| Technologies used for the remote audit | ☐ MS Teams | ☐ Cisco WebEx | ☐ Zoom |
| | ☐ Other on request of client:<br>**In this case, client takes over the responsibility for any required activity in information security.** | | |

## Details about the remote audit (if applicable)

The audit was performed applying technology for information and communication ("remote") at 0%.

Effectiveness and efficiency of the remote-part was ensured by

- ☐ experienced application of engaged technology;
- ☐ the consecutive processing of the single sessions with the individual units;
- ☐ the online interviews with different people from diverse units and various hierarchical levels;
- ☐ the separation of the audit team in individual online sessions;
- ☐ reviewing an adequate sample of documented processes and/or information;
- ☐ the discussion of appropriate charts, diagrams, slides or any other relevant information;
- ☐ the presentation and discussion of photos, videos and audios of issues, being prepared on detailed guidance and governance of the audit team.

Details about reviewed information or documents, interviewed persons, content of videos & photos etc. are recorded in the report or (handwritten) notes.

If the audit was performed partly remote, the corresponding sessions are identified unambiguously in the audit plan.

## Distribution/Confidentiality/Rights of ownership/Limitations/Responsibilities

This report is sent to the certification body or bodies, the members of the audit team and the audit representative of the organisation. All documents (such as this report) regarding the certification procedure are treated confidentially by the audit team and the certification body. This audit report remains the property of the certification body.

An audit is a procedure based on the principle of random sampling and cannot cover each detail of the management system. Therefore nonconformities of weaknesses may still exist which were not expressly mentioned by the auditors in the final meeting or in the audit report.

The responsibility for continuous effective operation of the management system always rests solely with the audited and certified organisation.

Salvo clause:
The audit report will be left to the organisation at the end of the audit - subject to approval by the certification body. The independent veto process may cause modifications or additions. In these cases a modified revision will be sent to the audited organisation.

## Conclusion

Taking into account the size and structure of the organisation, the objectives, the scope of the management system, the processes and the outcome, the organisation has demonstrated, that it operates its management system in order to ensure fulfilment of its own requirements, the requirements of its customers and the relevant legal requirements as well as the applicable requirements of the management system standards.

This includes in particular:the objective evidences already mentioned,

- the policies and objectives and their implementation in the organisation,
- the processes existing in the management system and their interactions,
- the resource management,
- the measuring and analysis (incl. sample of indicators),
- the continual improvement process as well as
- the recording system (p.r.n. including standard specific objective evidences).

The implementation and the effectiveness of the management system and the processes for providing services/product realisation or to realize the objectives were assessed by the audit team by means of on-site inspection and examination of documents on a random sample basis.

Nonconformities are recorded in corresponding reports, other findings (as e.g. opportunities for improvement) are described in the section for “Detailed Results".

The organization is recommended for recertificagtion as per ISO 9001:2015 requirement

## Notes for the detailed results

The evaluation of the audit results basically follows the scheme shown below:

| Stage | Classification | Meaning |
|---|---|---|
| **NC A** | **Major Nonconformity** (Nonconformity A "major") | Nonconformities could be classified as major in the following circumstances:<br>• if there is a significant doubt that effective process control is in place, or that products or services will meet specified requirements,<br>• a number of minor nonconformities associated with the same requirement or issue could demonstrate a systemic failure and thus constitute a major nonconformity. |
| **NC B** | **Minor Nonconformity** (Nonconformity B "minor") | Nonconformities could be classified as minor, if these do not affect the capability of the management system to achieve the intended results. |
| **OFI** | Opportunity for improvement | Items which would allow optimisation of the management system in relation to the requirements of the relevant standard. It is recommended that the company implements these items. |
| **GP** | Positive aspects / Good Practice | Positive aspects of the management system worthy of special mention (see also point 4.3 if applicable). |
| **CM** | Comments | Special situation and information to be traced in next audit. |

## Detailed results

**If applicable: Guidance for management of nonconformities**

The organization shall perform a root cause analysis for any nonconformity and define adequate corrective actions. Root cause analysis, corrective actions including action plan for implementation and - if applicable- objective evidences for performed corrections or containment actions shall be submitted electronically to nominated lead auditor in charge on time to agreed deadline (latest six weeks after last day of the audit). The lead auditor will review these documents and shall inform organisation about the result.

The auditee organisation shall implement the corrective actions as defined in the approved action plan and review the effectiveness of implemented actions.

In the case of major nonconformities (NC A) the lead auditor shall verify the complete and effective implementation of action plan until agreed date (latest three months after last day of the audit). On decision of the auditor depending on type and extent of identified nonconformity, this can be done in a follow up audit on site or in a desktop-review of submitted documentation (objective evidence).

For minor nonconformities (NC B) it can be agreed to perform the verification of effective implementation of action plan in the next regular audit.

If any nonconformity applies for more than one audited standard, it shall be counted for every applicable standard; therefore the total number of nonconformity reports can be less than the number of nonconformities.
