

Netto, Falkenberg — New doors installation

# Albany RR600 – solved the logistical problems for a large central warehouse serving the food industry

Criteria such as speed, flexibility, attractive design, new technology and innovation were decisive when Netto ordered Albany RR600 for its central warehouse in Falkenberg.
In addition to the central warehouse, the main offices for southern Sweden with purchasing, financial and marketing functions are also located here. The total surface area of the building, including offices and warehouse, is an impressive 17000 $m^2$.
Netto is part of the Dansk Supermarket Gruppen A/S, and its first store was opened in 1981 in Copenhagen. In 1990 Netto opened its first shops in Germany and the United Kingdom. In 1995 Netto started trading in Poland. In 2001 it started up its business in Sweden, and today there are approximately 75 – 80 stores, mainly in the southern parts of Sweden.
Netto plans to start 25 new stores per year in Sweden, and operations will expand into the central and northern parts of Sweden. In total Netto operates more than 800 shops in five countries. Its combined turnover is more than SEK 30 billion.

"The door contributed to our improved logistics and improved environment", said Thomas Bjurklint, who is the technical manager responsible for the central warehouse in Falkenberg. "Logistics have been improved by its speed of operation, which guarantees an optimum flow of goods through the door. The traffic mostly consists of trucks, but a relatively large number of people also pass through the door".

"As far as the environment is concerned, it reduces the air movement between the departments and improves the working environment for our employees. In addition, the temperature is held at a constant level and this is a very important aspect when considering the handling of foodstuffs", continued Thomas.
"Here at our central warehouse we have five (5) different temperature zones, which require temperature control from +5C up to +11C."
