Complete entrance solutions for Manufacturing

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in door opening solutions

ASSA ABLOY Entrance Systems offers convenient, automated door solutions for the front, back and interior of your manufacturing facility.

ASSA ABLOY, Besam, Crawford, Megadoor and Albany, as words and logotypes, are examples of trademarks owned by ASSA ABLOY Entrance Systems or companies within the ASSA ABLOY Group.

Effective solutions for a competitive advantage

As the leading supplier of automated entrance solutions and services, ASSA ABLOY Entrance Systems has a global presence and decades of unsurpassed expertise across a wide variety of applications. Our innovative, breakthrough door technology helps manufacturing customers reduce energy costs, increase security and ensure the safety of their workers and visitors. We provide peace-of-mind, allowing you to focus on increasing product output and optimizing the process efficiency.

Our expansive product range includes specialized options to solve all your entrance challenges. Our doors separate environments throughout a facility. They can minimize contamination risks in cleanroom environments; maintain temperatures and safeguard food products in cold storage areas; and protect workers and equipment in busy, high traffic areas. Plus, our expert technicians can help you maintain and modernize all of the automated entrances throughout your facility.

Increase convenience and cut energy costs

We understand the challenges of operating a manufacturing facility. Automated entrances allow for the safe and effortless flow of vehicles, goods and people. Our products feature unique designs and technology to reduce heat gain and loss, and uncontrolled air movement, throughout the building. We can help you create a more efficient building and reduce excessive energy consumption.

Our solutions include:

- Doors for the smooth flow of people
- Commercial doors, dock levellers and dock shelters
- High-performance doors with fast opening and closing speeds

Major benefits:

