2) How to upload the TQ Document. 38

A) How to login to the site?

To login to the site, access the below link with Internet Explorer 8 or above version.

Access the Intranet URL of the site

Home page of the project site will get displayed.

If site prompts you to enter the User ID and Password, enter User ID as domain\PS number and your domain (System Password)

For Eg:

User ID: encnet\200167

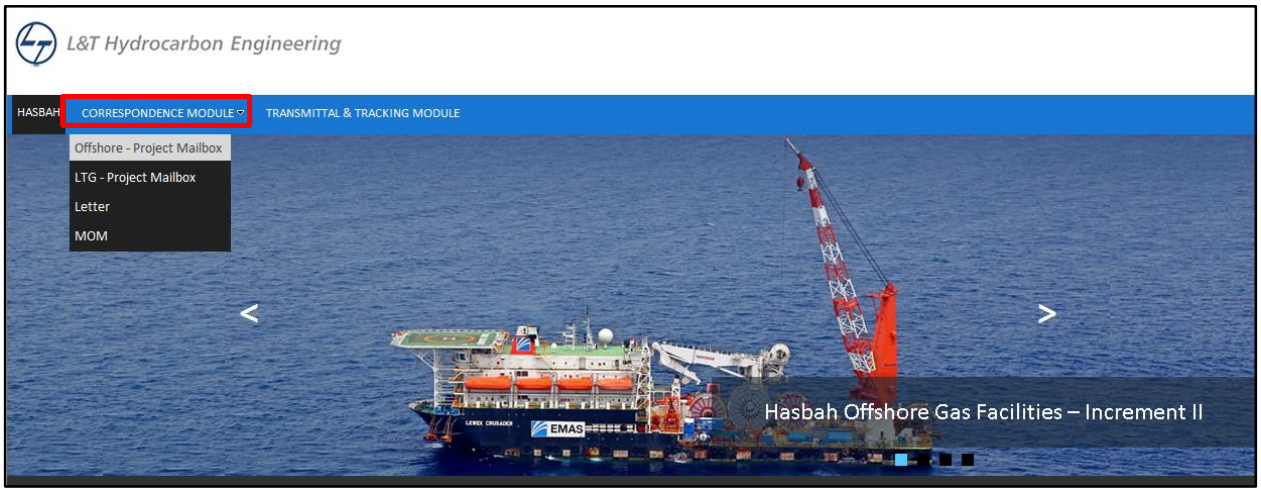

Password: XXXXX (Domain/System Password)

NOTE: Screenshot are for Demo Purpose and may not Resemblance to Actual Site

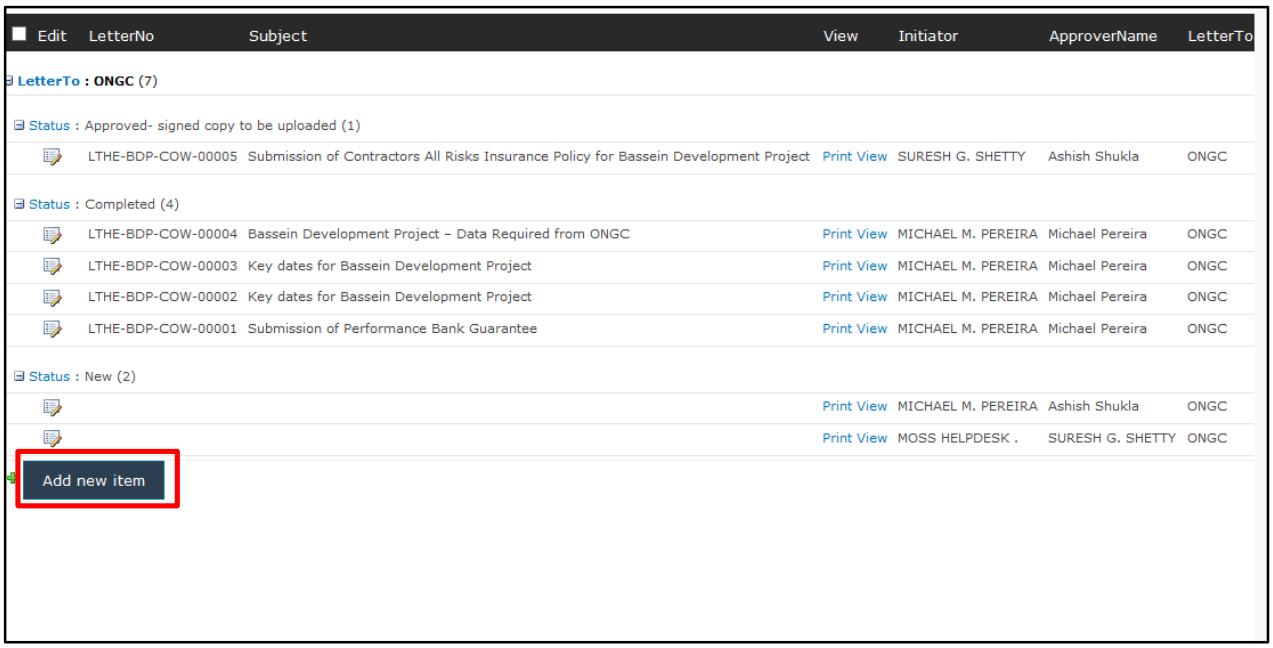

B) Correspondence Module

1) Letter Module.

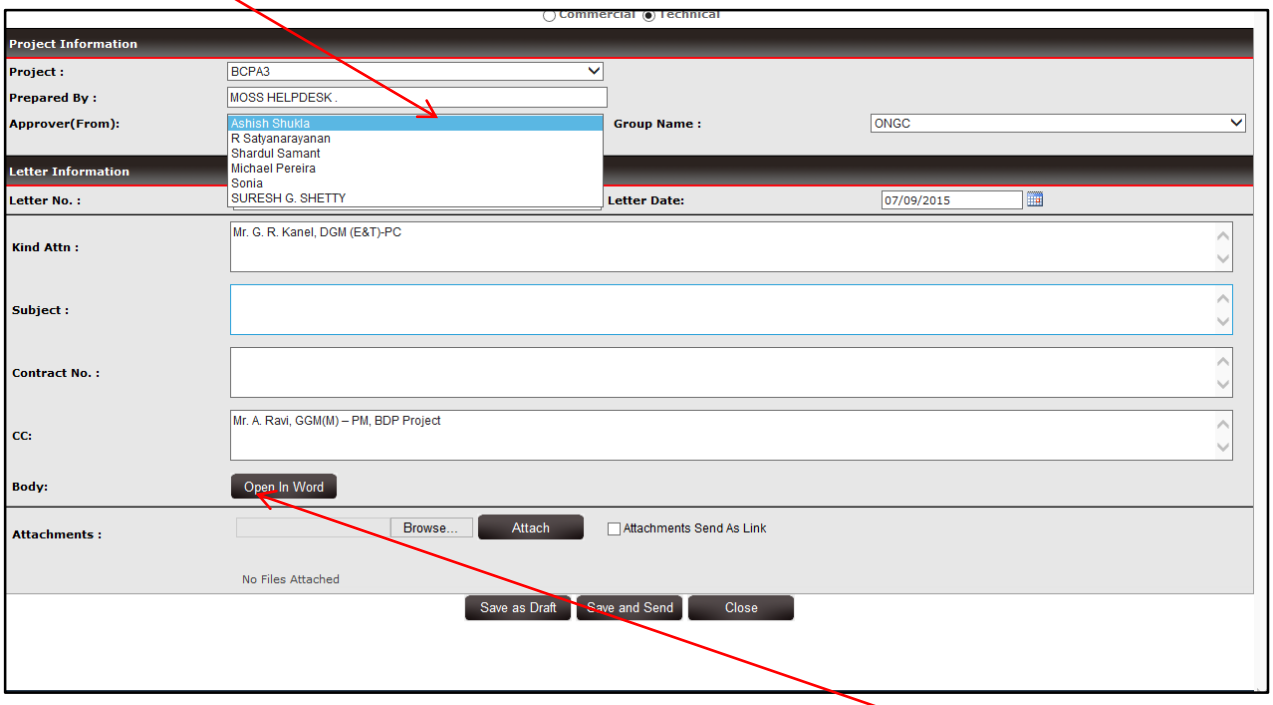

To create letters click on Correspondence select Letter as shown:-

Click on New item.

Select Approver and TO Group value depend on that TO & CC gets populate. Additional TO CC users can be added manually.

Enter the other details as required. To Enter the Letter Body Click on Open In word and enter the details. Save the Word file.

Attach the attachments, if any, and click on Save and Send button to send the letter to the approver.
On click of Save and Send button, an email will be triggered to the approver containing the link to the Letter, to approve or to send back the letter.

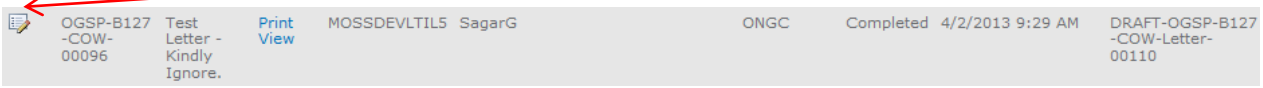

User can also save the letter in drafts by using Save As Draft button. When the letter is saved as draft, the approver to the letter can be changed by the initiator. However, approver field will get freezed once the Letter is sent for approval.

Once the letter is sent email will be sent to the Approver for an approval. Once the letter is approved, signed letter copy gets attached and letter will be circulated to all.

Letter sent/saved earlier can be opened by using edit button.

To open the Letter in print view, select the print view link, if the Letter is not approved by the approver, the link will open the Letter in word file format. If the Letter is approved by approver, the Letter will open in pdf file format so that the user can take the printout.

Letter sent/saved earlier can be opened by using edit button.

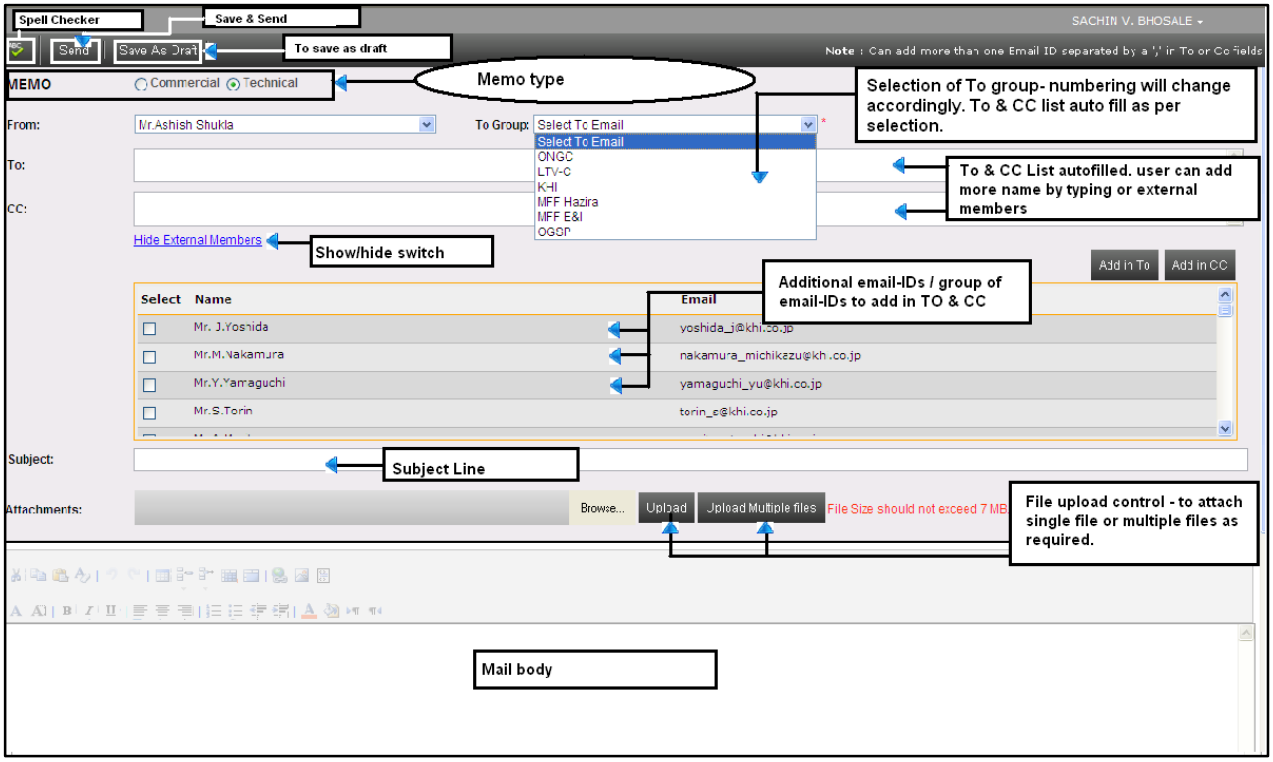

2) Project Mailbox.

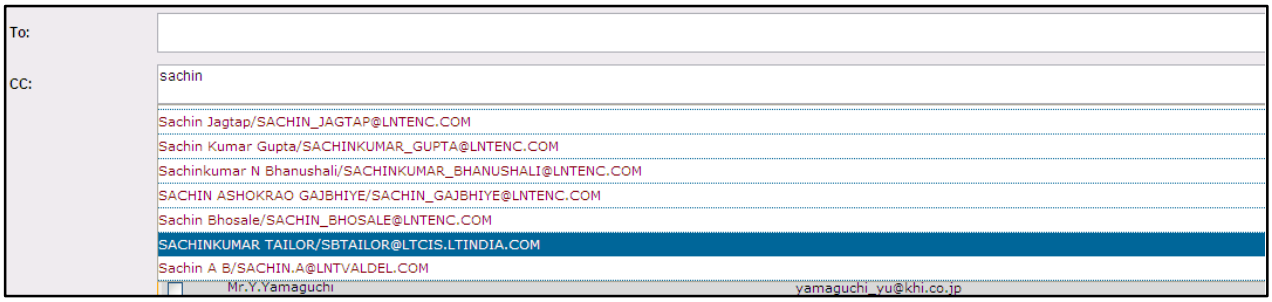

Compose mail

-Selection of from & to
-Adding additional emails
-External members/groups
-Attachment (Single & multiple)

Project mailbox's key feature is to generate numbered emails. Number generation is based on selected 'TO' group. Default TO & CC get changed as per selection of 'To Group'. Attachment size limit is restricted as per Mail Server rules.
Please see below screen-shot for more details about all elements in Compose mail window.

-Manual typing in TO & CC field results as below screenshot for IDs in L&T ENC domain.

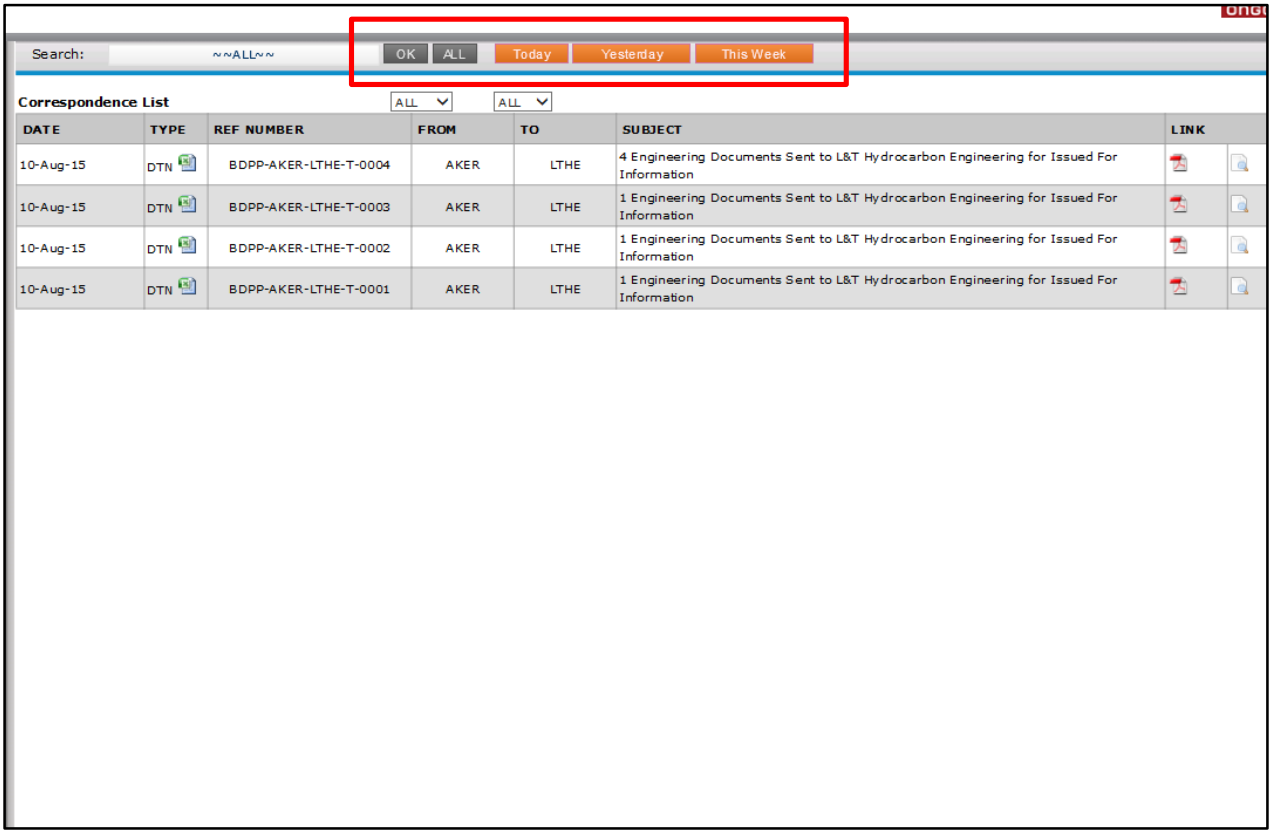

B) Transmittal and Tracking Module

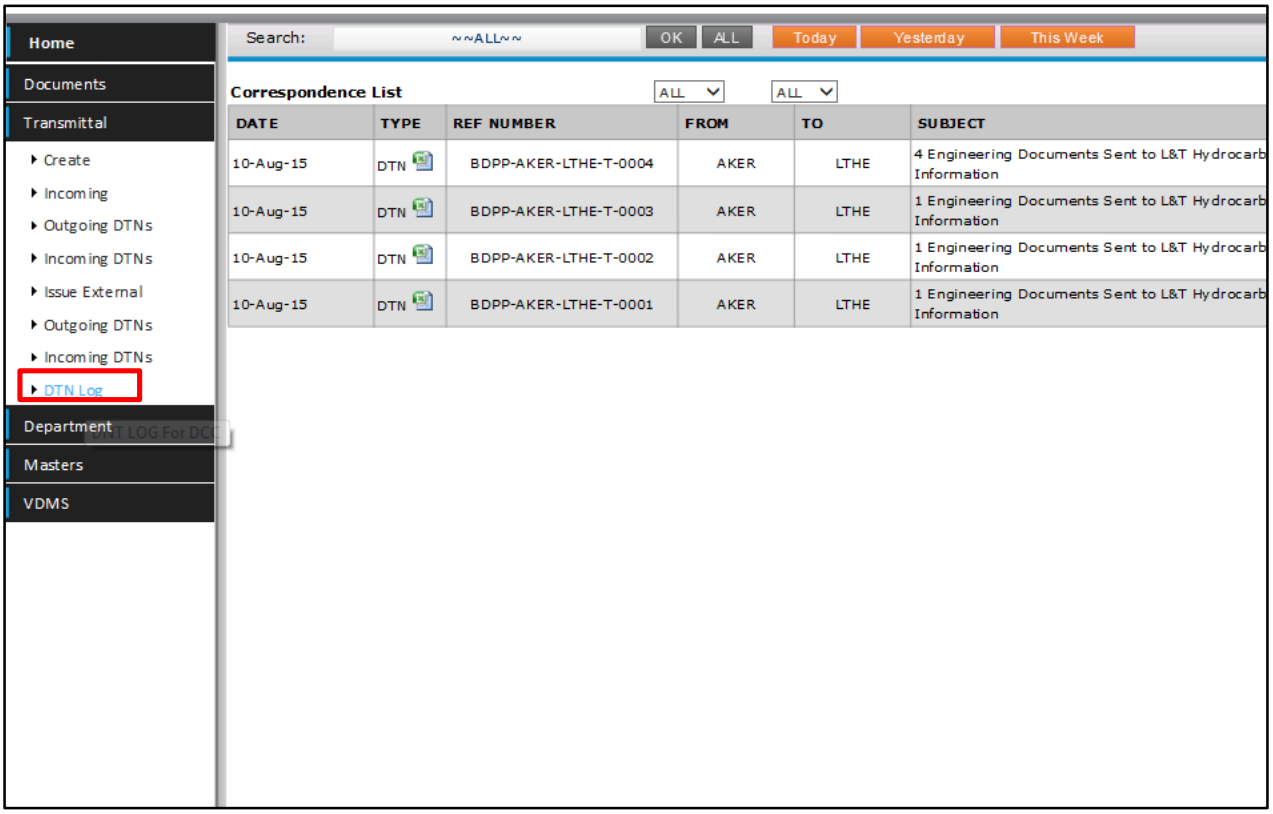

1) DTN LOG

After you login to Transmittal and tracking module, the page of DTN log gets displayed, which by default shows all DTN log for current date.

