What is a Cantilever Gate ?

Cantilever gates are gate systems that don’t require any tracking system on the floors along the length of the gate.

NIHVA
NIHVA TECHNOLOGIES PVT. LTD.

Cantilever gates need to be wider than the usual slide gates in order to provide a counterbalance section along the fence structure where the gate is supported. This section is usually half of the width of the gate opening.

They are suspended across the gate from the counterbalance, with no rollers on the ground. Because of this, cantilever gates provide no ground obstruction, making it a preferred choice for heavy-duty and industrial gate applications.

A cantilever gate frame constructed properly should be able to withstand forces of gravity and wind.

Why You Should Install A Cantilever Gate

Cantilever gates are the best option for uneven ground, grass, gravel, or even water.
A cantilever gate glides on two sets of support rollers, attached to a concrete foundation, ensuring a reliable, smooth, and silent operation.

Cantilever gates can work on an angle, making it ideal for driveways with steep inclines.
You don’t have to ensure the ground is leveled as they work on steep inclines.

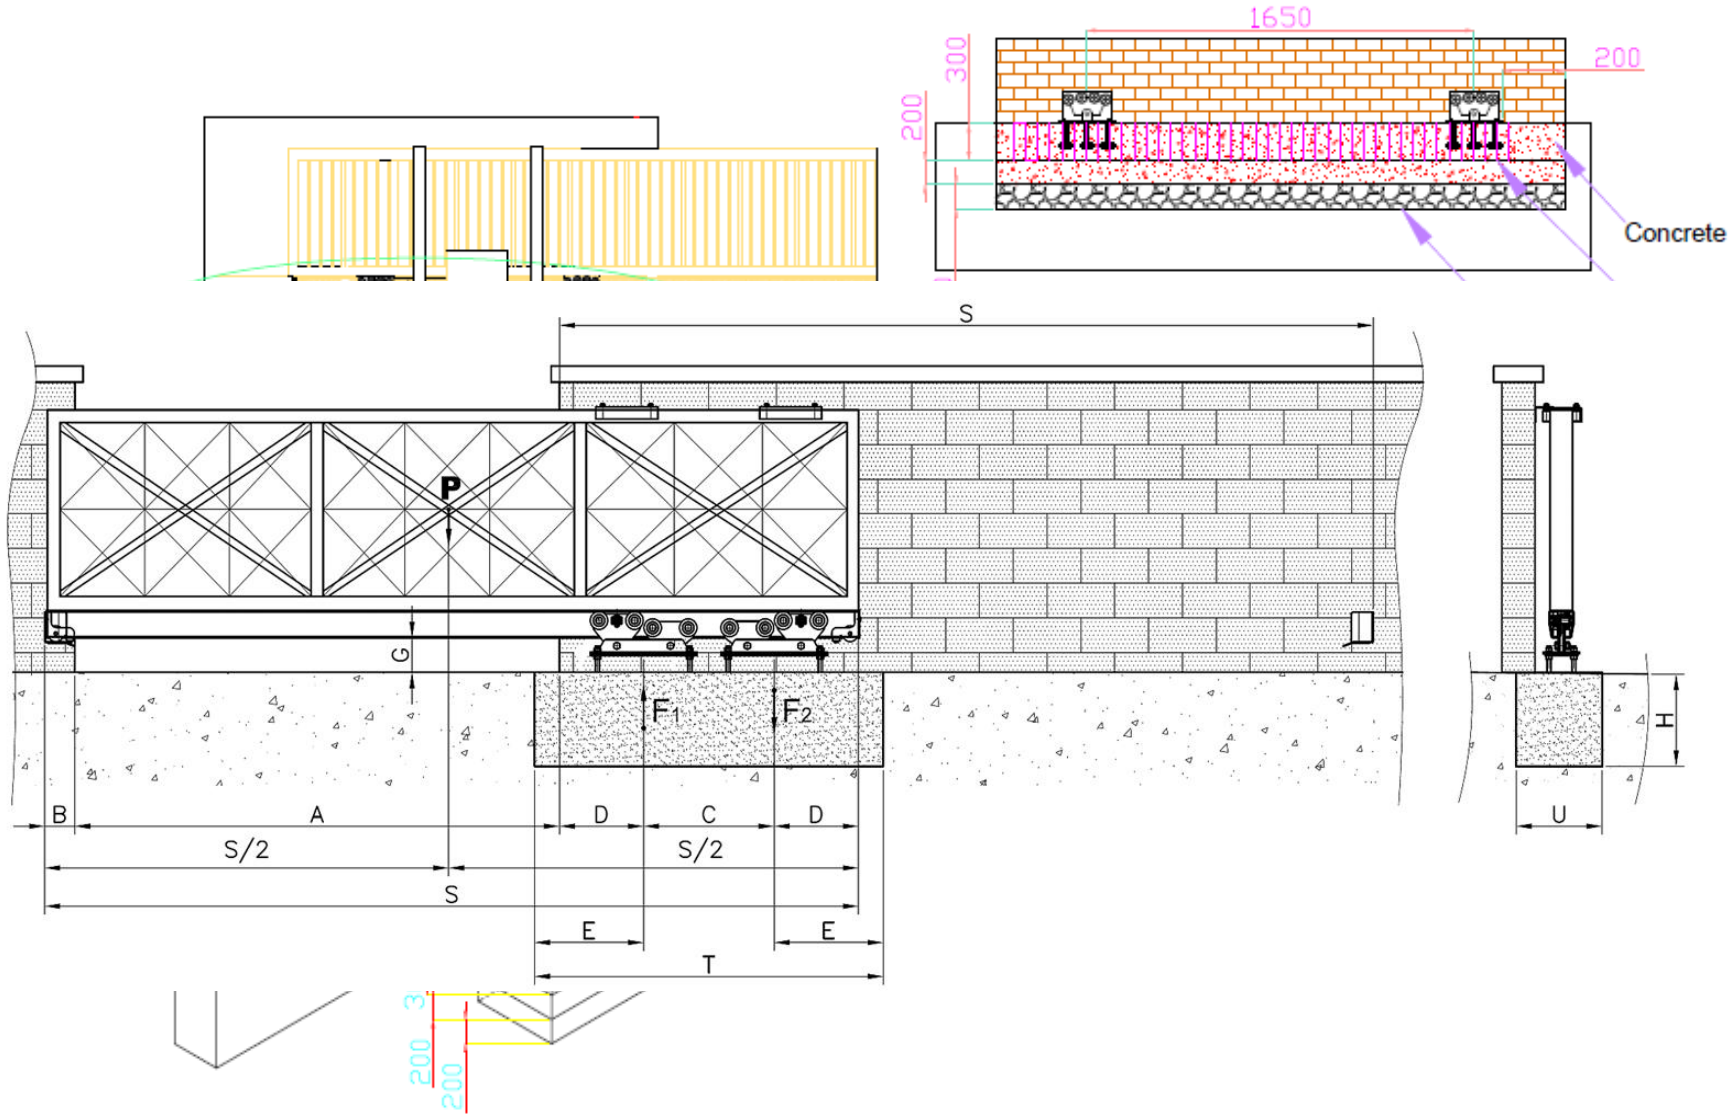

Cantilever gates have longer operational life.
Since a properly designed, fabricated, and installed cantilever gate will reduce friction when being used, it will prolong gate operations.

