Complete Entrance Solutions for Distribution and Logistics

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in door opening solutions

"Our terminal in Nuremburg is a big refrigerator. Since ASSA ABLOY Entrance Systems do regular service, I have fewer worries about unnecessary energy consumption around doors and levellers. The fast reaction time in the event of an emergency and the preventive maintenance are keeping doors from standing open."

Arthur Werzinger
Distribution Center Leader
Kraftverkehr Nagel

The smartest way to solve the puzzle

Your distribution and logistics business is a complicated puzzle, with goods in constant motion and no room for things to be out of place. ASSA ABLOY Entrance Systems has the tools to solve the challenge, from innovative entrance systems to smart maintenance and modernization packages. Our expertise makes the difference when your business is moving goods in or out.

On time and on target
In a business where efficiency is key, your entrance systems are more than just a way in or out. They're a key component of making things happen when and where they should.

When you can rely on your entrances, life is easier for your employees, who can more quickly and easily get the right goods on the right vehicle. For entrance systems that simplify operations and safeguard your uptime, you can rely on ASSA ABLOY Entrance Systems

Secure and assured
With so much in motion, your business needs extra protection. Not only for the goods themselves, but also for the equipment that handles them.

ASSA ABLOY Entrance Systems offers many levels of security, from enclosed and interlocking docking solutions to systems for monitoring and overview. For sensitive goods, we offer solutions that maintain hygiene, plus energy-efficient ways to preserve the cold chain.

Added peace of mind comes from knowing your equipment will work, thanks to a rugged construction that handles the inevitable bumps and scrapes.

Safe, comfortable and convenient
Your goods aren't all that need looking after. To get the job done, your employees need a sound environment where their safety comes first.

Solutions from ASSA ABLOY Entrance systems are built to fulfill all relevant regulations, and the same energy efficiency that protects your goods helps ensure a comfortable workplace.

But it goes much farther than that. With many smart features that mitigate hazards and prevent human error, our solutions keep your workforce safe and productive.

Sustainable in every regard
Managing the barrier between heat and cold isn't just a matter of comfort. It's a way to cut energy use and CO_2 emissions, which protects the environment and keeps your costs in check. ASSA ABLOY Entrance Systems can help you achieve energy efficiency, not only through tight-sealing and well-insulated products, but also through expertise, maintenance and modernization.

Working with us, you have a long-term and complete solution for reducing your impact and costs. That's not only environmentally sustainable, but financially sustainable as well.