You can click on All, Yesterday and This Week Tab to view DTN log for that period.

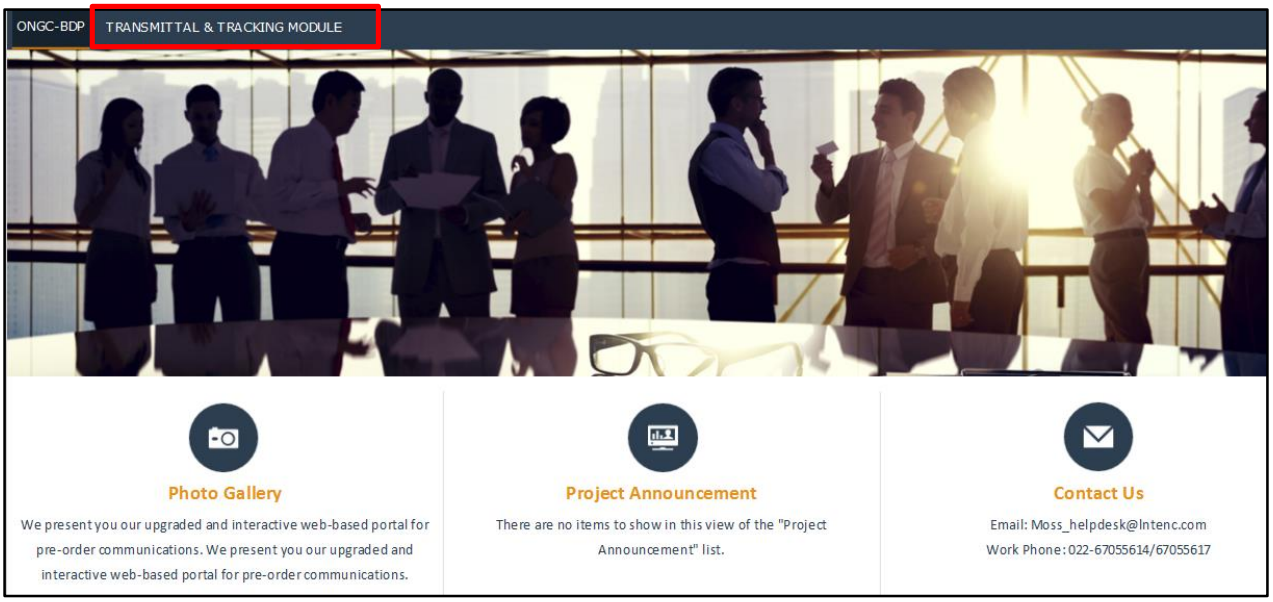

DTN log tab is also available under Transmittal Tab.

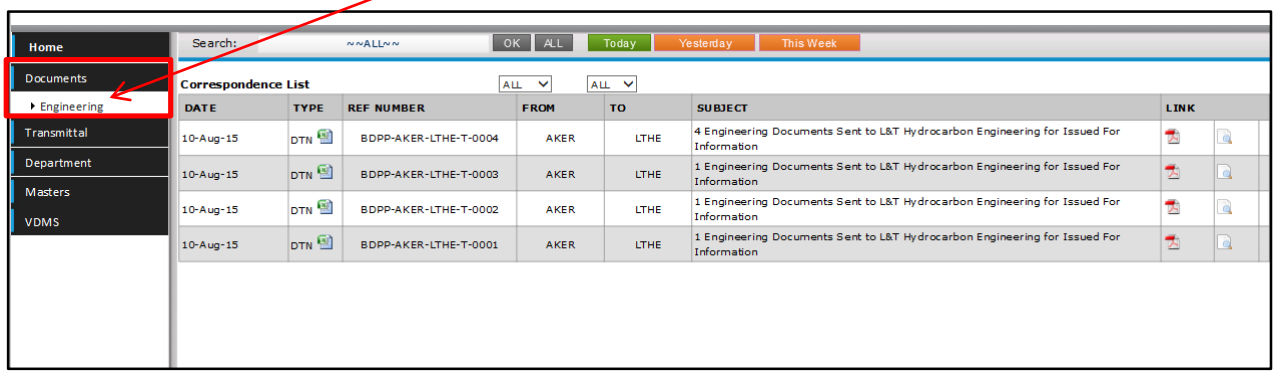

2)How to View and add new document to Engineering Register?

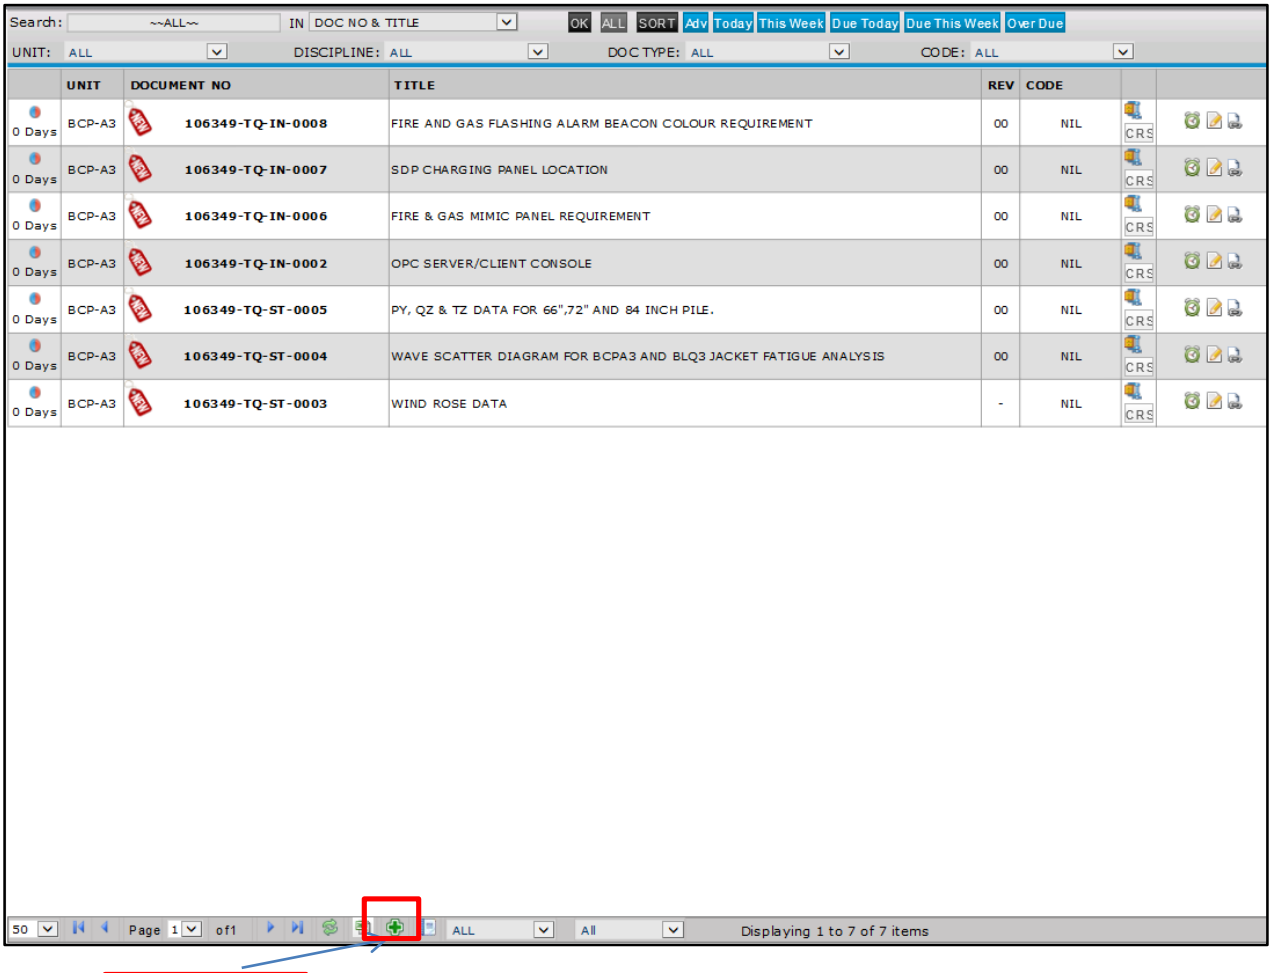

To View/add new document to Engineering Register, click on Transmittal & Tracking Module tab.

On below screen, Click on Engineering button Under Documents Tab.

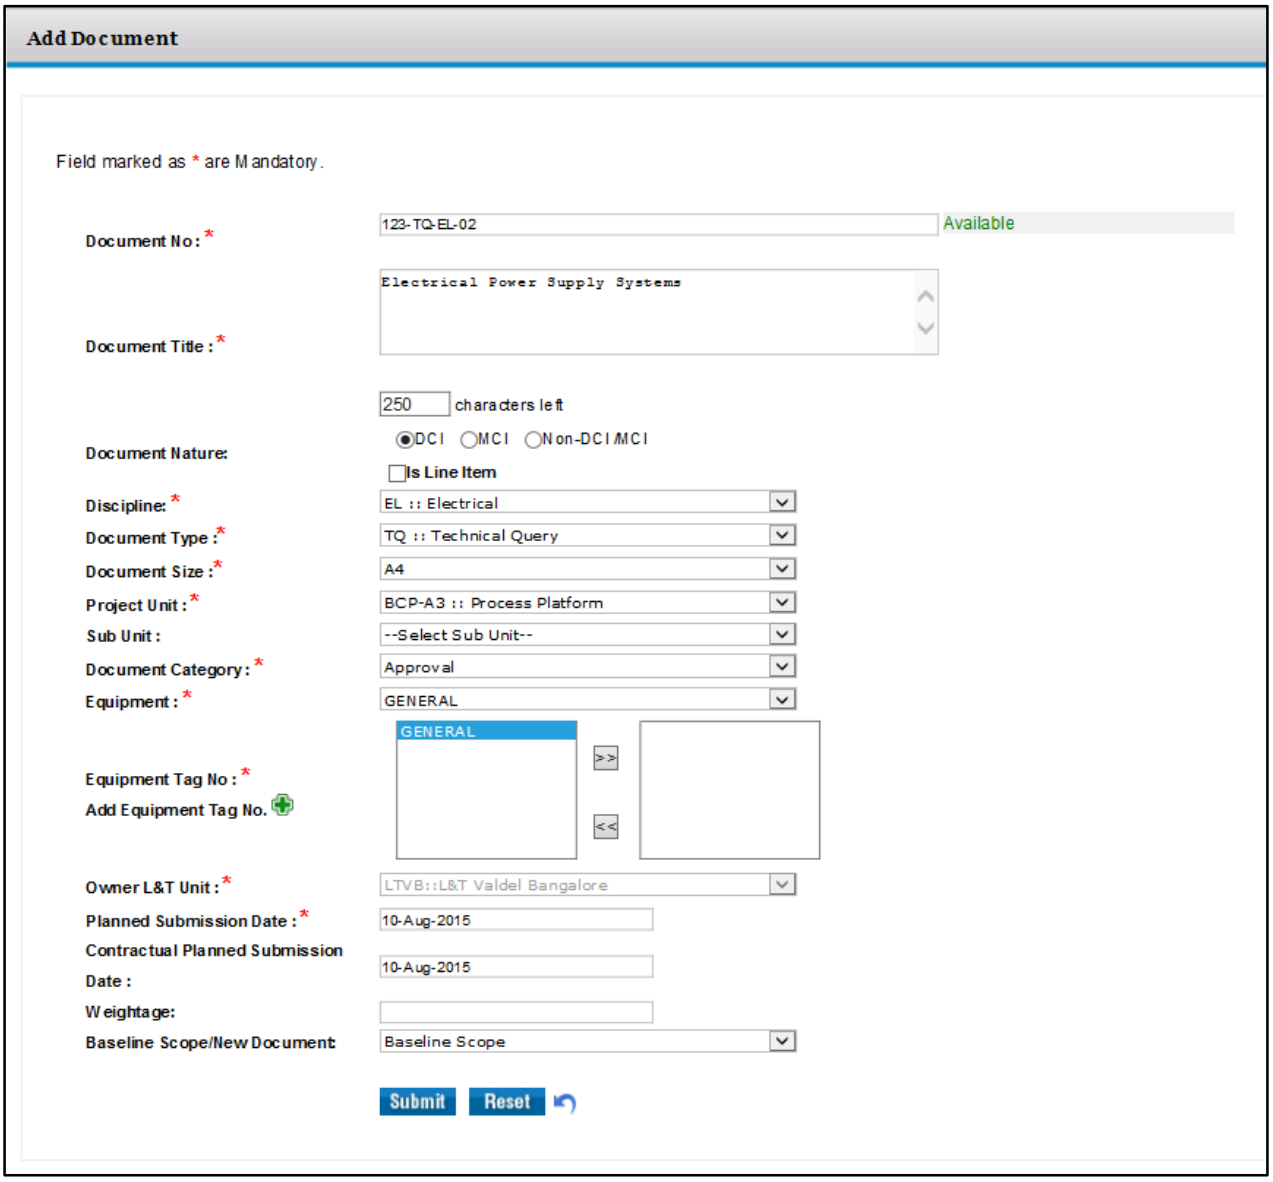

Below screen will appear which shows Document Records added in Engineering Register with Current Status ie. Current Revision, Current Review Code, etc.

Click on Add Document button to add new document

Enter the required details, The message will get displayed the document added successfully.

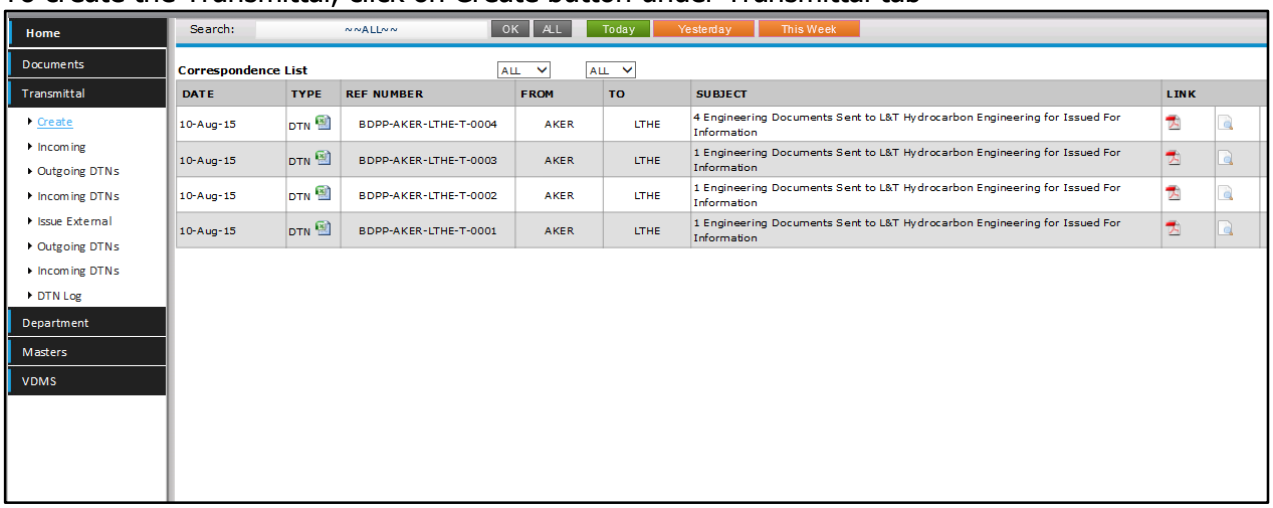

NOTE: If document is already added to register, then revised file can be uploaded against the document.

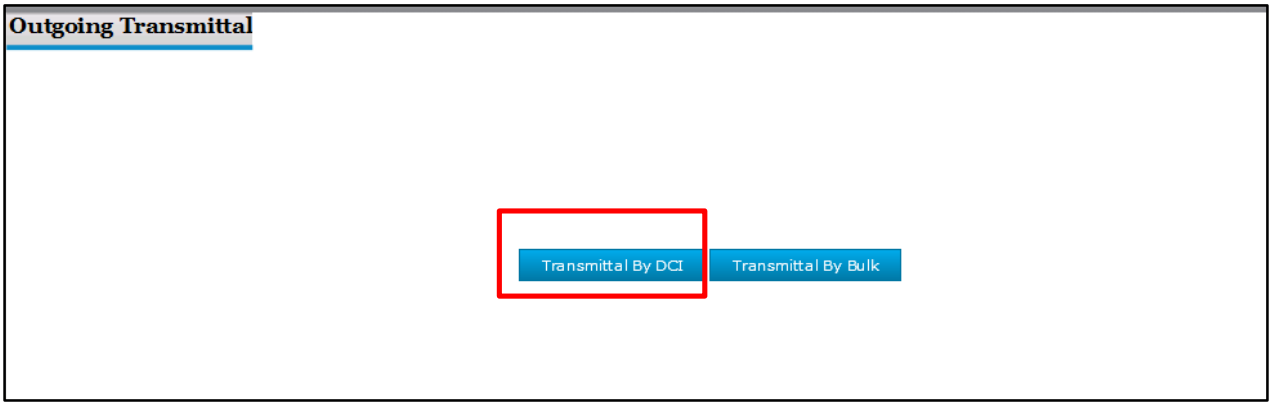

3) How to create New Transmittal?