Cantilever gates are easier to install.
Cantilever gates require no ground track installation, depending solely on overhanging structures based off two side posts. This makes it easier and faster to install.

Cantilever gates are easier to operate since no part comes in contact directly or indirectly with the ground.
There will be no chance of operation error due to ground obstruction or weather causes because cantilever gates do not require ground tracks.

Door Automation

- High speed Doors
- Sectional Doors - Puff Insulated / Glass
- Motorized Rolling Shutters / Fire Rated Rolling Shutters
- Hangar Doors / Extra Large Opening Doors
- Sliding - Folding Doors
- Sliding / Revolving / Swing - Glass Operators / Door
- Dock Levellers / Dock Shelters
- Sliding - Telescopic - Cantilever - Swing Gates
- Boom Barriers / Turnstiles / Bollards
- Grease Oil Separator / Drainage System (ACO)
- Automatic Sliding Roof

Automation Solutions

- Special Purpose Machine (SPM)
  Machining / Assembly / Hydraulics
- Engineering Services -
  Assembly / Hydraulics / Machining / Fabrication
- Material Handling Equipment's -
  Telescopic Conveyor / Scissor Lift / Goods Lift / Mobile Floor Crane
  Manipulator / Maintenance Work Platform
- Secondary Packaging Machines
- Wireless Automation (M2M)
- Processing Equipments