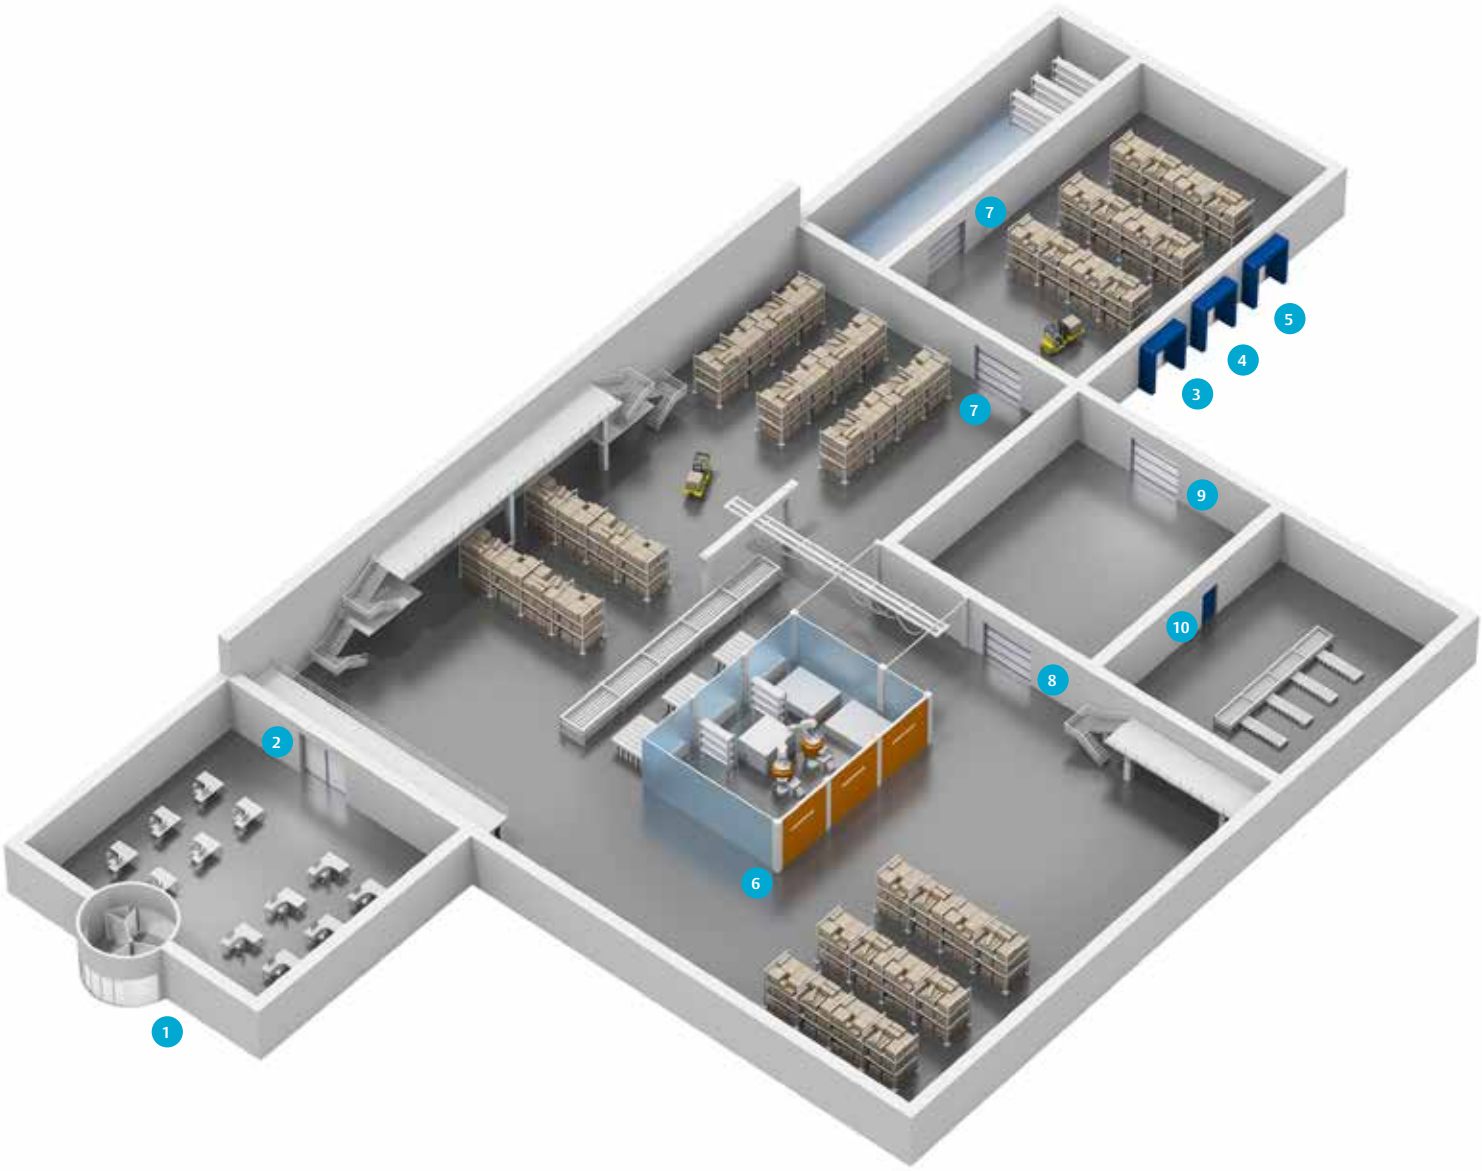

- Tight-sealing, reduced air infiltration and insulation options for lower energy costs
- Hands-free access and access controlled entry
- Controlled environments that minimize contamination risks
- Controlled temperatures and reduced ice buildup in cold storage areas
- Prevention against machine downtime and worker injury
- Fast openings and a smooth flow of traffic and goods

An ideal solution for every doorway

Cost reduction. Convenience. Security. Our solutions help control energy costs and provide smooth, safe and easy access for personnel, forklift traffic and all materials and goods.

Optimize efficiency for business processes

The layout of a manufacturing facility is often very complex. One incredibly large building is broken down into a series of offices, storage areas and a variety of different workspaces for specific processes. Each unique area has special conditions and needs. Our automated doors give you the ability to properly accommodate all areas of your facility.