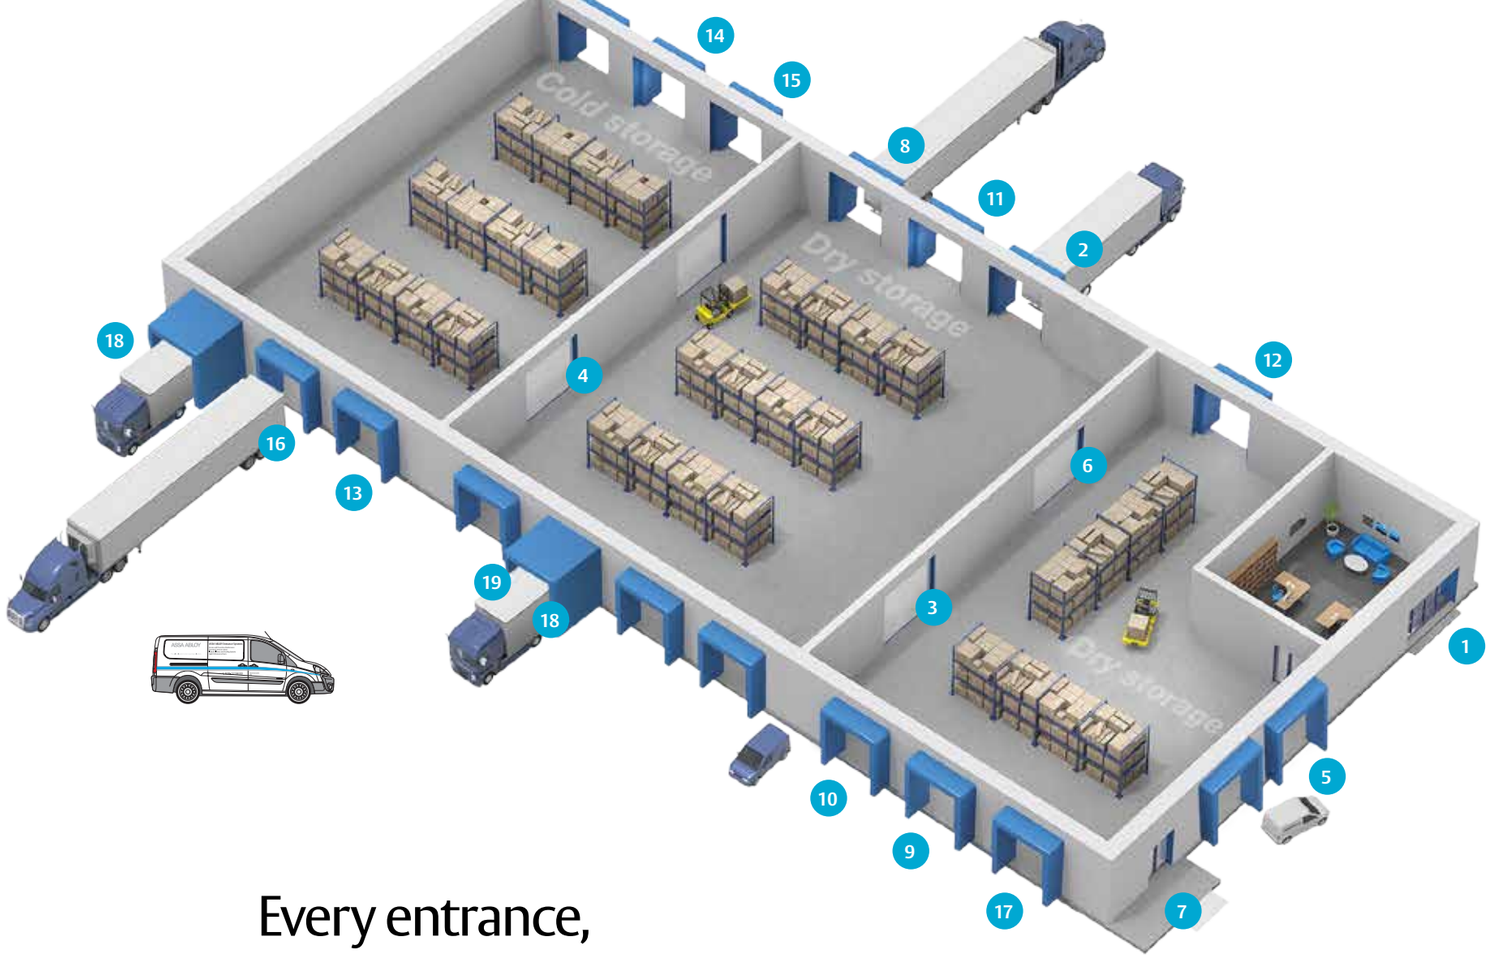

Ideal from start to finish
Best of all, ASSA ABLOY Entrance Systems is a one-stop shop to support you wherever you are in the distribution chain. From building and equipping a new facility to optimizing its ongoing operation, we have the solutions and knowledge to keep things moving.

ASSA ABLOY, Besam, Crawford, Megadoor and Albany, as words and logotypes, are examples of trademarks owned by ASSA ABLOY Entrance Systems or companies within the ASSA ABLOY Group.

Every entrance, every aspect

Pedestrian doors

1 Besam Sliding Door Operator
Sleek and quiet, this modular sliding door operator with Besam TightSeal combines intelligent traffic optimization with superior energy savings.

Control panel

2 Crawford Control Panel
Self-explanatory and easy to operate, this innovative all-in-one control system provides direct control of the dock leveller, door and dock shelter.

High-performance doors

3 Albany Internal High-Performance Door
This high-performance door has a modern design with aluminum side frames and offers customizable features such as automatic door opening.

4 Albany Rigid & Insulated High-Performance Door
This rigid, high-performance roll door is suitable for external and internal applications where optimal insulation and energy efficiency are needed.

5 Albany Rigid High-Performance Door
This rigid, high-performance roll door is suitable for external and internal applications where access control and high security are mandatory.

6 Albany Internal/External High-Performance Door
Featuring an economical design for larger door openings, this manually operated door is has knockout capabilities to reduce impact cost.

