General conditions of Aircraft Hangar Door (VL 3190)

1. Continuous uninterrupted access to any single door section or as agreed separately.

2. A clear floor area of 4 metres each side of the door leaf must be available during the curtain fitting process. The floor should be finished or if this is not possible, adequate temporary protection be made available to prevent damage to the curtain material.

3. 400 volt / 50Hz 3 phase isolator to be fitted to within 1 metre of the door main control panel. If not available at the start of installation, a temporary supply is acceptable. Any return visits to commission the doors due to permanent power not being available will be charged as appropriate.

4. A suitable structure should be available together with mullion floor pits (multiple section doors only) designed in accordance with final approval drawings issued by ASSAABLOY. Tolerances/deflections of the support structure to be in accordance with the drawings.

5. Provision of 230 Volt power supply (by others) for hand tools.

6. A dry and secure area, not in direct sunlight, is to be provided for storage of the door components.

7. Access to site between 7 am to 6 pm six days per week. If this is not possible the installation programme may require amending.

8. Any storage costs for materials due to delays outside of Mega door's control will be charged to the main contractor.

9. The project time indicated does not take into account adverse weather conditions that may prevent safe and efficient working practices. We reserve the right to extend the period accordingly.

10. Any passes required for the project, are the responsibility of the Customer and Contractor and must be available, before commencement of the installation. Any delays caused by the non-availability of passes, will be charged accordingly.

Inclusions

1. Our proposal includes **sea freight from Sweden to NAVA SEVA Mumbai and installation of the door leaf, guide rails, weather seals, motors, control panel.** (Please refer Exclusion)

2. A pre-installation inspection will be carried out, by our Project Manager, before our installers travel to site, so as to verify that the structural steelwork and electrical installation are as per our requirements. Our Project Manager will also check that the installation equipment and facilities are ready for installers.

3. Please note that the control panels, motors and electrical wiring are in full compliance with Swedish regulations and specifications, any variations due to specific requirements for India must be notified to us at the time of ordering and may be subject to an increase in the price. Any variations notified to us, after material procurement, will be charged accordingly and may lead to production delays.

Exclusions :

1. A compliance statement, with supporting documentation, which states that the building deflections are in accordance with the criteria, as agreed between our design department and the steelwork contractor (to be done by main contractor).
2. The supporting structure required for door mounting, drill Holes on steel structure for Header assembly + Mullion Hoist + Mullion Pit Frame + Mullion Plates + Wind Brace + Mullion Support Plate with Holes + Cable Trays up to control panel and motor + Load Testing Certificate for structure is in client Scope. Structural steel supports shall be installed in accordance with tolerances shown on Mega door shop drawings. The installation will not commence until these items are fully installed and tested (by steelwork contractor). The installation of the structure must be approved by the Megadoor Project Manager.
3. Any civil work required for Structural Support to be done by civil contractor
4. A load test on all points in the door opening, as specified by our design department. A load test report is to be submitted to our Project Manager after the test is completed (to be done by main contractor).
5. Any passes required for the project, are the responsibility of the Contractor and must be available, before commencement of the installation. Any delays caused by the non-availability of passes, will be charged accordingly.
6. A 400/230 power supply (permanent or temporary) must be provided (FOC) by the main Contractor during the installation of the door for power tools and testing of the door sections during erection.
7. A safe storage / pre-assembly area for the door materials (by main contractor).
8. Any additional tests or certification, which are not within our scope of works but may be required by the Consultant or Client, these will be carried out or provided, subject to the actual requirements but will be at additional cost (by main contractor).

If you have any questions after reading this proposal, or if you need more information, please do not hesitate to contact us.

Kind Regards,
