We are looking to install high-quality motorized retractable roofs at two religious sites in the city. Given the nature of the project, we require a solution that balances aesthetic appeal with long-term structural integrity. Please provide a detailed quotation and technical proposal based on the following requirements:

1. Technical Specifications

We require a complete breakdown of the following:

1. Structural Design: Details on the load-bearing frame (MS/Galvanized Steel/Aluminum) and wind-load resistance.

2. Roofing Material: Specs for Polycarbonate Sheets (Multiwall/Solid), including thickness and UV protection ratings.

3. Mechanism & Hardware: Information on the track system, rollers, sealing, waterproofing or weather-stripping etc..

4. Motorization: Specs for the motor (HP/Wattage), IP rating (weatherproofing), and control system (Remote/Switch/App).

2. Commercial Quote and Warranty

Please provide an individual cost estimate and warranty period for each of the following components:

1. Polycarbonate Sheets (per sq. ft. or total)

2. Aluminum/Structural Framing

3. Motor & Automation System

4. Load Supports & Guttering System

5. Installation & Labor Charges

3. Logistics & Timeline

1. Transportation: Cost and time for dispatch to sites in Hyderabad.

2. Installation: Approximate number of days required for onsite assembly and testing.

3. Payment Terms: Please specify your preferred payment schedule (e.g., Advance, Progressive, and Final Retention).

4. Site Dimensions

For your reference, please find attached the rough sketch and approximate dimensions for both locations.

We would appreciate a response at your earliest convenience. If a site visit is required to finalize the quotation, please let me know so we can coordinate a time.

Best regards,

Mirza Alamdar

Hyderabad, India.
