Modern, attractive & automated: Revolutionising car-showroom entrances

ASSA ABLOY Entrance Systems work with specifiers, architects, interior designers, main contractors, glazing specialists and automotive retailers directly to provide seamless movements of people and vehicles.

Background

Jaguar Land Rover is the UK's largest automotive manufacturing business, built around two iconic British car brands: Land Rover, the world's leading manufacturer of premium all-wheel drive vehicles and Jaguar, one of the world's premier luxury sports.

Challenge

As part of an ambitious expansion plan to meet consumer demand, and the company commitment to deliver exceptional car buying experiences, new showrooms are being built. Dedicated architects work with each brand to create concept designs for every showroom, meeting brand guidelines and delivering luxury spaces.

Requirements

- Minimise avoidable energy loss through open doors.
- Ensure stable working temperatures, in all customer facing zones, irrespective of outside weather conditions.
- Provide a consistent flow for customers.
- Maximise glazing effect across building facade to ensure visually appealing aesthetic.

Solution

Working with appointed Architects and Jaguar Land Rover's Global Specification and design, to deliver key strategic goals for their franchisees, including;

- Albany high-performance high speed doors, in external and internal openings.
- Besam automatic pedestrian doors for main pedestrian entrances.
- Crawford industrial doors for working entrances.
- ASSA ABLOY Security & Fire rated doors and shutters.

Result

Automatic pedestrian, industrial and high-performance door solutions from ASSA ABLOY Entrance Systems provide high-quality automated entrances for access to sales, office and service bay spaces. Installation and on-site management is co-ordinated through a single point of contact, making site operations efficient and coherent. Comprehensive specification suites are available to suit any building footprint.