Industrial doors

7 Crawford Overhead Sectional Door
This robust and well-insulated overhead sectional door slides up under the roof when opened, saving space in cold storage areas with limited headroom.

8 Crawford Dock Door
Designed for dry areas with ample headroom, this overhead sectional door rises vertically when opened and features a unique and simple design.

Dock levellers

9 Crawford Drawbridges
Crawford Drawbridges are the best flexible solution for open ramps and for providing service to vehicles.

10 Crawford Combidock
Serving trucks or vans at the turn of a switch, the Combidock eliminates the need for different ramp heights and thereby reduces building cost.

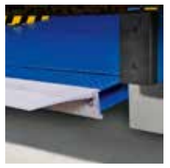

11 Crawford Swingdock
The easy-to-operate Swingdock, whose swing lip bridges the gap between the ramp and the vehicle bed, is a standard in industry applications.

12 Crawford Minidock
Developed for fleet operators whose vehicles have a standard bed height, the economical Minidock is a manually operated dock leveller.

13 Crawford Isodock
Insulated and hermetically sealed off below to prevent the intrusion of hot or cold air, Isodock is an energy-saving dock leveller with a telescopic lip.

14 Crawford Teledock
The universal Teledock has a unique telescopic aluminum lip that can be precisely positioned on the vehicle bed to allow full bed utilization.

15 Crawford Stepdock
Secure and energy efficient, the Stepdock allows the dock-in procedure to be completed and the shelter seal to be established before the vehicle doors are opened.

Shelters

16 Crawford Inflatable Shelter
Ideal for rough environments, this shelter is inflated around the docked vehicle for complete sealing, instead having the vehicle push up against it.

17 Crawford Curtain Dock Shelter
Attractive and corrosion-resistant, this curtain shelter has an aluminum frame and factory-made attachment holes that prevent fabric rupturing.

The roller top seal of this inflatable shelter, which is automatically activated for low or high vehicles, follows all vertical movements of the docked vehicle.

Available in many heights and widths, this curtain shelter has a self-adjusting top section that adapts to vehicle heights and vertical movements.

Loadhouses

18 Crawford Loadhouse
Comprising leveller, shelter and door, this solution for outdoor docking saves space indoors and is available in heavy-duty and light versions (depending on geographical area).

Additional items

19 Crawford Dock-IN White & Red Guide and Traffic Lights
Providing cost-effective safety around the docking bay, these energy-efficient LED lights are a better visual aid than white stripes on the asphalt.

From products to solutions

In the long term as well as the short, the right individual products can make a real difference in your operations. But when innovative products are combined, the benefits to your distribution and logistics business form a much bigger picture. A few examples can be found here.

Space savings and smooth arrivals
- Crawford Dock Door
- Crawford Loadhouse
- Crawford Curtain Dock Shelter
- Crawford Dock-IN White & Red
- Crawford Teledock

In this dry storage solution, a Crawford Dock Door acts as a gateway to the loading bay. No indoor space is wasted, thanks to a Crawford Loadhouse placed just outside.

At the vehicle interface is a durable Crawford Curtain Dock Shelter, whose self-adjusting top section adapts to the vehicles and their vertical movement during unloading.

When vehicles arrive, the LED lights of a Crawford Dock-IN package direct them safely into position. A Crawford Teledock then extends to the vehicle bed, creating a smooth passage between the leveller and bed with its uniquely flat aluminum lip.

Flexibility from sealing to unloading
- Crawford Dock Door
- Crawford Inflatable Shelter
- Crawford Combidock

This dry storage solution begins with a vertically rising Crawford Dock Door. Beyond it is a Crawford Inflatable Shelter, whose roller-design top seal is automatically activated upon the arrival of low or high vehicles. Since the shelter follows the vehicle's vertical movements, the seal remains tight during unloading.

Equal flexibility is provided by a Crawford Combidock, which allows trucks or vans to use the same ramp upon the turn of a switch. The Combidock also follows the vehicle's vertical movements and keeps the lip against the bed if the vehicle should move horizontally.

A simple standard for savings
- Crawford Minidock
- Crawford Dock Door

In this simple and economical dry storage solution where headroom is available, a Crawford Dock Door rises vertically to uncover the door opening. Vehicles arriving at the bay are served by a manually operated Crawford Minidock, which is ideal for standardized fleets whose vehicles have the same bed height. A limited free-floating function allows the platform to adapt to the vertical movement of the vehicle as it is loaded.

