# AUTOMATION SOLUTIONS

**NIHVA** is a leading provider of Wireless Automation - M2M in India. We provide solutions machine communication and remote SCADA with help of our proprietary range of hardware and software combinations and are proud of rendering our solutions to Varios industries and Government agencies. We specialize in critical operations monitoring with Logging and alert options.

We deliver Automation solutions that helps manage the manufacturing floor, functions, resources, and inventory and gives accounting and MIS all the information they require. No advanced knowledge of computers is required. For daily use and in most cases, all existing infrastructure, hardware can be utilised as it is.

**Automation + Traceability + Erp Integration + Management = Control On Your Bottom Line**

**Automation Softwares** **Pick & Place Machines** **Greas / Oil Separator**

# NIHVA'S - SERVICES / MAINTENANCE / AMC

Prevention is better than cure is an old philosophical statement but very true in all aspects of our life. Any engineering solution is viable for the user until it is working without any glitches and provides trouble free operation. As a matter of fact the solution should be such a part of an operation that it should be noticed only if it fails to perform.

NIHVA values its customers and their businesses and therefore has also built capabilities to provide after sales services. NIHVA is equipped with sophisticated tools and trained engineers to provide quick and efficient service to ensure minimum downtime, prevent unexpected breakdowns and safe work environment.
