SPRING BALANCER

ENDO Spring Balancers are a valuable addition to your assembly shop, body shop and many other industries. They support heavy tools with cable tension equal to the weight of the suspended tools, which makes them seem virtually "weightless".The assembler has the flexibility to reposition the tool, while experiencing comfortable operation and less fatigue.

Advantages

- Help the assembler with repetitive tasks such as installing fasteners: screws, nuts, bolts, etc. Hold fixtures, tools, welding guns, and similar equipment.
- Improves efficiency and diminishes worker fatigue.
- Stabilizes tool positioning and contributes to work accuracy.
- Contributes to a safer working environment Keeps fixtures, tools, and welding guns off of the floor and clean.
- Eliminates the need to separately power the balancer.

AIR BALANCER

ENDO Air Balancers provide very precise weight lifting capabilities, with more accurate positioning than can be achieved with an air hoist. ENDO Air Balancers are used for assembly lines where precision load positioning is required.

Speed Adjustment : Speed control valve equipped on the pendant control (MS).
Floating Condition : Approx 30cm floating condition for precise position setting (MS, MS-A, MS-AG, MS-ATC).
Down Stop : Added safety measure, a suspended load will not fall even if the air supply is cut off or when hoses are broken (except MS).
Energy Saving : Air consumption of air balancer is only 1/7 of that of air hoist (comparing our exiting model).
Cleanness : No lubrication is required and produces no oil mist.
Inertia Prevention Unit : Eliminates bouncing of a suspended load (EHB-85D MSD). Patent No. (JP)2008-284586

EHB-85 MS

EHB-85 ABC-5G-B

Body	Capacity (kg)	Stroke (m)	Wire Rope/Chain Size (mm)	Air Inlet	Mass (kg)
EHB-50	55	1.9	4.76	Rc 3/8	28
EHB-85	90	1.9	4.76	Rc 3/8	29
EHB-85C	90	1.9	4.00	Rc 3/8	30
EHB-85D MSD	90	1.9	4.76	Rc 3/8	40
EHB-130	140	1.9	4.76	Rc 3/8	36
EHB-130C	140	1.9	4.00	Rc 3/8	37
EHB-270	270	1.9	4.76	Rc 3/8	43

Control Module	Function
MS	Hoisting
MS-A	Hoisting with Down Stop
MS-AG	Hoisting with Down Stop by Grip Handle
MS-ATC	Hoisting by Grip Handle
BC2	Dual Balance
BC1	Single Balance
ABC-5P-B	Automatic Balancing
ABC-5G-B	Automatic Balancing by Grip Handle
MSD	Hoisting with Inertia Prevention Unit

- ABC, BC1, BC2 are not available with EHB-270.
- The air inlet size for BC1 Control Module is Rc 1/4.

- Capacity mention above are with air pressure 7 BAR.
- EHB Air Balancer can be used with Air Pressure 4-7 BAR (3-5 BAR for ABC Control Module).

Top Hook

I-Beam Trolley

ENDO Air Hoists can provide a better solution than electric hoists:

Easy Handling : Due to the small, compact but powerful hoist bodies

Improved Working Efficiency : The “run-time” and “number of starts” are unlimited. Especially with repeat lift jobs due to ENDO's high speed operation and lack of over-heating issues.

Able to do Precise Work : ENDO air hoists use non-step (continuously variable) speed controls that eliminate rough stops and starts.

Easy Installation : The air hoist works immediately upon connecting the air hose. Always make sure that you have F.R.L. Unit before you connect the air hoist.

Hazardous Duty : Ideal for use in hazardous environments, such as chemical plants.

Overload Protection : ENDO provides built-in overload protector for capacity above 250kg.

Spark Proof Model : Spark Proof Models are available upon request.

ATEX Classification : ⟨Ex⟩ II2G/DIIBT5 (EHW, AT, EHL-025TS/05TS/1TW/1TS/2TW)
⟨Ex⟩ II2G/DIIBT4 (EHL-3TS/6TW)

ALUMINIUM / STEEL RAIL SYSTEM

Power Free rail system is totally different from the conventional electric hoist in operation mechanism. It can be moved left and right with power freely. Endo Rail System is a proven system and efficient solution for variety of overhead material handling requirement for auto and engineering industry. Endo Rail System is used for handling and assembling of heavy material in three dimensional work space without difficulty. The operator does not feel fatigue in handling heavy material which results in enhancement of production to great extent. The system is composed of units so that system layout can be made without restriction. The unit parts can be reutilized when the line was modified.

JIB CRANES / INDUSTRIAL MANIPULATORS

Jib Cranes

Endo Jib crane is used in conjunction with a cable balancer or chain hoist to provide an inexpensive method of material handling. It is beneficial when the rigidity of a manipulator is not needed or when limited vertical travel is required.

Manipulators

Pneumatic Manipulators, can be used to effortlessly lift, move, turn and position any off-set load up to 200 kgs. They are reliable, robust and versatile in their operation and are available to suit every requirement. Once the machine is calibrated the operator may simply use manual movement to effortlessly guide product.

CABLE REEL

ENDO Cable Reel has been using in various industrial markets in the world. The experience and know-how obtained from Spring Balancer enable ENDO Cable Reel to achieve long life cycle of a product and ideal for harsh environmental application or equipment requires high frequency of operation.
Cable Reel is designed and manufactured as per customer's requirement.

HOSE REELS

For clean and safety working place.

- Spring-rewind mechanism.
- Latching system.
- Max. 20m hose - max. 15mm ID.
- Plastic casing & Steel Casing.
- Swiveling or fixed wall-bracket.
- Mountable in every position.
- Medium: Water, Air, Greese, Foods, Gas, oil, grease & Pesticides.

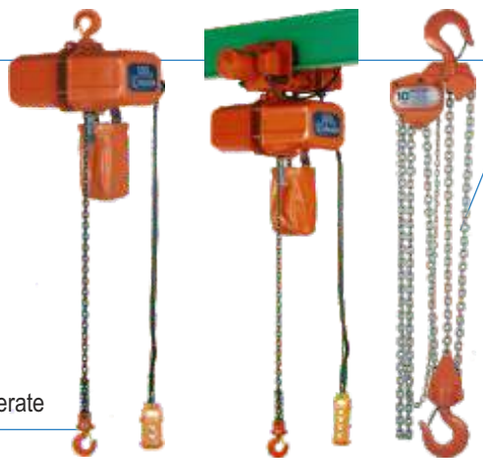

ELECTRIC CHAIN HOISTS & MANUAL HOISTS

Electric Hoist:

- Rated Capacity : Single Speed 250 Kg To 20 t
  Dual Speed 250 kg To 5 t
- Voltage: 415 V/ 230 V- 50/60 HZ
- Suspension varieties: Motorised trolley, Geared or plain trolley.
- Smooth operation.
- High quality & advance safety mechanism.
- Easier maintenance.

Manual Chain Hoist:

- H-50A Series
- Rated Load: 500 Kg To 50 t
- Compact, light, and easy to use and operate

CRUSHER

SMALL BIAXIAL

LARGE BIAXIAL

UNIAXIAL

SELF LOCK

SAVE FROM FALLING

Save your life from falling. Work at high places is always risky. Self Lock enables safe and flexible work in high places. It helps your high performance at public works, construction sites, shipbuilding, bridge site and electrical works etc.