3a) Create Transmittal by DCI

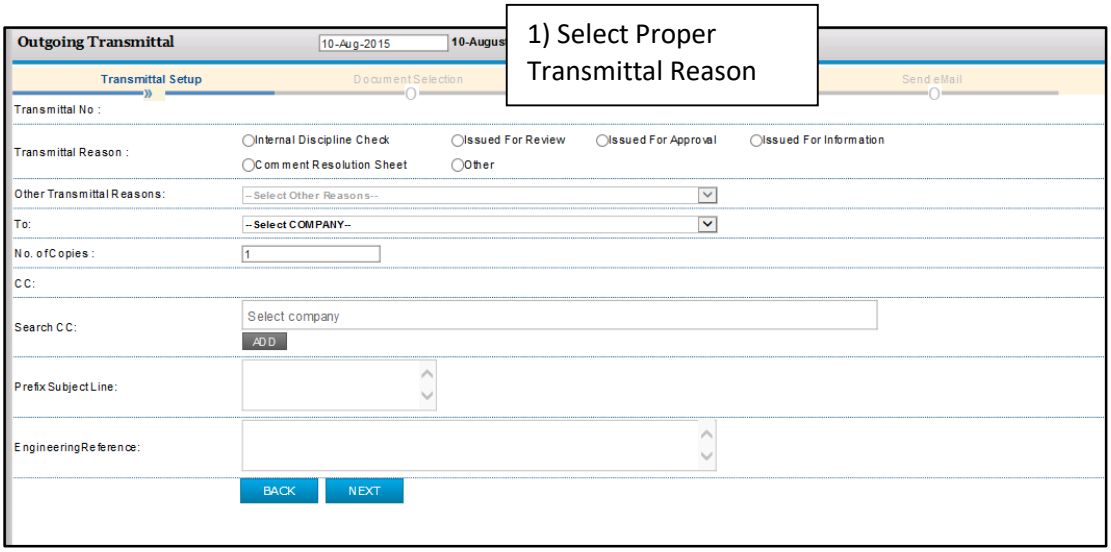

To create the Transmittal, click on Create button under Transmittal tab

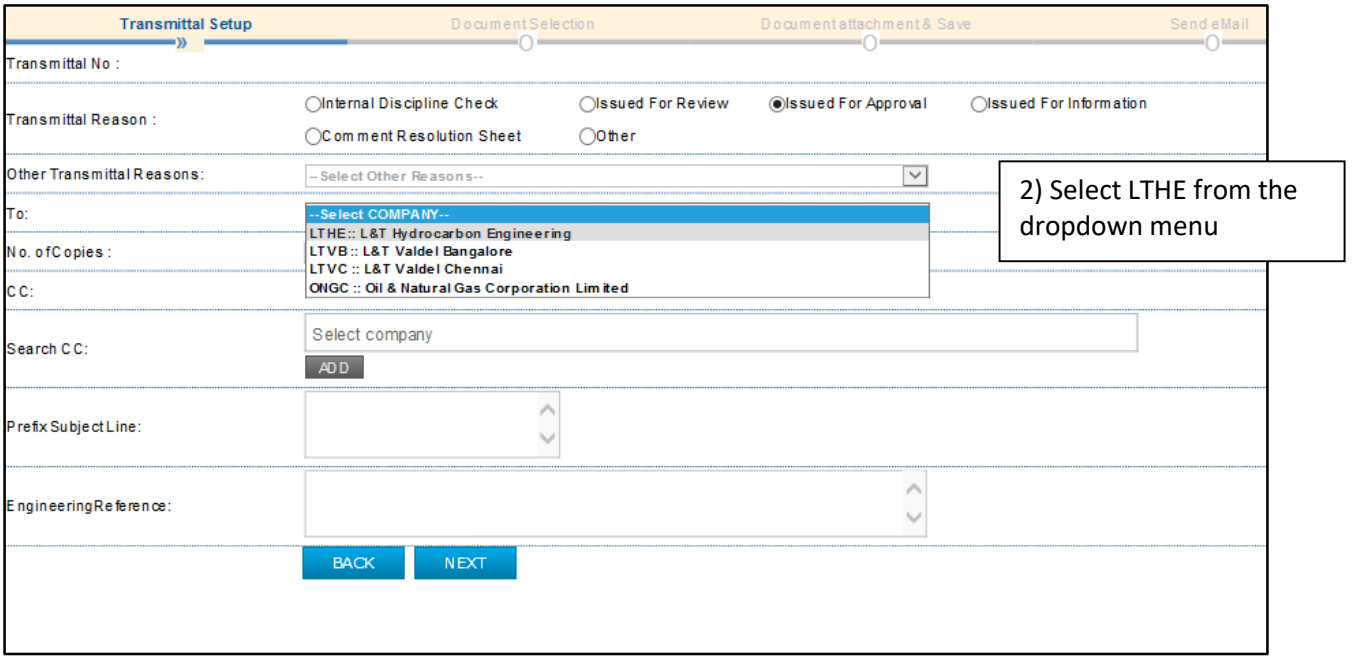

On below screen Click on Transmittal by DCI.

Select the proper transmittal reason. (Mandatory Field)

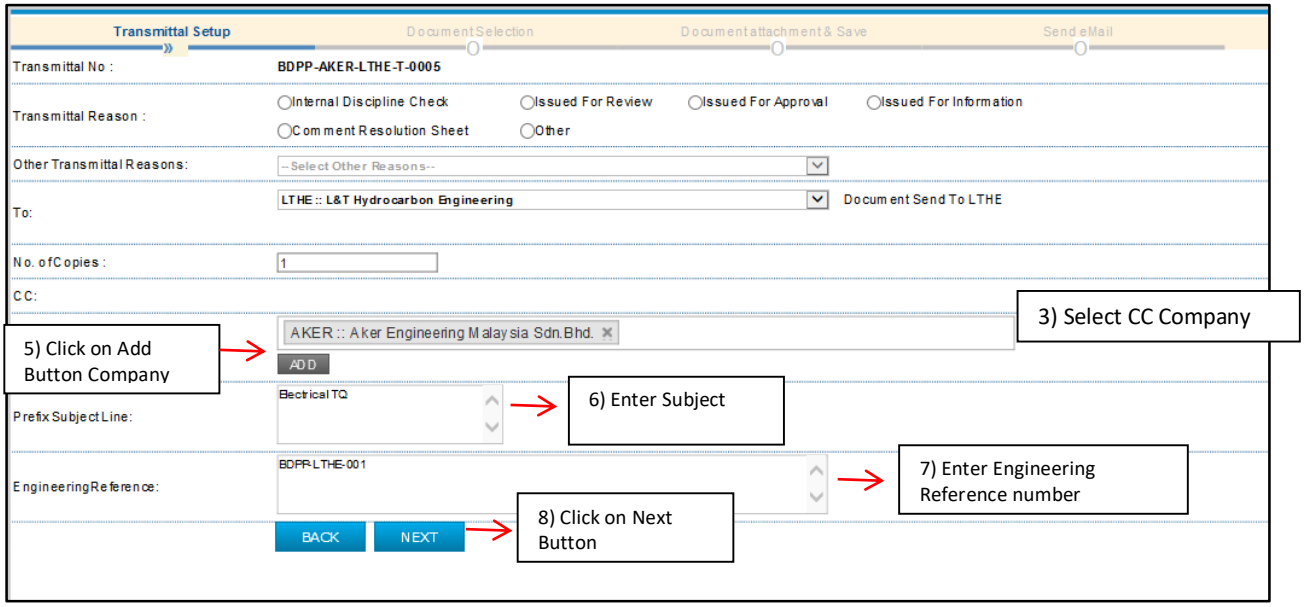

From Dropdown menu of TO, select the LTHE: L&T Hydrocarbon Engineering. (Mandatory Field)

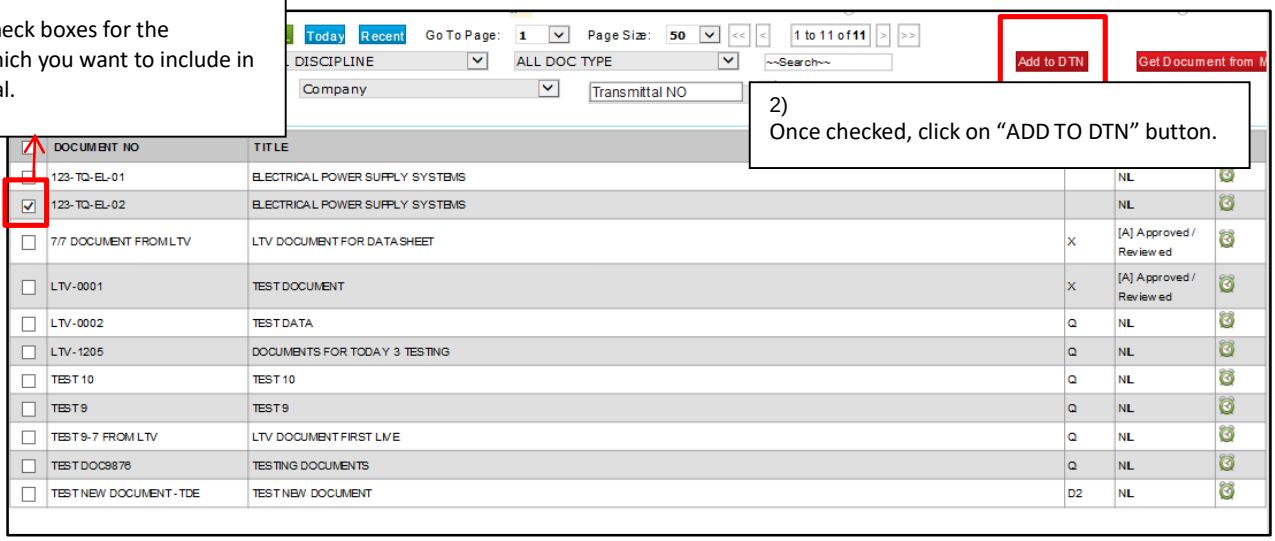

Optional Selection:

To add a CC company, you can select the appropriate company from the dropdown or else you can type the name of the company, the system will suggest you the company name. Click on Add button to add the company. Enter Engineering Reference Number and Click on Submit Button

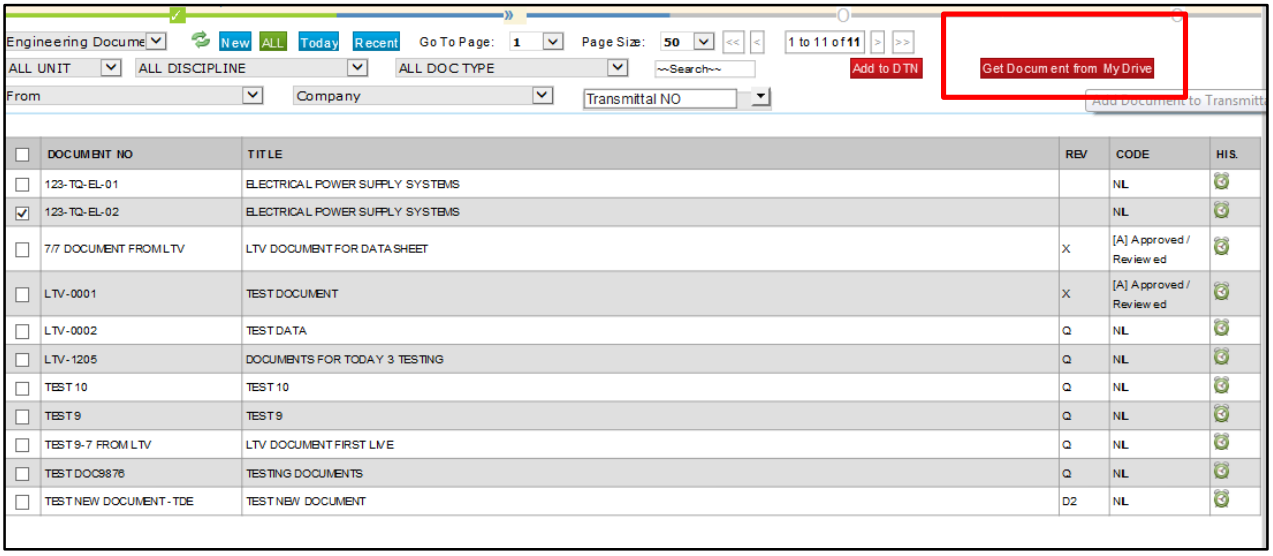

Below Screen will appear. In the below screen, select the document and then click on Add to DTN.

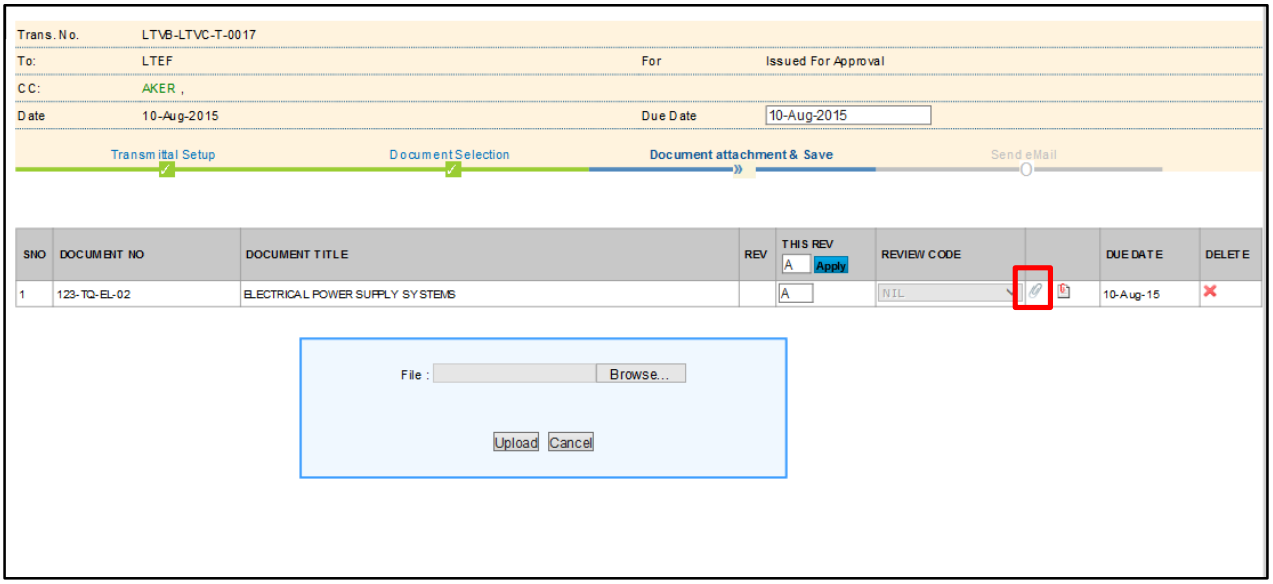

If documents are uploaded under Mydrive with the same file name as document name added in Register, you can then click on Get Document from My Drive.

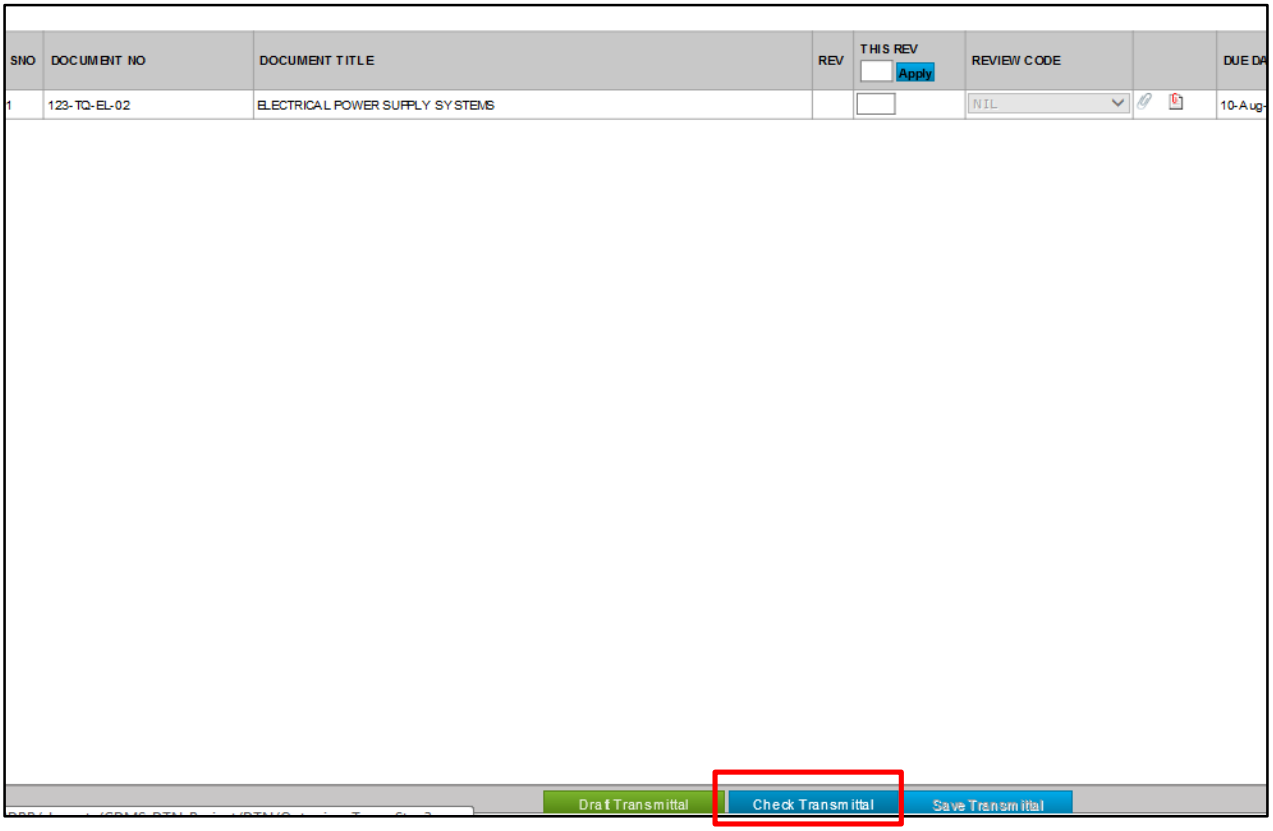

Select the single or multiple Documents from the Register and then Click on Get Document from MyDrive

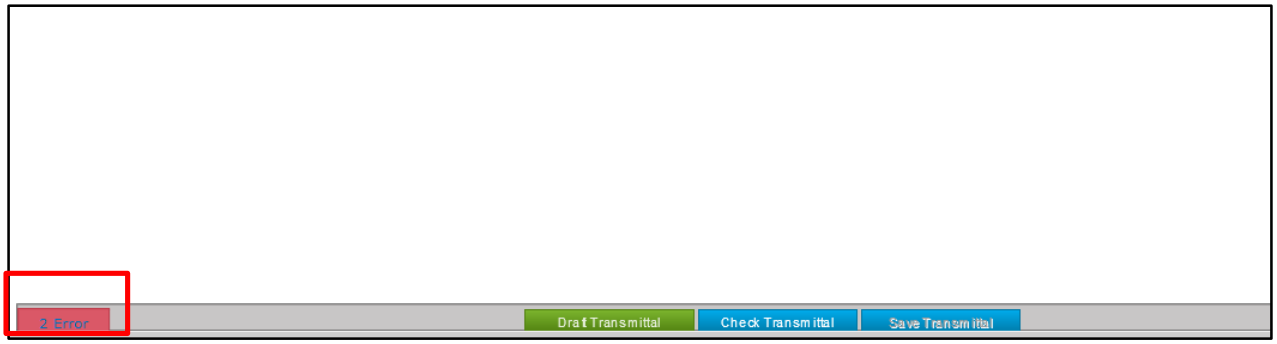

Enter the document Revision number and upload the file against the document, by clicking on attachment button.

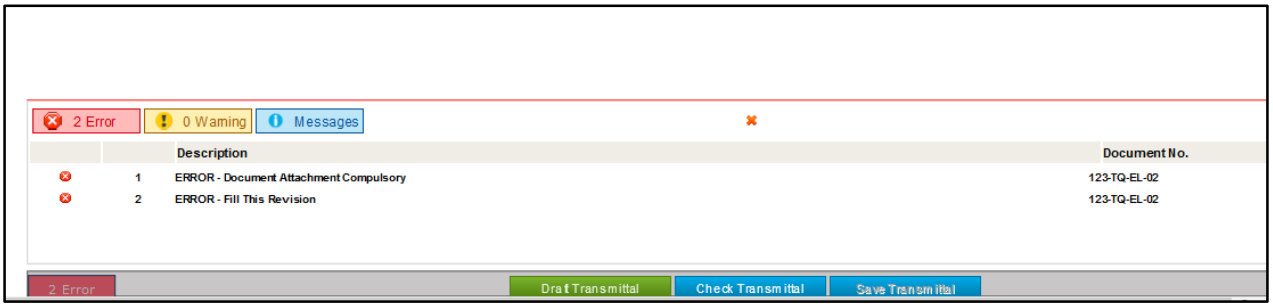

After uploading the file, click on Check Transmittal button.

