NIHVA Technologies Pvt. Ltd.

Established from 2012 in pune (Maharashtra , India) , We “Nihva Technologies Pvt Ltd” Are prominent Manufacturer , Importer , Exporter Of Comprehensive assortment of Industrial Doors , Material handling Equipments , Factory Automation Products , Special Purpose machineries and Muchmore . The offered Products are highly appreciated among our customers for their attributes like Aesthetical design , User Friendly and economic. Further , Our offered Product is checked on all well set parameters of quality in order to provide & achieve zero defect product .

NIHVA

NIHVA Technologies Pvt. Ltd.

Introduction

The easiest way to cut costs is to improve efficiency. Nihva Technologies Supply Telescopic Conveyors which is the effective way to optimize unloading process. Instead of team (4 - 5 people) taking up to four hours to unload a container, one operator can do the job in just mean time . Productivity is increased two-fold. NIHVA' Telescopic Conveyors - either belt or roller - provide cost-effective loading of loose-loaded items too. They can be used with any type of vehicle - large or small.

Working Principle

The belt conveyor consist of Mainly Rack , Conveying belt , belt roller , tensioning device , Transmission device. The machine body is made of High quality steel plates connected with each other, forming a rack based structure on the height difference between front & back legs. The plain is slant with certain slant angle. Belt roller , Carrier roller etc. are installed on rack used to drive & support Conveying belt. The driving mode includes Speed reducing motor driving & electric Roller driving .

Why Telescopic conveyor ?

Telescopic Conveyor is the perfect labor-saving component to meet the demands of high-speed production lines in a wide range of industries for raw material unloading and finished goods loading in the carriage.

