

Weleda, Schwäbisch Gmünd — New doors installation

Albany RR300 Plus – Airtight Doors Guarantee Absolute Cleanliness at Weleda

Weleda manufactures and produces anthroposophic medicine and natural products. A high amount of importance, therefore, was placed on the effective confrontation of the central problem of the cosmetics and pharmaceutical industry: the definitive maintanence of stable temperatures and of air purity in research and production areas.

The decision to install high-speed doors from ASSA ABLOY Entrance Systems was met with enthusiastic approval. The Albany RR300 Plus from ASSA ABLOY Entrance Systems provides an air-lock solution with its rapid opening and closing times, minimizing air exchange between various work areas, maintaining air purity as well as individual desired temperatures, and effectively and permanently preventing the intrusion of dirt and dust particles. Production at the sensitive research and work zones at Weleda, therefore, would be optimally supported.
The modular design of the Albany RR300 Plus can be customized to the customer's specifications, a feature proving especially viable for Weleda's purposes. Rapid opening and closing speeds minimize energy loss and provide long term cost-efficience. Moreover, the door offers safety features which protect people as well as goods.

Weleda began in 1921 as a pharmaceutical institute for clinical medicine with its own medicinal plants. Today, Weleda is one of the leading producers of holistic body care and anthroposophic medicines. 630 employees work at Weleda AG in Schwäbisch Gmünd which has been consistently recognized as a top employer of the middle class.

You would like to know more about our high speed doors? Contact us personally by telephone or simply send us your request by email or fax. We are here for you!