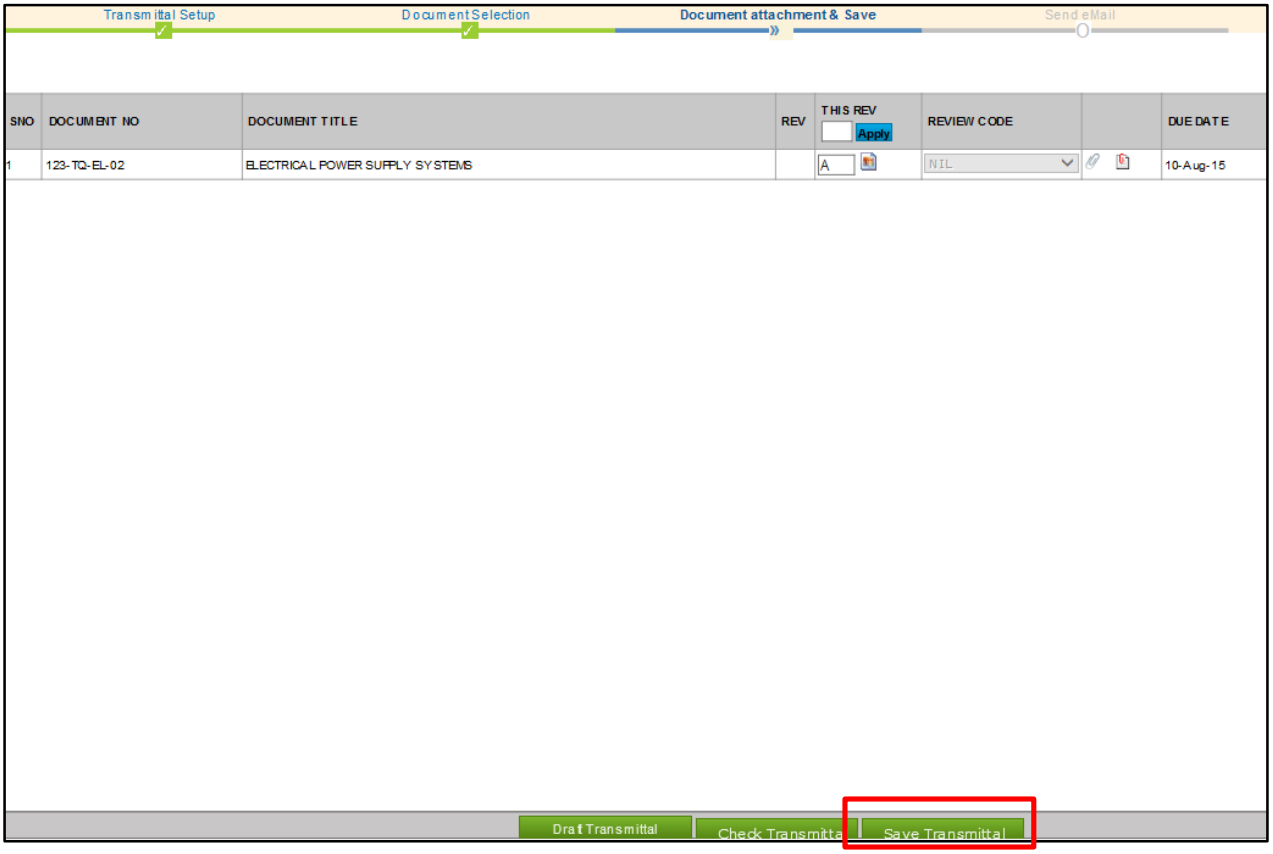

If there is any error in the Transmittal, the system will highlight the number of errors.

By Clicking on Error you will be able to get the error message, take appropriate action and then again click on Check Transmittal.

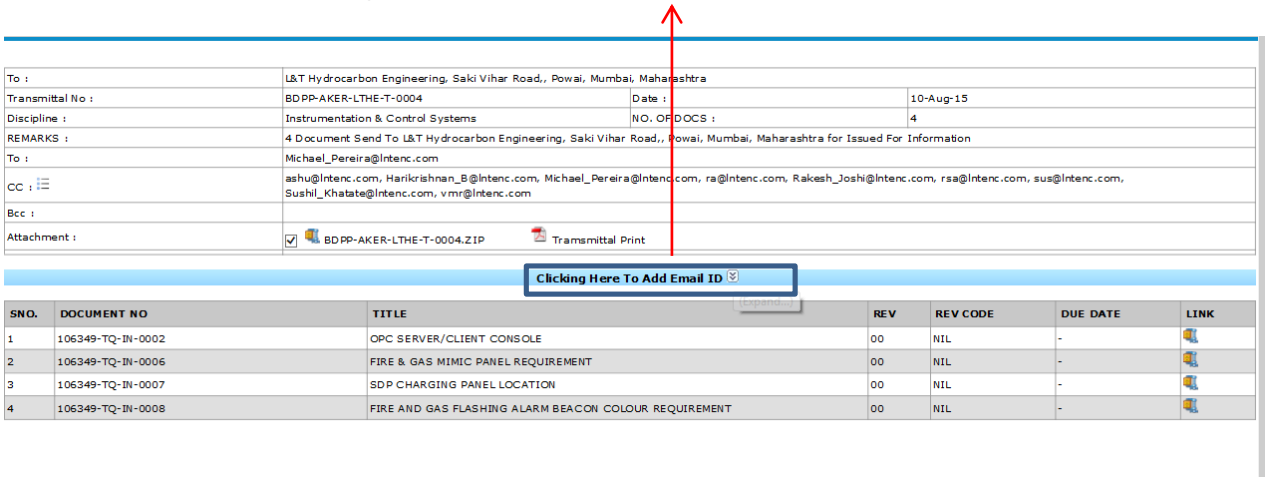

This will enable the Save Transmittal button. Click on Save Transmittal button.

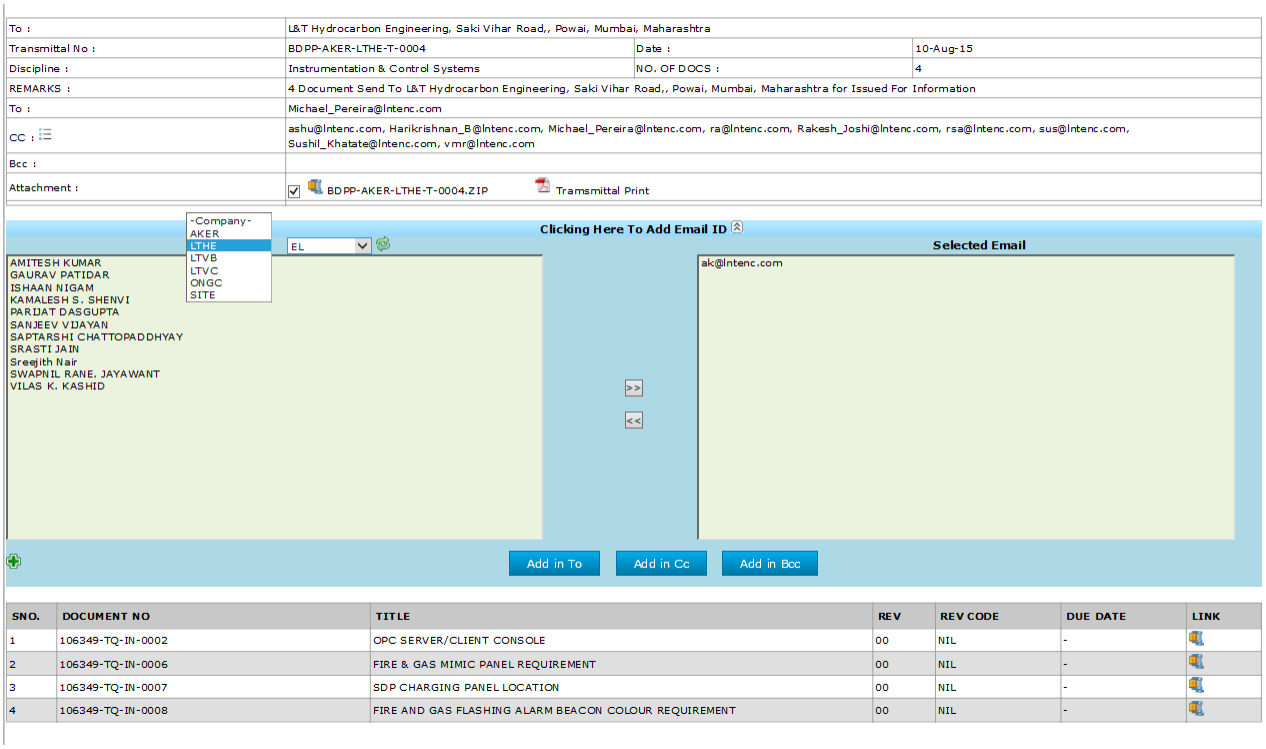

After Transmittal is saved, the below screen will appear.

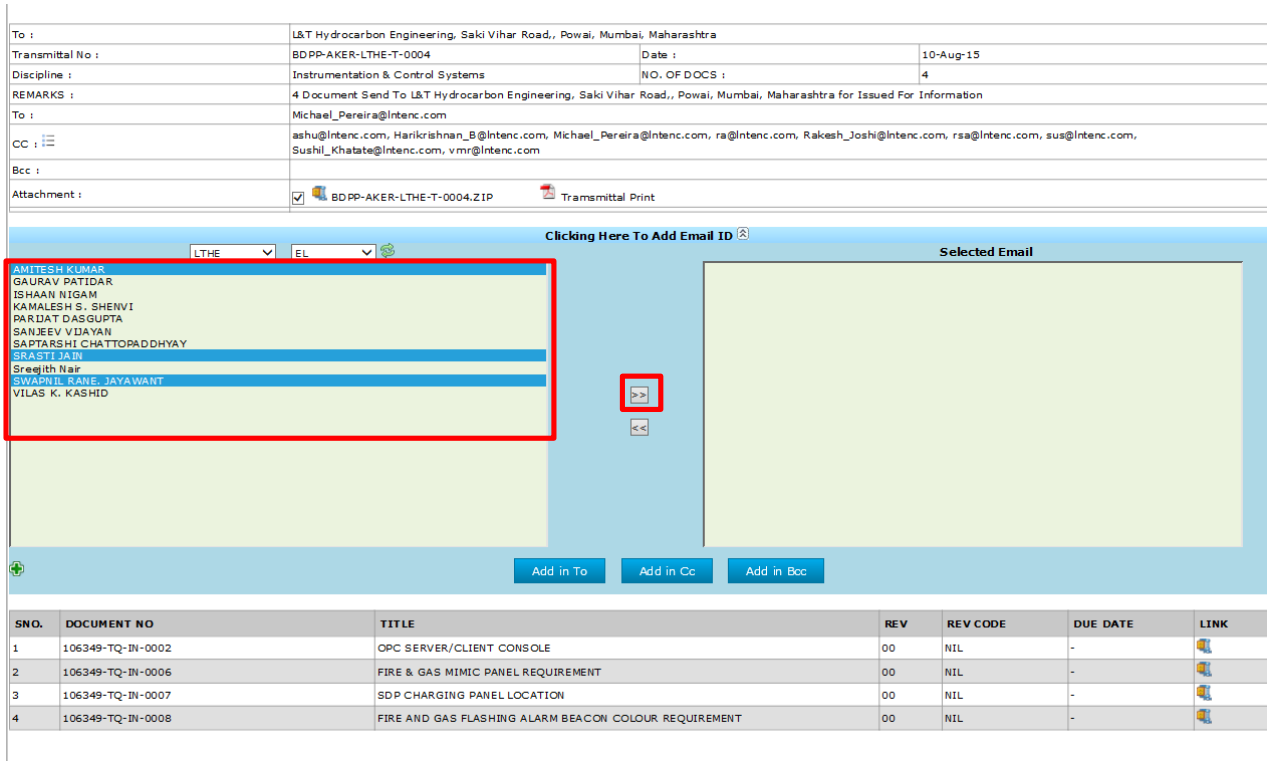

To enter additional Email ID, click on Click here to Add Email ID

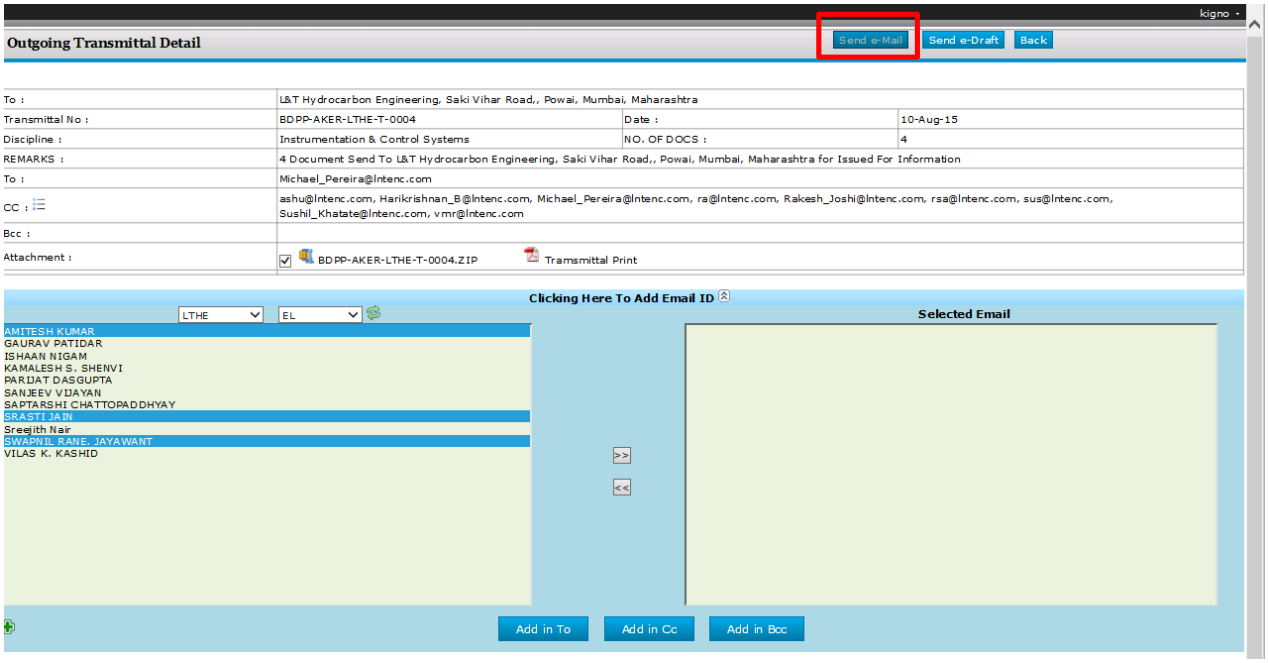

The Below screen will appear. You can use filter to filter the email Id by Company name and Discipline.

Select the name and then click on highlighted button to add the email ID. You can select multiple emails ID by pressing the ctrl button and then selecting the name.

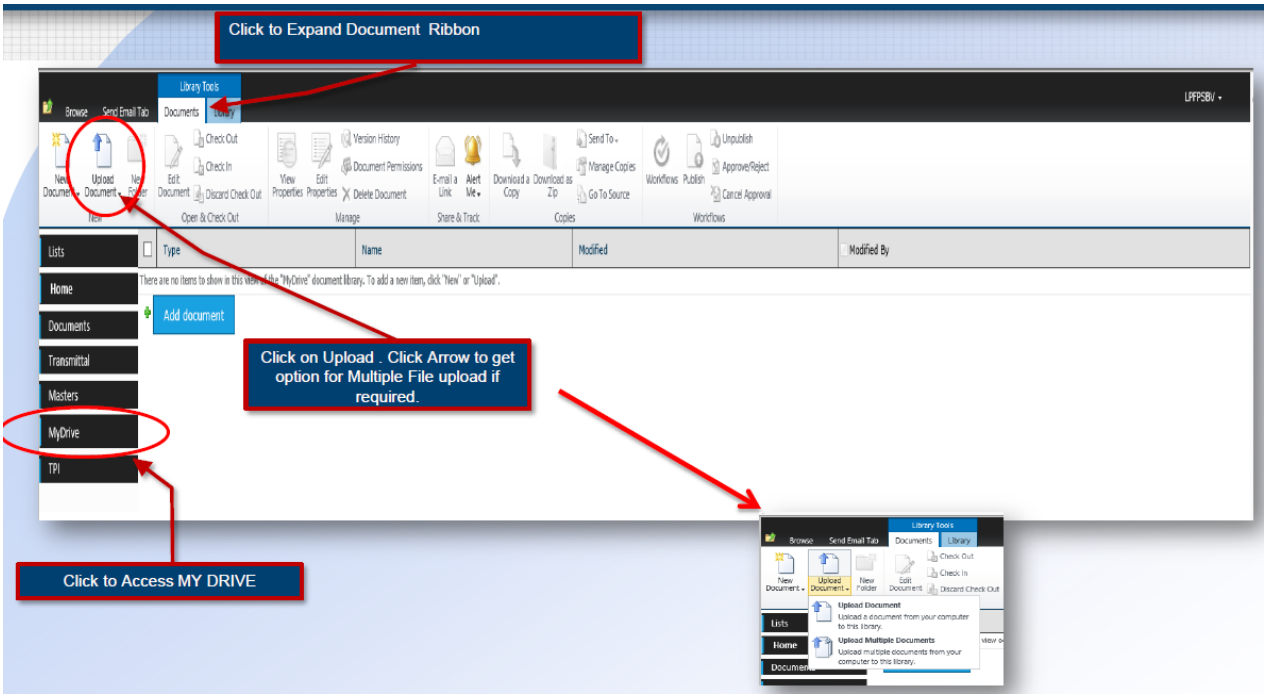

And then Click on Send Email Button.

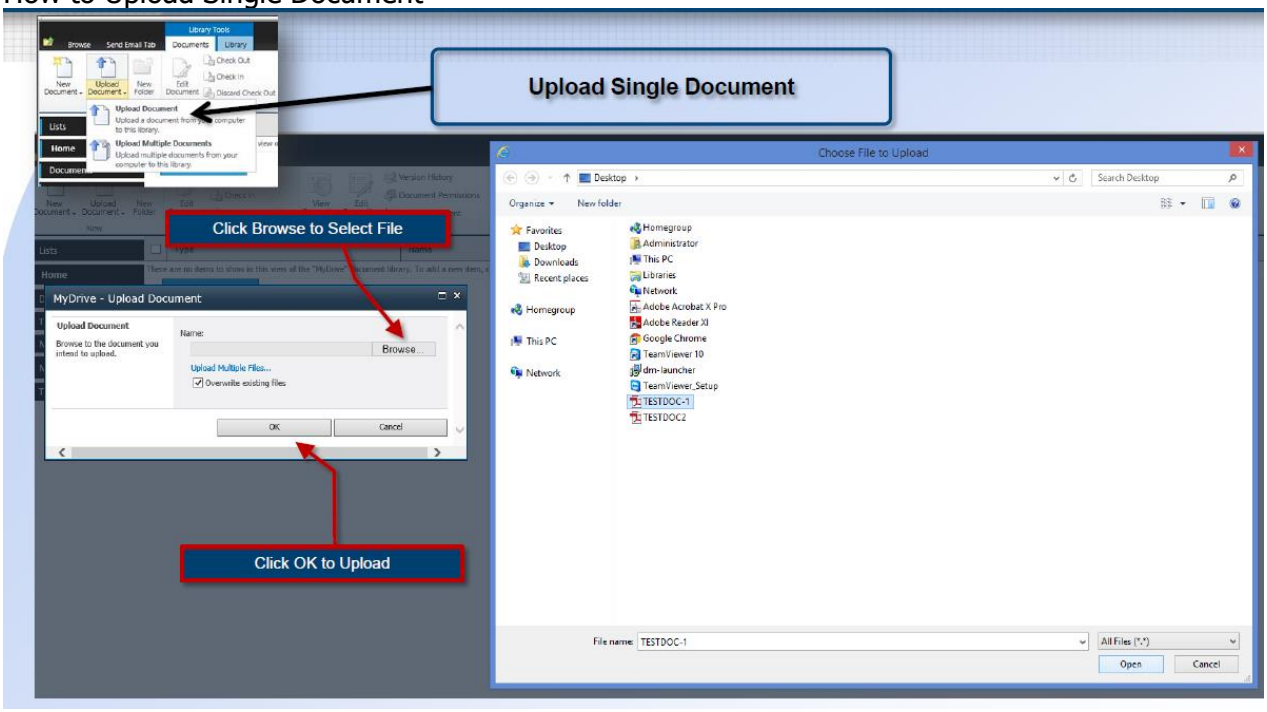

3b) Create Transmittal by Bulk.

