1.0 PURPOSE

- To define Management commitment towards process efficiency and customer focus, Quality Policy & Objectives.
- Communicate the company's QMS policy and objectives
- Provide the base for auditing effectiveness of QMS

2.0 SCOPE

QMS established at NIHVA.

3.0 DETAILS

3.1 Leadership and commitment with respect to quality management system

Following activities and actions are initiated for development and continual improvement of QMS:

- Taking accountability for effectiveness of QMS, by linking it with annual goals
- Quality policy is established which is compatible with the context of the organization
- Quality objectives are established. These are reviewed and updated on yearly basis. Management reviews are conducted to assess the effectiveness of the quality management system
- Process approach and risk based thinking
- Adequate resources are identified and made available to execute required processes
- Instilling Continuous Improvement Culture through business excellence systems and practices

3.2 Leadership and commitment with respect to Customer focus: -

NIHVA ensures that

- Customer and applicable statutory and regulatory requirements are determined, understood and consistently met
- Risks and opportunities that can affect conformity of products and services and the ability to enhance customer satisfaction are determined and addressed.
- Focus on enhancing customer satisfaction is maintained.

3.3 Quality policy: -

The Director and Managers have initiated and communicated the Quality Policy throughout the organization and made it available to relevant interested parties as appropriate. The Quality Policy is appropriate to the purpose and context of the organization and supports its strategic direction. It provides the framework for setting quality objectives, satisfying applicable requirements and supports the Company's commitment for continual improvement of the QMS.

Quality Policy

"NIHVA" is committed to understand and capture the current and future needs, expectations of our customers, applications as well as required innovative solutions to meet excellence.

We aim to achieve this by involving our stakeholders and business partners including NIHVA team in practicing a Quality System for maintaining high degree of Customer Service and Support, to provide State-of-the-art, Innovative and High Quality Products. We evolve and review the objectives as appropriate to the products and services.

We demonstrate personal ownership for quality through the following behaviors:

- **Satisfying our customers and other internal and external stakeholders**
  continuously strive to understand their challenges and deliver quality solutions, products and services that meet their requirements.
- **Setting aggressive objectives for quality performance**
  consider all steps of our processes – from start to finish - no matter what service, product or solution I am delivering.
- **Proactively identifying and solving problems every day**
  when I detect a quality problem, I stop the process immediately and seek resolution. I am committed to continuously improving the quality management system, addressing risks and opportunities.
- **Having a zero defect mindset**
  I ensure quality by accepting no defects, making no defects, and passing no defects.

NIHVA expects that all employees, at every level and in every function of the Company, understand and demonstrate these behaviors.

3.4 **Quality objectives**: -

- NIHVA ensures that quality objectives including those needed to meet requirements for product are established at relevant functions within the organization. The Quality objectives are measurable and consistent with quality policy.
- High-level business objectives are finalized every year. These are then cascaded down to functional level or individual level.

3.5 **Roles, Responsibilities and authorities**

The Organization Chart has been established to provide the interrelation and reporting structure of personnel within the organization.

The Business Manager has been appointed by the Director to oversee and manage the overall effectiveness and compliance of the QMS.
