Butterfly Garden Dome – Material Specification (Short Points)

1. Dome Structure (Frame)

- Material: **Hot Dip Galvanized Steel (GI) / Mild Steel (MS)**
- Section: **Circular or Square Hollow Sections (CHS/SHS)**
- Member Size: **60–120 mm**
- Thickness: **3–5 mm**
- Finish: **Hot Dip Galvanized (80 micron) + Powder Coating**

2. Dome Covering Material

- **Option 1 (Recommended): UV Stabilized Polycarbonate Sheets**
  - Thickness: **8–10 mm**
  - Light Transmission: **70–80%**
- **Option 2: Toughened Laminated Glass**
  - Thickness: **10 mm + 10 mm laminated**
  - UV protective coating

3. Ventilation Panels

- Material: **Stainless Steel Insect Mesh**
- Mesh Size: **1–2 mm**
- Location: **Top and side vents**

4. Base Foundation

- **RCC Circular Ring Beam**
- Size: **300 × 450 mm**
- Anchor bolts for dome structure

5. Entrance System

- **Double Door Airlock System**
- **Aluminium frame with glass/polycarbonate panels**

6. Internal Systems

- **Mist irrigation system**
- **Drip irrigation**

- **Natural plantation & host plants**

7. Floor Material

- **Natural soil plantation beds**
- **Stone / pebble pathways**