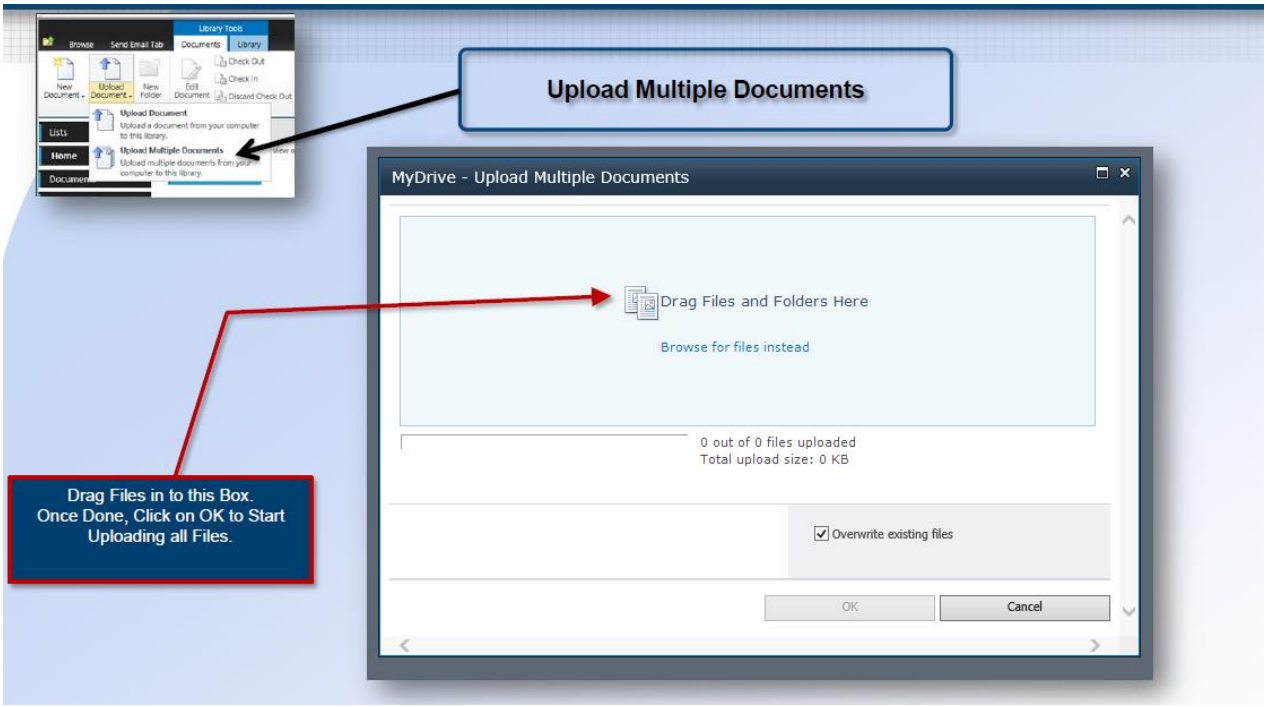

- This method will can be used if you are submitting multiple documents in same DTN
- Pre-requisite for using this method is the File Name of the PDF must match the Document Number as appearing in Vendor Master Register. Eg. If the document Number is TESTDOC-001, the name of the file must be TESTDOC-001.PDF.

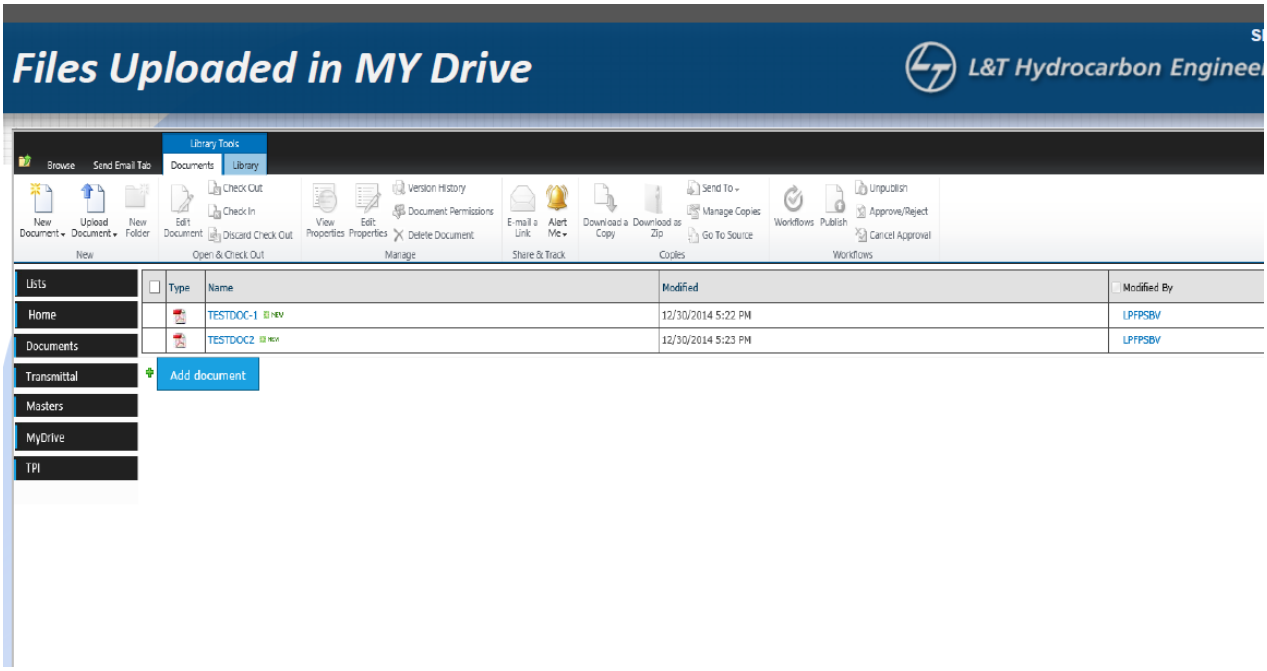

How to Upload Single Document

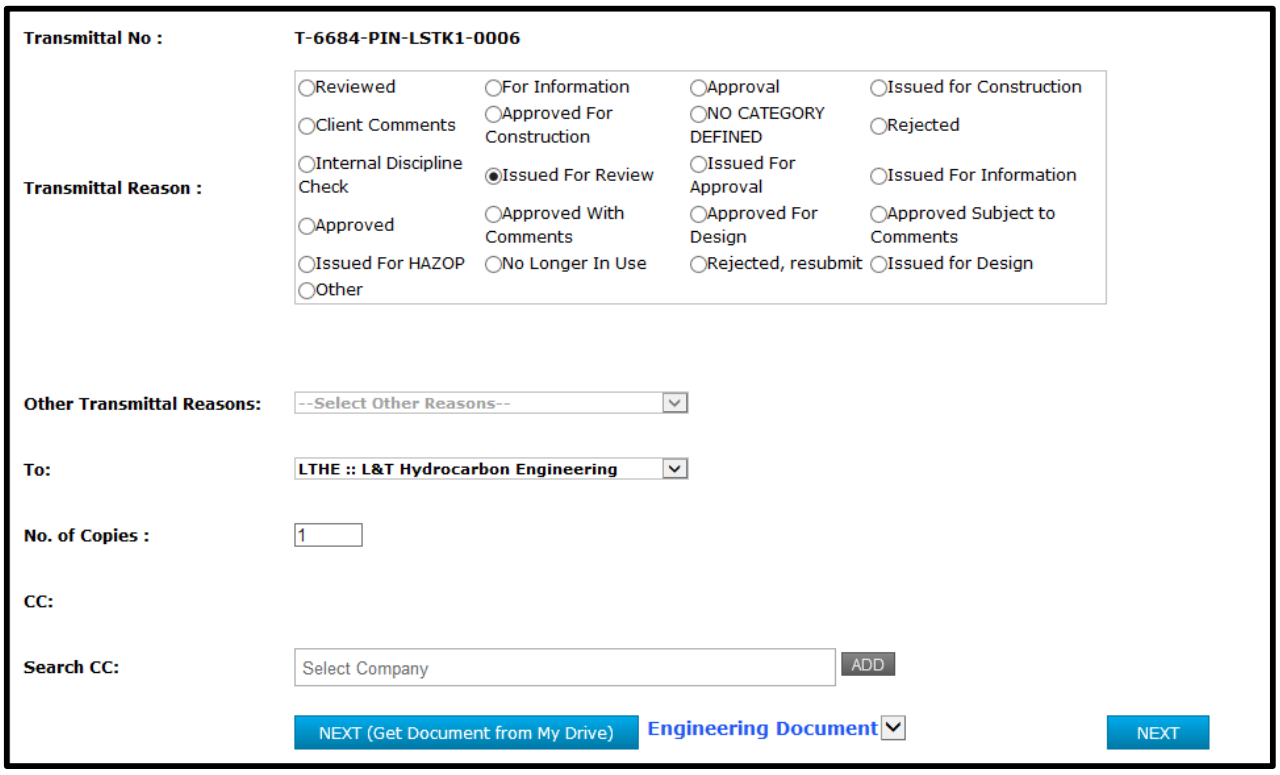

How to upload Multiple Documents

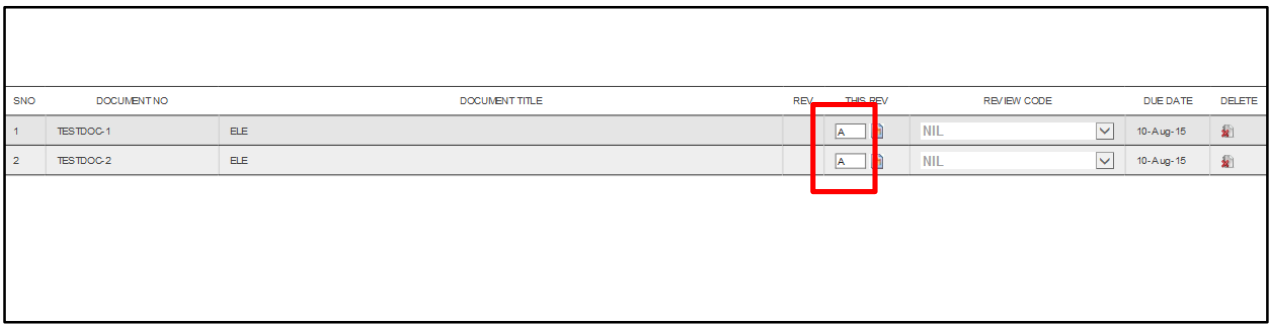

Files Uploaded in MyDrive

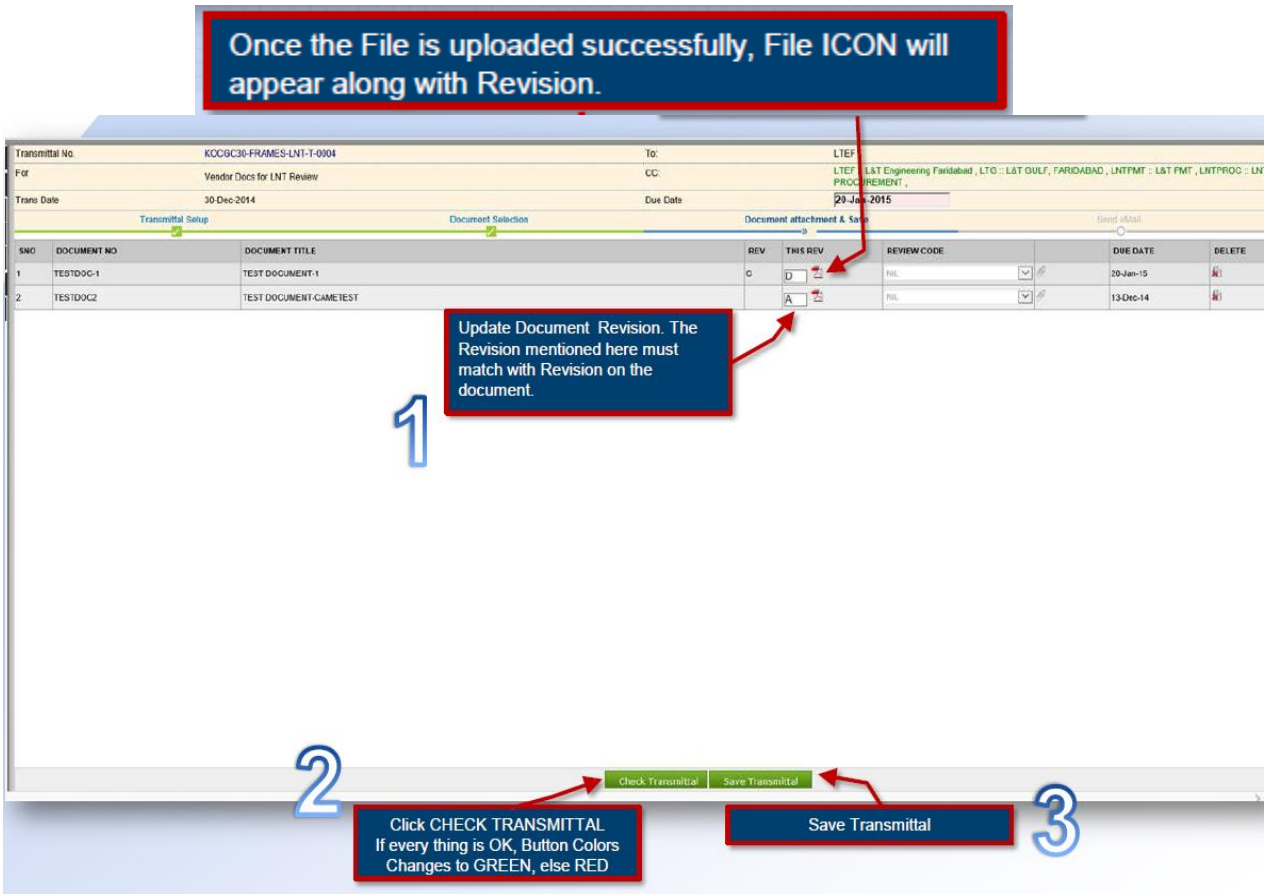

Once the Files are Uploaded in MY DRIVE. Goto TRANSMITTAL CREATE.

Click on Next (Get Document from My Drive)

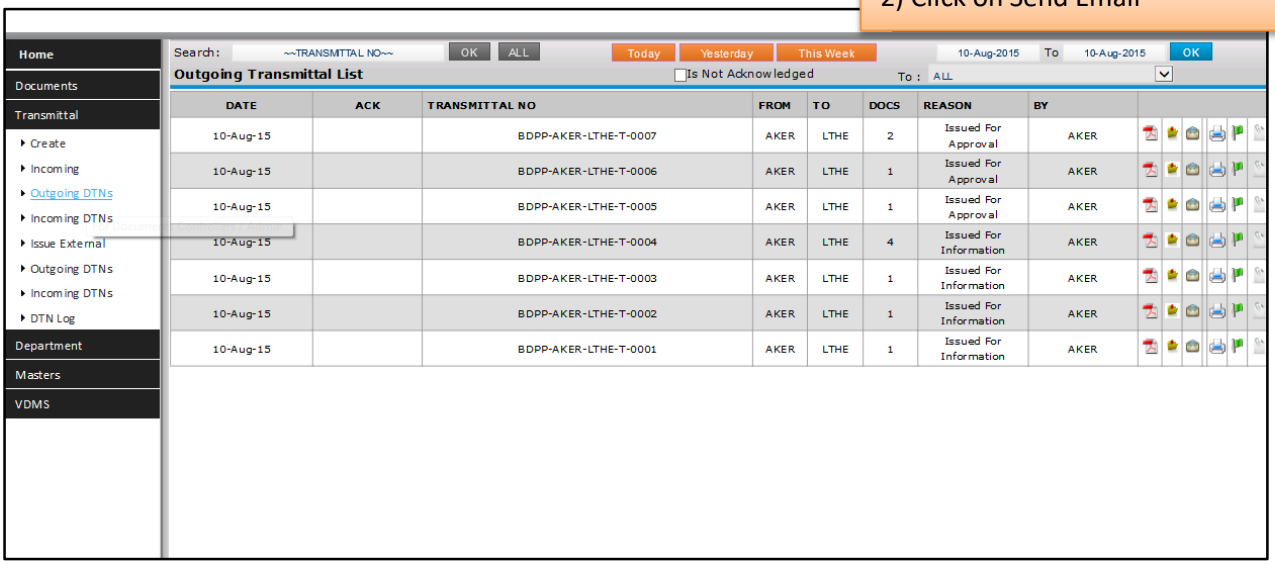

Enter the Revision code and then Click on Check Transmittal and Save the Transmittal.

To send the email of Transmittal generated through Transmittal By Bulk functionality click on Outgoing Transmittal and then Click on Send Mail.

2) Click on Send Email

1) Click on Outgoing

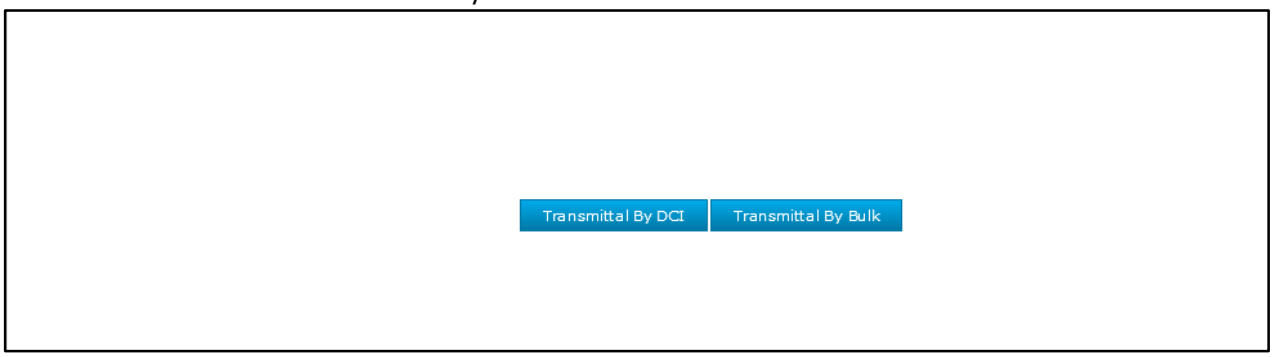

4) Regularization of Incoming DTN.

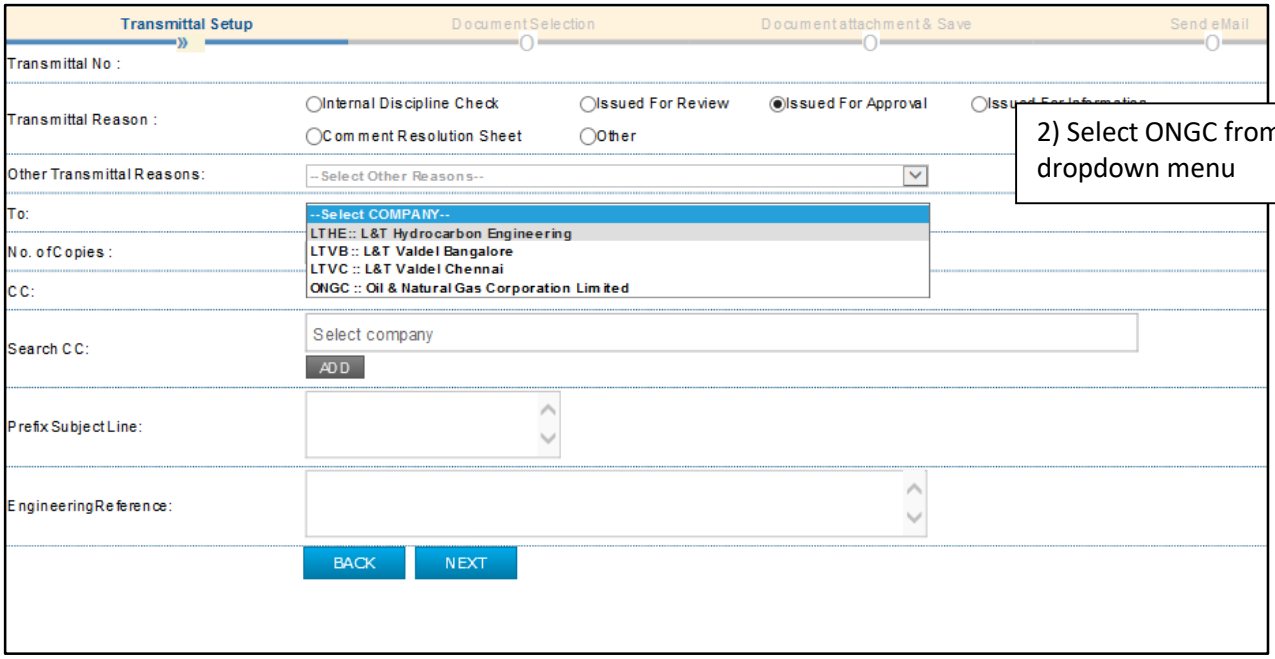

4a) Incoming Transmittal by DCI

To regularize the incoming DTN click on Incoming button under Transmittal tab

On below screen click on Transmittal by DCI.