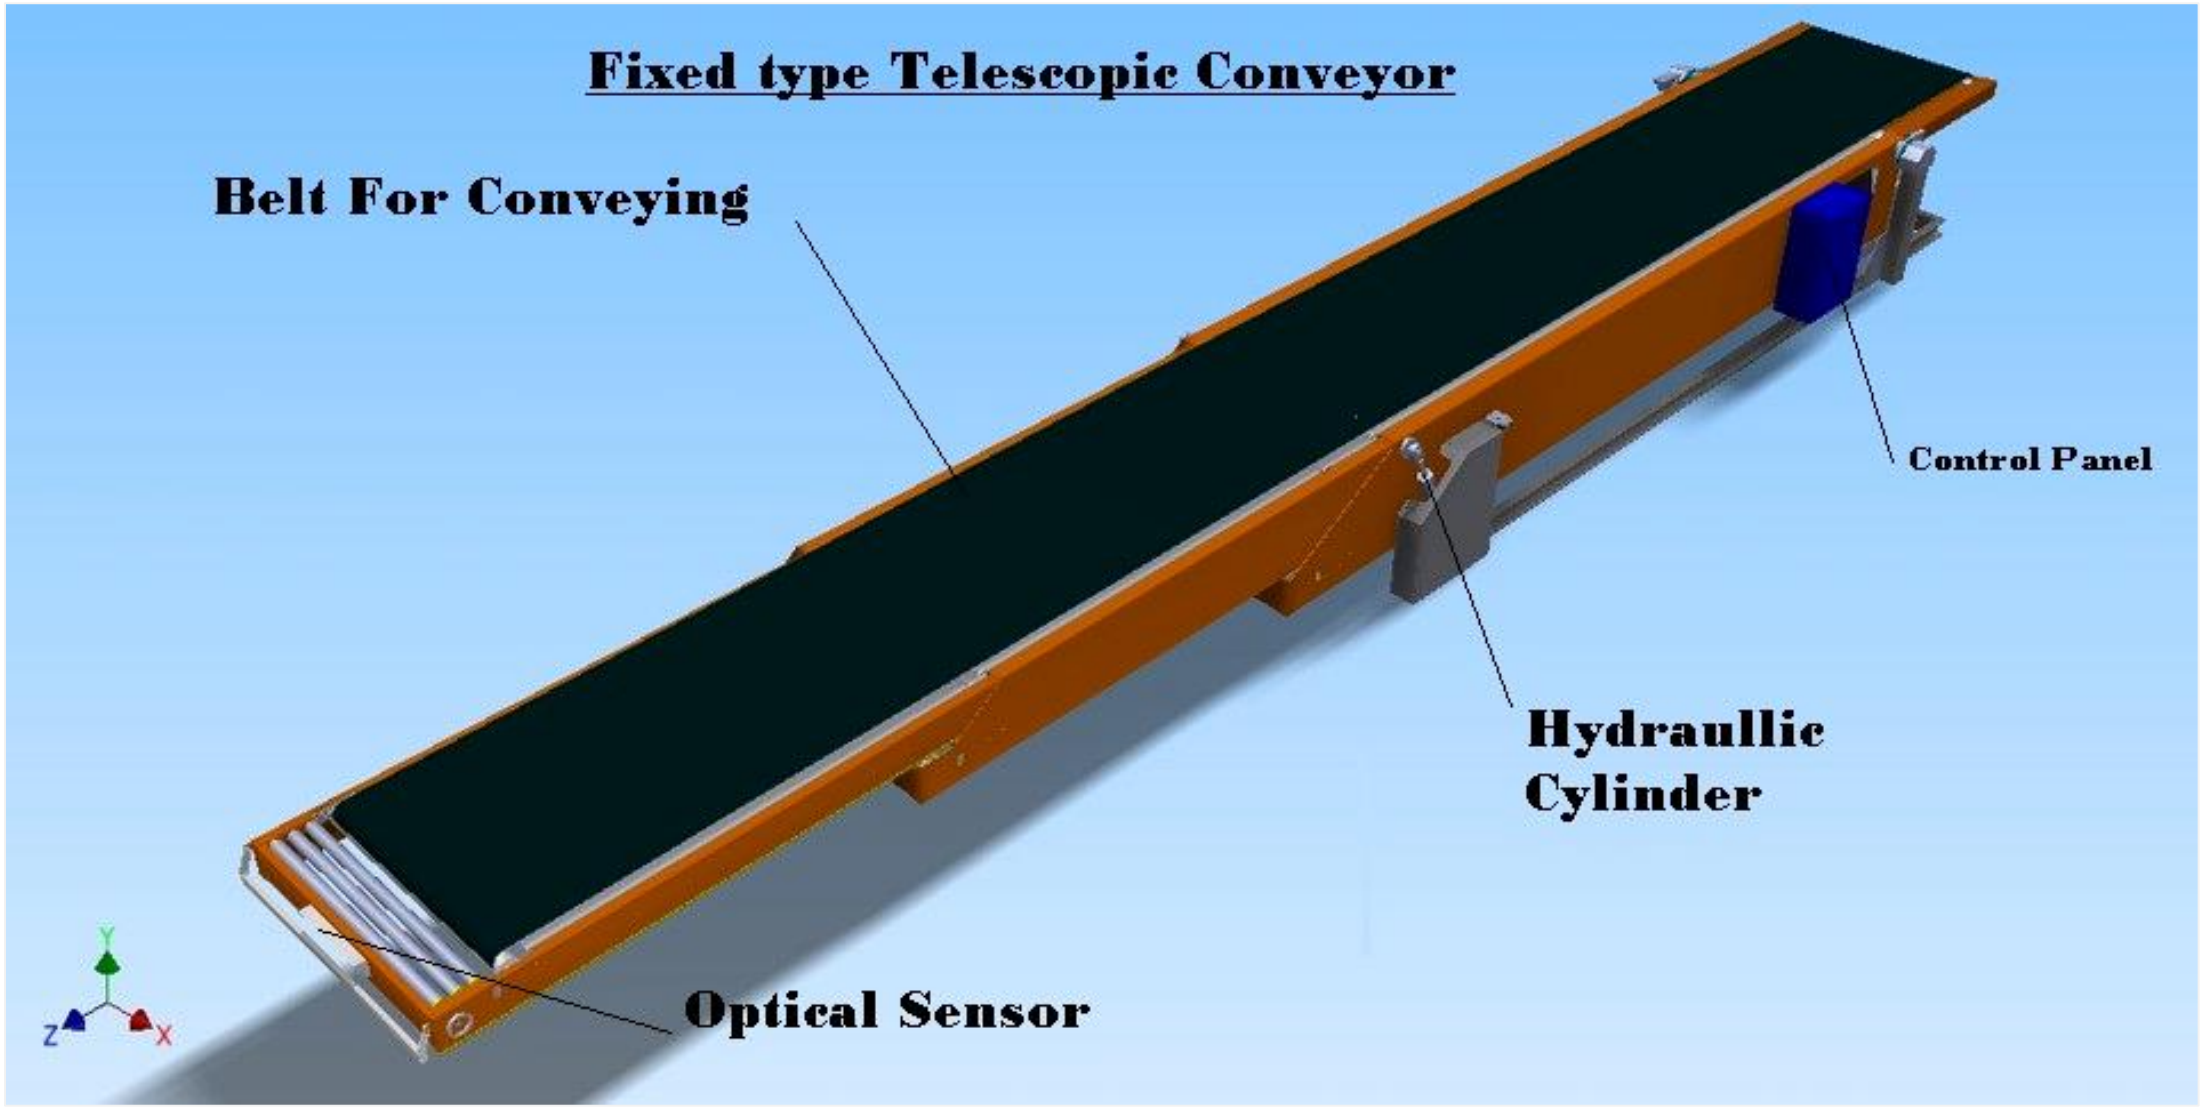

It is deluxe product for Loading/Unloading application with all necessary safety standards. It has heavy-duty design and durable construction requires minimal maintenance, thus assuring many years of dependable operation. Machine is having a very robust and vibration free body constructed on steel frame. It can also made with all food grade standards. User friendly and variable speed controls for conveyor speed make the operation easy to adjust as per output.

Only one employee is required to operate the Telescopic Conveyor

- Improve Speed of operation.
- It can work out for **any shape** like round, oval, square, etc. It is enable for unsymmetrical shape of container also
- Contact parts are resistant to flaking, chipping, scuffing so will not cause any cosmetic damage to containers
- Minimal operator training required
- INDIAN made-easy access to spare parts and service assistance

Safety Features

- Anti collision strip fitted at the front of the boom which causes the machine to retract / Stop
- LED Light unit is mounted at front of boom to illuminate light in container
- Idler roller with quick remove for anti accendent while unloading of boxes / finished good from conveyor
- Audible warning to alert operator of impending belt starts.
- All pinch points & moving parts are covered
- Movable remote at front Boom
- Main Panel with LOTO Switch
- Guard below last extended boom

Accessories

LED Light Is provided at front of telescopic boom to ensure vision inside truck container while loading & unloading

Hydraullic Cylinders (2 Nos) with rigid piping is Provided on telescopic conveyor at front side of Fixed length boom , which ensures the support & Lift for all telescopic boom

NIHVA

NIHVA Technologies Pvt. Ltd.

Flashing lamp is mounted on control panel which flashes with hooting sound to ensure Senctional and longitudinal movement of conveyor

Main control panel at rear side of Fixed length boom having control switches , push buttons , LOTO Switch

NIHVA

NIHVA Technologies Pvt. Ltd.

Anti collision strip to avoid damaged due to sudden collision ensures perfect telescopic operation