A cold seal below as well as above
- Crawford Overhead Sectional Door
- Crawford Inflatable Shelter
- Crawford Dock-IN White & Red
- Crawford Isodock

In this cold storage solution, an insulating Crawford Overhead Sectional Door slides up under the roof. Beyond it is a Crawford Inflatable Shelter, installed into a frame construction with energy-conserving insulated panels.

Arriving vehicles back safely into the bay with the help of the LED lights in a Crawford Dock-IN package. Instead of the vehicles pushing up against the shelter, the shelter itself inflates around them for complete sealing.

A telescopic Crawford Isodock keeps energy from being lost during loading and unloading, thanks to insulation beneath that creates a hermitic seal against the surrounding warm air.

Opening last to put energy first
- Crawford Overhead Sectional Door
- Crawford Loadhouse
- Crawford Inflatable Shelter
- Crawford Stepdock

This cold storage solution incorporates an insulating Crawford Overhead Sectional Door and a Crawford Loadhouse. The door does not open until an energy-efficient Crawford Inflatable Shelter has inflated and sealed around the docked vehicle. Only after the overhead sectional door slides up under the roof do the vehicle's rear doors open inside the shelter.

This sequence is enabled by the specially designed Crawford Stepdock leveller. Completing a sealed passage before the doors are opened protects the cold chain, increases safety and prevents the theft of goods.

When high performance is key

Fully optimizing logistics at your facility means looking beyond the places where you load and unload. High-performance doors can make a difference to your goods flow in many areas:

Facilitating indoor goods flow in the cold area
- Albany Rigid & Insulated High-Performance Door

Ideal for separating cold areas from dry areas, an Albany Rigid & Insulated High-Performance Door allows energy-efficient movement of temperature-sensitive goods by combining rapid function with excellent thermal insulation.

Combining speed with security at the entrance
- Albany Rigid High-Performance Door

Used as an external entrance, an Albany Rigid High-Performance Door provides the right balance of high-speed operation, insulation and safety.

Supporting logistics inside and out
- Albany Internal/External High-Performance Door

With a solid basic design that can be customized as required, an Albany Internal/External High-Performance Door has a curtain of high-transparency PVC or durable RollTex Plus and can support either internal or external logistics.

The solutions shown here are just a few of many examples. For more details and further information about our products, please visit www.assaabloyentrance.com/Distribution-and-logistics

Keeping it all running smoothly

More than 50 years as a manufacturer of doors and docking solutions lay the foundation for our uniquely tailored service solutions.

Our service capabilities
ASSA ABLOY Entrance Systems is not only the world's most comprehensive supplier of entrance automation solutions, but also a single partner for every aspect of their use. Our professional technicians are trained and certified to perform any service or repair required on your door or docking system – no matter what the entrance system or brand.

With the carefully selected stock of common spare parts in our service vehicles, our technicians are able to solve most problems on their very first visit. Just a phone call or mouse click away, they can be counted on for expert advice and quick dispatch in the event of an emergency.

Preventive maintenance programs
Maintenance and service aren't about what you get. They're about what you avoid: failures, accidents, losses and unplanned interruptions. A preventive maintenance program is the key to extending the life of your equipment and avoiding problems before they occur.

Pro-Active Care programs from ASSA ABLOY Entrance Systems include planned maintenance visits according to your needs and budget. Your equipment gets the regular attention it needs, including the change of wear parts before they break.

No matter which plan you choose, we keep you up-to-date on your equipment's service level, both in written documentation and online via our ASSA ABLOY e-maintenance™.

With an eye on tomorrow's needs

ASSA ABLOY Entrance Systems is well prepared to help you meet your business challenges – both present and future.

Upgrades and modernization
Safety standards and other regulations are constantly developing, just as the requirements of your distribution business can change over time. We can help you upgrade or modernize your doors and docking systems when the need arises, often through convenient standardized packages.

Our technicians are qualified and willing to advise you. Not only can they help you ensure regulatory compliance, they can also inform you of new innovations and smart new functions. These can improve your equipment in many areas, from safety and security to automation and energy efficiency.

