COMPANY PROFILE

Ozone Lift established in the year 2013 and is one of the fastest growing companies having in-house R&D and manufacturing facilities. We have done extensive market research in Lift business have invaluable insight into the strengths and weakness of the Lift of different makes offered by both indigenous and multinational companies. In a vibrant industry where technology obsolescence is at breathtaking speed. Customer's expectations and requirements demand drastic changes periodically. We believe in continuous learning, up-gradation, innovation & passion for perfection. The continuous feedback from different customers has added to our insight into the chosen field. We have a strong customer base, having provided lift solutions to many builders and industries. We have a talented team of technical professionals having expertise in Mechanical, Electrical, and Electronics field.

OUR TEAM

Mr. Kapil Sonawane
(MBA-Sales & Marketing)
12 Years Experience
Head of Sales &
Customer Relation Department

Mr. Harshal Jumade
(M.Tech-Machine Design)
12 Years Experience
Head of Design & Purchase
Manufacturing Department

Mr. Sandip Shisode
(MBA Operation)
16 Years Experience
Head of Erection &
Maintenance Department

Ozone Lift team has been driven by one basic idea to build an organization deeply committed to values, with the firm belief that success in business eventually but inevitably follows. Unflinching commitment to values continues to stay at the core of Ozone Lift. We strongly believe that ordinary people are capable of extraordinary things when organized into highly charged teams. Ozone Lift attempts to deliver business value to customers consistently. The consistency is driven by its pioneering efforts in service quality and predictability, through methodologies like Indian Standard IS:14665 and Europe Standard EN:81. Ozone Lift business success has been driven by keeping the customer at the core of everything it does. Combining its deep expertise in technology with an equally clear understanding of customer needs.

MANUFACTURING PLANT

We have manufacturing partner "Harshal Control System" Plant in Airoli, Navi Mumbai. Being an ISO 9001:2015 certified company. We have a vast expanse of over 32,000 square feet of factory premise on a plot of 82,500 square feet of prime industrial land at Airoli, Navi Mumbai with an integrate production line in terms of expertise, know-how and ultra-techniques with well equipped latest state-of-the-art modern machineries supported by hi-tech infrastructure, comprising of precision machinery imported from Amada (Japan) CNC Turret punch press, CNC Laser Machine, Hydraulic Press Brakes, Hydraulic Shearing Machine, In house powder coating facilities & assembly etc., Other modern-day machines which will cover the entire spectrum of finishing jobs with accuracy and develop innovative designs for the sheet metal industries, we have in-house testing machines & techniques for quality checks under strict supervision of qualified personnel.

PRODUCT RANGE

Passenger Elevators

Ozone Lift passenger elevator employ advanced technology in vertical transportation. Passenger Lift is used to carry a maximum of 25 passengers. We provide geared, gearless and machine room less Elevator.

Hospitals/Stretcher Elevators

Ozone Lift Vertical transportation system has designed special solutions for modern hospitals which includes spacious durable car, smooth and comfortable travel, accurate stop with inch up and inch down push-button control in the car. Most important, Emergency control feature and reliability with safety mechanism.

Goods/Industrial Elevators

Ozone Lift is well-known manufacturer and supplier of Goods Lifting platforms which are absolutely safe and convenient to use. These Goods Lifts are designed and developed by highly qualified engineers and personnel who have a thorough knowledge of the latest industry requirements.

Home/Hydraulic Elevators

Hydraulic lifts designed by Ozone Lift are cost-effective, safe and easy to maintain. They are very convenient and value for money solutions for low-rise buildings having low traffic. They boast superb user-friendliness and easy access machine room located at the basement. Once they are put in place, hydraulic elevators give the smoothest rides possible.

Dumbwaiter

A Dumbwaiter is a small freight elevator or lifts intended to carry objects rather than people. Dumbwaiters found within modern structures, including commercial, public and private buildings, are often connected between multiple floors. When installed in restaurants, schools, hospitals, retirement homes or in private homes, the lifts generally terminate in a kitchen.

COP & LOP - TOUCH SCREEN TYPE

FEATURES & SPECIFICATION

- Touch-enable car operating & landing operating panel.
- Aesthetically complements building interior.
- Touch Plate: Toughened Glass and Poly Carbonate.
- Face Plate Background Black Color and Keyboard Background White Color.
- The life of non-tactile keyboard is 4 million operations, while for tactile keyboard is 2 million operations.

TRACTION MACHINE

Geared Traction Machine

Geared Elevator motor is a traction AC motor, electro mechanical brake, heat-treated alloy steel worm shaft, centrifugally cast bronze worm gear wheel and superior grade cast iron drive sheave all compactly mounted on a single base or bed plate. Taper Roller Bearings ensures end thrust absorption and Spherical Roller Bearings ensures enough traction and minimizes rope wear and tear.

Geared Traction Machine

Geareless Traction Machine

Gearless Traction Machine

Gearless motor, the latest innovation in elevator technology based on permanent magnet synchronous gearless machine is in great demand in the elevator industry because of the following technical advantages: The PMSM (Permanent Magnet Synchronous Motor) uses a rare earth permanent magnet with high magnetic flux density. In this system, when permanent magnetic flux is established, there is no need to release magnetizing current which in turn results in effective control and energy saving. This invention allows the motor to have short length with a large diameter and therefore a high torque. As it does not require gears, it is compact in size and weight which allows installation in a small space. It is less noisy, provides unsurpassed smoothness and ride quality.

CONTROL SYSTEM

Ozone Lift traffic control system is based on advanced microcontroller system incorporating field proved and field programmable sophisticated software to ensure efficient and reliable service under demanding traffic conditions. There are different control systems to meet the diverse needs of different types of requirements. The system can be programmed for Single speed, two-speed or Variable Frequency Drive (VFD) with either manual or auto door operation available for all types of applications. Error message display in LCD/Dot matrix/7 segment modes included for quick fault diagnosis, easy and speedy debugging of the controller.

Control Panel

V3F DRIVE SYSTEM

Ozone Lift V3F (Variable Voltage Variable Frequency) Drive System is most ideal for elevator motion control.

Salient Features

- Smooth start/stop providing greater travel comfort.
- Power saving up to 50% with PWM Technology.
- Reduced cable size because of low current.
- Jerk free operation. Reduced wear & tear of moving components increasing the overall life span of the equipment.
- Improves overall efficiency and reliability of the system.

V3F Drive

Automatic Rescue Device (ARD)

AUTOMATIC RESCUE DEVICE (ARD)

Auto Rescue Device (ARD) is an advanced rescue system for rescuing passengers from an elevator in the event of a power failure. Manual rescuing is time-consuming and prone to heightened anxiety among the passengers.

Attempt to manually rescue may also result in injuries if done by untrained persons. ARD provides the required power to move the elevator car to the nearest landing and open the door automatically to rescue the passengers.

SERVICE & MAINTENANCE

We support our customers every step of the way from design, manufacturing, and installation to maintenance and modernization. Periodic, scheduled maintenance visits by our company trained technicians are done to conduct necessary cleaning, lubricating, adjusting and minor repairing work to ensure that your lift or elevator is kept in proper operating condition. We continuously focus on technical training on new technologies, development and process refinements for technicians so that we can provide better service to our customer 24 x 7.

Our maintenance agreement through service contracts can reduce your lift maintenance cost and can bring new life to your lifts. We do a thorough check of the lift and other devices prior to an agreement so that the detailed report of the lift condition is provided to you and accordingly service is provided.
