or TightSeal sliding door
Besam hermetic sliding doors easily adapt for critical environments such as operation theatres and clean rooms. Besam TightSeal offer infection control solutions to ICU and ward bay areas.

3 Door closers
Besam door closers are CE marked, EN-standard products ideal for public areas such as public restrooms and private apartments needed to suit the requirements of those with physical impairments.

4 High-performance doors
Albany high speed doors feature incredibly fast speeds to significantly reduce energy loses and reduce operator waiting time.

5 Swing door
Besam swing doors ensure maximum convenience when space is a factor. Add access control for increased security.

6 Dock levelers and dock shelters
Crawford dock levelers and dock shelters will optimize your energy- savings and goods flow by tailoring a complete loading dock solution.

7 Revolving door (2-wing)
Besam revolving doors welcome visitors while safe-guarding air infiltration. Use the display areas for special healthcare campaigns.

8 Overhead sectional door
Crawford overhead sectional doors are space-saving, robust and well insulated doors, ideal for emergency vechicles applications.

9 Cleanroom high-performance door
Albany high-performance doors specially for cleanrooms with smooth and easily cleanable surfaces are well suited for the stringent requirements of hygienic areas. The door regulate airflow, minimize contamination and provide personnel access control.

We offer support in:

- Optimizing convenience
- Increasing energy saving
- Improving safety
- Enhancing security
- Giving your entrance a lift to improve its general appeal

ASSA ABLOY ENTRANCE SYSTEMS
Maintenance & Modernization

NIHVA

We are here to help you meet your business requirements challenges - both present and future.

Upgrades and modernization

Safety standards and other regulations are constantly developing, just as the requirements of healthcare will change over time. We can help you upgrade or modernize your doors and docking systems when the need arises, often through convenient standardized packages.

Our technicians are qualified and able to advise on a varity of solutions. Not only they can help you ensure regulatory compliance, they can also inform you of new innovation and smart new functions. These can improve your equipment in many areas, from safety and security to automation and energy efficency.

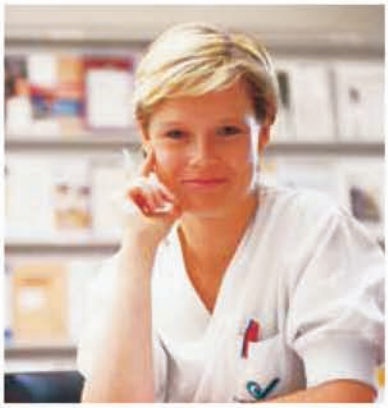

Lost energy is one of the key factors lying 'hidden' behind the opening and closing of your doors. Anything that saves energy has a positive impact on your bottom line, as well as on the environment.

Our tight-sealing and well-insulated products save considerable energy, and our preventive maintenance can save even more. Ensuring fewer breakdowns contributes to a more stable interior climate, which benefits your goods and keeps energy losses to a minimum.

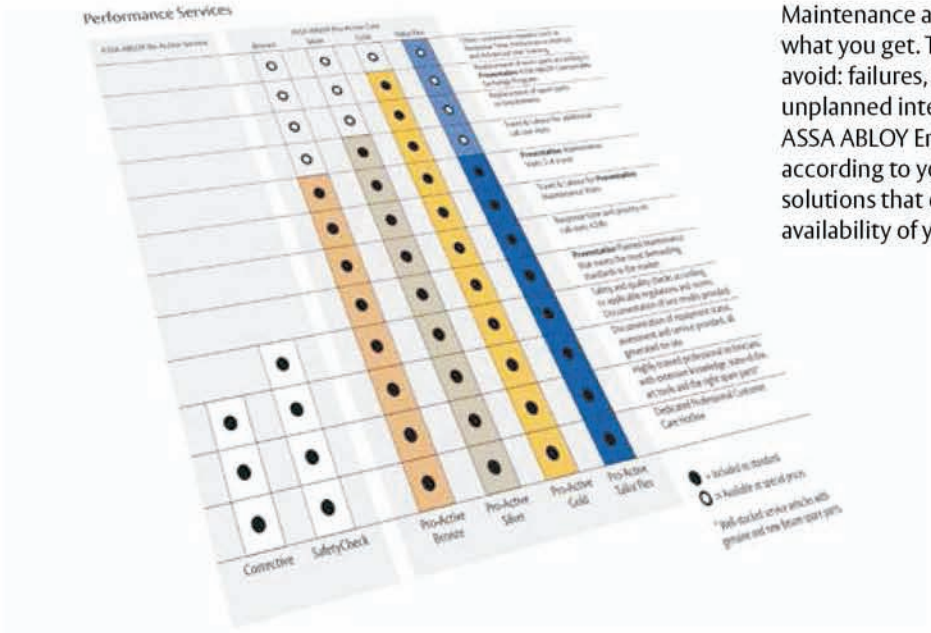

By sustaining the top performance of your doors and docking systems, you make your business more sustainable as well.

With an eye on tomorrow's need

Maintenance and service aren't about what you get. They're about what you avoid: failures, accidents, losses and unplanned interruptions.
ASSA ABLOY Entrance Systems works according to your needs, with tailored solutions that ensure the function and availability of your entrances.

Proof in action

Hospitals, medical offices, veterinary clinics and assisted living facilities all require taillored solutions. ASSA ABLOY Entrance Systems products and solutions provide added convenience, security and safety for staff with their hands occupied, for people with mobility or sensory impairment, and most importantly - when saving seconds could save lives.

In a time of increased awareness of infectious disease control and hazardous biological material handling, our products help to maintain and increase life safety by decreasing how often people need to actually touch a door. In addition quality automated solutions can help reduce costs, save energy and prevent damage to doors and other equipment, while also improving internal logistics ad generally making life easier for all users.

Energy-saving entrance solutions

We aim to support our partners in finding the entrance and service solutions that effectively pair energy-savings with the architect's own design aspiration.

In the long run, every penny wasted on your building's unnecessary energy consumption, is a lost opportunity to reinvest in your facility and the people who need it the most.

When every minute count and people turn to you in their moment of need, your entrances green benefits might not be the first thing on your mind. So with respect for your facility's daily challenges, our entrances automatically incorporate the optimization of people and goods flow with streamlined energy consumption.

- Tight seal solutions for minimal air infiltration
- Directional sensors minimizing unnecessary opening cycles
- Modernization possibilities to re-use and lift existing entrances to today's standard
- Remote, online maintenance and product information possibilities

Calculate and compare potential energy and emission savings using the energy calculator of ASSA ABLOY Entrance Systems.

Automatically green advice tools

Your local ASSA ABLOY Entrance Systems advisor has access to professional tools designed to provide our customers with reliable and relevant data for choosing the entrance products that best suit your specific circumstances and sustainability needs.

Years of testing, documentation and measurements of our products in different applications have gone into the development of these energy savings tools and they are continuously evolving. Local energy costs and environmental circumstances are taken into account, tailoring the report to each client and location.

Our advisors can support you on-site in calculating your energy- and emission savings for your ASSA ABLOY Entrance Systems' automated entrance solutions.
