Pick & Place (Manipulator / Air-balancer)

Pick & Place Operation is to be done using Manipulator. Manipulator devices are pneumatic articulated arm balancers in the ultimate load classes 50 kg to 300 kg with a max. Working radius upto 3000mm and a lifting range of 1500mm as standard features. Due to the specially designed lifting cylinder connection, we achieve a consistent balancing performance in the entire lifting area. The Manipulator can be operated as pillar device, hanging device or as a device that can be moved within the rail system. The devices can be combined easily or can be upgraded with different modules. All gripper models (mechanical, vacuum, magnetic, tilt, rotary axis, etc) with pneumatic control models can be combined as well. Due to this extraordinary level of flexibility, each Manipulator can be modified in accordance to the specific application to achieve optimal performance

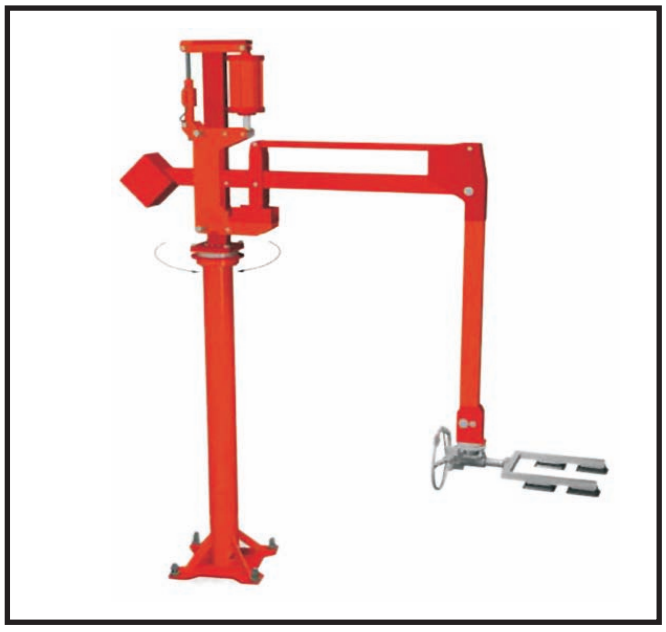

Area of Applications

- Seat Handling
- Battery Handling
- Door Handling
- Tire Wheel Handling
- Other Mechanical Assemblies
- Cyl. Head & Block Handling
- Any Lifting Area

Technical Data

Maximum Lifting Capacity. (Inclusive of Gripper weight.)	: 300 Kg @ 6 bar air
Maximum lifting Stroke	: 650 mm – 1200mm
Lifting speed	: approx. 30 m/min.
Lowering speed	: approx. 30 m/min.
Working radius (max)	: 1650 mm – 2200mm
Rotation around the main column.	: 360°.
Working air pressure	: 6 bar.
Air consumption per double stroke	: 20 NL – 30 NL
Noise generation	: < 70 dB
Working range Temperature	: 0 to 50°C

Customize Manipulator with Gripper

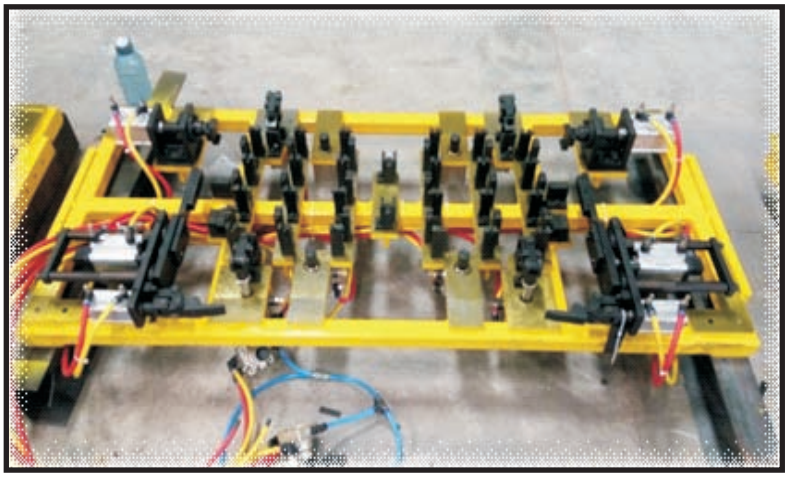

Special Purpose Machine

Secial Purpose Machine (SPM) are those machine which are not available off the shelf. These are not covered in standard manufacturing programs. Therefore those have to be designed & tailor made as per the customer's specific requirements. They are also called as bespoke machines. Always in the production process there is a long felt need to improve the quality of product, minimize rejection and increase the productivity per person, to cater to the pressing circumstances in the globalised world economy.