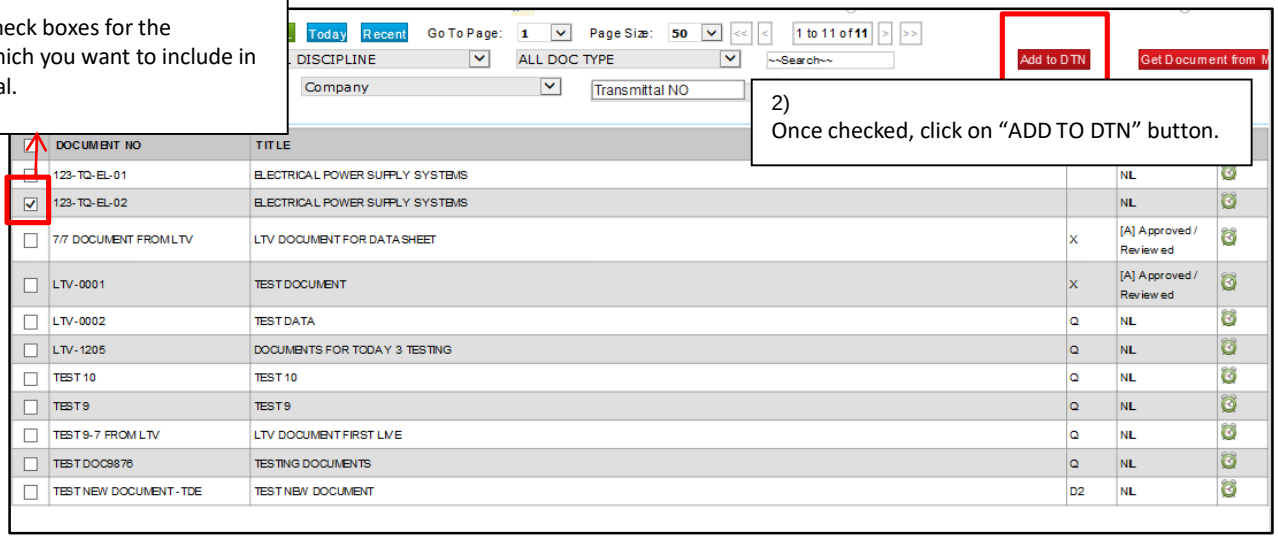

Select the proper transmittal reason. (Mandatory Field)

2) Select ONGC from the dropdown menu

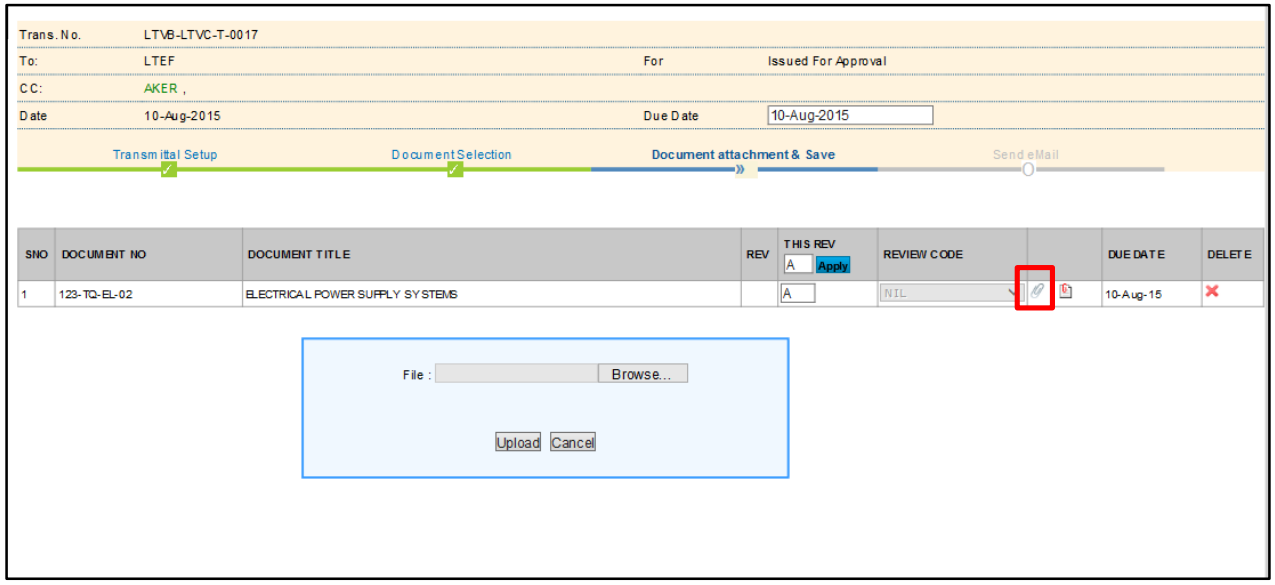

Below Screen will appear. In the below screen, select the document and then click on Add to DTN.

1)
Click on the Check boxes for the Documents which you want to include in this Transmittal.

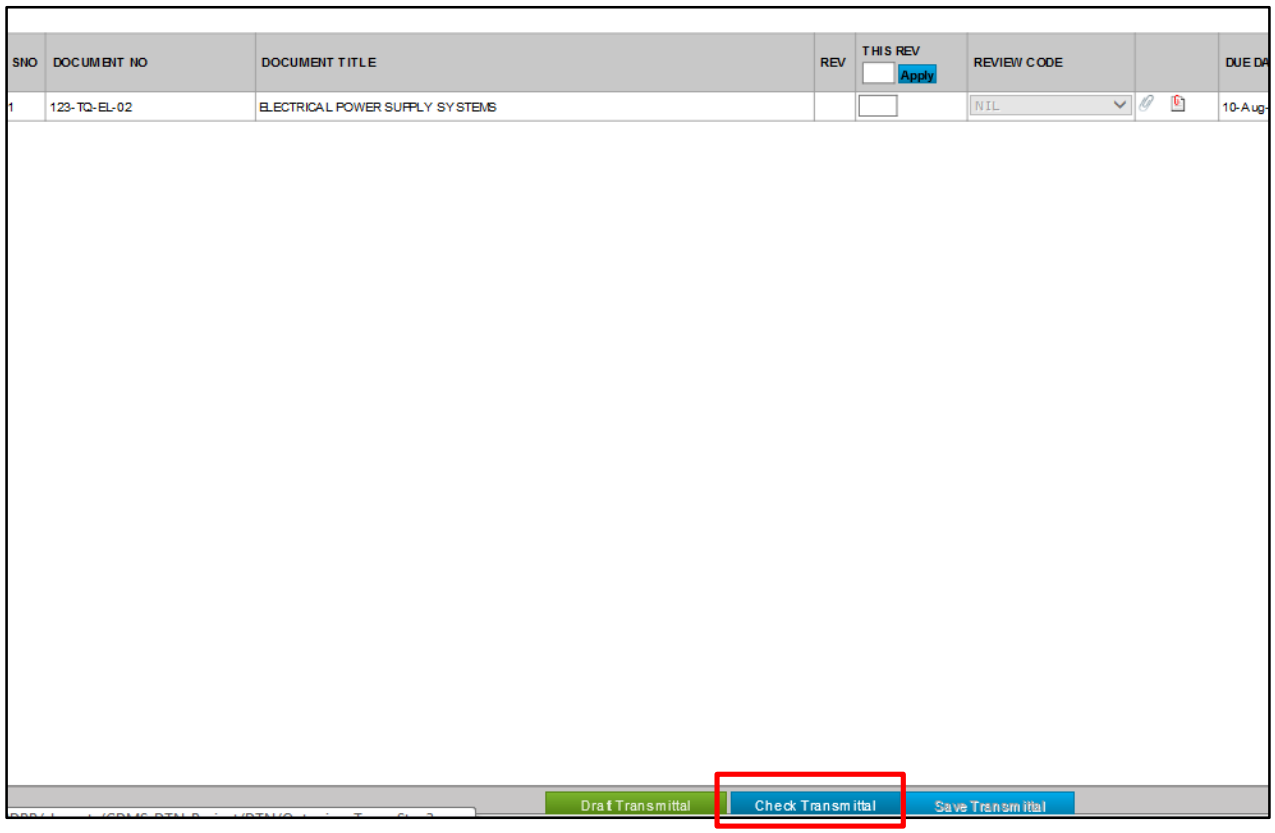

2)
Once checked, click on “ADD TO DTN” button.

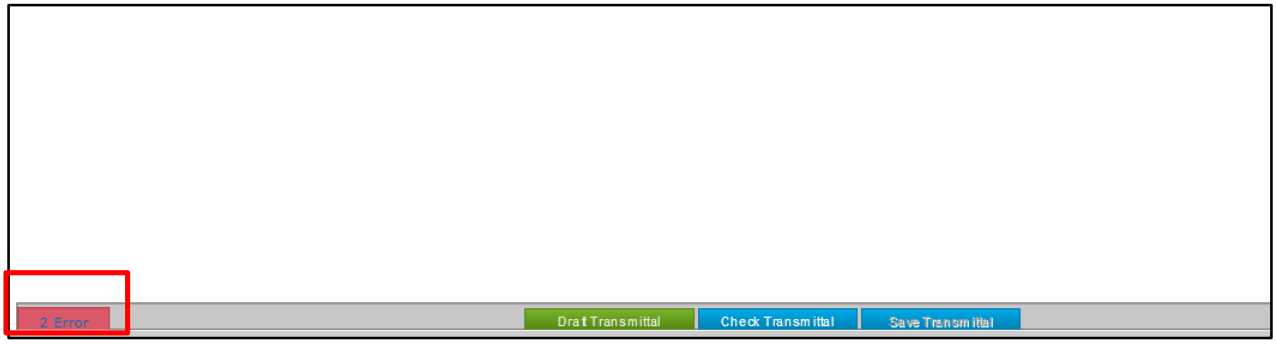

Enter the document Revision number and upload the file against the document, by clicking on attachment button.

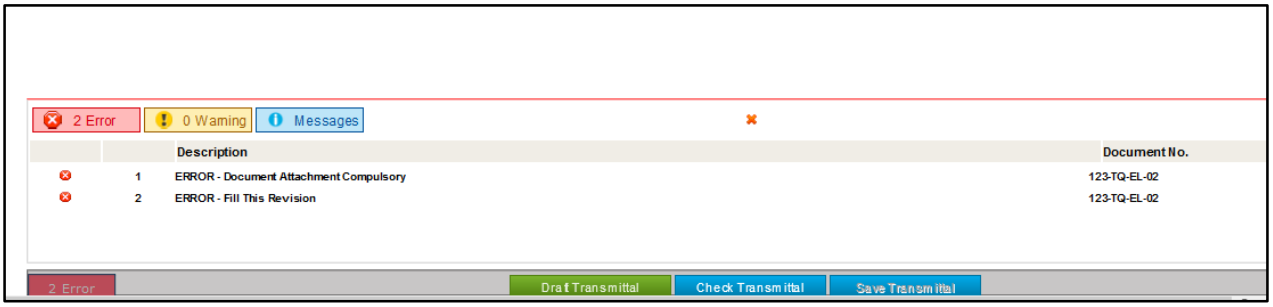

After uploading the file, click on Check Transmittal button.

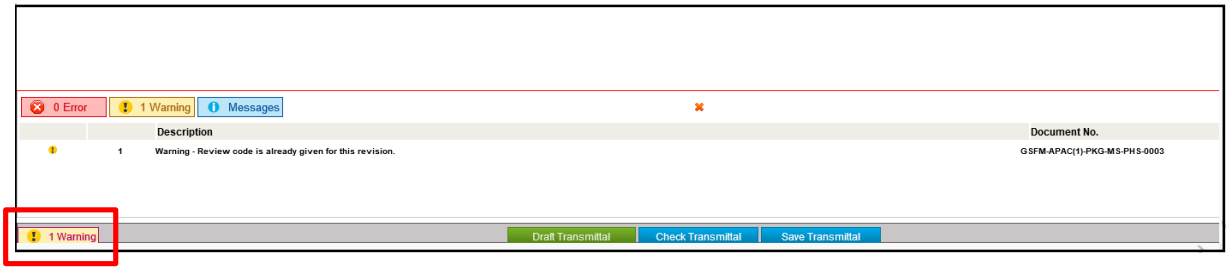

If there is any error in the Transmittal, the system will highlight the number of errors.

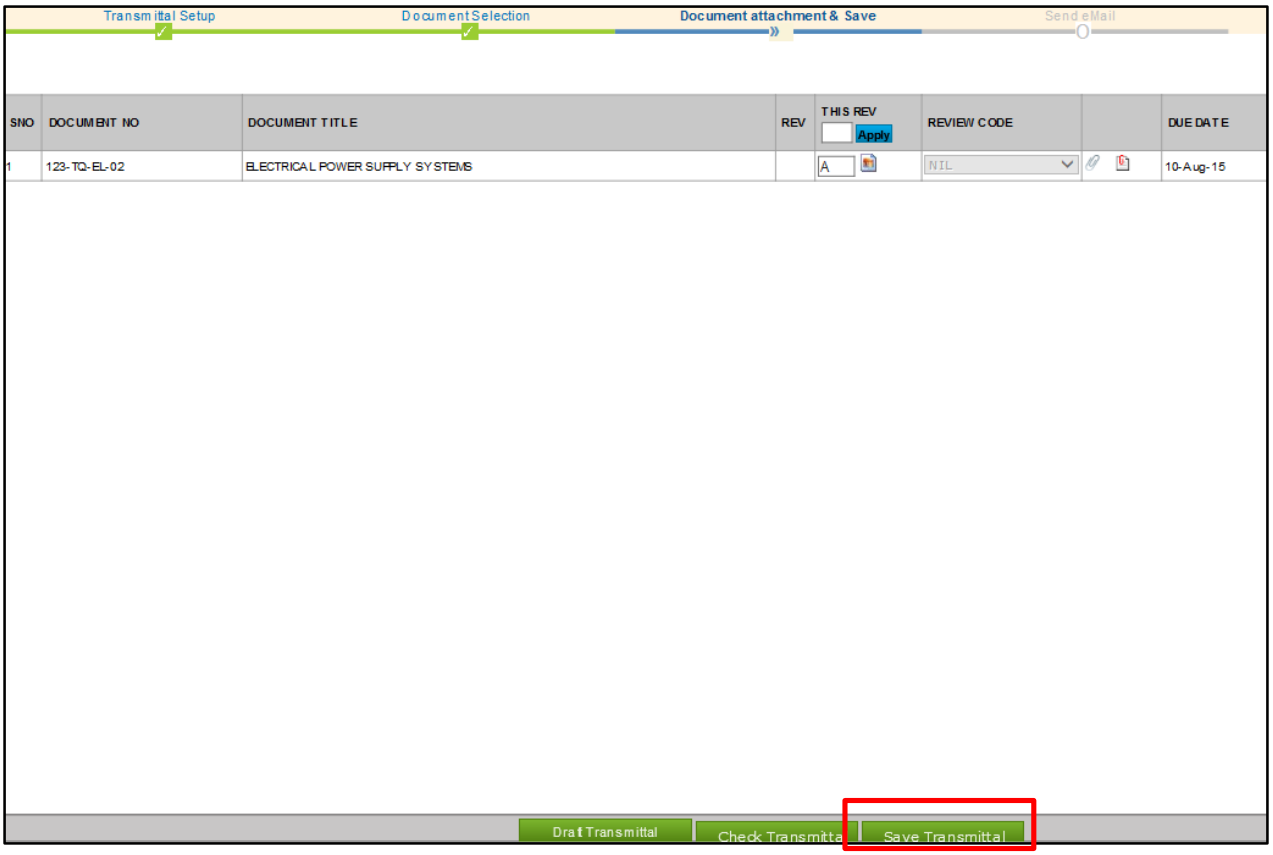

In Case of Error: - By Clicking on Error you will be able to get the error message, take appropriate action and then again click on Check Transmittal.

In Case of Warning:-By Clicking on Warning, you will be able to get the warning message; warning message can be ignored by clicking on "Save Transmittal".

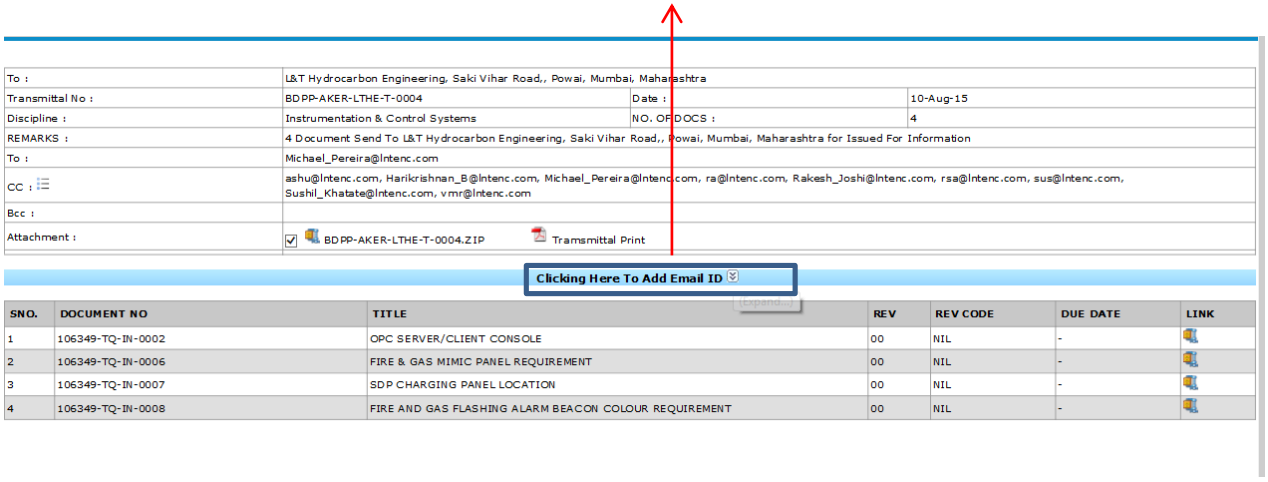

This will enable the Save Transmittal button. Click on Save Transmittal button.

