REMARKS:

TOTAL GROSS PRICE	**614.70**

PLEASE REMEMBER THE FOLLOWING WHEN PLACING A SPARE PART ORDER

1. For docking spare part orders, it is absolutely necessary to state the production number or serial number of the original product.
2. For door spare part orders, please state the serial number if possible. This is to avoid unnecessary delays and/or mistakes.
3. Always specify the item number of the spare part you want to order. You find the item number in the spare part catalogue (SPC).
4. For some items (e.g. tracks and sections), you need to provide a detailed specification. Please use the pdf-file which is attached to the relevant item in the SPC. The pdf-file tells you which parameters you have to specify in your order, for example:
   - For tracks you need to specify measures A, B, C, D (see pdf-file in SPC).
   - For sections you need to specify production size, colour, windows, handle L/R, lock L/R, etc (see pdf-file in SPC).
5. When ordering length items (e.g. bottom sealing, profiles), you must specify both the number of pieces and the length per piece.
6. For sections with passdoor, we need the original order number (incl. position), or the serial number of the door.