Automatic doors

1 Main entrance to office
Besam revolving doors significantly reduce energy losses and eliminate drafts.

2 From office to warehouse
Besam double swing door systems with access control offer significant noise reduction between the manufacturing floor and office space.

Industrial doors

3 Exterior entrances
Crawford overhead sectional doors provide access control for large openings with strong, durable, low maintenance and energy efficient options designed specifically for commercial applications.

Loading dock equipment

4 Convenient loading of goods
Reliable, easy-to-operate dock levelers provide smooth transitions and improve productivity.

5 Incoming and outgoing goods
Crawford dock shelters improve energy efficiency and working conditions, sealing off the vehicle during the loading and unloading process to provide weather and draught protection.

High-performance doors

6 Automated processes
Albany machine protection doors provide a safe barrier between worker and machine, prevent worker injury and prevent machine downtime.

7 Interior high-speed doors
are ideal for frequent opening while separating critical interior areas. Albany Rapid Roll interior doors allows for area climate-control while automation helps to prevent the spread of germs or fumes throughout a factory.

8 Cleanroom areas
Albany cleanroom doors regulate airflow, minimize contamination and provide personnel access control.

Albany High-speed interior doors
suit many different applications. With fast opening and closing speed, Albany high-speed interior doors improve your operational efficiency and help you save energy.

9 High-speed exterior entrances
Albany exterior high-speed doors feature incredibly fast speeds to significantly reduce energy losses and reduce operator waiting time.

10 Food processing areas
Albany high-speed doors for food manufacturing help reduce ice buildup in humid environments and help lower energy costs.

Improving your manufacturing business

ASSA ALOY Entrance Systems has a range of specialized products for a variety of manufacturing tasks. From the highly sensitive needs of cleanrooms and food processing facilities to the unique challenges facing automated processes, our automated entrance solutions will help you expedite, secure and grow your production. Our doors are designed with high quality, industry-standard materials and play host to unique technical features that both streamline and improve the movement of people, products, forklifts and vehicles.

Cleanroom Manufacturing

Pharmaceutical, electronics, semiconductor and other clean manufacturing facilities face
many challenges. ASSA ABLOY Entrance Systems designs specialized products that help you gain control over hygienic environments, minimizing the risk of contamination and safeguarding valuable products and inventory. We help you to feel confident when monitoring air change rate, particle concentration, bacterial count and room pressure. We help you create a high-performance building to meet the first-rate standards required of clean rooms.

Food & Beverage Manufacturing

Safeguarding sanitary areas and maintaining proper temperatures are two critical requirements for food manufacturers. Our doors are uniquely designed to reduce the transmission of dust and dirt, and protect products from insects or rodents. The full product line from ASSA ABLOY Entrance Systems also includes solutions to help maintain cold storage areas – with insulated panels and incredibly tight seals, products remain fresh and buildings save on energy costs.

Automotive Manufacturing

When safety, speed and process integration is the challenge, our smart machine protection doors are the solution. Automated manufacturing and assembly requires advanced technology, processes and equipment. ASSA ABLOY Entrance Systems delivers high-performance, high-speed doors that are specially suited for such demanding conditions. Fast speeds ensure short cycle times, rugged construction stands tough in harsh, industrial environments, and comprehensive safety features meet high industry standards.

Clean entrances meet high standards

Our clean room doors:

- Meet requirements for ISO 14644-1 Classes 1 through 5
- Meet requirements for Federal Cleanliness Standard Classes 1 - 100
- Meets USDA, FDA, cGMP and EMEA requirements
- Feature smooth, easy-to-clean surfaces
- Ensure quick and safe movement through air locks
- Seamlessly integrate into building structure
- Seal tightly for low air leakage and low particle emission

Hygienic solutions protect food-processing facilities

Our food doors:

- Ensure cleanliness with tight seals and high-speeds to protect sanitary areas
- Feature stainless steel components and industry-approved fabrics for wash down
- Easily break away upon accidental impact preventing downtime
- Have intuitive and automatic safety features to protect personnel
- Can be outfitted with insulation and temperature control features to maintain the cold chain

Automated doors for automated processes

- Tear-resistant, wind load-resistant fabric door that protects against direct pressure, allowing door to be installed a short distance from machines
- Rigid, aluminum door that provides the utmost protection, particularly from laser beams
- Machine integration for direct command, sensing and control of the door.