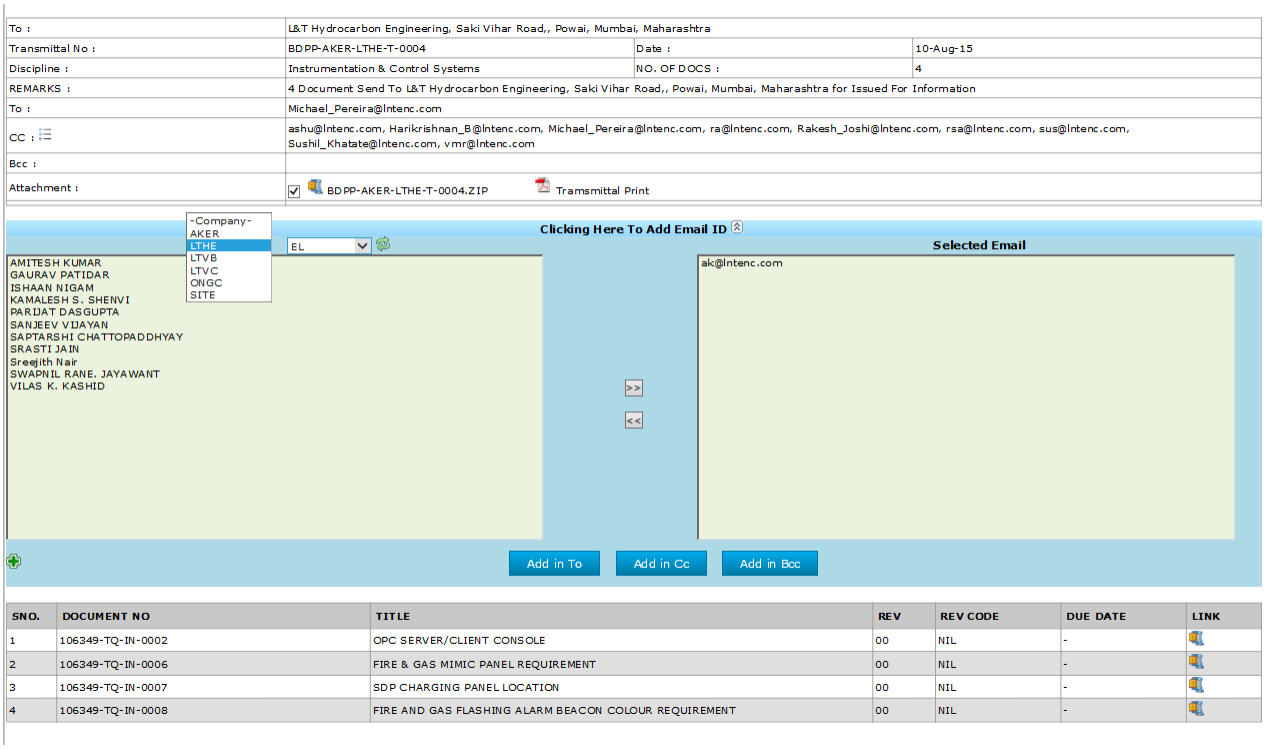

After Transmittal is saved, the below screen will appear.

To enter additional Email ID, click on Click here to Add Email ID

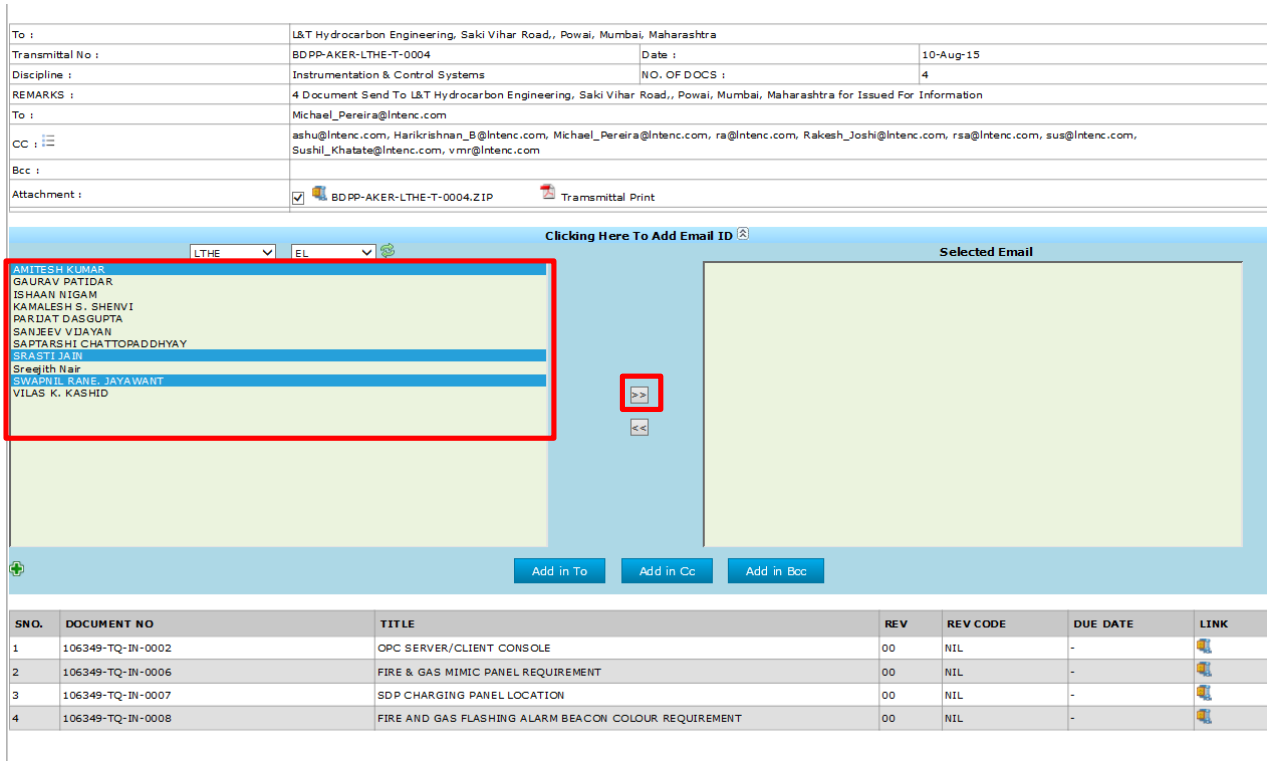

The Below screen will appear. You can use filter to filter the email Id by Company name and Discipline.

TESTDOC2
12/30/2014 5:22 PM
12/30/2014 5:23 PM
Add document

Once the Files are Uploaded in MY DRIVE. Goto TRANSMITTAL CREATE.

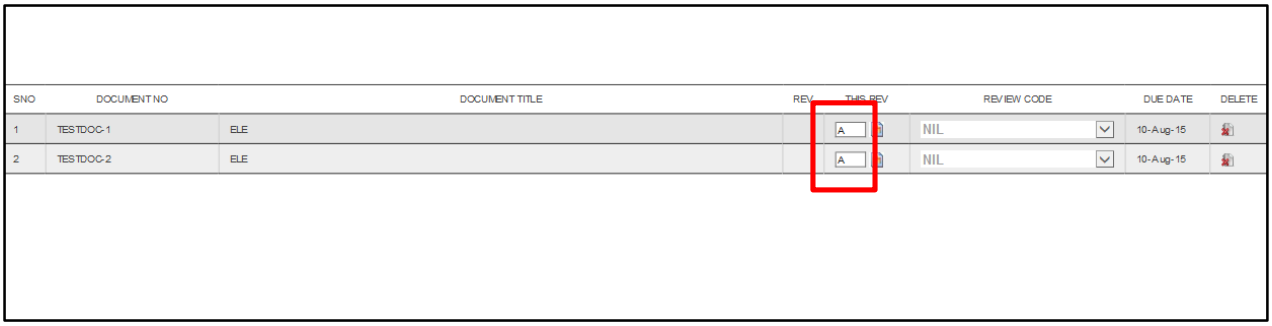

Click on Transmittal By Bulk Button. The below page will appear.

1) Select Approval Category.
2) Select To Company as LTHE
3) Select CC company (Optional) and then click on Add Button

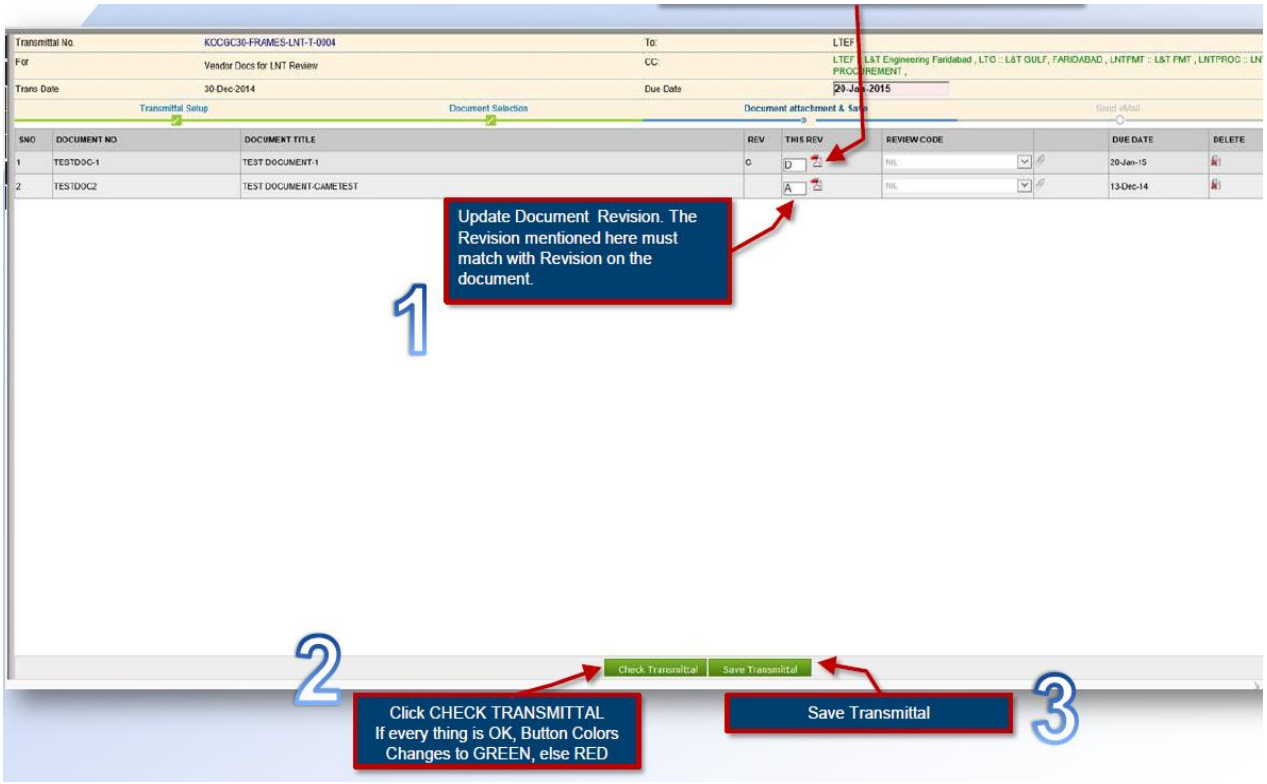

Click on Import from Temp button

Enter the Revision code and then Click on Check Transmittal and Save the Transmittal.

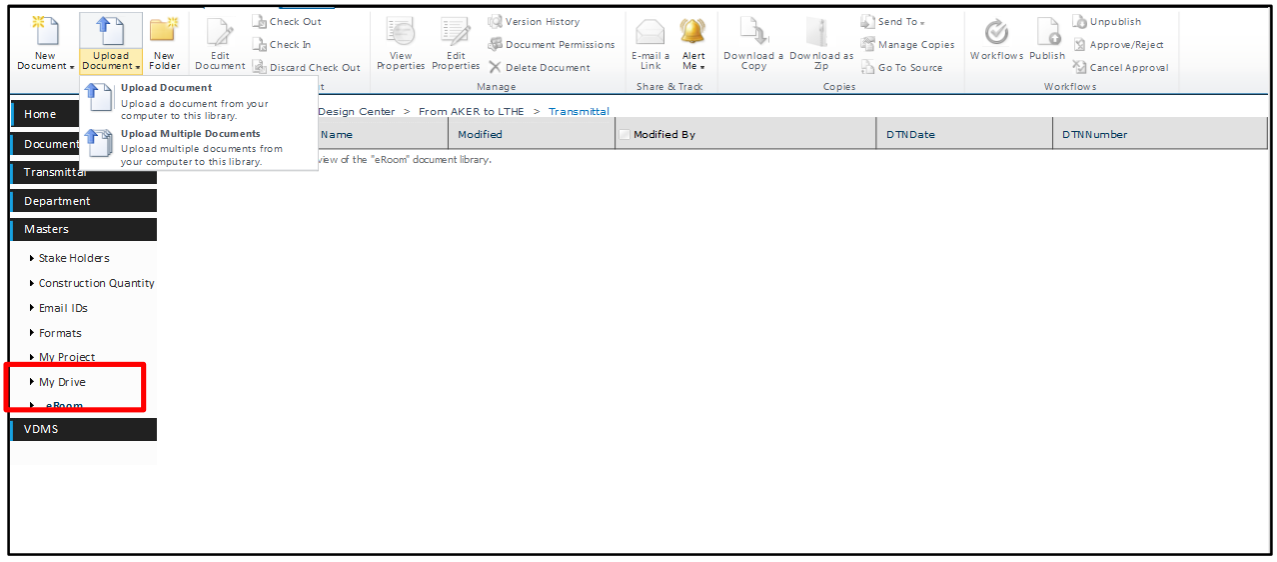

Once the File is uploaded successfully, File ICON will appear along with Revision.

5) E-Room/IDC Documents

E-Room Library is used for Temporary Exchange of documents from ENGG Center to LTHE and Vise-Versa.

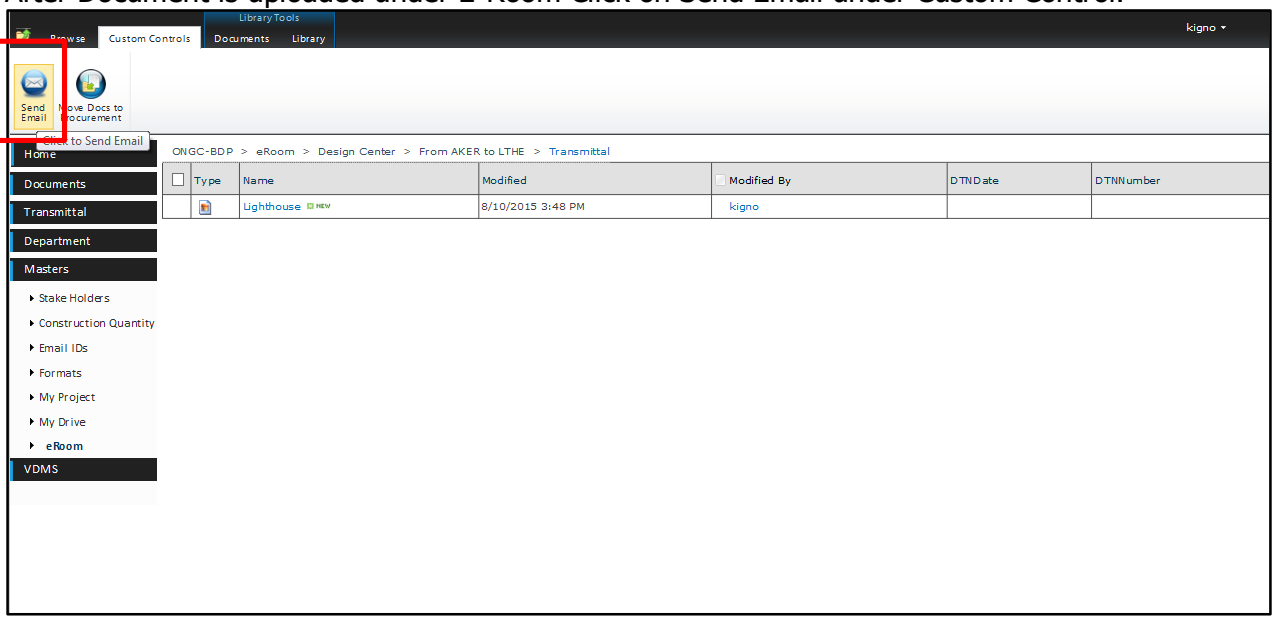

To Upload the Document in E-room Click on E-Room Button under Master Tab. Navigate to appropriate folder and upload the Document.

To notify other user/company, we can use Send Email Functionality or Send Email through Project Mail Box.

5a) Notify through Send Email

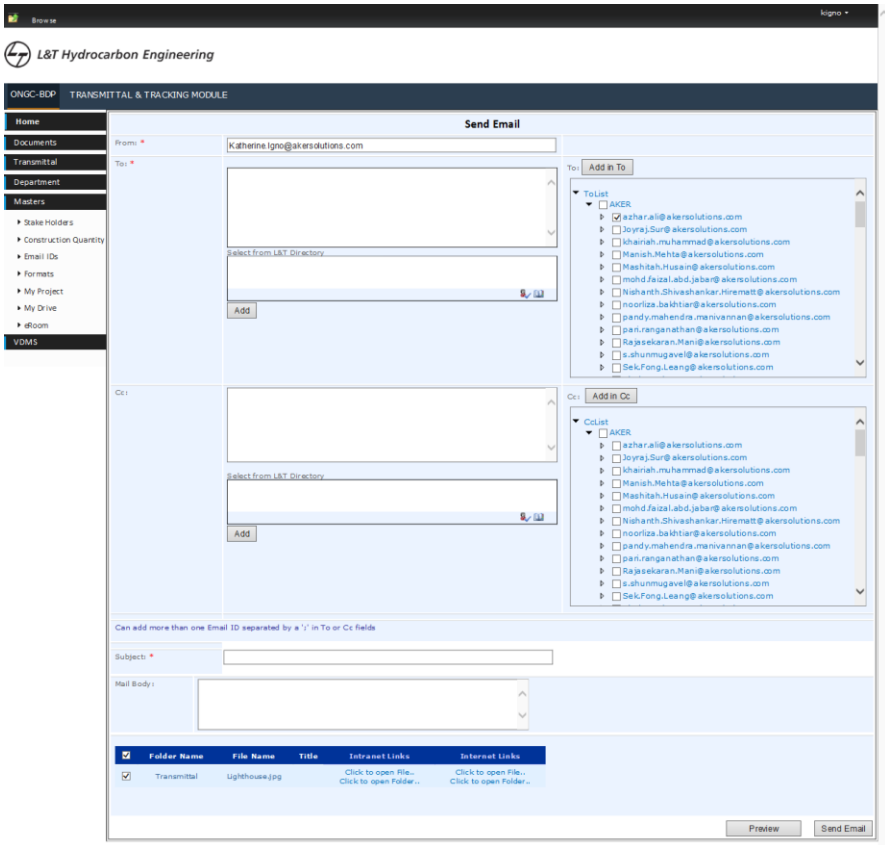

After Document is uploaded under E-Room Click on Send Email under Custom Control.

The Below Screen will appear. Enter the Email Id and TO and CC field.

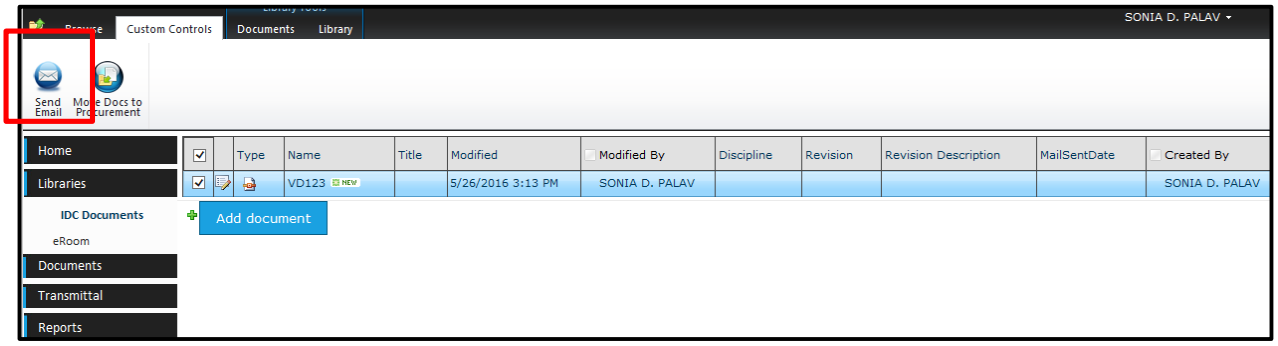

Enter the Subject and then Click on Send Email Button.

The Email will get triggered to TO and CC user along with File and Folder Link.

