Basic information

Tag:	RD		
Structure:	Galvanised steel	**Opening speed:**	Up to 2,4 m/s
Curtain:	Flexible PVC	**Closing speed:**	1,2 m/s

Technical description

Rolling door designed for medium size outside applications with intensive use and subjected to extreme wind loads.

It consists of a galvanised steel structure, with side reinforcements and superior and tight seal that protects against wind, rain and extreme temperatures.

Smooth operation guaranteed by a frequency inverter driven motor.

Motor IP rating IP65.

Flexible curtain without rigid elements. The curtain automatically reinserts itself when dislodged.

Provided with infrared barrier at 300 mm from the floor.

Water permeability Class 3 in accordance with test EN 12489.

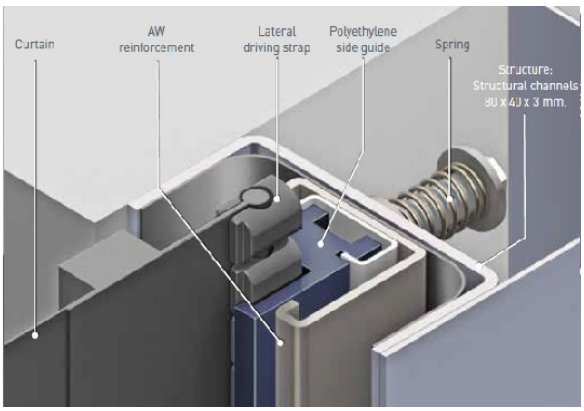

Wind permeability Class 1 in accordance with test EN 12427.

Wind load Class 4 in accordance with test EN 12444.

Maximum dimensions: 5.500 x 5.500 mm

NOTE: Shown images are indicative only. Final product may have slight aesthetical differences depending on the manufacturer. Operational features shall be as indicated
