ASSA ABLOY

Sustainability

ASSA ABLOY has focused on improving its sustainability profile for several years.
The group monitors performance in the manufacturing plants and have implemented improvement targets in many important areas. To improve the performance further, the group has increased the focus on sustainability in new product innovation.

ASSA ABLOY TightSeal solution

You can **add on** ASSA ABLOY TightSeal solution to get more sustainability since it helps to conserve energy. Using TightSeal will cut down air leakage/infiltration up to 60% compared to standard profiles. The TightSeal features extra brushes and rubber bumpers and is available for both upgrade and new sliding door systems. Benefits include reduced air leakage and water infiltration, both during and after peak usage hours.

When fitted to the Besam SL500 Frame with/without thermo and Besam SL500 Frame Slim with/without thermo, these automatic door systems meet European regulation BS EN 12207 (Air Permeability) Class1 standards for thermal efficiency.

When fitted to the Besam SL500 operator our automatic door systems meet European regulation norm EN16005.