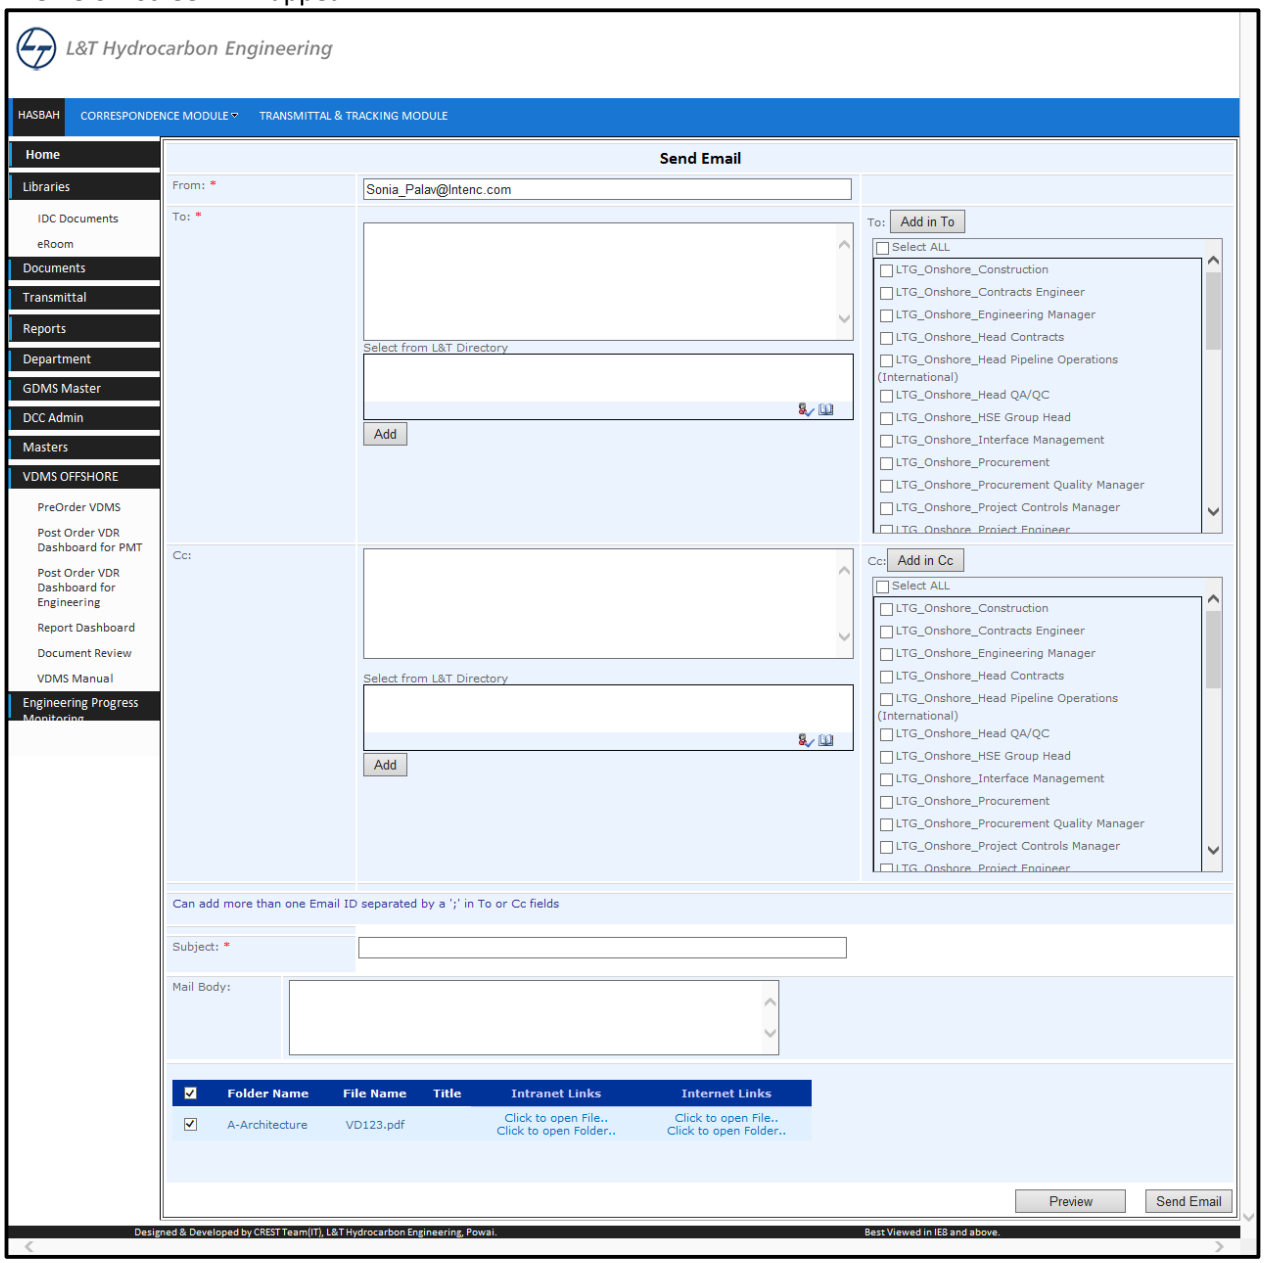

5b) Notify using Project Mail Box.

Under Custom Control click on Send Email.

The Below screen will appear:

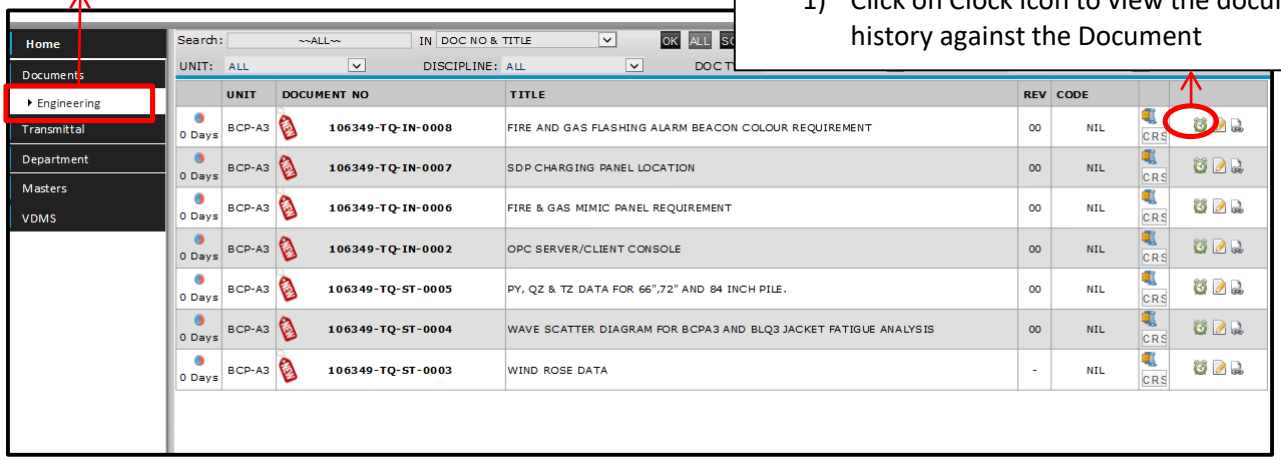

Enter the required detail and Click on Send

6) How to Check Document History?

To Check Document history click on Engineering Button and then click on Clock icon

2) Click on Engineering Tab under Documents

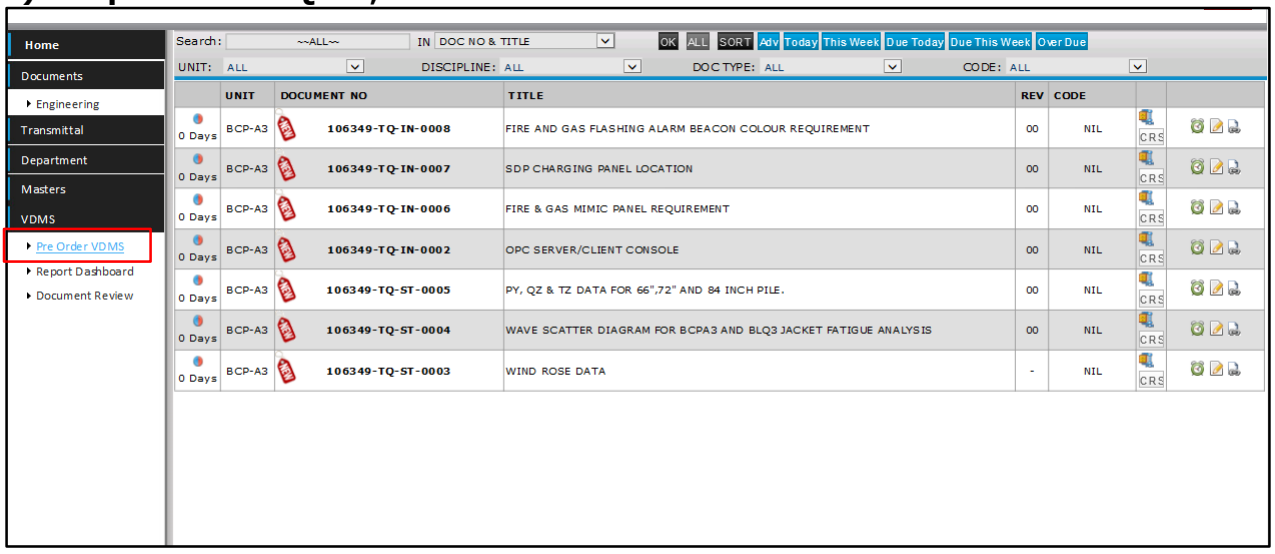

1) Click on Clock icon to view the document history against the Document

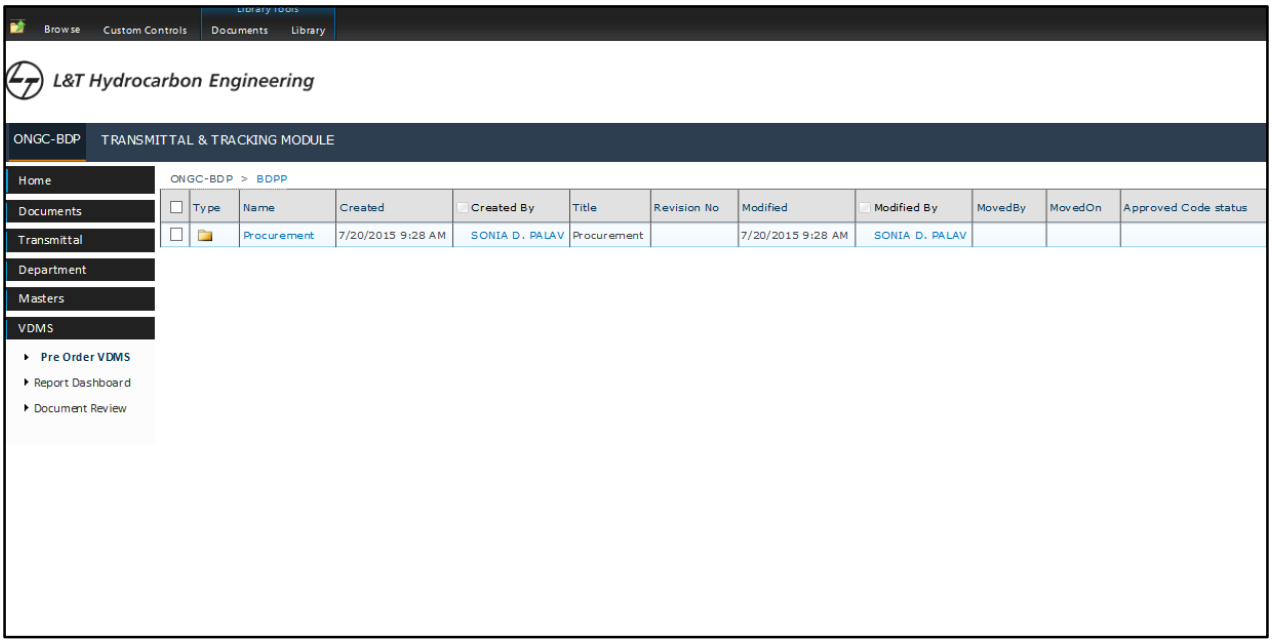

Document history page will get displayed.

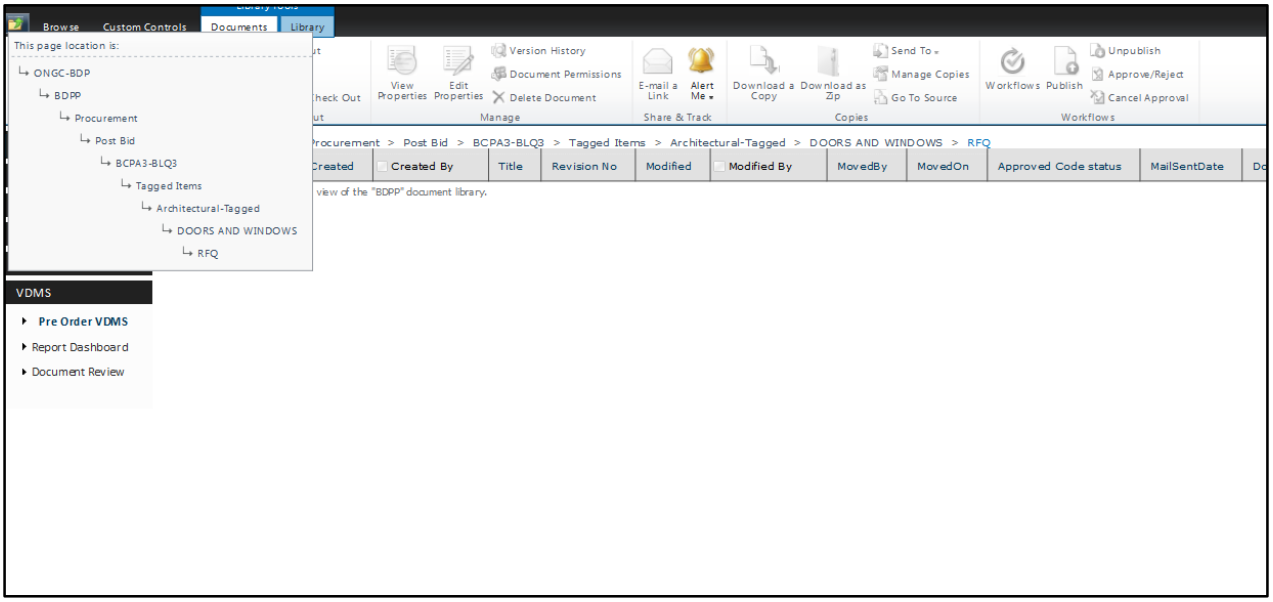

VDMS- Pre Order Documents

1) To upload the RFQ file, click on Pre Order VDMS tab.

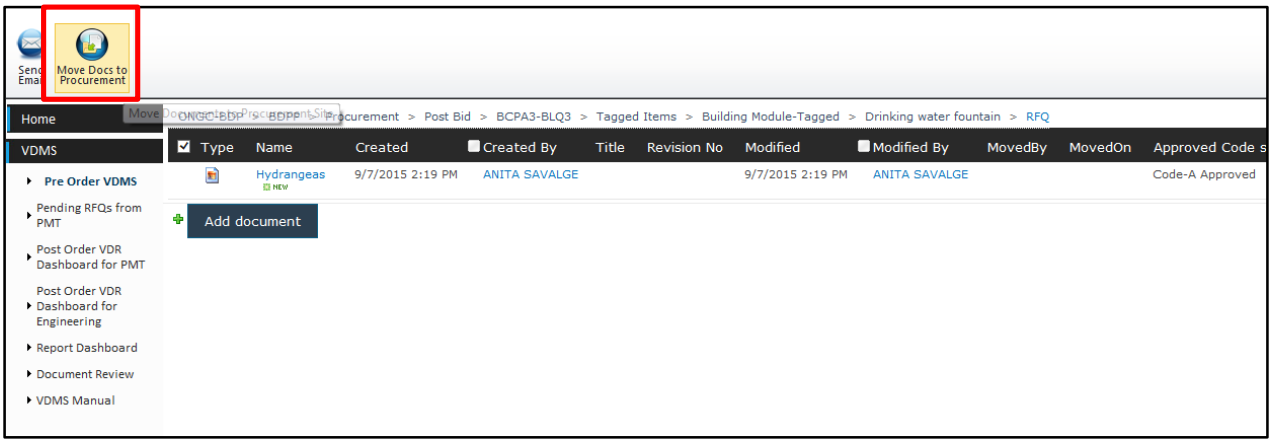

Navigate to appropriate item folder, in item level folder file has to be uploaded under RFQ Folder.

Upload the Document under RFQ folder, and use the move document functionality to initiate the LTHE Team.

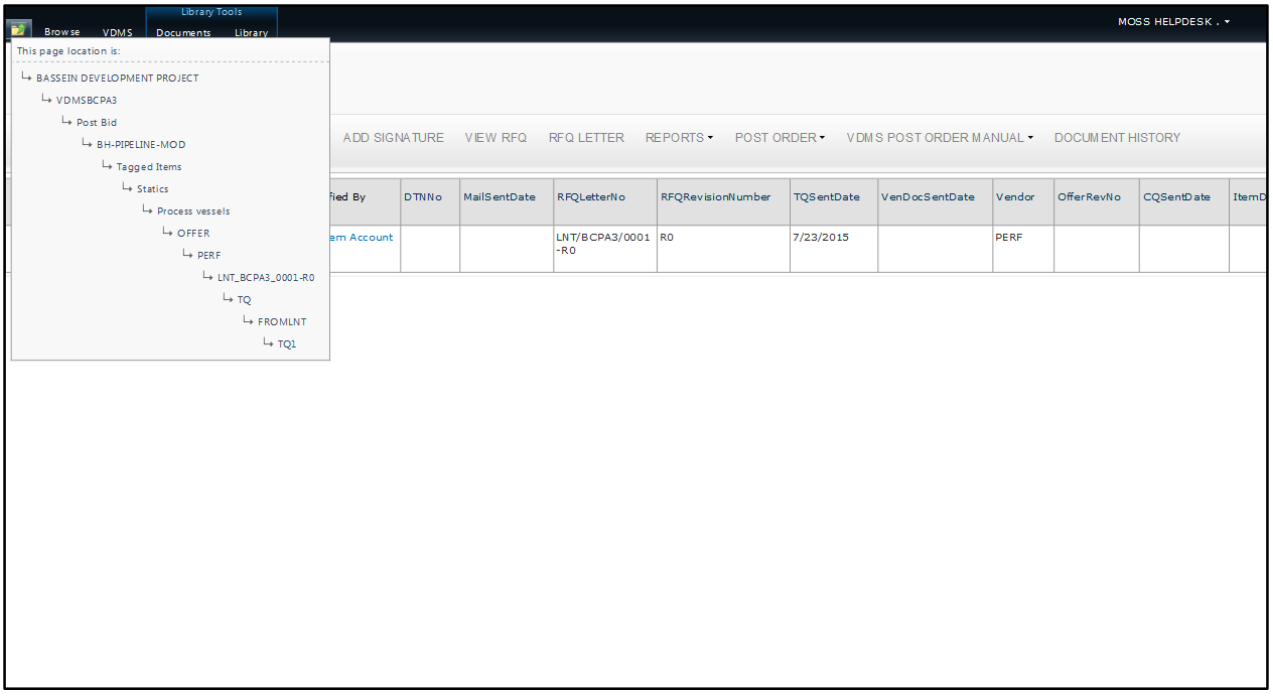

Click on Move Document to Procurement

2) How to upload the TQ Document.

After LTHE receive the offer document TQ folder will get auto created under item level folder.

First TQ file has to be uploaded under TQ1 folder in From LNT.

After Uploading the file under TQ1 folder, Send Email Functionality can be used to intimate LTHE Team.

Reply to TQ1 will be initiated to ENGG Center by using send email Functionality.

After TQ1 reply is received, TQ2 folder is automatically created, second TQ2 file has to be uploaded under TQ2 folder in From LNT.
