Added comfort and convenience for staff and patients

The large, high-capacity Besam revolving doors can be equipped with not only air curtains, but also night closing doors with intrusion protection for optimal security around-the-clock.

Background
Vlietland hospital in Schiedam, the Netherlands, wanted to optimize the convenience for staff and patients while reducing energy costs.

Challenge
- To create a attractive revolving door entrance of at least 5,4 meters in diameter
- Safe and fire-resistant door automation between departments and on existing doors
- Minimize the spread of infection by utilizing door automation through-out the hospital
- Creating a draught-free entrance
- Optimize accessibility for all, despite age and physical ability

Solution
- Large, high-capacity Besam UniTurn with air curtain system at the main entrance
- 200 swing door operators and 150 sliding door operators between hospital departments
- Pro-Active maintenance agreement

We were selected to sully and install a draught-free, 2-wing Besam UniTurn with a unique air curtain system in the main entrance. This provided Vlietland hospital with benefits in both comfort, convenience and energy-saving.

200 Besam swing door operators and 150 Besam sliding door operators were installed on the doors between the departments to ensure safe and convenient hands-free operation - a prerequisite for infection and disease control.