Fixtures & Structure as per machine

Bowl Feeder / Vibrator as per application

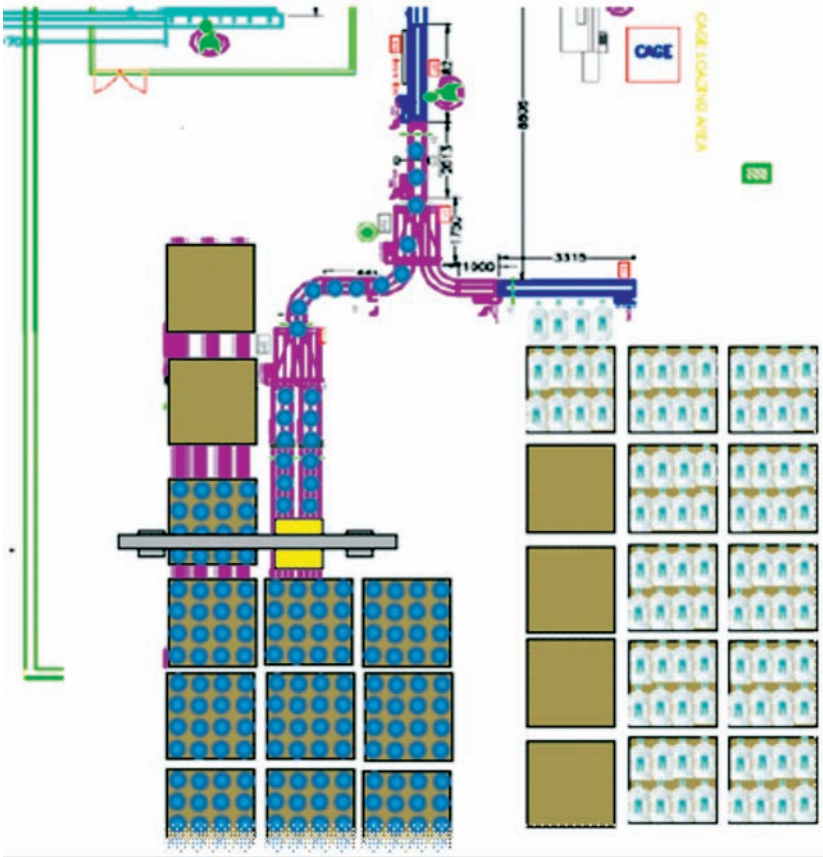

ARM with total line Assembly

We are manufacturing and supplying utmost quality range of Welder Machines with Pick & place solution for a total line control. Our products are manufactured using the optimum quality raw material and latest technology. The offered machines are designed with high precision in order to meet the international quality standards. These are highly recognized among clients for their robust construction, excellent performance and durability. Apart from this, the offered machines are available in various specifications as per the varied demands of clients.

Welding Arm

Key turn Solution for Total Plant Process

NIHVA

Automation Solutions	Material Handling Equipments	Door Automation
Automation Solutions	Dock Levellers	High speed doors / Sectional doors
Pick & Place Machines	Scissor lifts / Mobile ramp	Sliding doors / Folding Doors
SPM	Dock Shelters / Dock Seals / Dock House	Fire rated - Mot. Rolling shutters / Sliding doors
Wireless Automation (M2M)	Goods Lift	Hanger Doors / Extra large opening doors
Automation Softwares	Spiral Conveyors / Belt Conveyors	Boom barriers / Turnstiles / Bollards
Grease / Oil Separator	Telescopic Conveyors	Sliding / Cantilever Gates