A full service partner for optimal performance

With more than half a century as the leading provider of automated door and dock solutions, ASSA ABLOY Entrance Systems delivers comprehensive services with expert technicians. Consistent assessment of your systems will help you improve energy performance, ensure safety and standards, and extend the life of your investment.

Maintenance and service aren't about what you get. They're about what you avoid: failures, losses and unplanned interruptions.

ASSA ABLOY Entrance Systems works according to your needs, with tailored solutions that ensure the function and availability of your entrances.

Proof in Action

From food processing to automotive manufacturing, cold storage to automated machinery – we have succeeded in meeting customer challenges in every industry, all around the world.

Salumificio, San Carlo, Italy

ASSA ABLOY Entrance systems provided the Crawford Isodock, an energy-saving dock leveller with a telescopic lip. This insulated and hermetically sealed solution prevents the intrusion of hot or cold air.

Urschel Laboratories, Inc., Indiana

Schering Plough, Montreal, CA

ASSA ABLOY Entrance Systems provided ten Albany RR300 doors to separate the temperature-controlled warehouse from the production department. The slim design of the Albany RR300 allows the door to be installed in tight spaces, for convenient access anywhere. The tight sealing and fast speeds helps Schering Plough lower energy costs while maintaining productivity.

Automated entrances protect against energy loss

Large, energy-hungry buildings face difficult environmental challenges. Sustainable solutions are key to improving building performance and efficiency. ASSA ABLOY Entrance Systems recognizes these challenges. We emphasize innovations in design and technology to help you meet your sustainability goals.

Our intelligent products provide a range of options to help you minimize energy loss; improve indoor air quality; increase daylight; control air circulation, including the movement of pollutants or potentially hazardous particulates; and optimize the overall energy performance of your facility.

Green design and technology

ASSA ABLOY ENTRANCE SYSTEMS
Automatically green

Entrance automation is the first step to controlling excessive energy usage. With our impressive features such as tight seals or insulation, any entrance can achieve optimal energy-performance.

- Besam automatic sliding-, swinging-, and revolving doors feature options which help reduce air infiltration. The doors can be fortified with insulated glass to further increase energy savings.
- Crawford overhead sectional doors are available with a variety of environmentally-friendly insulation options to provide an efficient barrier against heat and cold. Plus, Crawford loading docks help seal the docking unit and reduce heat exchange by as much as 80%.
- Albany high-performance doors open and close incredibly fast, and are designed with tight, double-sealed protection to limit air infiltration and control temperatures. These doors can be specialized for cold storage facilities, to include low-voltage, room-temperature airflow systems and insulated panel material.

One point of entry for all your needs

Smoothly functioning entrances are a prerequisite for businesses. To keep them functioning at optimal levels, look to ASSA ABLOY Entrance Systems to provide superior products, innovative solutions, and incomparable service for the front, back and interior of your building.

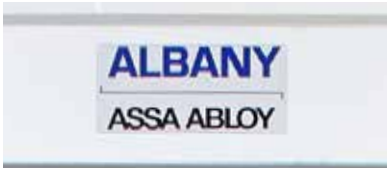

As the world's most comprehensive supplier of entrance automation products and services, we take an integrative approach to the flow of people, goods and vehicles, creating solutions with the best possible balance of cost, quality and lifetime performance.

Proven solutions and extraordinary service expertise

At our disposal is a strong portfolio of well-established brands, market leaders in their fields for decades and with a strong history of proven solutions and extraordinary service expertise. Today they are gathered under a single roof, at your disposal to meet all your requirements.

ASSA ABLOY Entrance Systems is a leading supplier of entrance automation solutions for efficient flow of goods and people. With our globally recognized product brands Besam, Crawford, Albany and Megadoor, we offer products and services dedicated to satisfying end-user needs for safe, secure, convenient and sustainable operations.