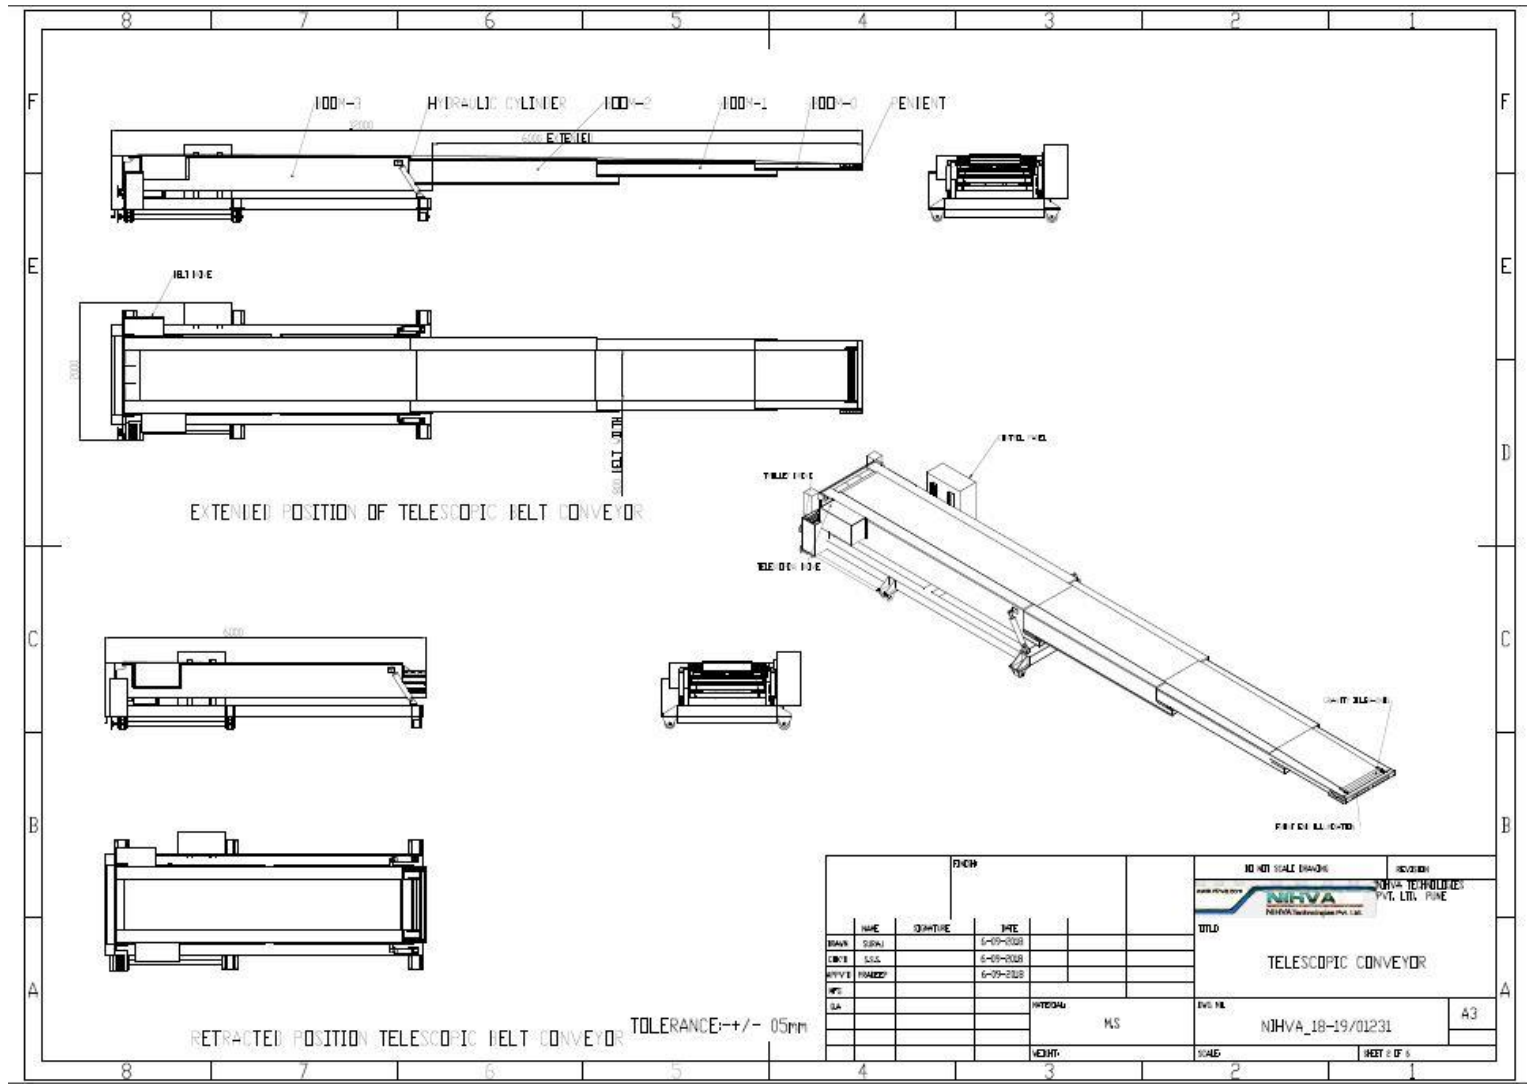

Optical sensor to avoid sudden collision , this sensor is integrated with system which makes it to stop as it detects any object in its sensing range while telescopic movement