Lost energy is one of the key factors lying "hidden" behind the opening and closing of your doors. Anything that saves energy has a positive impact on your bottom line, as well as on the environment.

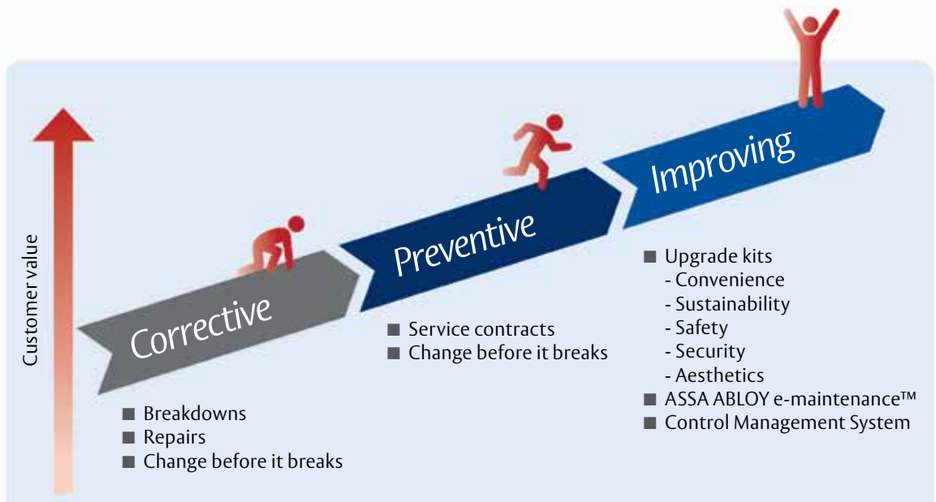

Our tight-sealing and well-insulated products save considerable energy, and our preventive maintenance can save even more. Ensuring fewer breakdowns contributes to a more stable interior climate, which benefits your goods and keeps energy losses to a minimum.

By sustaining the top performance of your doors and docking systems, you make your business more sustainable as well.

Making it all come together

Investing in and building a new distribution and logistics facility involves its own range of special challenges. With our unique capabilities, ASSA ABLOY Entrance Systems is an ideal partner for the work ahead. As elsewhere, we can help get the job done on time. And we can help ensure that the finished result pays off for many years to come.

Advantages to build on
ASSA ABLOY Entrance Systems is a one-stop shop for everything to do with entrance automation. In additional to our exceptional range of products, we have the knowledge and expertise to support you with the right recommendations.

Within our portfolio, you'll find a wide range of solutions to make your job easier and more economical. These include full units comprising all relevant components, such as our loadhouses or complete loadbays, as well as flexible docking solutions that support a broad range of vehicles.

Whatever solutions you choose, you can count on accurate and efficient delivery, thanks to a reliable supply chain with hubs throughout Europe.

Leadership on site
Meeting your budget and your customer's expectations isn't only a matter of choosing the right products. As with all aspects of distribution and logistics, it's a matter of getting the right products in the right place – at the right time.

Beyond the products themselves, ASSA ABLOY Entrance Systems provides first-rate project management at your building site.

Our dedicated project manager is accountable for the whole undertaking and is active from its first stages to the final installations. His or her responsibility covers not only regulations and safety, but also making sure that the right solution is in installed for a given application.

Satisfaction guaranteed
ASSA ABLOY Entrance Systems provides a high degree of standardization, with tight product specifications and well-established manufacturing procedures. So whether you're building for a long-term tenant or preparing a facility for short-term rentals, the solutions you choose will be suitable for everyone.

Nonetheless, our standardization is matched by flexibility. While all of our solutions are attractive and well built, tailor-made colors and other options make it easier to match the specific wishes of your customer.

What we agree on is exactly what you receive. Our size, strength, routines and professionalism are all guarantees that your terms and conditions will be fulfilled.

Complete entrance solutions

ASSA ABLOY Entrance Systems is the world's most comprehensive supplier of entrance automation solutions. We take a holistic approach to the flow of people and goods, creating solutions with the best possible balance of cost, quality and lifetime performance.

At our disposal is a strong portfolio of well-established brands. These have been the market leaders in their fields for decades, which mean they all have a strong history of proven solutions and extraordinary service expertise. Today they are gathered under a single roof, where they now form a complete offering for the front, back and interior of your building.
